SPRING 2019

APPROVAL

This internship titled “ONLINE SHOPPING WEB APPLICATION”, submitted by **Md. Abdullah al Obayed**, ID No: **152-15-6166** to the Department of Computer Science and Engineering, Daffodil International University has been accepted as satisfactory for the partial fulfillment of the requirements for the degree of B.Sc. in Computer Science and Engineering and approved as to its style and contents. The presentation has been held on **2nd May 2019**.

BOARD OF EXAMINERS

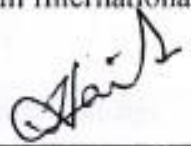

Dr. Syed Akhter Hossain
Professor and Head
Department of Computer Science and Engineering
Faculty of Science & Information Technology
Daffodil International University

Chairman

Dr. Md. Ismail Jabiullah

ACKNOWLEDGEMENT

First I express our heartiest thanks and gratefulness to almighty God for His divine blessing makes us possible to complete the semester project successfully.

I am really grateful and wish our profound our indebtedness to **Ms Afsara Tasneem Misha, Lecturer**, Department of CSE, Daffodil International University, Dhaka. Deep Knowledge & keen interest of my supervisor in the field of “*Web Application*” to carry out this Internship. His endless patience, scholarly guidance, continual encouragement, constant and energetic supervision, constructive criticism, valuable advice, reading many inferior draft and correcting them at all stage have made it possible to complete this project.

I would like to express our heartiest gratitude to **Dr. Syed Akhter Hossain, Professor and Head, Department of CSE**, for his kind help to finish my internship and also to other faculty member and the staff of CSE department of Daffodil International University.

Finally, I must acknowledge with due respect the constant support and patients of our parents.

ABSTRACT

As a team member under “**Soft Apple BD.**” I have done various types of work. Mainly I am learning with my team members working process and skill for how to maintain a client. “**Soft Apple BD**” is generally a service provider and maintainers all types of software module from abroad. The Aim of this internship how to develop a software or application and maintain this software. Firstly our team members struct a structure and flow of this application. The whole part of this internship report gives an overview of application development step by step. As I learnt how to work with a team members with spirits I achieve real time working experience with my team mates. I learned how to detect or finding application bug and how to solve this bug.

CHAPTER 1

INTRODUCTION

1.1 Introduction

We are living in the period of innovation. Individuals utilized these intriguing innovations for different purposes. Presently the innovation has gone so far that the telephones are currently accessible in our grasp and current innovation has given us such a gift, that we can utilize just for our diverse purposes in spite of our discussions. For instance, the Android stage and its applications conveyed some progressive answers for a large number of our day by day life issues.

This day almost everyone uses the Internet. They are to buy things online. So I'm interested in creating an online platform, in that region I'm an internship at a software company "soft Apple BD".

Now I am supplying this application (online shopping) that will help people find their essentials and buy from it. As a result, this app is helping save you valuable time [1].

1.2 Motivation

Online shopping is a lifestyle. Online business web application, which gives diverse advanced and way of life things. This undertaking licenses review of various things available, enables selected customers to purchase the perfect thing quickly, and would now have the capacity to put in a solicitation using the cash decision in the transport portion structure. This endeavor gives straightforward access to officials and executives to see orders using portion options [1].

1.3 Objectives

The motivation behind temporary job portrays the consequences of the entry level position: Objectives for the objective gathering and immediate, short-and medium-term impacts. The motivation behind the undertaking must be inside the chances of temporary job, and one must almost certainly legitimately impact the impact of entry level position. The motivation behind temporary job is regularly made on the terms of the entry level position for the objective gathering: "Higher ... Higher ..." It additionally plans to get ready entry level position goals to accomplish a future circumstance.

The purpose of the shopping system is to increase the customer's preferred point of view, while reducing the time used during the purchase of shop and the use of the product.

The "WEB BASED ONLINE SHOPPING SYSTEM" project mainly adds new products to the primary products, new members and updates to new information, product and member searches, and online shopping facilities [1].

1.4 Expected Outcome

Expected outcomes mean the aftereffects of our undertaking. We trust our state of satisfying our undertaking. It accomplishes my temporary position objective.

