ACKNOWLEDGEMENT

Firstly, we express our heartiest thanks and gratefulness to almighty God for His divine blessing makes us possible to complete the final year project/internship successfully.

We are really grateful and wish our profound our indebtedness to Mr. Md. Aynul Hasan Nahid, Lecturer, Department of CSE, Daffodil International University, Dhaka. Deep Knowledge & interest of our supervisor in our project of “*web application*” to carry out this project. Her endless patience, scholarly guidance, continual encouragement, constant and energetic supervision, constructive criticism, valuable advice, reading many inferior drafts and correcting them at all stage have made it possible to complete this project.

We would like to express our heartiest gratitude to Professor Dr. Touhid Bhuiyan Professor & Head, Department of CSE, for his kind help to finish our project and also to other faculty member and the staff of CSE department of Daffodil International University.

We would like to thank our entire course mate in Daffodil International University, who tookpart in this discuss while completing the course work.

Finally, we must acknowledge with due respect the constant support and patients of our part.

ABSTRACT

The project "Earnban" is a Bangladeshi freelance platform that we have created for people who are willing to work freelance or looking for workers. This project will play a helpful role in reducing the unemployment rate in our country. It is growing anxiously day by day and there is no freelance platform like this. So, we try to create a website for people who are looking for freelance work. In our project, people will have the opportunity to do their skill development. After finishing this project we tested the way we know as much as possible and it works successfully.

CHAPTER 1

INTRODUCTION

1.1 Introduction

Our country Bangladesh is one of the excessively populated nations in the world. The amount or quantity of entrepreneurs isn't so high to make new job opportunities for large population in Bangladesh. A group of people from this population is working as freelancers nationally and internationally. A freelancer can work from his/her home in his/her convenient time on his/her choice. And freelancers are not limited to 9 am to 5 pm office hours or any specific time, a specific organization, stable working load, and fixed income. In sum up, we can say that freelancers are not limited to work for any organization and to work for a fixed time and region. The freelancing service is growing up in Bangladesh in last decades. This project is made for those Bangladeshi people who actually wants to earn money from home very easily where is no payment difficulties. There will be 3 types of people (Buyer, Seller and normal guest user) in this website. A guest user can only show all of the features but can't take any services. But a Seller and Buyer only can take services in this site.

1.2 Motivation

We made this web project names "EarnBan". It's a peer to peer service website. By which a buyer type user can take services through this website and a seller type user can do jobs of a buyer. Using this site a user can do all types of soft skill related work that means digital work. Like website Design and Development, Ecommerce Marketing, SEO, Graphic Design and Motion Graphics, App development etc all types of digital tasks.

1.3 Objectives

- Hire a person as worker
- Post a job as needed
- Consume the time to looking for worker
- Avoid transaction hassles

1.4 Expected outcome

1. Job finder can be able to find out expected job with his/her interested category
2. Those who post jobs can find specialized people.
3. Working time frame will be consumed
4. Transaction hassle is no more. Because Bangladeshi Payment method is available.
5. Experts can do the job as they want
6. Job Posters can be able to see the job progress

1.5 Report Layout

Chapter 1: Introduction

Motivation, objectives, and the expected outcome is described in this chapter.

Chapter 2: Background

Here, Background situation, previously done related work is showed, comparing with previously done working is happened.

Chapter 3: Requirement Specification

In this chapter Business Process Model, requirement collection and its analysis, Use case mode is displayer.

Chapter 4: Design Specification

In this chapter discussed about design like front-end design, how view will displayed to user category wise.

Chapter 5: Testing the full website

How to use this website from Buyer and Seller type user is discussed in this chapter

Chapter 6: Conclusion and Future Scope

Here the conclusion and the scope of future are discussed.

CHAPTER 2

BACKGROUND

2.1 INTRODUCTION

At first we need to research related project before starting a project, because researching the background is the most important matter for a project indeed. We can get more and more information about the previous related work and their limitation. Whom we can work on their limitations and remove these and improve or develop the system and build our system more strongly. As a result that we may have a short chance to improve our existing features and add a new one. Due to these reasons the background of a project plays an important role in a web development project indeed.

2.2 RELATED WORKS

There are some sites that provide freelancing in our country. Some have limitations, and some have a little feature. Some freelancer's platforms are:

1. Shadhinkaj.com [1]
2. Truelancer.com [2]

Problems:

1. Excessive extra charge
2. Cannot post directly
3. Cannot communicate with hired
4. Money gateway complications

Actually, there are no website in which is specific for Bangladeshi people and where Bangladeshi payment method is available.

2.3 COMPARATIVE STUDIES

Our project “EarnBan” has many features. Some features are similar to previous work and some are different from the mentioned applications. However, we have to develop something which is new because of all existing work,

- People can post job category wise.
- Can receive their suitable job.
- Can chat with both of them
- Users can check their progress.

2.4 SCOPE OF PROBLEMS

We faced a lot of struggle to complete this project. We have just tried to solve those problems. We needed to know about our market demand, money gateway problem, in a work.

