ACKNOWLEDGEMENT

From the outset, I have to gratefulness of Allah for gift me and fortifying me to complete my last year Internship works successfully. I'm incredibly happy that, grateful to my good supervisor **Mr. Md. Mahfujur Rahman** and co-supervisor **Mr. Saif Mahmud Parvez** instructor of Department of Computer science and Engineering (CSE), Daffodil International University, Dhaka. Critical data and profound information on my boss in this field of Web Design and Development affected me to do this Internship. their magnificent and well disposed behavior, instructive bearing, significant data and keen supervision made it conceivable to complete my website composition venture furthermore, entry level position. What's more, subsequently I should offer my generous gratitude to all other employees of Computer Science and engineering department of Daffodil International University, they give significant data which is significant for endure effectively in future. I totally completed my everything courses in light of their inviting conduct and they generally give significant data which is out obviously. By then I should thanks my accommodating mates in Daffodil International University, who offer me significant guidance while completing the course work. At last, I should respect and appreciation to my folks for all their help and inspiration.

ABSTRACT

BD smart fashion is a E-commerce base website, it's a system which focus buy and sell many different product in online. This online market is so important for Bangladesh, this system for those peoples who spends less time to visit the market place. The project aimed to design a web page that enhance marketing through online advertising online buying and selling. In this system multi-tired architecture, and implementation technologies are JQUERY, BOOTSTRAP, HTML5 and CSS. It's a project with the objective to develop a basic website where a customer is provide with a shopping card application and also to know about the technologies use to develop such an application.

CHAPTER 1

Introduction

1.1 Introduction

The temporary job builds up a student's understanding. The entry level position known is to increase a few wisdom from the diverse numerous associations that will assist a great deal with making a connection among the theoretic and handy information. The Internship information is wanted to make strides understudies chipping away at record and servitor in productive science degrees in law requirement or recovers with a chance to form quickness into the reasonable utilization of scholastic information. By watching the work exercises of the individuals from a criminal legitimize office and by working under guard, understudies will be better prepared to meet their own advantage and become fit for a career.

1.2 Motivation

This was a significant adventure for me. As a CSE understudy, I need to profound information on web application Design and Development. So I have the entry level position on web application Design and Development at ZAFIDIGITAL. From this adventure I was found out numerous significant things and I was meet with numerous sorts of individuals and figured out how to deal with numerous sorts of legitimate issue, and I imagine that this will assist me with building my profession well overall and I assembled such huge numbers of instructive and authority information. I accept that the temporary position will give me the standard chance to broaden my Career.

In this adventure I was found out HTML, CSS, JavaScript, WordPress and Bootstrap which are the critical to plan a site and now I can structure a site appropriately and in present time I am learning step by step.

Because of my varsity and the organization where I was finished my entry level position, this association offers me the chance to learn part of significant things. I trust that I will manufactured myself as an expert website specialist and engineer moreover.

1.3 Internship Objectives

Form this internship my objectives are gather knowledge on web design and how to handle official problem.

Some objectives are:

- ✓ To gather more technical information's
- ✓ Learn how to maintain official environment.
- ✓ Improve my communication skill.
- ✓ To know about some framework and some popular language.
- ✓ Know some clear knowledge about web design and development.
- ✓ Increase some data about job area.
- ✓ Gain team work performance skill.

1.4 Internship Goals

My internship goal are:

- ✓ To improve proficient morals.
- ✓ Addition information about the Job division.
- ✓ For solid information about web architecture.
- ✓ Instructions to do customer work in an official way.
- ✓ How to understand the customer's necessity?
- ✓ The capacity for critical thinking.
- ✓ Functions admirably with the group.

CHAPTER 2

3.20 Project task and Activities

After join this ZAFIDIGITAL organization I have a ton of increases. It was an incredible chance to work with the ZAFIDIGITAL group, I also do some different work in this company.

- I also learn how can I work in online market place
- Video marketing
- Gain some knowledge about Android
- They also teach me how can I do work for iOS applications.
- They also give some information about Js and MySQL query.
- And from this company I learn how to maintain a customer.

