Acknowledgement

First my Sincere gratitude goes to Almighty for giving me all support towards the successful completion of this thesis and masters degree program in journalism and mass communication at daffodil International University.

A very big thank you to my supervisor Dr. Sheikh Mohammad Shafiul Islam, Associate professor of the department for his suggestion, advice and great support.

Finally I would like to thank you to all my classmate at Daffodil International University.

Letter of Transmittal

Subject: Submission of Thesis on Rohingya issue coverage in electronic media

Dear sir,

I am pleased to submit the thesis on Rohingya issue coverage in electronic media in Bangladesh . The thesis is an output of my rigorous study work and the content of this thesis was not taken from the basis of any previous degree awarded to me or to the best of my knowledge to anybody else. I would like to declare here that the project has not been submitted by me for any research degree in any other University or institution.

I have properly acknowledged all the intellectual thought and opinions found relevant have been borrowed and used in this thesis report.

I would like to thank you very much for your whole-hearted support and efforts to accomplish this thesis

Sincerely yours,

Md Mainul Islam

ID- 122-28-139

Certificate of Approval

I am gladly certifying that the thesis titled 'Rohingya refugee issue on Bangladeshi tv news' conducted and prepared by Md Mainul Islam bearing ID no- 122-28-139 of the Department of Journalism and mass communication has been approved for presentation and the viva. He has completed the project under my supervision during fall-2019 semester.

The Thesis is an authentic work of Md Mainul Islam. I would like to recommend the thesis for further Academic approval.

Md Mainul Islam bears a strong moral character and honest personality. It was really a matter of pleasure to work with him. I wish him all success in life.

A handwritten signature in black ink, appearing to read 'Shafiul', is written over a light blue horizontal line.

Chapter one

Introduction and background of the study

Rohingya refugee issue one of the most focusing issues in world media. In Myanmar, there happened most atrocious Rohingya muslim killing by Myanmar Army and their associates. Since 25 August of 2017 about one million Rohingya came to Bangladesh to save their life. They got shelter in different refugee camp in coxbazar.

. Since 25 August while RohingMuslim came to Banglades . The whole world media treat this as very important facts. Bangladeshi Tv media also treated this from different aspect. In my thesis I have highlighted some of Bangladeshi Tv media's treatment on Rohingya a issue. This is why have chosen four electronic media's news of nineteen days. Two are mixed channel and two are news channel. I have focused on how Tv media treated this issue and what was the content and quality as well.

Rohingya refugee issue in Bangladeshi TV news

1.1.What is Rohingya crisis:

Rohingya crisis is not new . This was started on the mid of forty decades. According to the historian ,Rohingya have been living in Arakan of Myanmar during the British colonization between 1824 and 1948, Migration of laborers from India and Bangladesh to Myanmar was significant. Then the migration was considered an internal movement because the British administrated Myanmar as a province of India.

After the independence of Myanmar in 1948 the government declared this migration illegal .citizenship was denied to Rohingya population. This crisis expanded in the mid of seventy. As a result of denying the Rohingya people started to come in Bangladesh. And there was five laces Rohingya living in coxbazar as refuse.

But in the year 2015, the situation started to get worse .according to the UN Refugee Agency (UNHCR), more than **723,000** Rohingya fled to Bangladesh since 25 August 2017. On 28 September 2018, Sheikh Hasina, the Prime minister of Bangladesh spoke at the 73rd United Nations General Assembly. She said there are 1.1 million Rohingya refugees now in Bangladesh. This is burden for Bangladesh as well as humanitarian crisis.

1.2

Who are the Rohingyas :

The Myanmar Government says that Rohingya people are not Burmese citizens – but the Rohingyas have been living in Myanmar for generations. Today, they are a people with no home or citizenship. Even their name is denied them in Myanmar.

Rohingya people are being widely abused and exploited. They are one of the most persecuted minorities in the world.

1.3

Present situation :

Now the Rohingya population is overloaded in Bangladesh . It is more than our capacity to accommodate them .Rohingya population is 1.1 million in Bangladesh as per information provided for Bangladesh government. But the situation is inhuman as Since they are a lot in number, they are living a bad life. The Number of Rohingya is more than one million in only two Upazila .So besides the destruction of the biodiversity, the local people are also suffering .