2.5 Challenges

We have faced some challenges are mentioned below:

- Smart design with responsiveness.
- Develop a user friendly UI.
- Handel two parts, Seller (worker) and (Buyer) job poster in a single website.
- Bangladeshi Payment Gateway Integration

CHAPTER 3

REQUIREMENT SPECIFICATION

3.1 User of Website

3.1.1 Seller

The seller can see the homepage, browse job, job category, and contact form of the website. If a seller wants, he can take a course from the get tutorial option for his skill development. A seller must first login via email and password through registration. The seller will be able to search for jobs, give job bids, and submit orders. If the seller is facing any problem, he will be able to contact support. If the seller wants, he can withdraw the payment.

3.1.2 Buyer

Customers will be able to view the homepage of the website, view job categories, and browse jobs, post jobs. If a seller bids in the customer's post, the customer can see it and the customer can order from the seller. If the customer wants, he can text the seller. The buyer must login through registration.

3.1.3 Admin

The admin manages the full program. The admin must login via email and password, then after logging in the admin will have access to the dashboard. The admin can control the category list, control the profit percentage, control the user information, control the job list, control the order list, and control the withdrawal payment. Admin can see the message.

3.2 Requirement Collection and Analysis

Requirement Collection is an essential piece of a venture. It's the most beginning work for any task. We need to know a Clear view necessity to draw a graphical perspective on the undertaking. It is hard to build up a venture without creating a graphical view. Prerequisite assortment is an exceptionally huge test for a venture in light of the fact that the necessity isn't accessible all over. Once in a while there is a high opportunity to get off-base and bogus data for our venture work center point, we begin to examine something before compose code. Our wellspring of data is numerous destinations and books. We set up certain techniques and models to acknowledge and address the framework. Prior to doing a fruitful task, we need to gather necessities, and some friendly examination then we need to break down the gathered prerequisite and start the race for the venture.

3.3 Business Process Modeling

This interaction is a significant piece of our venture and we show all our movement through this cycle. It is an insightful portrayal of a venture. In this cycle, we make a work process of a framework. Give all subtleties and make an undertaking simpler and reasonable.

