BANGLADESH 05/12/2021

APPROVAL

This Project/internship titled “**PhotoOptica**” submitted by Md. Sufiyeen and Md. Mostafijur Rahman to the Department of Computer Science and Engineering, Daffodil International University has been accepted as satisfactory for the partial fulfillment of the requirements for the degree of B.Sc. in Computer Science and Engineering and approved as to its style and contents. The presentation has been held on 05-12-2021.

BOARD OF EXAMINERS

Dr. Md. Ismail Jabiullah

Professor

Department of Computer Science and Engineering
Faculty of Science & Information Technology
Daffodil International University

Chairman

Nazmun Nessa Moon (NNM)

Assistant Professor

Department of Computer Science and Engineering

ACKNOWLEDGEMENT

First, we express our heartiest thanks and gratefulness to almighty God for His divine blessing makes us possible to complete the final year project successfully.

We really grateful and wish our profound our indebtedness to **Mr. Riazur Rahman** Senior Lecturer, Department of CSE Daffodil International University and Co-Supervisor **Md. Zahid Hasan**, Assistant Professor, Department of CSE Daffodil International University, Dhaka. Deep Knowledge & keen interest of our supervisor in the field of “Web Development” to carry out this project. His endless patience, scholarly guidance, continual encouragement, constant and energetic supervision, constructive criticism, valuable advice, reading many inferior drafts and correcting them at all stage have made it possible to complete this project.

We would like to express our heartiest gratitude to Prof. **Dr. Touhid Bhuiyan**, Head, Department of CSE, for his kind help to finish our project and also to the other faculty members and the staffs of CSE department of Daffodil International University.

We would like to thank our whole route buddies in Daffodil International University, who took component on this talk while completing the course work.

Finally, we should acknowledgement with due admire the constant help and patients of our mother and father.

ABSTRACT

PhotoOptica is a site that welcomes photographic artmen worldwide to post snapshots making use of any photographic interaction (print, photograph circulate, emulsion flow, encaustic, excessive comparison, and so forth). The winner will get the prevailing quantity announced by the challenge coordinator in real money grants, be highlighted within the Online Gallery, and be at the victor's listing. The main Prize-prevailing photograph might be published on the task subtleties after proclaimed the photograph that success the task web page. The beginning of images focused on consistent lifestyles symbolism like own family snapshots, pics of roads, cities, chateaus. Over the lengthy-haul photographers prolonged their imagination and prescient to more grumpy pictures, at last to in which photography is these days; a sweeping work of art, created by the digital camera and focal factor and turning in huge inspecting of symbolism from reality to much less unmistakable digests. PhotoOptica is a photography-based skill-share and knowledge-sharing application. Anyone can join here for any contest and win prize money. Anyone, who will want a professional photographer for their wedding ceremony or party they could hire us from here.

CHAPTER-1

INTRODUCTION

1.1 Introduction

PhotoOptica is a photography-based skill share and knowledge sharing application. Anyone can join here for any contest and winning price money. Any one, who will want a professional photographer for their wedding ceremony or party they could hire us from here. We have our special authentication system for my website. Without valid email no one can register or access to our website. Only After successfully Mail confirmation a user can use my website. Anyone can join here for any contest and winning price money. Any one, who will want a professional photographer for their wedding ceremony or party they could hire us from here. We have our special authentication system for my website. This is our logical data model for our project. Users join the photo contest, join contest and comment are related to photo contest. Here is another feature which name is contest. And contest also have some features. Those are free or paid contest, pay for access, user can download photo and also can share social media.

1.2 Motivation

PhotoOptica is a photography-primarily based skill proportion and information sharing software. Anyone can be a part of right here for any contest and winning rate money. Any one, who will want a expert photographer for their bridal ceremony or celebration they might hire us from right here. We have our special authentication system for my website. Without legitimate email no one can check in or access to our website. Only After efficiently Mail affirmation a person can use my internet site. Anyone can be part of here for any contest and triumphing rate money. Any one, who will want an expert photographer for their wedding ceremony or party they could hire us from right here.

We have our unique authentication gadget for my internet site. This is our logical records model for our project. Users be a part of the photo contest, be a part of contest and comment are associated with photo contest. Here is any other function which name is contest. And contest additionally have some functions. Those are free or paid contest, pay for get right of entry to, user can download image and can also share social media.