My expected outcomes,

- Catch more customers.
- Increase the traffic.
- Make more sales.
- Best customer service.
- Minimum Shipping time.
- Increase the number of reviews.
- Get Positive feedback.
- Customer follows up.

1.5 Report Layout

In the chapter (1) we decide the situation of the division level, the inspiration and the targets of the normal consequences of our applications.

In the chapter (2) we examine discourses identified with foundation consider and related applications Google Play Store. We have restricted subsidizing of existing applications and we take the test of our applications.

In the chapter (3) we need is shown in the investigation. It utilizes picture delineations and depictions all things considered.

In the chapter (4) we are demonstrating the structure and usage figure. This is incorporated into the E-graph, DFD and class pictures and depictions. It demonstrates our application highlights and the important devices and dialects.

In the chapter (5) we are talking about application testing and test subtleties.

In the chapter (6) we are assessing our applications utilizing 5 overviews. This review is a down to earth client input for our applications.

In the chapter (7) we talk about the points of interest and restrictions of our applications and the future chances.

Finally we finish up our application report and included some reference.

CHAPTER 2

ORGANIZATION

2.1 Introduction to the Company

Soft Apple BD was founded in 2016 as a private company. Md. Zakir Hossain's founder name is "soft Apple BD". This is an "IT" type organization. Business functions are software development and website design companies. Soft Apple BD Business maintains ERP, School and Collage ERP, University ERP, Library Management, and already provides services of web hosting, software development, domain hosting and online marketing of 20+ clients Service delivery.

The company had separate division for Desktop application, web development, software development, and Domain hosting and online marketing service provided [2].

2.1.1 About Us

Soft Apple BD is a software development organization. The company was founded in 2016 with the aim of providing high quality software for business organizations, educational institutions. Software development quality assurance is meant to be our first priority by the customer joy [2].

2.1.2 Mission

Being an outstanding software company in the global ICT market, using local expertise, which contributes to the country's economy.

2.1.3 Vision

Standard Plus Computer System is working for the development of developing software by focusing on limited Bangladesh market. We want to achieve the following goals at the end of our development in the software industry. To develop a process based software development team to ensure high quality assurance of industrial software development methods, to ensure local IT expertise and to develop and develop accurate and accurate documentation [2].

2.1.4 Our Development Methodology

Up to now we are using SCRUM, a repetitive, growing process to create an item under the Agile Development Method for creating products for our customers. We strongly urge different documentation and quality assurance instruments and strategies to ensure the highest quality guarantee for our products.

Soft Apple BD.

2.2 Product and Market Situation

Website composition Services measurements review reports give key industry assessment and industry bits of knowledge, conjecture publicizing promoting, explores examples of present and future industry, and shows bits of pies for the biggest association in the business. IBIS disseminates the biggest gathering of World Industry reports with the goal that you can see an industry's store organize, money related driver and the primary purchaser and market. The Web Design Services industry has organizations and experts that create sites for organizations and people. Internet omnipresence has changed over the past five years to increase the expansion of the customer and kept on shape. Associate with clients for the organization, in this time the website has become interested in the interest of experts, has become a standard path quickly. Directed by Small Business Technology Research of the National Small Business Association, 82.0% of independent enterprises have a site. In any case, website development has been hampered by industrial development, which enables people without coding their ability to create their own sites. These tools are easy to use, reducing the resources required by the website architecture administration and the amount of buyers. Price plus computer systems are focused on limited software and web development, software development, e-commerce, resort management, etc. They treat each client differently, and so they do not offer a set price for a service. They offer moderate minimal effort website composition with our website composition administration for all private sites and business sites. Their experts trust that the way to the achievement of the progressing venture is to make an

assembled correspondence tie with their customers. A portion of the administrations offered by them are given [2].

2.3 Target Group

However, there are different people who work for different organizations, Bacon has brought home, considering it to start a new business for himself, and should not be insane to consider whether it is working day-to-day or low-maintenance gigabytes. Changed financial atmospheres are not guaranteed to be ensured and, without any doubt, can help others spend their time while helping them achieve their goals. As a visual creator, outsourcing and creating our own personal agency is usually a really regular idea; it's pretty sure about it neither do we show ourselves as consultants, however, I am certain that some of us have reached the closest positions to establish some extra trade from our pockets. Some stores simply find the opportunity to offer plans for the plan administration, and the whole organization's entire organization or the whole organization's surroundings are designed to create items, or to combine with other people to offer more items and administration. Power: Software Development, Web Development and Desktop Software Development, iOS and Android App Development, Business Process Automation, Custom Software Development [2].