3.21 Implementation and Learning process gain from this project

The languages utilized in the execution of the venture are HTML5, CSS3, BOOTSTRAP and a little bit of Js, and I want short explain about it...

HTML5

This HTML language is so popular language In this world for all kind of web base work, and day by day many developer do update this language, in this time HTML5 is running.

CSS3

The full form of CSS is “Cascading style sheet” mainly it’s use for design, color, lent, width and different type of shadow, and frame etc. so this language mainly use for designing.

and it’s also improve by mane developer day by day, the running upgrade version is CSS3.

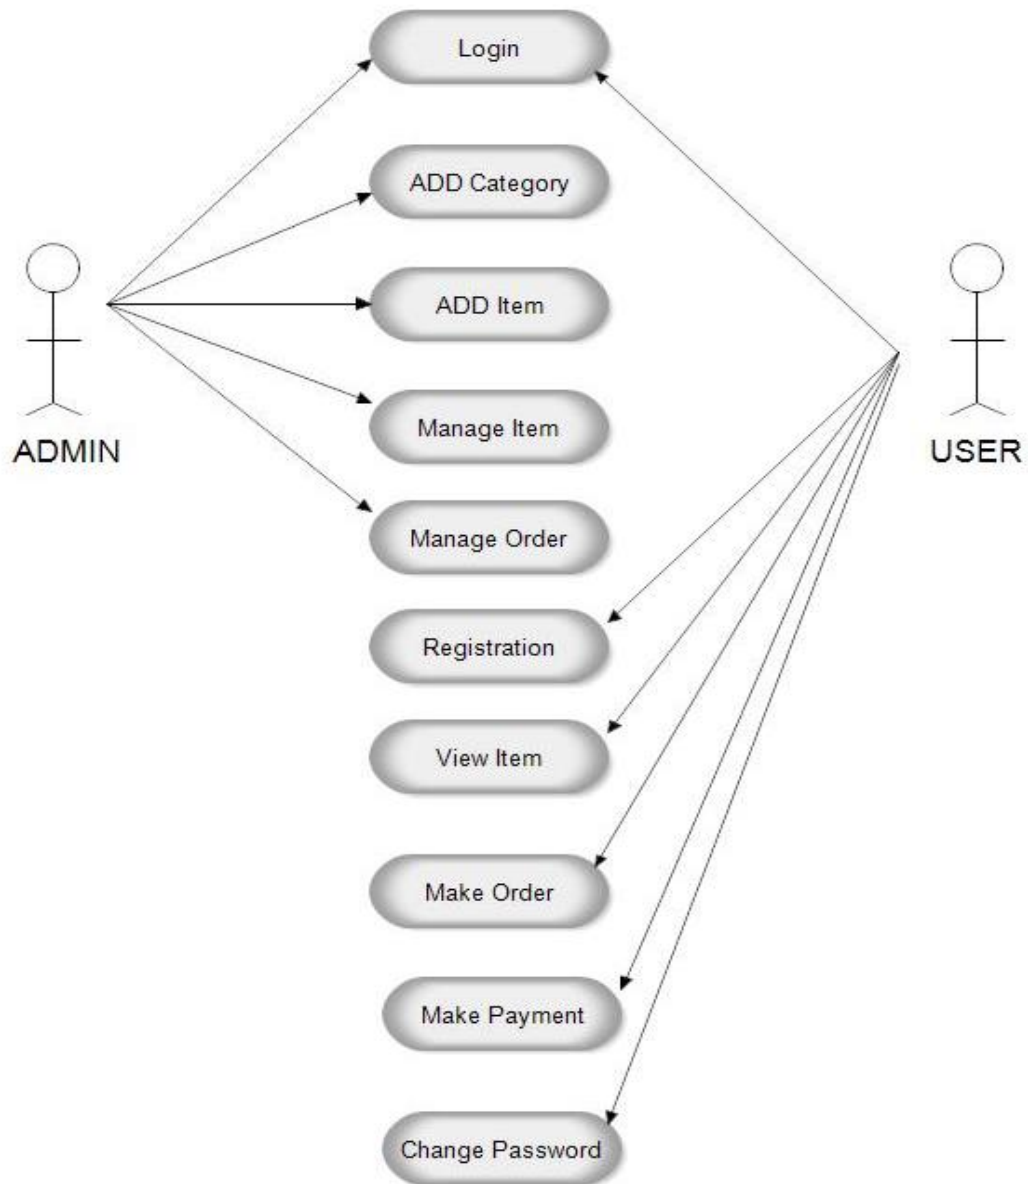

JS

Js means JavaScript which Is a high level programming language, and also well for web development because of it’s a scripting language.

BOOTSTRAP

Mainly Bootstrap is a framework, it’s so popular because it’s totally free and open source. This framework built on some popular language which are HTML,CSS and JavaScript for facilitate the development of responsive.