1.3 Objectives

- Saving your valuable time and stamina.
- Knowledge development for all photographer.
- Photographer can make money form here.
- Has a good position to be earn money?
- Help to process time prominent.
- Are helping photographer for sharing their photo.
- It has a simple way to learn.
- Easy to utilize.

1.4 Expected Outcome

The PhotoOptica saving the time and energy. To make people more attractive for their skill. Skills are very important to share everyone and can do anything right here. One of the best sections to innovate their photography. photographer will be very excited to join here. Many of people are connecting for many others and will see our contest. They will make money from here. This is one of the best ways to sharing knowledge.

These all are some expected Outcome:

- History based Contests.
- Program based Contests.
- Marketing based Contests.
- Gift base contests.
- Media based contests.
- Monthly contests.
- Highlight Contest.
- Final Year Contest.

1.5 Report Layout

Chapter 1 That phase we have got discussed incentive for our errand, following, and except normal after effect of endeavor.

Chapter 2 Approximately the status quo of our work and observe approximately others associated works, comparable examinations, the diploma of the problems and demanding situations in this phase.

Chapter 3 We have inspected in this phase about our necessities like interaction demonstrating, case use model, er diagram, and the opposite plan given.

Chapter 4 Those tasks are accepting association notion like the front end and lower back give up plan, a coordinated attempt plan and the execution essentials.

Chapter 5 In this component, we can percentage the execution of our database, front-give up plan and the test effects and reviews of the project.

Chapter 6 In this segment we will observe our choice and what will be our possible recreation plan with this task.

CHAPTER-2

BACKGROUND

2.1 Introduction

The PhotoOptica saving the time and energy. To make people more attractive for their skill. Skills are very important to share everyone and can do anything right here. One of the best sections to innovate their photography. photographer will be very excited to join here. Many of people are connecting for many others and will see our contest. They will make money from here. This is one of the best ways to sharing knowledge. Skills are very important to share everyone and can do anything right here. This is so important to all the People like to take a break from life and go for chill. I am the only one who wasn't a photographer but I am a real business man. I find this normal way to find all the matter. We are very appreciated to doing the job. Photography base skill share is a platform where we are connecting very king of photographer.

2.2 Related Works

It has some special feature where we work many of thing. We can make money form here. We are very Funny to having selfie camera. Any one can upload their photos in here. If we want, we can spend our valuable time here. We are very proud to be made this one. I an the only one to make it different. This is one of the making money sites in the world. we assure that we are giving you the price for your working. This is very beautiful to make money. In PhotoOptica there are some equal fine features that I have covered and attempt a few thrilling functions for a photographer. Some of the papers describe a few image-related ideas however now do not encompass approximately contest-associated subject matter. Be that as it may, our website online is a complete bundle. There are in like the way many ills of their destinations. By using the one's locales people are not getting their regular administrations. The modern destinations are providing just character assist. Among them, e-courier is one of the flows assists that with giving package administration essentially via using their expert. But we are imparting the maximum highly-priced features and era to the photographer that he/she needs in his career. We concept about their life also and make an environment so one can earn cash from here.

2.3 Comparative Studies

It has some special feature where we work many of thing. We can make money form here. We are very Funny to having selfie camera. Anyone can upload their photos in here. If we want, we can spend our valuable time here. We are very proud to be made this one. I an the only one to make it different. This is one of the making money sites in the world. we assure that we are giving you the price for your working. This is very beautiful to make money. In PhotoOptica there are some equal fine features that I have covered and attempt a few thrilling functions for a photographer. Some of the papers describe a few image-related ideas however now do not encompass approximately contest-associated subject matter.

2.4 Scope of the Problems

It has some unique characteristics wherein we paintings a lot of factors. We could make money from right here. We are very Funny to have a selfie digicam. Anyone can upload their pics right here. If we want, we can spend our valuable time here. We are very proud to be made this one. I am the most effective one to make it one-of-a-kind. This is one of the getting cash sites within the international. We assure you that we are providing you with the charge for your work. This is very lovely to make money. In PhotoOptica there are a few equal great functions that I actually have included and strive a few interesting features for a photographer. Some of the papers describe a few photograph-associated thoughts but now do no longer embody contest-associated difficulty count numbers.

