---

## **Declaration**

I hereby declare that this project report has been done by us under the supervision of Afsana Begum, Lecturer (Senior Scale), Department of Software Engineering, Daffodil International University. I also declare that neither this report nor any part of this report has been submitted elsewhere for the award of any degree.

### **Supervised By:**

## ACKNOWLEDGEMENT

At the very beginning, we are very grateful to the almighty Allah for achieving our goals and completing this whole project. We would like to acknowledge and express our gratitude to many individuals who have helped us so much to complete this project.

First of all, we would like to express our deepest thanks and gratitude to our honorable teacher and supervisor **Asana Begum**, Lecturer (Senior Scale), Dept. of Software Engineering, Daffodil International University, Dhaka. Her inspiration, continual encouragement and valuable advice, reading many inferior drafts and correcting them at all stage have made it possible to complete this project. We would like to thank our entire course mate in Daffodil International University, who took part in this discuss while completing the course work.

Finally, we must acknowledge with due respect the constant support and patience of our parents

## Table of Contents

<b>Chapter 1: Introduction</b>		
1.1	Project Overview	2
1.2	Project Purpose	2
1.2.1	Background	2
1.2.2	Benefits & Beneficiaries	2
1.3	Stakeholders	2
1.4	Proposed system model	2
1.5	Project Schedule	2
1.5.1	Gantt Chart	3
1.5.2	Release Plan/Milestone	3
<b>Chapter 2: Software Requirement Specification</b>		
2.1	Functional Requirements	5
2.2	Data Requirements	7
2.3	Performance Requirements	7
2.3.1	Speed and Latency Requirements	7
2.3.2	Precision or Accuracy Requirements	8
2.3.3	Capacity Requirements	8
2.4	Dependability Requirements	8
2.4.1	Reliability Requirements	8

# **Chapter 1**

## **Introduction**

## **1. Introduction**

### **1.1 Project Overview:**

In our university the existing system is not automated and it is time a consuming process for that reason it is quite hard to manage. My proposed system will remove this type of all redundancy. From this system student and teacher both will be benefited. Student will apply for overlap courses and teacher will verify the matter and then they will approve the application. It will reduce the valuable time of student and teacher both.

### **1.2 Project Purpose:**

Make the processing system automated. It reduces the processing time and also benefited for both teacher and student.

#### **1.2.1. Background**

There is a problem of existing system. Student fill the form and submit it. It also takes a long time for collecting teacher signature. Teacher at first see the application then approved it. It takes a long time for making a list of overlap exam. I want to develop an automated system. In this website where student fill up the form online and check their status and teacher also get notification through mail.

#### **1.2.2 Beneficiaries and benefits**

- This website is fully functional and flexible.
- Student and teacher both benefited by website.
- Easy to use.
- It reduces the processing time
- This website is safe and secure

### **1.3 Stakeholders**

**2.2.1. Admin**

**2.2.2. Teacher**

**2.2.3. Student**

### **1.5 Project Schedule**

To complete the project at the right time, project schedule helps for proper planning. I also make a project schedule to complete my project properly.

## 1.5 Ganttchart

Figure – 1.5.1: Gantt chart

### 1.5.1 Milestone

Milestones, a timeline of a project, will clarify the task

Table-1.5.2: Milestone

Task	Task Name	Time
1	Project Planning	2week
2	Requirements gathering and analysis	2 week
3	Database design	2 week
4	UI design	2 week
5	Development	3week
6	Implementation	2 week
7	Testing	1 week
8	Evaluating the project	1 week

## **Chapter 2**

# **Software Requirement Specification**

## 2.1 Functional Requirements

### 2.1.1 User Registration

<b>Fr-01</b>	<b>User Registration</b>
<b>Description</b>	This system allow to user to registration the system using first name, last name, email, id, password and become a valid user
<b>Stakeholder</b>	<b>Teacher, student,</b>

### 2.1.2 Login

Table-2.1.2: Login

<b>Fr-02</b>	<b>Login</b>
<b>Description</b>	In this website there are 3 types users like student, teacher, admin etc. User can login after complete Registration. Admin can login anytime.
<b>Stakeholder</b>	<b>Teacher, student, admin</b>

### 2.1.3 Formsubmit

Table-2.1.3: Form Submit

<b>Fr-03</b>	<b>Form submit</b>
<b>Description</b>	In this website student can only submit their application for overlap examination. To submit a form a person should have registered as a student first.
<b>Stakeholder</b>	<b>Student</b>

### 2.1.4 View status

Table-2.1.4: View status

<b>Fr-04</b>	<b>View status</b>
<b>Description</b>	In this website student can only view their status who are already submit their application.
<b>Stakeholder</b>	<b>Student</b>

### 2.1.5 View routine

**Table-2.1.5: View routine**

<b>Fr-05</b>	<b>View routine</b>
<b>Description</b>	All user can view the current routine who are visit the website .
<b>Stakeholder</b>	<b>Student, teacher, admin</b>

### 2.1.6 Notification

**Table-2.1.6: Notification**

<b>Fr-06</b>	<b>Notification</b>
<b>Description</b>	Teacher will get notification through mail when a form submit from student .
<b>Stakeholder</b>	<b>Teacher</b>