2.4 SWOT Analysis

SWOT Analysis is a vital arrangement procedure that enables an individual or association to recognize the qualities, shortcomings, openings, and dangers identified with business rivalry or task arranging. © Daffodil International University 7 SWT Analysis fundamentally talks about the qualities, shortcomings, openings and dangers of any venture or work [3Table 2.4: SWOT Analysis Strengths Vulnerability Opportunities Threats Convenient Positions High Rental Costs Continuous Market Development Supermarkets Over 24 Hours Overall Brand Equity Increases High Staff Costs Product Supplier Suppliers Removed Online Supplies Individually Branded Products Technical Power Exclusive Products Supply Security Protection Franchise GE co-marking areas offer obligation free, 2.5-system organized structures, trades, rights and customary courses of action of the lines of promise to a connection. The distinctive layers of structures are distributed, controlled, and made, how the parts, qualities and guarantees are made and how to choose data streams in various

dimensions of the association. Contingent upon the reason and technique for endorsement of a structure. In joined structures, the best dimension of association has an expansive level of power over fundamental expert and there is solid command over the working environment and the offices. In a decentralized structure, the important activities are controlled and in the working environment and the segments can coordinate level of chance. © Daffodil International University 8. Nahid Ahmed is the proprietor of our affiliation and he is the Managing Director of the association. For the most part, my standard in addition to PC framework unites the dimension structure of the association, which proposes that Md. Nahid Ahmed considers everything to be an affiliation. 2.5: Organizational Structure [2].

3.3 Use Case Description: Narrative

The Figure-3.1 demonstrates the utilization case chart of our application which we depicted underneath.

Title: Create Profile

- Summary: This case portrays steps related with making client profile.
- Actor:
- User: Perform ventures to make profile.

Flow of Event:

Pre-Condition:

- User must go to site.
- This case will show up in the wake of stacking the application.

Main-Success Scenario:

- User input username
- User input email
- User input secret phrase

Error-Scenario:

- User can't top off username field not make profile
- User can't top off secret phrase field not make profile

Post Condition:

- Username will be shown on the upper right corner of the applications principle screen.
- Next time the client can straightforwardly get to the principle page in the applications.

Title: Log In

- Summary: This case portray to client sign in.
- Actor
- User: Perform ventures to sign in.

Flow of Events:

Pre-Condition:

- User must register this application

Main-Scenario:

- User input email
- User input password

Blunder Scenario:

- Input wrong data not sign in.

Post-Condition:

- Display landing page by profile

Title: Store Product

- Summary: This case portray to client include new post or store new Product.
- Actor:
- User: Perform ventures to include or store Product.

Flow of Events:

Pre-Condition:

- User must signed in this application

Fundamental Scenario:

- User input Product name
- User input Description of item
- User connect record or pictures

Error-Scenario:

- Input not connects record or pictures item client can't include post.

Post-Condition:

- Display message to effective include new post

Title: Search Product

- Summary: This case depict to client seek Product
- Actor:
- User: Perform ventures to look through any Product

Flow of Events:

Pre-Condition:

- User must signed in this application

Main-Scenario:

- User input item name

Error-Scenario:

- User must information item name generally seek fizzled

Post-Condition:

- Display Products item by a table or message box

Title: My Post

- Summary: Display all of post by profile
- Actor:
- User: Perform ventures to demonstrates all self/claim post

Flow of Events:

Pre-Condition:

- User must sign in this application

Main-Scenario:

- Just snap to my post in route bar
- Admin can erase post

Error-Scenario:

- User must post before snap my post

Post-Condition:

- Display or demonstrates all of post by message box

Title: Log out

- Summary: This case depicts to client leave this application administration
- Actor:
- User: Perform ventures to leave from application

Flow of Events:

Pre-Condition:

- User must signed in this application

Main-Scenario:

- User click log out catch

Error-Scenario:

- User not signed for this situation can fall flat

Post-Condition:

- Display message to fruitful logged out [3].