2.5 Challenges

The PhotoOptica saving the time and strength. To make humans greater attractive for their ability. Skills are very essential to share everybody and may do something right here. One of the great sections to innovate their pictures. Photographer will be very excited to enroll in here. Many of humans are connecting for lots others and will see our contest.

- Support all the photographer

CHAPTER 3

REQUIREMENT SPECIFICATION

3.1 Business Process Modeling

This is the business modeling for our project. We like to share with you for the project modeling. Here we can see project initiation. Requirement Project for doing the project. We are apologies to give you the information actually how we make the project. The main theme of our project is how to make money fast from photography career.

Figure 3.1: Gantt chart for PhotoOptica.

3.2 Requirement Collection and Analysis

Here is some requirement, that we are collected for our project. I think you should enjoy to see the requirement of our project creation. We like to share you the importance of our project. We are very proud to be making the project. In this time, we need proper guide line for the project.

In this project we are using waterfall model. We are developing our website by water fall model.

Fig 3.2: Waterfall Model

3.3 Use case Modeling and Description

This is the use case modeling for our project. We like to share with you for the project modeling. Here we can see project initiation. Requirement Project for doing the project. We are apologies to give you the information actually how we make the project. The main theme of our project is how to make money fast from photography career.

Figure 3.3: Use case Diagram for PhotoOptica.

In this framework we need to follow the model. People are needs to join here and wanna know the main theme of our project.

We need to helping our people specially photographer to use this website for improving their skill. This is a skill share and knowledge sharing application. We are using paypal for withdraw the money. This is very good system for withdrawing the money. This is the most successful payment method in the word. In this sector we can find the international withdrawing system. This the most famous payment method in the world.

3.4 Logical Data Model

This is the logical data model. We are using logical data model for better performance in the security system. We need to know how to use this system easily.

Figure 3.4: Logical data model for PhotoOptica.

3.5 Data Flow Diagram

In this diagram we are showing you the whole think are connected one of another. Following diagram, we can see the base point of the project:

Figure 3.5: Figure DFF for PhotoOptica

3.6 Design Requirements

We have use so many requirements for our design. We are using some system for testing our project many ways. People can easily find out the main theme. We are excited to make money in the project. We are the photography lover. Make sure to improve our skill we need to practice more and more. We are using so many diagrams in the project. We are using cascades style sheet for our project to improve the design more and more beautiful. We have use so many requirements for our design. We are the use of some system for testing our task many approaches. People can easily discover the primary subject matter. We are excited to make cash inside the challenge. We are the photography lover. Make positive to enhance our ability we need to practice an increasing number of. We are the usage of such a lot of diagrams within the project. We are using cascades fashion sheet for our undertaking to enhance the design increasingly more lovely. We are using so many diagrams in the project. We are using cascades style sheet for our project to improve the design more and more beautiful. We have use so many requirements for our design. We are using so many diagrams in the project. We are using cascades style sheet for our project to improve the design more and more beautiful. We have use so many requirements for our design. We are using so many diagrams in the project. We are using cascades style sheet for our project to improve the design more and more beautiful. We have use so many requirements for our design. We are using so many diagrams in the project. We are using cascades style sheet for our project to improve the design more and more beautiful. We have use so many requirements for our design.

CHAPTER 4

DESIGN SPECIFICATION

4.1 Front-end Design

In front end design we are using cascades style sheets for improving our website more and more beautiful. In this picture you can see how beautiful look is given the cascades style sheets. This is our login page to improve the system of our project.

The image shows a web browser displaying the login page of a website called "PhotoOptica". The page has a red header bar at the top with the text "Welcome guest" on the left and social media icons (Facebook, Twitter, LinkedIn, Instagram) and "Login" and "Registration" links on the right. Below the header is a navigation menu with links: HOME, ABOUT US, GALLERY, CONTEST, BLOG, and CONTACT US. The main content area is a light gray box with the title "LOGIN" in bold. Below the title are two input fields: "Email Address *" and "Password". Below the password field is a link "Lost your password?". At the bottom of the form is a red button labeled "LOGIN". The footer is a black bar with the text "© Copyrights 2021. All rights reserved."

Figure 4.1: Front-end design of login page.

Figure 4.2: Front-end design of home page.

4.1.1 HTML

We are using html for our project. we are developing our website by html. The full meaning of html is hypertext markup language. By using html, we are very proud to be developer. We are developing our website in many ways. We are using python and many more. HTML is the way to feel free to like and share your energy in the coding section.