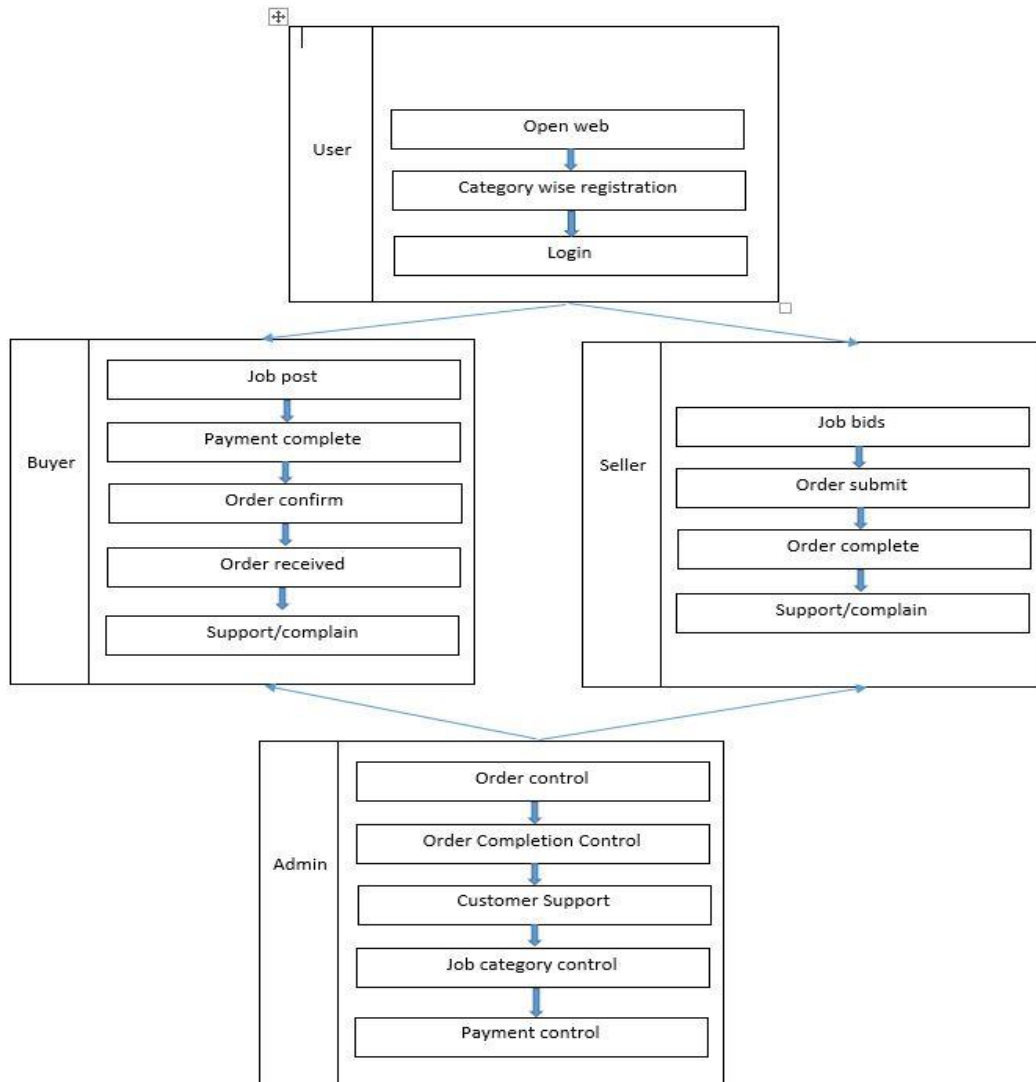

Figure 3.3.1: Business process model

3.4 Use Case Modeling and Description

Before making an undertaking, we need to make a utilization case outline. For this situation, we show our undertaking usefulness. We likewise examined our venture framework, client, and site.

We have made one use case model sort. For acknowledging various kinds of jobs utilized in the framework and can see their follows up on our framework.

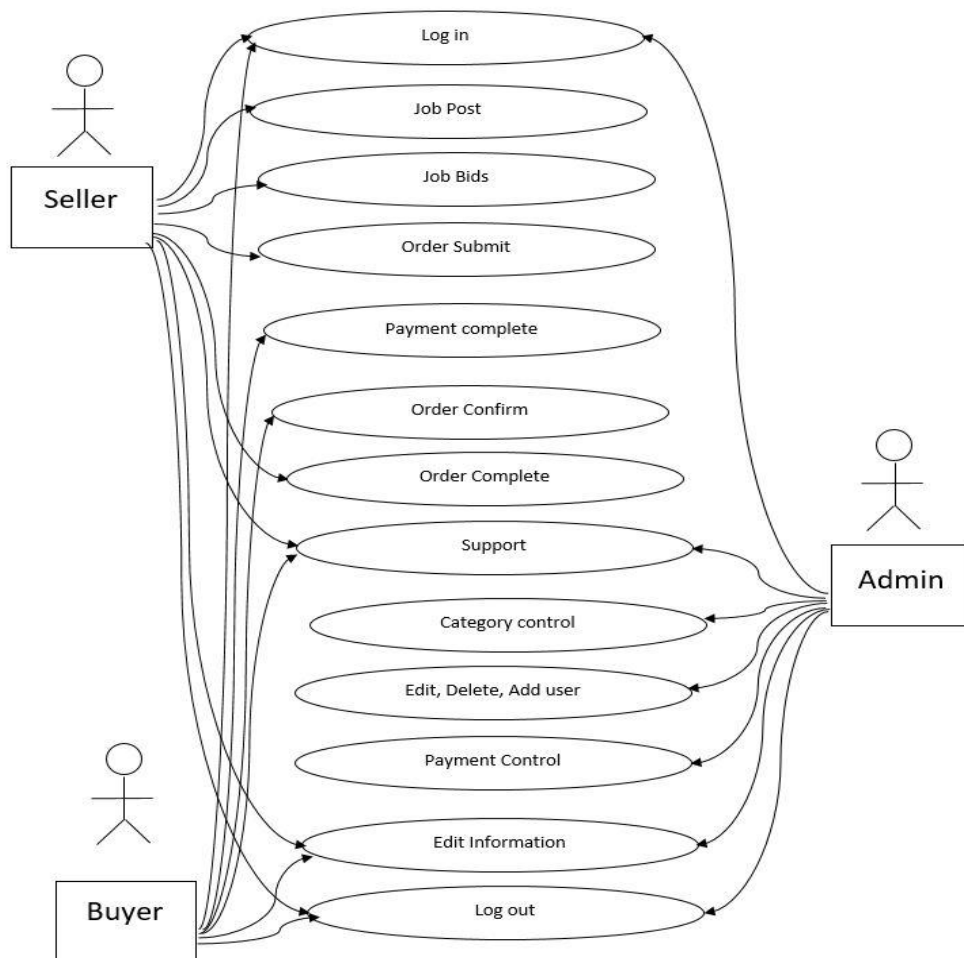

Figure 3.4.1: Use case model

3.5 Flow Chart

This flow chart help us to create specified diagram of user, system and website.

3.5.1 Seller flow chart

In this case we discuss about seller functionality. The seller must login through registration.