3.4 System Requirements

Requirement for this Application:

- A PC with windows OS.
- HTML and CSS for front end design.
- PHP and Java for back end operations.
- MySQL for database server & SQL for operation.
- Atom (text editor) for code writing.
- XAMPP for creating virtual server.
- Internet Browser [3].

CHAPTER 4

DESIGN AND IMPLEMENTATION

4.1 Database Design

The following figure is 4.1 on my application's ER drawing. The main agencies are users, orders, cart and products. The user's entity has created eight IDs, user IDs, user photos, user phones, user addresses, user passwords, first names, last names and emails. All companies have multiple attributes and there is a relationship with user product entity. There is a relationship with the cart and order user[4].

Figure 4.1: E-R Diagram of Online Shopping

4.2 Data Flow Diagram

The accompanying figure 4.2 (an) is the dimension 0 information stream outline of our application and figure 4.2 (b) is the dimension 1 and dimension 2 information stream graph of our application.

4.2.1 Level 0 DFD

Data Flow Diagram For Product Search

Figure 4.2 (e) : Data flow diagram For search product

4.3 Class Diagram

The following figure 4.3 is the class diagram of our app

Figure 4.3: Class diagram

4.4 Language and Tools

We have utilized the accompanying programming and dialects -

- HTML
- CSS
- MySql
- PHP
- JavaScript
- JQuery

4.5 Features

There are bunches of uses identified with book searchers in Google play store. They are utilized in the base highlights of their applications. Be that as it may, a large portion of different highlights of our applications have been endeavored to incorporate and some new highlights have been added to our application. The highlights are recorded underneath:

Register (Create Profile)

- User Email Address
- User Password

Add Post:

- Add new Post by Admin
- Attach Images record by Admin

My Post:

- By Profile
- By Post

Log in:

- Easily Logged In

Order:

- Easily Order item by on the web

Register (Create Profile):

Subsequent to beginning the application, clients will have a choice to make profiles. You can make client profiles by giving email and secret key data. There will be two alternatives, email and secret phrase. The client can include email and secret phrase that utilizes his profile. The client will keep his email and secret phrase in the regarded segment. When the profile is made, our keen database will be told to see numerous books without precedent for the pursuit list[4].

Add Post:

This element lets administrator include another post. An administrator can without much of a stretch include a post utilizing this component. Administrator (dealer) has an item, they are effectively included to this item my framework. This element relies upon three capacities are....

- i. The admin or merchants must input their product name to be uploaded to my system.
- ii. Then the name of the admin input product and my system description for adding the post.
- iii. Admin Add a picture file to upload a product to my system.

My Post:

This feature provides all the information or products listed on merchant profiles. How many products a businessman has added to our system, this feature is easily visible and merchants can delete their posts using this feature.

Lon In:

This feature provides the user log in system who are registered in my system by username and password.

4.6 How My Application Works

At the starting of our application the accompanying Figure 4.4 will show up. This is the Home screen of this application.