4.1.2 CSS

Falling cascades style sheets is a critical element for including style in Web reviews. Investigation changed into done into Cascading Style Sheets and the extraordinary methods it might be used to govern each the plan and style of the website. There turned into a few experimentations with using <div> marks and CSS to control plan, similarly to the use of tables to manipulate layout with a few C.S.S to put together such things as a course of movement and concealing.

```
.table-danger tbody+tbody{border-color:#eb8ea4}.table-hover .table-danger: hover{background-color:#f0acbd}.table-hover
.table-danger: hover>td,.table-hover .table-danger: hover>th{background-color:#f0acbd}.table-light,.table-light>th,
.table-light>td{background-color:#fafafa}.table-light th,.table-light td,.table-light thead th,
.table-light tbody+tbody{border-color:#f6f6f6}.table-hover .table-light: hover{background-color:#ededed}.table-hover
.table-light: hover>td,.table-hover .table-light: hover>th{background-color:#ededed}.table-dark,.table-dark>th,
.table-dark>td{background-color:#c6c8ca}.table-dark th,.table-dark td,.table-dark thead th,
.table-dark tbody+tbody{border-color:#95999c}.table-hover .table-dark: hover{background-color:#b9bbbe}.table-hover
.table-dark: hover>td,.table-hover .table-dark: hover>th{background-color:#b9bbbe}.table-focus,.table-focus>th,
.table-focus>td{background-color:#cbcacf}.table-focus th,.table-focus td,.table-focus thead th,
.table-focus tbody+tbody{border-color:#9e9ca6}.table-hover .table-focus: hover{background-color:#bebd3}.table-hover
.table-focus: hover>td,.table-hover .table-focus: hover>th{background-color:#bebd3}.table-alternate,.table-alternate>th,
.table-alternate>td{background-color:#d9cddc}.table-alternate th,.table-alternate td,.table-alternate thead th,.table-alternate
tbody+tbody{border-color:#b9a2c2}.table-hover .table-alternate: hover{background-color:#cdded4}.table-hover
.table-alternate: hover>td,.table-hover .table-alternate: hover>th{background-color:#cdded4}.table-active,.table-active>th,
.table-active>td{background-color:#e0f3ff}.table-hover .table-active: hover{background-color:#c7e9ff}.table-hover
.table-active: hover>td,.table-hover .table-active: hover>th{background-color:#c7e9ff}.table .thead-dark th{color:#fff;
background-color:#212529;border-color:#32383e}.table .thead-light th{color:#6c757d;background-color:#f8f9fa;
border-color:#e9ecef}.table-dark{color:#fff;background-color:#212529}.table-dark th,.table-dark td,
```

Figure 4.3: CSS of the front-end design

4.1.3 Bootstrap

We are using bootstrap for our project. we are developing our website by following bootstrap. The full meaning of html is hypertext markup language. By using html, we are very proud to be developer. We are developing our website in many ways. We are using python and many more. HTML is the way to feel free to like and share your energy in the coding section.

Figure 4.4: Bootstrap design of the social site.

4.1.4 Java Script

We are using JavaScript for our project. we are developing our website by JavaScript. The full meaning of html is hypertext markup language. By using html, we are very proud to be developer. We are developing our website in many ways. We are using python and many more. HTML is the way to feel free to like and share your energy in the coding section.

```

$(document).on('click', '#interested', function(event) {
    event.preventDefault();
    var pk=$(this).attr('value');
    $.ajax({
        type: 'POST',
        url: '{% url "interested_event" %}',
        data: {'event_id': pk, 'csrfmiddlewaretoken': '{{ csrf_token }}'},
        dataType: 'json',
        success : function (response) {
            $("#interested-section").html(response['form']);
            console.log("done");
        },
        error: function (rs,e) {
            console.log(rs.responseText);
        }
    });
});

```

Figure 4.5: Java Script code of the site.

4.2 Back-end Design

In back-end design we are using so interesting and most popular language in the world. That is python, python is most popular language in the world. So, we are creating our project by using python. By using html, we are very proud to be developer. We are developing our website in many ways. We are using python and many more. HTML is the way to feel free to like and share your energy in the coding section.

4.2.1 Python

In back-end design we are using so interesting and most popular language in the world. That is python, python is most popular language in the world. So, we are creating our project by using python. By using html, we are very proud to be developer.