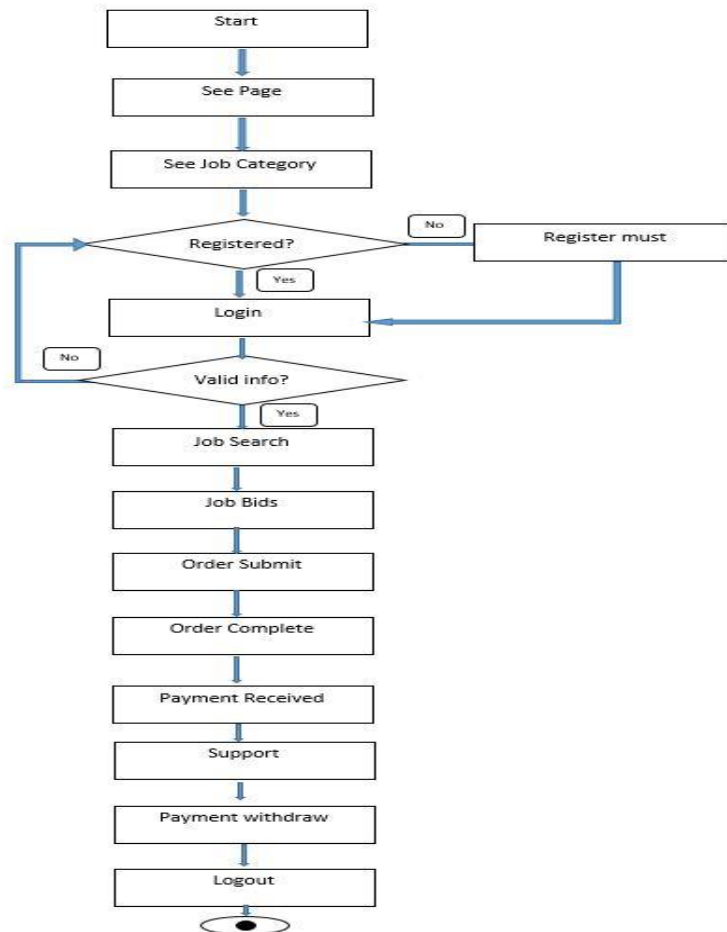

Figure 3.5.1.1: Seller flow chart

3.5.2 Buyer flow chart

In this case we discuss about Buyer functionality. The buyer must login through registration.

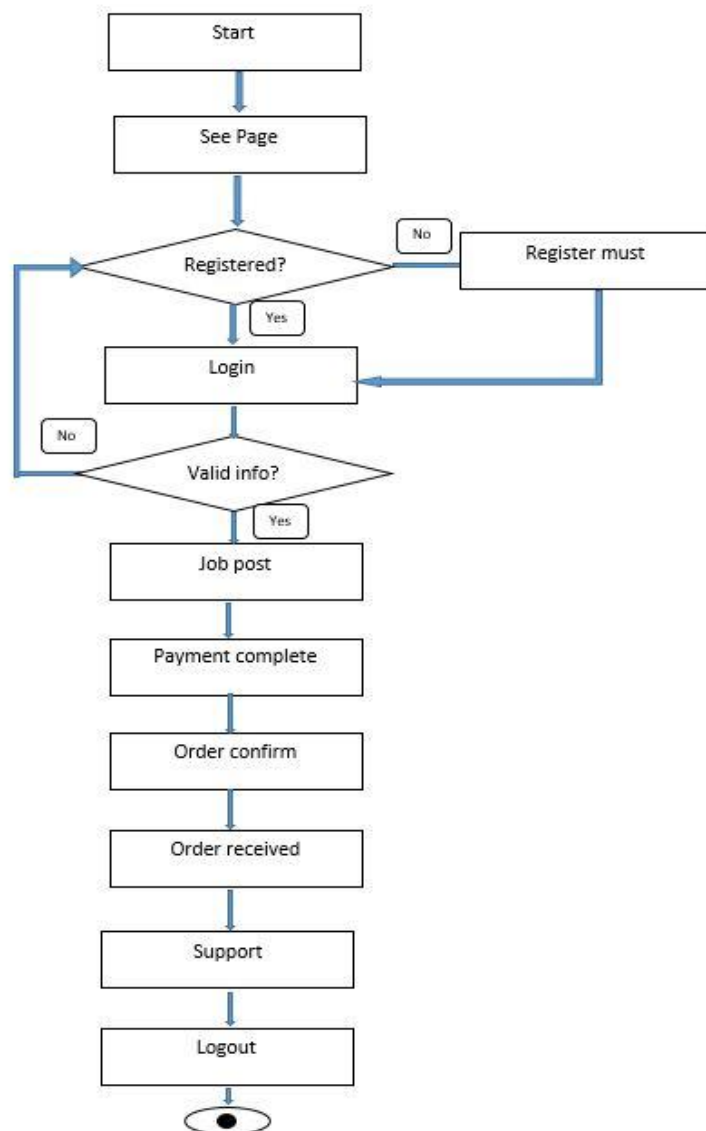

Figure 3.5.2.1: Buyer flow chart

3.5.3 Admin flow chart

In this case we discuss about admin functionality. The admin must login via email and password, then after logging in the admin will have access to the dashboard