Now Myanmar government is not as much willing to bring them back . As a result the government is considering the transfer of most Rohingyas to vashanchar in Noakhali.

1.4

Rational of the study :

Rohingyarefuse is the most focusing issue in all over the world . There happened most atrocious mass killing over the Rohingya Muslim by army backed government and there associates .since 25 August of last year 8 lac people fled away to Bangladesh to save their life. They got shelter in different refuse camp in Cox's bazar . Here there living standard is not up to standard . Since 25 August while Rohingya Musilm came to Bangladesh the whole world media treat this as very important facts . Bangladeshi Tv media also treat this from different aspect . In my thesis I will highlight some of Bangladeshi tv media's treatment on Rohingya issues .

This is why I will chose four electronic media's news of five days. Two are mixed channel and two are news channel. I will focus on how they treat this burning issue.

Chapter – two

The study methodology:

2.1

Study Objective :

The specific objectives include to figure out :

1. Understanding the tendency of Reporting on Rohingya issues .
2. Comprehending type and nature of the stories
3. Figure out quality of Reporting
4. Find out the behind reason of Rohingya crisis.
5. Finding out the role of media while rohingya crisis started .

2.2

Method of study :

Content analysis method was applied carrying out the study.

2.3

What is content analysis :

Content analysis is a specific research approach used frequently in all the areas of the media study . The method is popular with mass media researchers because it is an efficient way to investigate the content of the media .

2.4

Scope of Analysis :

Following aspects of the coverage were reviewed

1. Type of the content and classification of news
2. Nature of News (Strait jacket , investigation , interpretative, follow up etc)
3. News treatment (The serial of news , it is called Run down in the terms of television news)
4. Quality of information sources and quality of analysis
5. Quality of content.

2.5

Sampling:

Which channel

I have selected four leading TV channels of Bangladesh. Among them two are news channels who all the broadcasts news and to mix channels who broadcast both news and program . News Channels are –

1. Independent Television
2. Jamuna Television

Two Mixed channel are:

1. ATN Bangla
2. Banglavisión .

2.6

Number of Reports I studied

SL	Name of TV channels	Number of Reports
01	ATN Banlga	05
02	Banglavisión	05
03	Independent tv	05
04	Jamuna television	04

As part of my study I have collected total nineteen news from 26 August 2017. The reason behind collection of news on August 25 and next is that, at this time, there was shield Of Rohingya people started coming to Bangladesh. At that time most of the media of the world was watching the Rohingya issue very sincerely as it was unprecedented inhuman happening occurred.

As the issue was surrounding Bangladesh, Bangladeshi media treated this issue in different way . Every of Bangladeshi Television channel covered that issue by their own means and way . But the tendency of covering news was not same . So I have picked up different issue of four television's news treatment in my study .

2.7

Why this channels :

ATN Bangla is the oldest channel in Bangladesh. It has different significance in the society. This channel is much more credible since it beginning. And the quality of their news marks as good standard.

Banglavisision :Banglavisision is also the leading channel of Bangladesh . It has been broadcasting since 2005 while there were few Television channel broadcasting. This television covered Rohingya issue very sincerely sending the special reporter to coxbazar while Rohingya got entry into Bangladesh . There had three news teams to cover that issue.

JamunaTelevision :According to the Television Rating point (TRP) Jamuna television always belong top position in Bangladesh . This channel broadcast only news . As a news channel, Rohingya issue was most treated topic for Jamunatelevision . Moreover this channel a bit marked for their anti government sentiment. So there has a scope to make out the tendency of coverage. This is why I have selected this tv channel as part of my study .

Independent Television: It is also a full time news broadcasting channel. This channel is owned by Salman F Rahman a ruling party leader of Bangladesh. This is most familiar Tv channel as pro government. so there has a scope to find out the tendency of coverage . It is easy to make out whether they has different agenda or not regarding Rohingya issues .