3.22 Use Case Diagram

3.23 Flow Chart

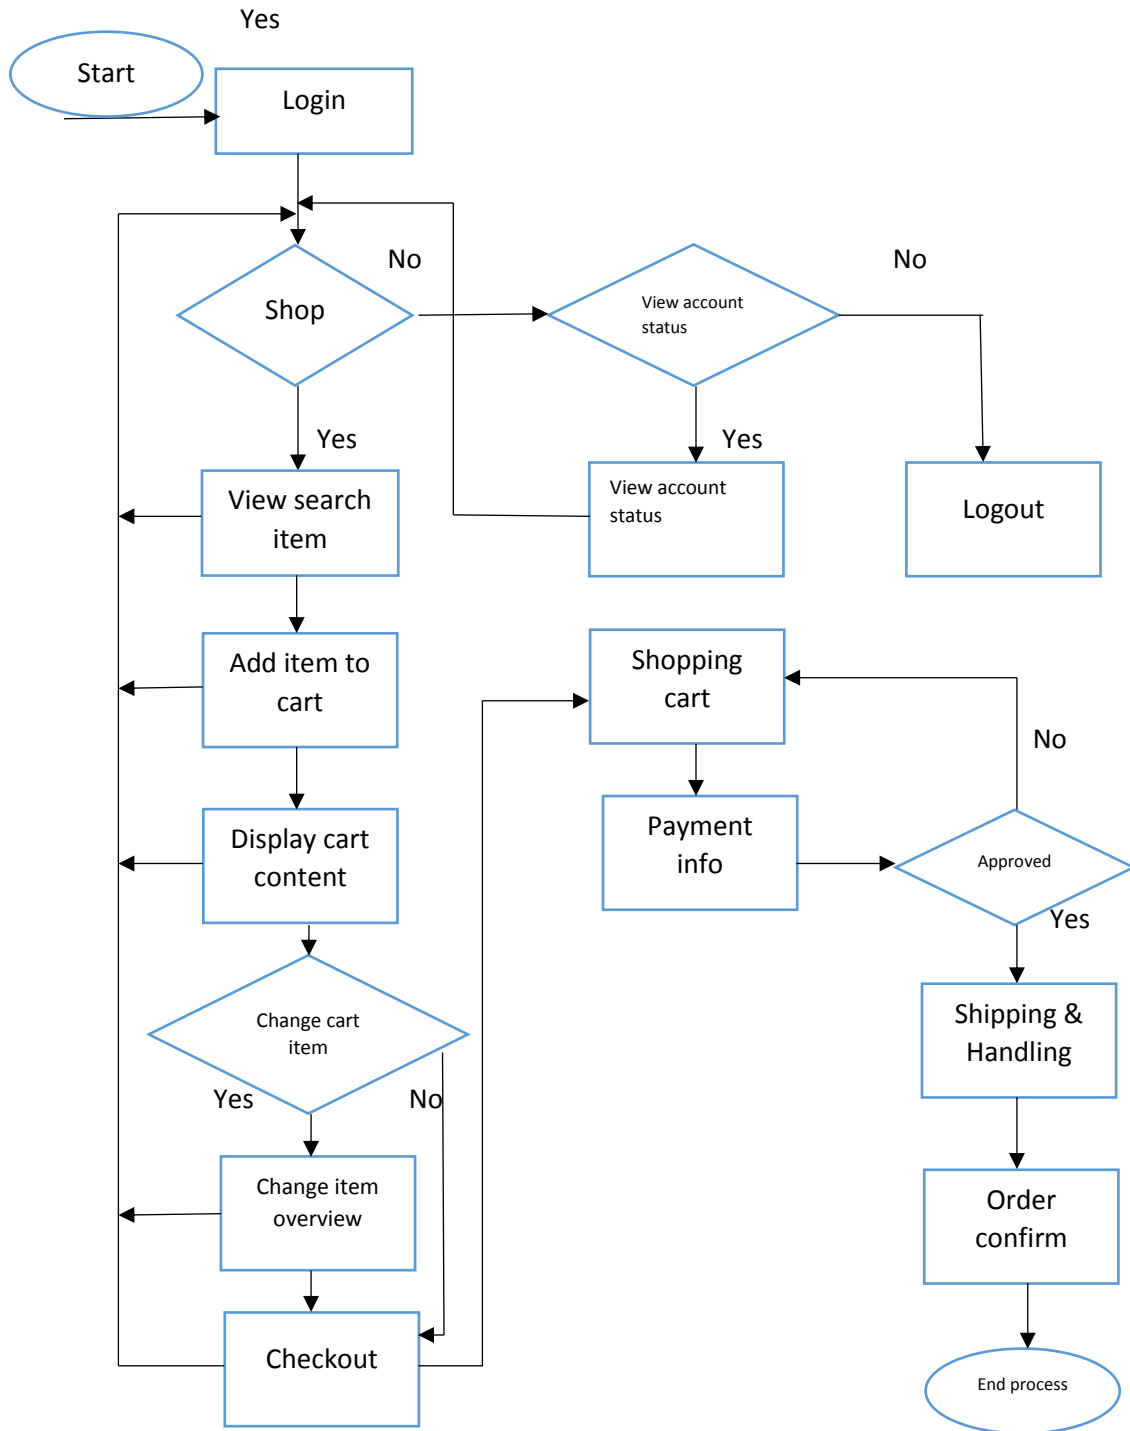

Figure: 3.20 Flow Chart Show

3.20 Challenges during Internship

Website specialist and Developer is certifiably not a straightforward task as it accompanies a variety of difficulties. Each and every the very first moment Designer and engineer needs to confront various issues and difficulties. Yet, as a creator and engineer must discover an approach to take care of that issue with a productive outcome. Else, it would not be a decent Designer and engineer Responsive and basic reasoning and speed transfers. So as to tackle this sort of issue and give incredible client experience to a customer, the web engineers must be patient and address the difficulties perseveringly. Each website specialist and designer must have the quality to take care of every issue and taking equipped for challenges.

CHAPTER 4

INTERNSHIP OUTCOMES

4.1 Learning Something

Before start internship the Jafi Digital company, actually I had no idea about web design and development. I just heard about it and some language which are HTML and CSS, but after join this internship I can learn more about this, and also learn more details about many languages and framework which are HTML,CSS, JavaScript and Bootstrap.

4.2 Internship Outcomes

- ✓ At first it taught me how can I work in a team.
- ✓ It also give me a lot of tricks about how can I develop my communication skill.
- ✓ It also taught me about official environment and office manner.
- ✓ This internship taught me how can I handle a official environment and work.
- ✓ It also taught me how can I understand a client and company customer.

CHAPTER 5

Conclusion and Future Scope

5.1 Conclusion

In a single word from this internship actually I learn about web design and gather a little bit of knowledge about web development, and learn more details different language and some popular framework. And also see a corporate life style and learn official manner, hopefully it will be a great achievement for my future career and my future job sector.

5.2 Future Scope

Finding a good job from current job sector, maybe isn't it easy and it's too much hard in this time if I have no experience in job market place, but I have a good experience from this internship and I think I will be good for me.