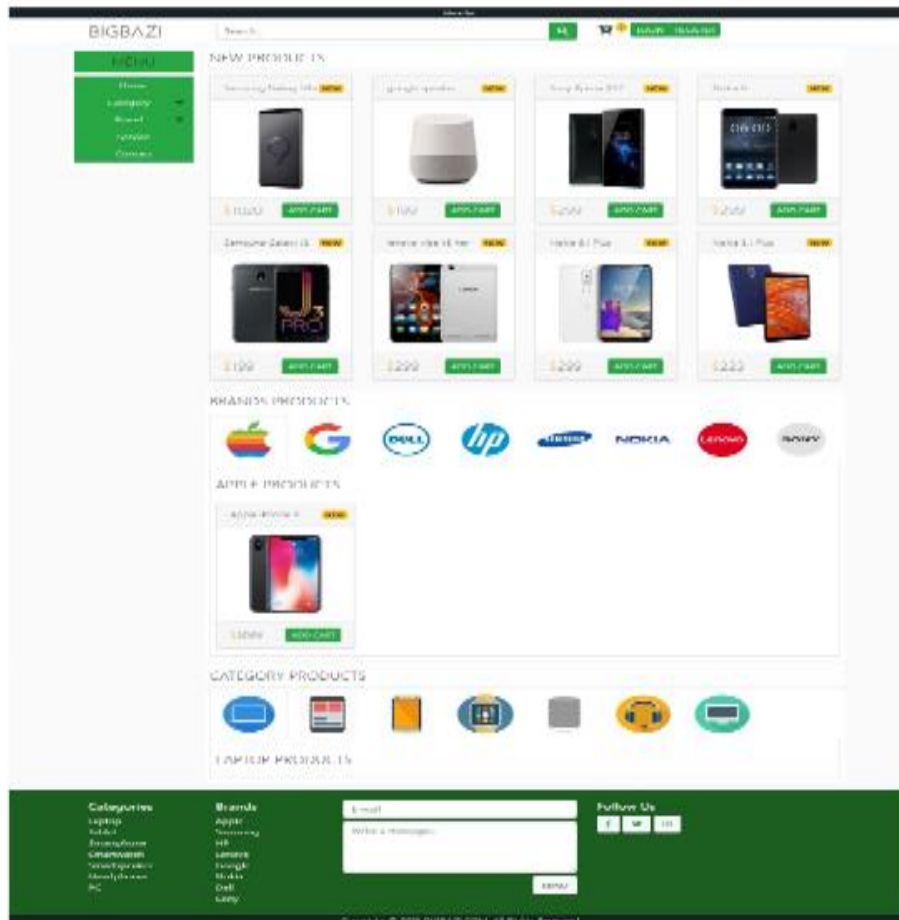

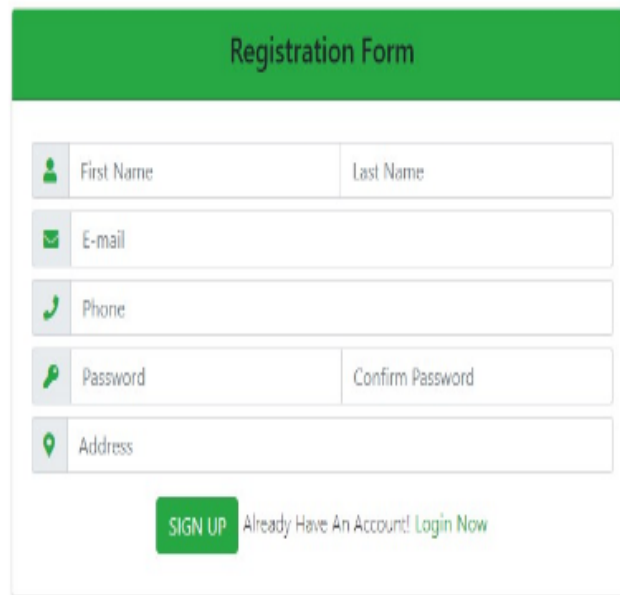

Figure 4.4: Home Screen

At that point my appreciated screen or first page will show up. Which we named as an appreciated page. This page will give the client make profile. The accompanying Figure4.5.

User signup page

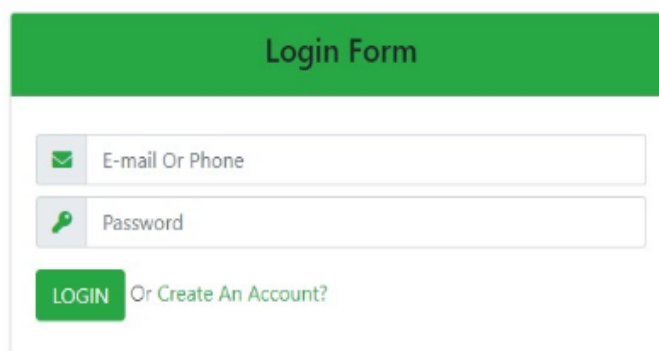

The registration form is titled "Registration Form" in a green header. It contains several input fields: "First Name" and "Last Name" (split into two boxes), "E-mail", "Phone", "Password" and "Confirm Password" (split into two boxes), and "Address". At the bottom, there is a green "SIGN UP" button and a link that says "Already Have An Account? Login Now".

Figure 4.5: Register or Create Profile Page

After register a client can without much of a stretch sign in our framework. Our sign in framework following Figure 4.6 is.