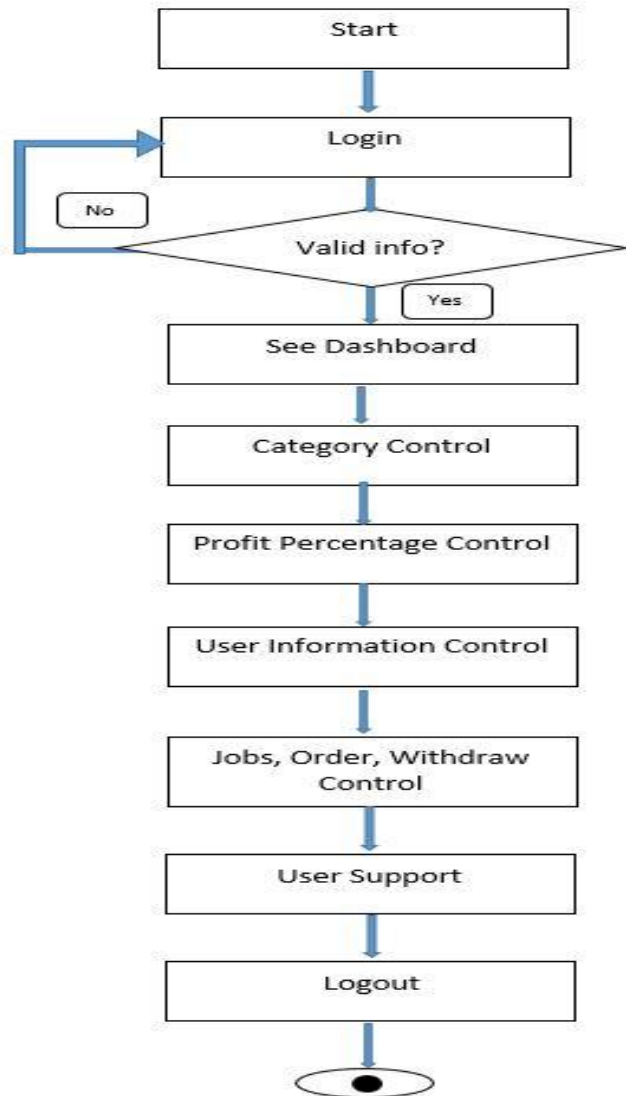

Figure 3.5.3.1: Admin flow chart

3.6 ER Diagram

ER diagram is an important part and before starting a project we need to create an ER diagram. It helps to describe a structure of database and relationship of entity.