Resource question:

Based on the aforesaid discussion from different paradigms related to the role of electronic media the following inquiries were made in the present study

1. Do the television media in Bangladesh consider appropriate topic on Rohingya issue.
2. Do the daily events and surface matters around the Rohingya issue get more coverage in the media I selected for my study?.
3. What was the usual type of content covered by the television.
4. Do the contents follow standard practices of journalism.

Chapter three

3.Findings

4.1 Tendency of Report coverage:

Table – 1

Tv channel	Theme of Reports
ATN Banlga	Rohingya's access in Bangladesh
Banglavisision	Overall human crisis
Independent	Torture on Rohingyamuslim in Myanmar
Jamunatv	Human crisis and the role of Bangladeshi authority like BGB and Local administration

Description :

Basically the Rohingya crisis was exposed on August 25, 2017. Since then, the whole world media was broadcasting the crime against humanity in Rakhain province of Myanmar . There were many more inhuman incident occurred in Myanmar . But International media were not permitted to go over there to pick up the real scenario.

There had little bit scope to make investigative story over Myanmar . All of Bangladeshi Tv channel like other world media went to coxbar and Bandarban to cover the Rohingya issue . The peoples voice those who were expelled from Myanmar were the main hand of making news . Some of Rohingya people . Some people who had taken some inhuman and atrocious pictures and video on mobile when they were running away to Bangladesh to for saving their life . Lastly some of them provided that picture and video footage to Tv Journalists . That Common pictures given by the Rohingyas were spread to all Bangladeshi media . So there was very few different

footage and content among all Bangladeshi media . All four of Television channels I have studied on news, there had similarity between content on everyday . All focused on Rohingya's Illegal entry and inhuman situation . Moreover they Importantly focused on Bangladesh Border guard's role regarding Rohingya crisis .

3.2. Focus of the Content :

All of four television I selected basically highlighted almost same issue , On Basic issue there was no difference The focusing content was below –

1. Illegal entry of Rahingya.
2. Humanitarian crisis.
3. Torture on Rohingya in Myanmar.
4. Some of Rohinga are missing on the way of fleeing .
5. Anxiety of International community against Rohinga Torture
6. Shortage of food and water .
7. Inhuman condition of Rohinga women and children .
8. Uncountable Rohinga are begging the permission in Bangaldesh-Myanmar border to get entry in coxbazar.
9. Local people of coxbazar and their concern .
10. Border guard Bangladesh (BGB) stand in border .

3.3

Types of Reports.

TV Channels	Number of Reports	Surface	Investigative	Follow up	Interpretative
ATN Bangla	5	2	1	2	
Bangla vision	5	3	1	1	
Independent	4	3	1		
Jamuna TV	5	3	2		

The study shows that most of the reports regarding Rohingya issue were strait jacket.

Reports mostly based on same issues and the content is almost same. Among five reports of Banglavisision one report found investigative while Independent and Jamunatv made one special story among each five. But the among Five days reports I collected no special or investigative story found on ATN Bangla . The reason behind less investigative or special report is the entry was restricted for Bangladeshi journalist in Myanmar so that the Bangladeshi journalist can see the situation.

3.4

Treatment of the Contents :

Among five reports of ATN bangle dated 25.08.2017 to 29.05.2017, All Rohingya related news treated as first news in rundown.

In Independent four news were treated as first and one was second.

All the news of Banglavisision were very careful to treat the news in good way. All five of news were first news .

Jamuna and Independent tv both broadcasted as first news of Rundown .

Chapter four :

4. Analysis

I have studied on nineteen Report of Four television channels. Analysis is below –

4.1

Visualization :

Name of Tvchannel	Number of Report where visualization is standard	Number of Reports where visualization is not standard
ATN Bangla	3	2
Banglavisision	4	1
Independent tv	5	-
Jamuna television	3	1

Most of the footage of **ATN Bangla** broadcasted was not very standard. Their has a great reputation of news. But in most of the news broadcasted, they could not do justice to the name. Most of the visualization that was broadcasted on August 26 was mostly on mobile.

There had vague footage on 30 August News of ATN Bangla .

The visualization of **Banglavisision** was not bad. But footage regulation was not satisfactory level.