User login page

The login form is titled "Login Form" in a green header. It contains two input fields: "E-mail Or Phone" and "Password". At the bottom, there is a green "LOGIN" button and a link that says "Or Create An Account?".

Figure 4.6: Log in Page

After sign in client see seek page of my framework. Hunt page are appeared following

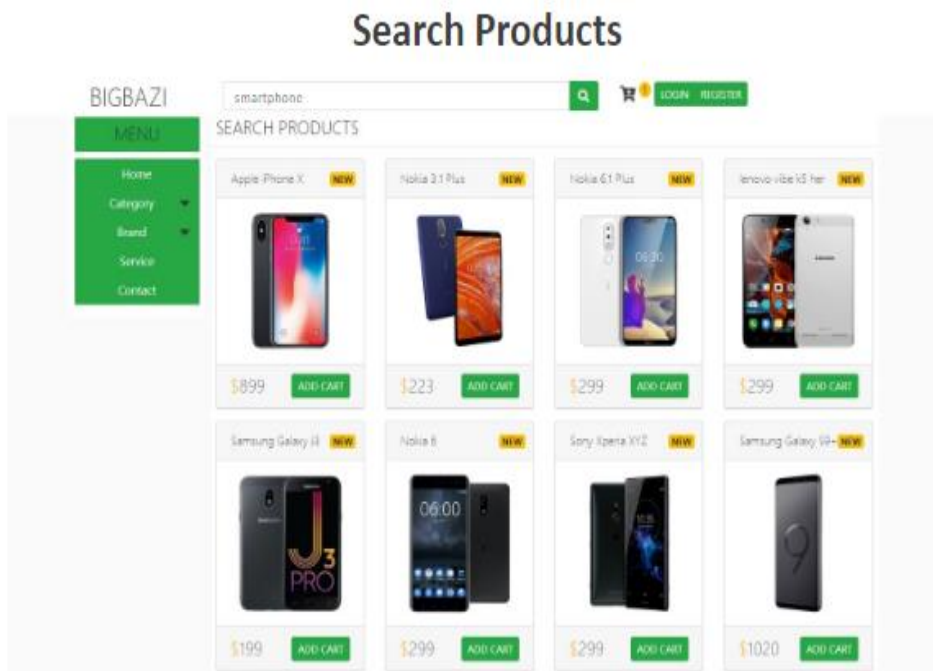

Figure 4.7: seek Page after signed in

Presently the Details of items in my framework in following figure 4.8. This figure help to client comprehends the administration of our framework.

Below the recent orders is an 'ORDERED PRODUCTS DETAILS' table:

USER ID	PHONE	ADDRESS	DELIVERY DATE	ORDERED ITEMS	QUANTITY	PRICE
4	01742345050	Mirpur-12, Dhaka	2018-12-27 00:00:00	7	7	1793
1	01775559622	Mirpur-1, Dhaka	2018-12-25 00:00:00	4	4	996

Figure 4.16: User requested page

User List Page

The screenshot shows a dashboard for the 'User List Page'. The sidebar is identical to the previous page, with 'USER' highlighted in the menu. The main content area has a title 'Users List' and a table with the following data:

ID	Name	Phone	Address	Action
1	Sabuj Islam	01775559622	Mirpur-1, Dhaka	<input type="checkbox"/>
2	Rubel Ahmed	01740896996	Mirpur-1, Dhaka	<input type="checkbox"/>
3	Noman Sarkar	01931413003	Mirpur-1, Dhaka	<input type="checkbox"/>
4	Kazi Abu Noman	01742345050	Mirpur-12, Dhaka	<input type="checkbox"/>

Figure 4.17: User list page

So this is essentially the plan and work process of our application. We have attempted to keep it as straightforward as would be prudent. This is only a model. We are getting ready for better plan and highlights in our next adaptation of this application.

CHAPTER 5

TESTING

5.1 Testing

- Unit testing
- Integration Testing
- Regression Testing
- System Testing

Unit Testing:

- Each singular movement is inspected
- User profile query is utilized to check books
- Testing book data utilizing spared database data

Reconciliation Testing:

- The back catch prompts past page
- Regression Testing
- If versatile information not empowered book data not appeared

System Testing:

- The whole framework is tried to guarantee the usefulness of the application
- Black Box Testing
- The test client needs data about how they got it without having any information [5].

