Finally, I must acknowledge with due respect the constant support and patience of my parents.

ABSTRACT

Internship as a “Web Developer”, Work with new web technology and gaining of the knowledge to develop a big project have been widely discussed in the internship period. Working experience with various project and onhuge team is totally different in environment as we think generally. Duties of a Web Developer or programmer and co-operational working procedure have been discussed fully in this report. Working experience with HTML, CSS, JS, PHP and WordPress among various web technology like- JS(ES6; AngularJS; ReactJS; VueJS etc.), PHP(Laravel; CodeIgniter, Symphony; Magento; YII; Cake PHP etc.), CMS (WordPress; Joomlaetc.) have been focused in the discussion. How a large team work collaboratively and co-efficiently by following a special working model is also discussed in the report. There are manylayer and system stepof a project development. Which layer I’ve worked with and my experience with that layer and system has been discussed. Mainly my work of developing Newspapers, E-Commerce and many more dynamic Websites have been fully discussed. Development of frontend with backend system and gaining knowledge of being a full stack web developer has been discussed slightly.

CHEPTER1
INTRODUCTION

1.1 Introduction

The internship was about front desk work experience with the modern web technologies from the very first or the scratch such as HTML, CSS, JS, JQuery, PHP and other languagesand an introduction to web based application development with the demand of current age and the client satisfaction. This internship will involve dynamic and challenging opportunities and help totrace the best career for the 21st century. This is a great opportunity to gain hands on hands experience on web application development and step to the first stair in huge ERP or Application Development.

1.2 Motivation

I worked with an internship program to develop myself for creating the best career as aweb application developer or a web programmer. I believe that this career is the most powerful career in this 21st century. Again this job has a super dynamic environment that will help me to grow more in the next decade and will help me to create a start-up. They helped me andthe other employee in learning new technologies, strategies and various idea those will help for the growth of any company and the best team. Again that may help Seeking for a challenging and creative job in a dynamic and a betterwork place where I can use my strong technical knowledge and skills.

1.3 Internships Objective

I've gained the knowledge about web technology and a major area of web programming languages. There was a perception that was the importance of the web sites and mobile applications for the Institutions, Businesses, Brandings, Personals, Spreading the News, Discussions, Communication and the other purposes is so much what is hard to describe in words. I've experienced on the office environment for express my career in the future. I realized the strength of team work. That internship increased my sense and responsibility and good work habitsmaintaining the time line.Now I can implement my innovative ideas, skills and creativity for develop my career in the best job sector in the world.

1.4 Introduction to the Company

Journey Begins of Popular IT Limited (2009)-

Popular IT Limited begun its journey as a conventional IT company in 2009 by a born dream walker. After 2 years it starts the journey as another country office in Hong Kong in 2011 and runs more than 3 sister concerns within 2017.

Further steps of being one of the best IT company-

Popular IT started 2011 in Hong Kong but won the "Hong Kong ICT Award" in 2013 by proving the best dynamic and fast IT services in Hong Kong.In November, 2011it started a new sister concern "Popular Server" with new ideas and dreams to provide the hosting facilities in reliable price. After that Popular IT becoming one of the most popular IT company in Bangladesh and abroad. Now Popular IT has more than 450 clients in all over the world. It creates it's another sister concern "Themes Bazar" in 2017 and this is the first and only Bangladeshi themes market place like "Envato Theme Forest" with various WordPress and other themes in a single place.

1.5 Business Background

Popular IT runs the business from the 2009 with a tiny dedicated team. But it runs another country office within two year in Hong Kong. Separately It runs another two sister concerns within next few years as a CEO concern of Md. Helal Uddin successfully. Spread the services among all over the world and creates more than 450 customers from the home and abroad.

Vision

To achieve the highest level of IT services. Ensuring the reliable IT services and making Bangladesh develop in ICT sector.

Mission

Their mission is to deliver IT services fast, hassle free and fair. To give the guarantee of the best server ever. Reaching to all the people of Bangladesh to introduce the benefits of ICT and spreading the knowledge among the citizen by providing best quality IT training.

1.6 Report Layout

A report design is an archive that goes about as a format or visual that characterizes the standpoint of a report. A report format will normally utilize tables to organize content, where the report contains information fields, content or picture.

Discussion on Chapter 1-5

- In the ‘Chapter-1’ I have discussed about the motivation, Objectives and the Introduction of the company where I completed my Internship.
- In ‘Chapter-2’ I’ve discussed all about the organization where I’ve done my Internship. I also described about Introduction of the organization, product and market situation, Target group, SWOT analysis and organizational Structure.
- ‘Chapter-3’ is all about the daily tasks and activities, events and activities I’ve challenged, My Projects tasks activities and the challenges faced in the internship.
- In ‘Chapter-4’ there discussed about the earning of competencies, creating of smart plans and reflectionsof the organization.
- In ‘Chapter-5’ I’ve discussed about the conclusion of the internship and the expected future career by the gained knowledge from the organization.