4.2.2 SQL

This workshop teaches the fundamentals of (non-spatial) SQL the use of DB Browsers and SQLite. This workshop offers a top-level view of the application and base SQL instructions for working with data in a relational database. We'll consciousness on querying records to get to understand a database and solution questions, and combining facts from separate tables.

Name	Type	Schema
> auth_group_permissions		CREATE TABLE "auth_group_permissions" ("id" integer NOT NULL PRIMARY KEY AUTOINCREMENT, "group_id" integer NOT NULL PRIMARY KEY, "permission_id" integer NOT NULL PRIMARY KEY)
> auth_permission		CREATE TABLE "auth_permission" ("id" integer NOT NULL PRIMARY KEY AUTOINCREMENT, "content_type_id" integer NOT NULL PRIMARY KEY, "codename" varchar(100) NOT NULL)

> users_subscriber		CREATE TABLE "users_subscriber" ("id" integer NOT NULL PRIMARY KEY AUTOINCREMENT, "until_date" date NOT NULL, "user_id" integer NOT NULL)

Figure 4.6: Using SQL for database management (migration table).

4.2.3 Django

We are the usage of Django for our mission. We're developing our website by means of Django. The complete meaning of html is hypertext markup language. By the use of html, we're very proud to be developer. We are developing our internet site in many methods. We are the use of python and many extra. HTML is the way to feel free to love and proportion your strength within the coding segment.

4.3 Interaction Design and UX

We are the usage of python for our mission. We're developing our website by means of python. The complete meaning of html is hypertext markup language. By the use of html, we're very proud to be developer. We are developing our internet site in many methods. We are the use of python and many extra. HTML is the way to feel free to love and proportion your strength within the coding segment.

Figure 4.7: User profile PhotoOptica

4.4 Implementation Requirements

- We are using most popular language which is python.
- We are using SQL for data base management system.
- In this system we are perfectly store our user data in by the SQL.
- We are using font end design HTML and CSS.
- We are offering so many things for attraction our customer.
- We are using java script for our smart application.
- We are offering live contest for our customers.
- For dynamic our website we use bootstrap.
- Sometimes we are using Django libraries.

Chapter 5

Implementation and Testing

5.1 Implementation of Database

This workshop teaches the fundamentals of (non-spatial) SQL the use of DB Browsers and SQLite. This workshop offers a top-level view of the application and base SQL instructions for working with data in a relational database. We'll consciousness on querying records to get to understand a database and solution questions, and combining facts from separate tables.

Name	Type	Schema
> users_contract		CREATE TABLE "users_contract" ("id" integer NOT NULL PRIMARY KEY AUTOINCREMENT, "name" varchar(31
▼ users_customuser		CREATE TABLE "users_customuser" ("id" integer NOT NULL PRIMARY KEY AUTOINCREMENT, "password" va
id	integer	"id" integer NOT NULL
password	varchar(128)	"password" varchar(128) NOT NULL
last_login	datetime	"last_login" datetime
email	varchar(255)	"email" varchar(255) NOT NULL UNIQUE
first_name	varchar(20)	"first_name" varchar(20) NOT NULL
last_name	varchar(20)	"last_name" varchar(20) NOT NULL
is_active	bool	"is_active" bool NOT NULL
is_staff	bool	"is_staff" bool NOT NULL
is_superuser	bool	"is_superuser" bool NOT NULL
is_verified	bool	"is_verified" bool NOT NULL
verification	bool	"verification" bool NOT NULL
created_at	datetime	"created_at" datetime
updated_at	datetime	"updated_at" datetime NOT NULL
▼ users_profile		CREATE TABLE "users_profile" ("id" integer NOT NULL PRIMARY KEY AUTOINCREMENT, "about" text NOT NU
id	integer	"id" integer NOT NULL
about	text	"about" text NOT NULL
photo	varchar(100)	"photo" varchar(100) NOT NULL
gender	varchar(12)	"gender" varchar(12) NOT NULL
phone	varchar(11)	"phone" varchar(11) NOT NULL
city	varchar(50)	"city" varchar(50) NOT NULL
balance	real	"balance" real NOT NULL
email_id	integer	"email_id" integer NOT NULL UNIQUE
> users_requestwithdraw		CREATE TABLE "users_requestwithdraw" ("id" integer NOT NULL PRIMARY KEY AUTOINCREMENT, "paypal")

5.3 Implementation of Interactions

Implementation of interaction is the most useful thing for our project. We are using some feature like live contest, like and share our page, contact us page, and many more. The basics things are given in this site. We are considering our time to give you the better site. It is the only way to give you permission to make money legally. In this process we are going to be a rich man in the world.