5.2 Test Cases

The accompanying table 5.1 portrays the aftereffects of my application enlistment experiment. Presently we see that in all respects significantly made profile.

Table 5.1: Create Profile or Register Test Case

Test Case	Expected Output	Actual Output	Result
Enter Email Address			
Enter Password			
Click register Button	Successful create profile	Successful create profile	success
Blank Email	Error	Error	Failure
Blank Password	Error	Error	Failure

Test Case	Expected Output	Actual Output	Result
Enter Product Name			
Click Search Button	Search Result Viewed	Search Result Viewed	success
Blank Product name	Error	Error	Failure

CHAPTER 6

EVALUATION

We have chosen to assess our application to perceive how accommodating and compelling our application is. Our application framework assessment process is essentially an examination that takes clients' involvement in the wake of utilizing our framework.

The assessment objective is to assess the advancement for our applications. We actualized a review on five inquiries identified with our application framework to show signs of improvement comprehension of the convenience of our applications among various clients.

We have made 5 addresses identified with our application framework and how our application reacts to it, conveyed to 10 individuals for a fundamental overview. On the size of 4 distinct choices on the scale we requested to rate their application. In view of this review, we anticipate improving our application and making it more easy to understand than any time in recent memory. The inquiries we have chosen for our overview with client input are given underneath.

Questions:

Q1. How helpful is our system search to find your product?

According to the survey, 87% of the people are excellent in the search book of our system. They have been very reliable and easy to use using our system search. So it's a very good review for us. 11% people disagreed with him and said that it was satisfactory and it could be better than now. And 2% say it was good. Here is a pie chart which shows the results of our survey query.

Figure 6.1: Survey Question 1

Q2. How would you discover our App Order and Cart choice helpful?

We got a blended response to this inquiry. 43% of individuals said that this capacity is incredible. About 29% of the general population think our guide scene is agreeable. They think it is better observed with more subtleties. 13% individuals state it's great and 15% individuals state it's poor. The measurements appeared beneath are:

Figure 6.2: Survey Question 2

Q3. Are Our Profiles Profitable To You? How might you rate it?

We have made a profile through which the client can spare his profile and locate his ordinary items toward the start of the query items as indicated by his profile data. A representative effectively transfers an item to my framework so it helps many individuals. The vast majority like it amid the review procedure. About 76% said it was one of a kind and they appraised it as pleasant. 21% of the general population fear this component yet not their desires. They have appraised it as tasteful. What's more, 3% individuals appraised it also.

Figure 6.3: Survey Question 3

Q4. What's your opinion about our administration?

We have given an item look through that gives data privately dependent on database data made by heads and clients. 41% individuals have discovered this valuable and they evaluated it as an extraordinary activity. 47% individuals enjoyed it, and yet they are not happy with satisfactory data and structure. They appraised it as tasteful. About 12% individuals should state this element is great and database data ought to be improved.

Figure 6.4: Survey Question 4

Q5. What is your Review after using our service?

This component gives query items to items accessible on our framework. The data furnished with our administrations is effective to the point that about 79% of individuals have concurred as an amazing component. 17% have actualized it well and it's fantastic palatable. 4% individuals were not content with the plan and yield. So they appraised it also.

Figure 6.5: Survey Question 5

So we have overviewed these inquiries in 10 individuals. We got blended input about our application from this review. The survey discloses to us that a portion of our works have truly halted and in certain territories where we have to improve. By receiving positive signs starting now and into the foreseeable future, we are attempting to fix those guidelines with the goal that we can make our application progressively dependable, usable and valuable [6].

CHAPTER 7

CONCLUSION

7.1 Future Scope

It's only a demo type right now. Later on we will work better plans, more highlights and more easy to understand alternatives. We will attempt to give better administrations to the client later on.

7.2 Conclusion

These days individuals are utilizing alternate route. They don't prefer to sit tight for inept issues. To spare our valuable time and item look issues, I made this application. On the planet, there is no fitting work application on this entry level position. With the goal that I pick it and attempt our best to give a few administrations to the world's people. Each disclosure has some trouble. There's one of these as well. When it has turned out to be prevalent, and after that, individuals will most likely make a computerized world and move to another progression of creation.