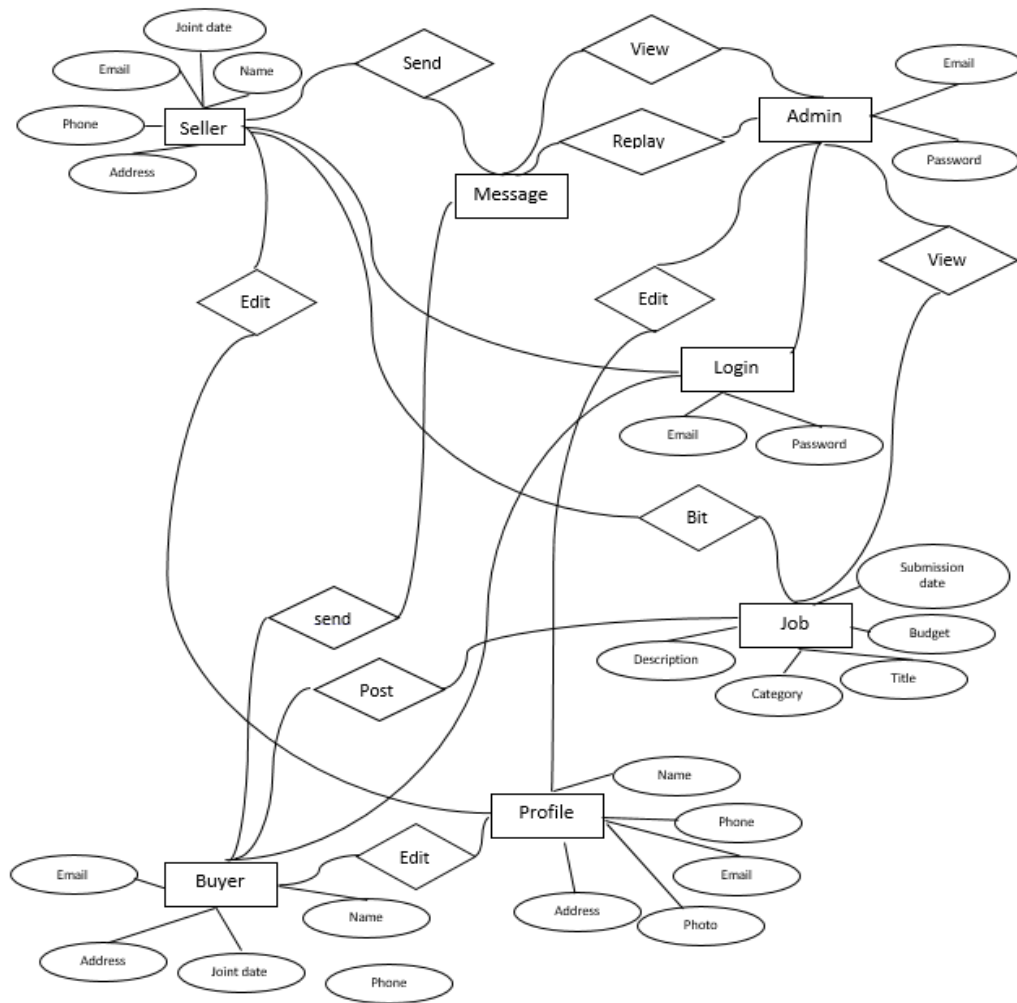

Figure 3.6.1: ER Diagram

3.7 DESIGN REQUIREMENTS

3.7.1 There are two types of users, sellers and buyers.

3.7.2 The seller will be the one who will provide the service and will be paid according to the type and duration of work

3.7.3 The buyer is the one who will hire the sellers and pay when the work is completed.

3.7.4 The buyer will pay as soon as the agreement is reached and the seller will start work as soon as the payment is deposited in the secure vault of the payment platform.

3.7.5 Seller will receive the payment when the buyer declares the time of payment through work approval and declares it as complete.

CHAPTER 4

Design Specification

4.1 Front end design

To make the interface I mean front-end part we needed to use HTML, CSS and JS, and Bootstrap mainly

4.2 Backend Design

For the database, we used MySQL and server “Apache” and used “Laravel” for the development purpose.

4.3 Interaction Design and UX

Authentication:

- User Login (User needs to registered Gmail and password to login into this website)
- User Registration(user will register with a valid email address and password not less than 8 characters with alphanumeric combination and phone no, address)
- Login with Google (user can also log in with their Google email address)

Feed:

- Use can see all available jobs
- Buyer can a hire multiple person for a job.

Buyer Profile:

- User can see their information (Upload image)
- Pending Work
- Previous work
- Work processing status
- Available job
- Withdraw option
- Message list
- Edit Information
- Bidder's Basic info
- Bio
- Logout

Post:

- Post work requirements
- Dedicated Skill Requirement
- Budget Required

Payment:

- Gateway selection

CHAPTER 5

5.1 Registration and login

A visitor how to login into this website here will be described. 3 types of people can visit this website. Guest user who isn't registered in this website can only browse the entire website and see all the features but can't do any action.