CHAPTER2
ORGANIZATION

2.1 Introduction

Popular IT Limited since its inception in 2009, has given the best IT services like Web Development, Mobile Application Development, Game Development, ERP, CRM, POS, E-Commerce Solution, IOT, Domain-Hosting Service, ICT training. Popular IT has the first and only theme market place(https://www.themesbazar.com) in Bangladesh. Themes bazar has more than hundreds free and premium web templates, WordPress, Joomla and other themes.Popular IT works with the modern web and mobile app development technology.

2.2 List of Products and Services

- Quality Training on Web Development and Database Development.
- Freelancing and other ICT Training.
- Print on Demand Services and Training.
- Logo and Graphic Design Services.
- Lead Generation and SEO Services.
- Modern Web Site Design and Development with latest trend.
- Mobile Application Development.
- Web and In-App Payment Gateway Services.

- E-Commerce Solutions and Management.
- ERP, CRM, Payroll Software Development.
- Biometric Device Attendance System.
- VPS and Cloud Server Services.
- Shared Hosting and Domain Services.
- Reseller Hosting Services

2.2.1 Related Products I Worked with

Products: E-Commerce and WordPress Theme, ERP Software, Business Website.

Description: E-Commerce Website and Employee management system for Sailor Fashions Limited. News One and News Light WordPress Themes.

2.2.2 Market Situations

Popular-IT has created the most valuable market situations for their fair and fast services with reliable costing. Popular-IT gives the services of various training of Computer. And in this present age this has a lot of possibilities among the modern business competitions. Again the training of ICT such as Web Design, Web Development, Graphic Design, Logo Design, Lead Generations, SEO, Server Management and Trendiest ICT service Print on Demand.

These training service only provide at most twenty or thirty company in the Dhaka City but they are not all classified or quality based. But Popular-IT serves with the quality and the best mentor for the topic.

Recently Popular-IT serves the VPS server and this has created the most valuable market situations for the company. Again Themes Bazar the only and first market place for the WordPress and other themes in Bangladesh. And Themes Bazar has created huge customers within a few months. It's selling Themes and Plugins among the whole Asian Subcontinent presently and in future it'll spread all over the world like themeforest of Envato market.

2.3Target Group

- New companies or business is a great target for making their web sites, Online management systems, bio metric attendance system etc.
- New newspapers for making the online portal and live broadcasting system.
- New hospitals and other enterprises to help them to build their web sites, mobile applications, management systems, bio metric attendance device, Online marketing etc.
- Individuals for making their portfolios and mobile application.

2.4 SWOT Analysis

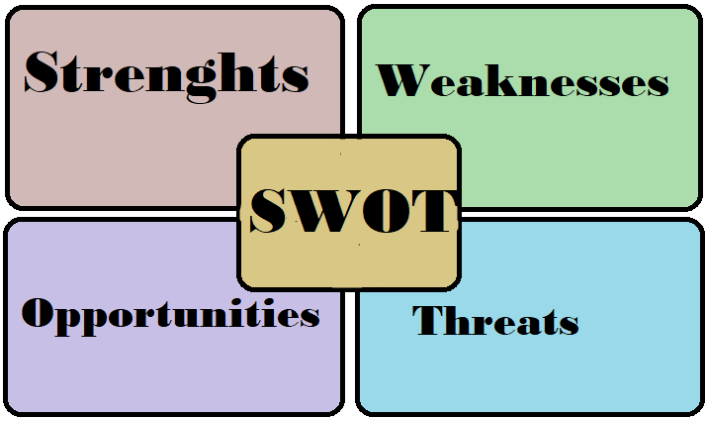

Figure 2.4.1: SWOT Analysis

Strengths

- The company has stability to make difference comparing other IT company.
- Best server and hosting providing.
- Best ICT training in the city.
- Print on demand services for the first time and only in Bangladesh.
- Best web design and development Services following the new trend.
- Best mobile applications services.
- Ensuring the security tokens is another strength for the company.
- First themes market place in the country.
- Fair and reliable services.

Weakness

- Business team management.
- Small number of staff can hamper the productivity.
- Lagging of huge project management.
- Critical situation handling.
- Print on demand servicesis a new service in Bangladesh.

Opportunities

- Print on demand services for the first time in Bangladesh.

- Making a difference for the Bangladesh with Themes Bazar like Envato market.
- Opponents aren't able to run with its service area.
- Working with the trendy technology can bring more satisfactions.
- People are tensed with fair service but Popular-IT ensures that.
- Themes Bazar can make a vast employment area in the next decade.

Threats

- Working with new technology needs to make new team learning.
- New technologies create the hard problem sometimes to solve.
- Some companies are working hard to reach the point.