Several direct shooting scenes were shown on the news of **Jamuna TV**news. This is not fair. It goes against the policy of visual journalism. There might have feeble hearted viewers.

Some footage of **Independent television** goes against ethics of visual journalism. They showed close picture of dead body and injured person.

4.2

Sources of Reports

Name of TV channels	Number of Reports where source is clear	Number of Reports where source is not clear
ATN Bangla	2	3
Independent	3	1
JamunaTv	4	1
Banglavisision	3	2

The news of 26 August on ATN Bangla regarding rohingya illegal access all source were clear where the main source were Rohingya who expelled from Myanmar .

The news of 27 August of ATN Bangla where mentioned about new clash but the source was not described as well as video footage was not shown .

The news of 30 August where a Rohingya women's speech was taken by Reporter but she was telling on her own language but there was no Dubbing.

No source was described on 27 August news of Banglavisision while informing the number of Rohingyaentry .

73 Rohingya detention information has been given. But there was no source described on the date of 27 August news on **Banglavisision** .

Myanmar urged the United States to stop the conflict. There was a mention in the news of **Jamuna TV** on August 27 . But who urged to stop this was not described in script. And video footage was not shown regarding US urges.

There was no reference or source to the number of people injured by Myanmar army's firing by the reports of **Jamuna TV** on 27th August.

The news of **Independent television** on 27 August were mentioned about the number of pushed back Rohingya, but source was not clear.

4.3

What about Script :

In Television news the script should be shorter than print media . Because there has a little bit scope to make understand the thing through script . Unnecessary Information should not be given through television Reporting.

In case of crime or violence related news no Literature based script should not make. Because this not fair. Only the real scenario or happening must to be described.

But Jamuna and Independent television frequently described the situation with unimportant information rather than important happening. In some case there had description but visual was not found.

The text of ATN Bangla and Banglavisision script was weak though information important. In some case this two channels provided unnecessary information.

4.4

Situation of Women:

The situation of women and children was very critical. The Reports found that, most of women and children had to walk for four or five days continually. While walking some of Women were missing by the Myanmar Army. The women who were able to reach to the Bangladesh Border had fled frequently. Important thing is most women had to strive for two or three days. Even after touching Bangladeshi land some women were pushed back to the Myanmar along with their male company.

4.4

What was the situation of Children

Most pathetic situation happened to Children . Children who came to cox bazar had to strive for long times along with their family. Some of Reports shows that, parents are alive with having food from tree of jungle, but the children are not able to have such food that parents have had. So their condition was very curtailed because of malnutrition.

Chapter five

Recommendation:

There is no quality at all among the 19 Reports I have studied so far . Visualization was the big problem I have noticed there. To make an effective and good report, visualization is the element which must be existed.

But the absence of this element was found in those reports. There was lack of information in few reports which is not desirable in making good report.

one must dig through the deep. Details of incident are not shown in TV reporting maximum time . Because time is limited there. That's why the key information should be highlighted there in that type of reporting . Excess unimportant information should be avoided .

Reporters do not intend to show anything from their personal interest. There should be reference in describing news which makes the news authentic and acceptable. In visual report, Footage is an important element.

Mobile can also be used to capture any sudden incident which happens before eyes . But every footage can't be captured by mobile phone .

To maintain the quality of TV reporting , quality camera and video graphed are necessary . The reports on which I have researched are reported by local representative mostly . To cover the news there was lot of limitations and machinery weakness I have found .

If the quality reporters of institutions were present in making such news , the news would be perfect for presentation .

To present this type of news, time should be extended of news package . Then it will be possible present the most important information to all .

Conclusion

Rohingya crisis is the most atrocious issue in world history. There has uncountable issue to make story for broadcasting. But Bangladeshi Television channel has a limitation of capability to cover all happening. They has limitation of good reporter, good videographer and latest technology as well.

In spite of the limitations, most of the cases have shown professionalism in Reporting . But there had some fault . For example there had lack of good visualization and some case lack of sources.

In my project I have tried to pick up basic and fundamental content, views and overviews of reporting on Rohingya issues that will refer a fruitful project, I think.