When a guest user browses this site, they will see this website like this,

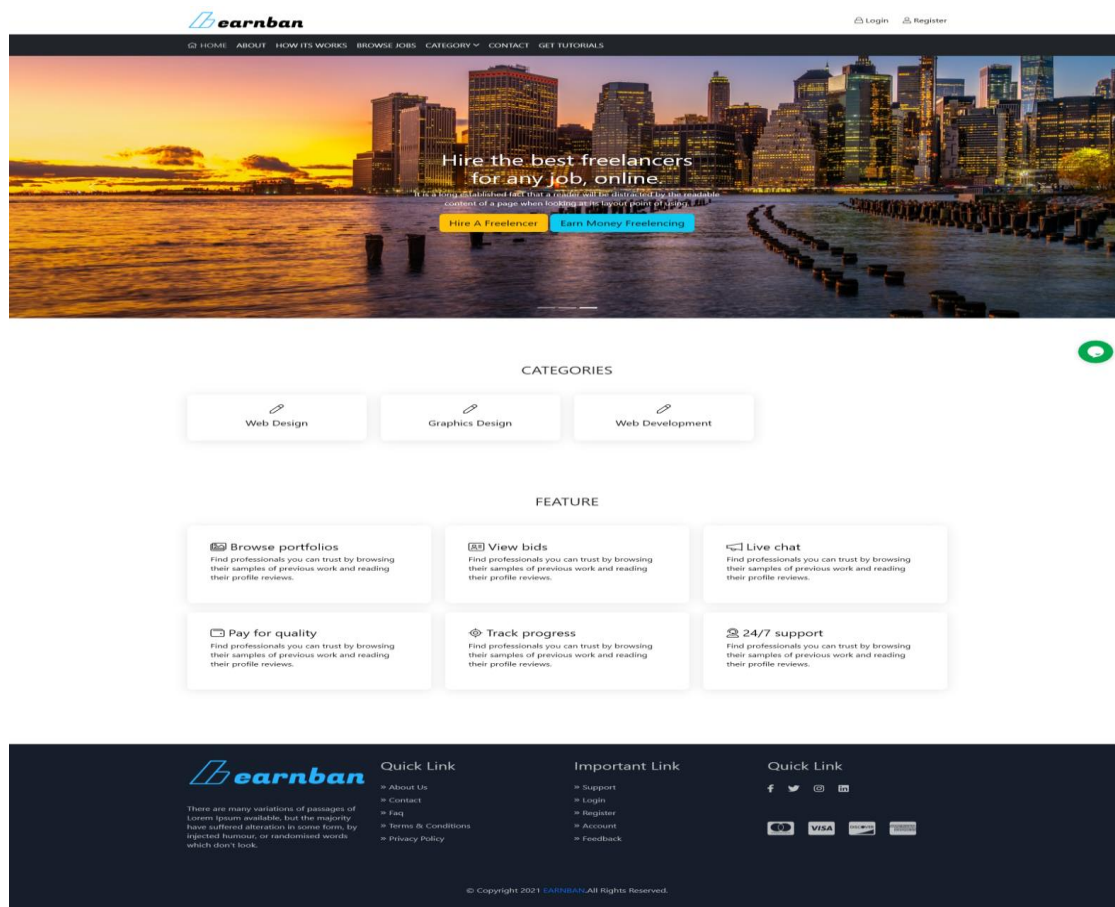

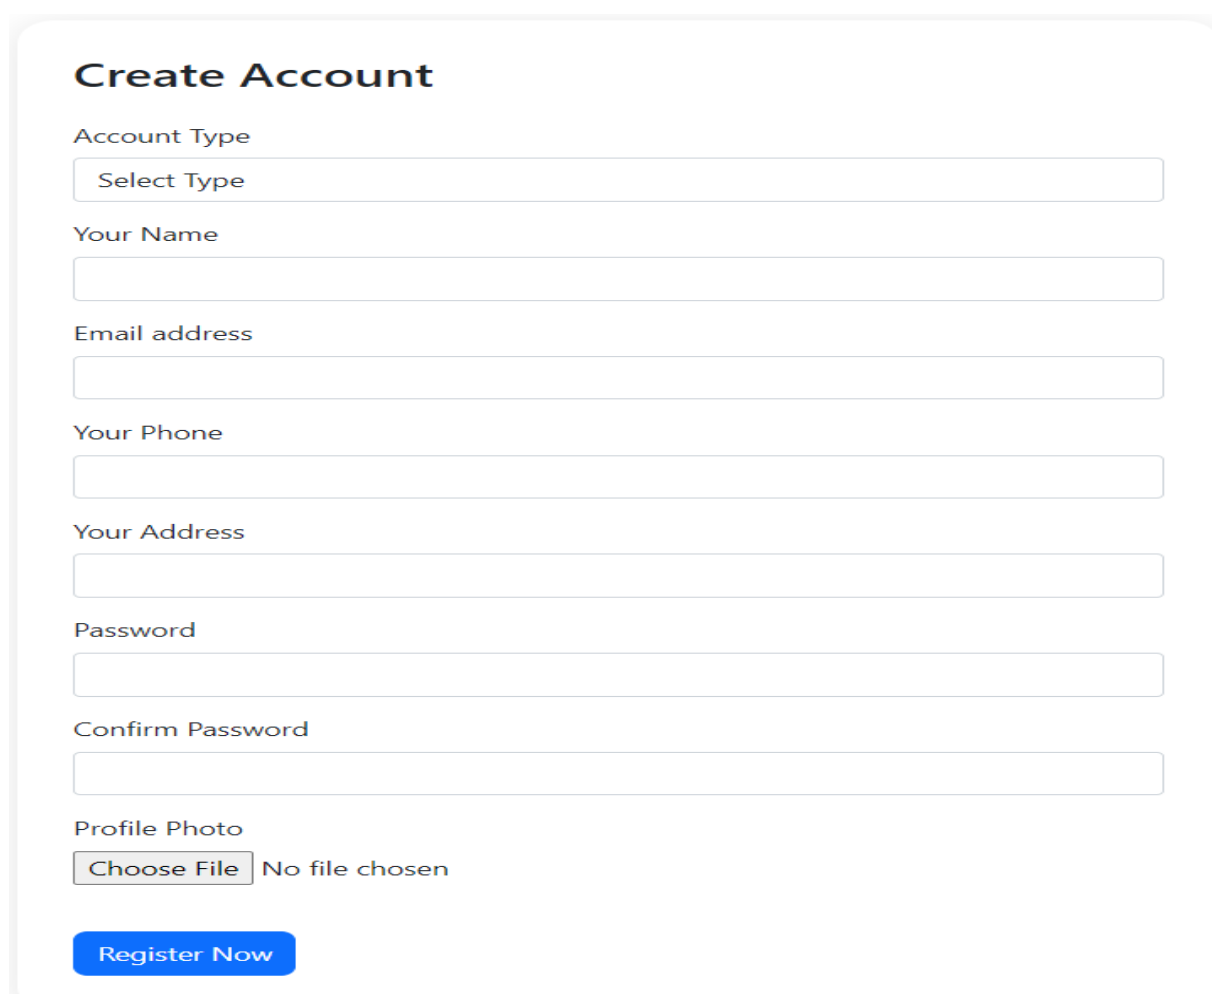

Figure 5.1.1: Home Page View

In this website a person can register him/her between 2 types. 1. Buyer (Who is a job holder) 2. Seller (Who is a worker).