2.5 Organization Structure

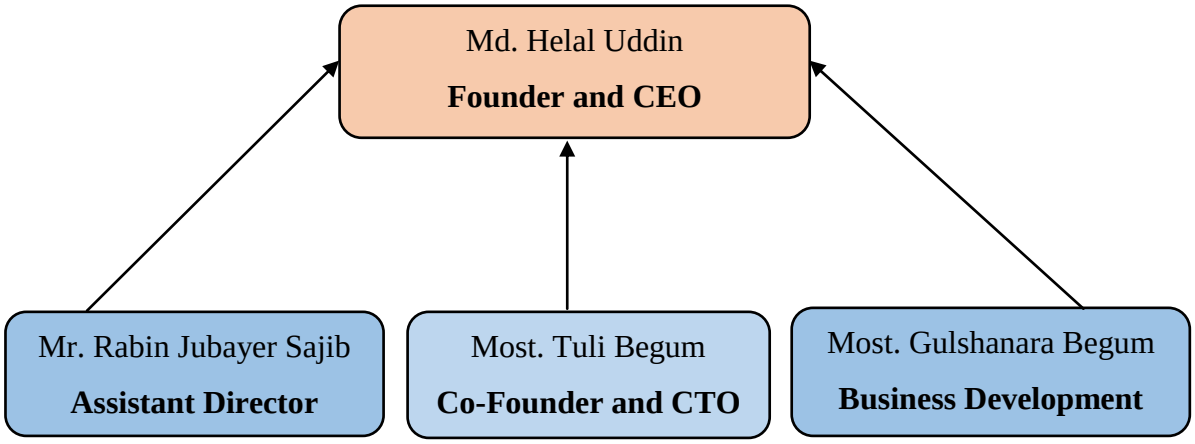

Figure 2.5.1: Organization Structure Diagram

CHAPTER 3

Tasks, Projects and Activities

3.1 Daily Task and Activities

Office starts at 09.30 am and ends at 06.00 pm regularly 6 days in a week. In that time period I had many task to do with.

- Starting with basic web site design with HTML5, CSS3, JS and Bootstrap.
- Tracing the error for the designs and fixing them.
- After 1 month I faced a project of WordPress theme customization and development for the clients with the co-operation of Durbin Labs Limited.
- After 2 months I had worked with an E-Commerce website in the co-operation of Durbin Labs Limited.
- Learning new technologies and new creative and outstanding design continuously.
- Hand to hand experience on big projects and the knowledge of finishing the job maintain by the timeline.

3.2: Events and Activities

This internship helps me to learn the new languages and technologies within a short time. That helped me to make myself well known with the IT event management and other activities within the scheduled timeline. The internship helped me to develop my experience on hand to hand projects and heal me to develop my resume and portfolio.

There was a challenge for every project I developed in my Intern Period. Those challenges were following the timeline, making the outstanding projects, bring the customer satisfaction, Ensuring the no need more revisions on the projects.

Again there was a nice environment for learning and working in a friendly mind set co-operational platform. That helped to gain the experience to work in suit myself in any kind of work place and organization.

Table: 3.3.3 More Technologies I've worked on

Technology	Expertise
Google Material Design	Expert 80%
Materialize CSS	Expert 95%
Semantic UI	Expert 90%
Bootstrap	Expert 95%
AJAX	Medium 75%
Angular JS	Medium 60%
Node JS	Beginner 40%
Laravel	Beginner 30%
Typescript	Medium 70%
VUE JS	Beginner 10%

3.4 Challenges

Facing many problems or challenges is simple during the completion of a huge project. I've faced too, but overcoming is another experience for me. Even error solving and get done the projects has another part of fun and happiness. It may make one more confidentto take the next challenges.

CHAPTER 4

Competencies and Smart Plan

4.1 Competencies Earned

I've worked with several projects during my Internship. I've done those job within the required timeline. So that I could say I'm enough mature now to do any kind of hard and challenging job in the ICT sector related to Full Stack Web Development and Web based Android Application. For this dynamic challenging time I'm totally prepared for the career. I've hand to hand experience for making the super dynamic sites and android application with the new age technologies.

Even I'm fully prepared for learning new technologies within a short time. Now many more technologies come daily and controlling the trend. I'm totally ready for taking those challenge.

4.2 Smart Plan

I've already planned and mapped my career for enhancing and creating the outstanding web technology. I've planned about to beautify my future by the following steps:

- Working with the new challenging job.
- CV and Portfolio making for tracing the better career.
- LinkedIn Profile and GitHub Profile enhancing.
- Up to date myself with the technology.
- Continuing work for remembering my gained knowledge.
- Searching for doing new and creative arts and design.

4.3 Reflections

- Doing challenging job with a creative team.
- Creating something outstanding for my country.
- Learn more technology.
- Start an Initiative for making the new opportunities.
- Creating something for the nation and mankind.

CHAPTER 5

Conclusion and Future career

5.1 Discussions and conclusion

I've learned so many things in this internship. How to manage a project and manage the timeline were the most important topic.Knowledge about various Web and Android Application technology can help me to find the better career than other. SDLC process for the huge project and making a SDK and well documentation were other experience I've gathered. Again working in collaboration with a team experience will help me to enhance my step forward.

5.2 Scope for Further Career

This internship and knowledge will help me to utilize my future career. Still I've some limitations on my knowledge and I've to learn more. But my present knowledge can help me enough to trace the best career of the century. I'm seeing the following future career can be my target:

- Good knowledge on JS can help me to work with dynamic and creative jobs.
- There is not so much JS developer presently so that I could get in a higher profession on any IT company.
- Several knowledge about web and android technology can pick me to the leading IT company.
- Besides Web and Android knowledge, I've others knowledge for project management and collaborative work will help me to get the best career.