Interaction system is based on these tools:

1. Python is the most useful language in the world. This is so powerful language and also easy to learn.
2. SQL allows to store our data save.
3. Hypertext markup language which we are known as a HTML. We are using html by using our time.
4. Cascading style sheets is known as a CSS. This is another way to build up our website more beautiful.

5.4 Testing Implementation

For interaction a system based some tools:

Python is the most useful language in the world. This is so powerful language and also easy to learn.

This workshop teaches the fundamentals of SQL the use of DB Browsers and SQLite. This workshop offers a top performance.

Hypertext markup language which we are known as a HTML. We are using html by using our time.

Cascading style sheets is known as a CSS. This is another way to build up our website more beautiful.

5.5 Test Results and Reports

We are researching by lot of ways to rationalization check statistics lastly got the outcome. For trying out utilization explanation, take a look at facts, ultimately got the authentic outcome. The test approaches or takes a look at substance are surrounded right into a take a look at plan that suggests which structures make us profitable.

CHAPTER 6

IMPACT ON SOCIETY, ENVIRONMENT & SUSTAINABILITY

6.1 For impact in society

PhotoOptica made a vital rule for impacting our society. We could make them happy through our website. Any one who want for their program could hire us. We are very happy to help them. People could be happy to know that this is very simple to hire us. we are assuring our customer for their services.

6.2 Impact on Environment

PhotoOptica made a vital rule for impacting our environment. We could make them happy through our website. Anyone who want for their program could hire us. We are very happy to help them. People could be happy to know that this is very simple to hire us. we are assuring our customer for their services. This is the way top make people more helpful through internet.

6.3 Ethical way:

Ethically this is an ideal way to improving their skill. It helps a photographer to make them more profitable. It's a way to improve their skill. Anyone who want for their program could hire us. We are very happy to help them. People could be happy to know that this is very simple to hire us. we are assuring our customer for their services. This is the way to make people more helpful through internet.

6.4 Sustainability Plan:

PhotoOptica is the best skill share and knowledge sharing application. This is more useful for a professional photographer. They can make money from here. They can advertisement their work through our website. It's a platform where a photographer can reach their destination. This is the way to make them more profitable.

CHAPTER 7

DISCUSSION AND CONCLUSION

7.1 Discussion and Conclusion

PhotoOptica is the excellent skill proportion and information sharing utility. This is extra useful for an expert photographer. They can make money from here. They can advertisement their work thru our website. It's a platform wherein a photographer can reach their destination. This is the way to cause them too greater profitable. Ethically this is a super manner to improving their ability. It helps a photographer to lead them too extra worthwhile. It's a manner to improve their ability. Anyone who want for his or her software could lease us.

7.2 Scope for Further Developments

PhotoOptica made an essential rule for impacting our society. We could lead them to satisfied via our internet site. Any one that need for his or her software may want to lease us. We are very happy to help them. People could be happy to recognize that that is very simple to rent us. We're assuring our consumer for their services. PhotoOptica made a critical rule for impacting our environment. We ought to cause them to glad thru our website. Anyone who want for their application may want to hire us. We are very glad to assist them. People might be happy to realize that that is quite simple to lease us. We're assuring our client for their services. This is the way pinnacle make people greater useful through internet.

APPENDIX A

Project Reflection:

In the period of conclusive shield, 3 choices are on hand Thesis, venture, and entry-level function. We decide to make a mission give a hazard software this is gainful. This is our assessment that every understudy must accomplish some facts nearby potential in true existence and observe nicely. Each web engineer needs to use their experience for making some responsibilities. It will help us a ton, we failed to recognize before the wide variety of measures have a place for increasing utility. In this project through we are achieving most of the famous language python. And we are using Django for the development.

APPENDIX B

Related Diagrams:

We are developing PhotoOptica through many famous languages in the world. We are using html for front-end design. We are using CSS for the style of our project. CSS make more beautiful interface in our template. We are using python for developing back-end. We use Django for developing our site. We are using sql for our project data base management system. Overall, we are very happy to making our project more flexible by using those languages.