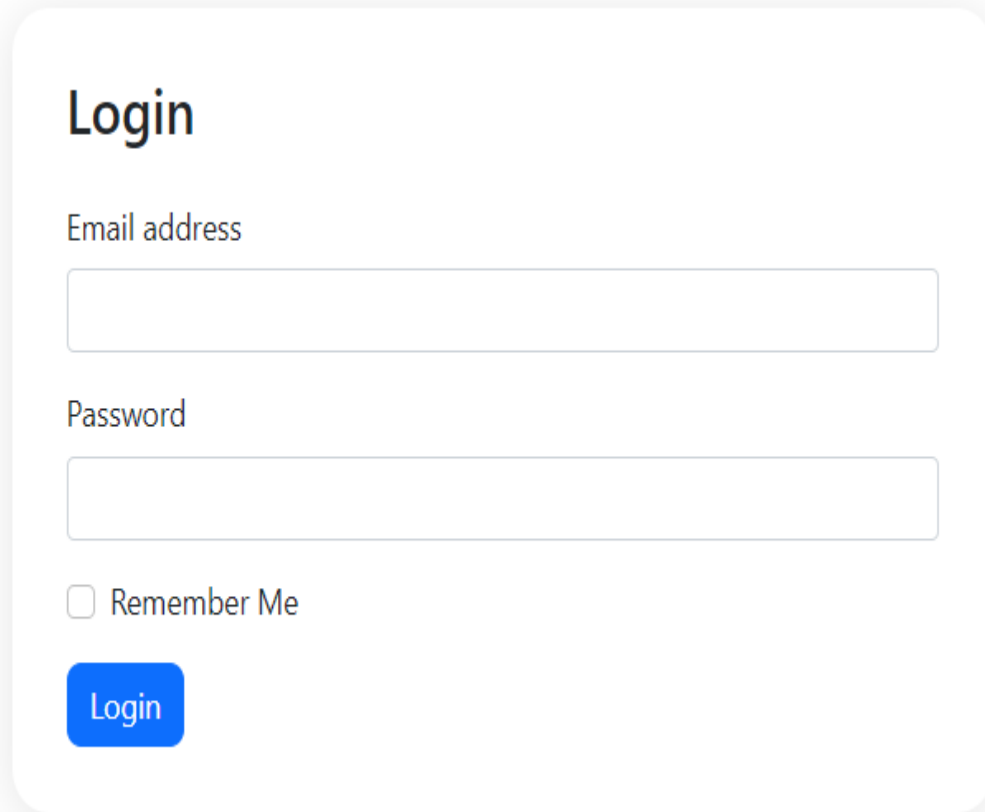

To registry in this website, need to click on “Register” option from top. Then he/she will See this of view.

The image shows a 'Create Account' registration form. It features a title 'Create Account' in bold. Below the title are several input fields: 'Account Type' with a dropdown menu showing 'Select Type'; 'Your Name', 'Email address', 'Your Phone', 'Your Address', 'Password', and 'Confirm Password', each with a corresponding text input box. At the bottom, there is a 'Profile Photo' section with a 'Choose File' button and the text 'No file chosen'. A blue 'Register Now' button is positioned at the very bottom of the form.

Figure 5.1.2 : Registration From

After registration need to login by click on “Login” button from top

A login form with a white background and rounded corners. At the top, the word "Login" is written in a large, bold, black font. Below it, the text "Email address" is followed by a rectangular input field. Underneath that, the text "Password" is followed by another rectangular input field. Below the password field, there is a checkbox followed by the text "Remember Me". At the bottom left of the form, there is a blue rectangular button with the word "Login" in white text.

CHAPTER 6

CONCLUSION AND FUTURE SCOPE

6.1 Discussion and Conclusion

This project is for Bangladeshis who are looking for freelance work. Here people will have the opportunity to develop their skills by learning to work and will be able to earn money by learning to work. Moreover, those who want to work can get it done at a very low cost. More new updates and feature updates will follow.

6.2 Scope for Further Developments

Advancement of an undertaking can't end. We additionally have some arrangement in not so distant future. Those are given bellow:

- Our money will remain in our country
- The transaction method will be easier
- It will be easy to understand the work by massaging
- There will be opportunities for skill development
- There will be support option in case of any problem
- Live video chat will come in the future
- The rating option will be added in the future, through which the work efficiency of a freelancer can be judged.

APPENDIX

Appendix A: Project Reflection

We started our excursion to fabricate this task from Fall 2020. For better agreement, we did a ton of exploration on Bangladeshi independent stage and commercial center. We gathered data from numerous sites. We've attempted to assemble an easy to use independent uncommonly for understudies. It can likewise be a correspondence medium between work searcher and laborer searcher. I trust this application will be extremely useful for the clients. We will continue overhauling our framework adding new offices and highlights.