### 2.1.7 View application

**Table-2.1.7: View application**

<b>Fr-07</b>	<b>View application</b>
<b>Description</b>	Teacher who will get notification they can view the application. But teacher must have registered. After login they can view application.
<b>Stakeholder</b>	<b>Teacher</b>

### 2.1.8 Allow and deny Application

**Table-2.1.8: Allow and deny Application**

<b>Fr-08</b>	<b>Allow and deny Application</b>
<b>Description</b>	Teacher who will get notification they can view application and they will have two option allow application or deny application.
<b>Stakeholder</b>	<b>Teacher</b>

## 2.1.9 Allow, deny and pendinglist

**Table-2.1.9: Allow, deny and pending list**

<b>Fr-09</b>	<b>Allow, deny and pending list</b>
<b>Description</b>	Admin and teacher can view all allow, deny and pending application list.
<b>Stakeholder</b>	<b>Admin, teacher</b>

## 2.1.10 Searchapplication

**Table- 2.1.10 Search application**

<b>Fr-10</b>	<b>Search application</b>
<b>Description</b>	In this system both admin and teacher will search application. If they want any specific application they can search inputting mid and semester name.
<b>Stakeholder</b>	<b>Student</b>

## 2.2 DataRequirement

- Full information of user
- Need to know about how system work
- Managing skills and programming skills

## 2.3 Performancerequirements

It's very necessary to maintain the performance of the project. To assure the better performance, this project has to meet some requirements which will provide the better performance.

### 2.3.1 Speed and LatencyRequirements

While inserting or viewing the website in the browser, website need a minimum amount of speed to perform the task

**Table-2.3.1 Speed and Latency Requirements**

<b>Slr-01</b>	<b>The system will be faster</b>
<b>Description</b>	When user browsing, it depends on internet speed. It also depends on server bandwidth speed.
<b>Stakeholder</b>	<b>Admin, teacher, student.</b>

### 2.3.2 Precision and Accuracy Requirements

Website has to confirm the Legibility and Accuracy of the data.

**Table-2.3.2: Precision and Accuracy Requirements**

<b>Lar-01</b>	<b>Data Accuracy</b>
<b>Description</b>	Data should have to accurate at the time of inputting. If the data will not accurate system will not allow to save the data. Like registration, login when user run the application first time they must register with valid data input.
<b>Stakeholder</b>	<b>Admin, teacher, student</b>

### 2.3.3 Capacity Requirement

The website should maintain the all inserting data.

**Table-2.3.3: Capacity Requirement**

<b>Cr-01</b>	<b>The system will manage all the inserting data in database.</b>
<b>Description</b>	All registration data like Student registration data, Teacher registration data, Form information are store in the database.
<b>Stakeholder</b>	<b>Teacher, Student.</b>

### 2.4 Dependability Requirements

Dependability means, it measures of a website availability, reliability, security etc. Here, dependability means the running time of this project.

#### 2.4.1. Reliability and requirements

**Table-2.4.1: Reliability and requirements**

<b>RR-01</b>	Our system is more reliable.
<b>Description</b>	The system is able to behave consistently active in our varsity
<b>Stakeholders</b>	Admin

## 2.4.2 Availability Requirements

**Table-2.4.2: Availability Requirements**

<b>Ra-01</b>	<b>The system must be available 24x7</b>
<b>Description</b>	<ul style="list-style-type: none"><li>• It's available 24 hours in a day.</li><li>• The system must be updated regularly.</li></ul>
<b>Stakeholder</b>	<b>Teacher, Student</b>

## 2.4.3 Robustness or Fault-Tolerance

**Table-2.4.3: Robustness or Fault-Tolerance**

<b>Rft-01</b>	<b>The system handles over access and system error</b>
<b>Description</b>	Sometimes multiple user can over access to this system. The system can handle multiple user access
<b>Stakeholder</b>	N/A

## 2.4.4 Safety critical requirements

There are no specific safety critical requirements.

## 2.5 Maintainability and Supportability Requirement

For Maintenance The website and support the website, some people associate the project.

### 2.5.1 Maintenance Requirements

**Table-2.5.1: Maintenance Requirements**

<b>MR-01</b>	<b>Website helps to Delete the member info at any time</b>
<b>Description</b>	Admin can delete member info if its fake
<b>Stakeholder</b>	Admin

### 2.5.2 Supportability Requirements Specification

SRS-1. To understand the website's behavior on a technical support is required by the website operator. The reason for reading them might be

SRS-2. Website malfunction has occurred and the system operator has to find the exact point of time when this happened

SRS-3. Website produces wrong results and the developers must be able to reproduce the data flow through the system

SRS-4. Hacker tried to breach the website's security mechanisms and the website operator must understand what he did.

### **2.5.3 Adaptability Requirements**

There are no specific adaptability Requirements.

### **2.5.4 Scalability or Extensibility Requirement**

No Visible extensibility requirements

## **2.6 Security requirements**

There are no access requirements beside those that have been outlined in the below:

SR-1. Log in as an Admin

SR-2. Login

as a Teacher

SR-3. Login

as a Student

To get access to this system or a specific module the system must provide a central authentication mechanism. In order to prevent anyone to exploit stolen participants all participants password must be encrypted in hash process.

### **2.6.1 Accessibility Requirements**

This website provides accesses the different module, by access the authentication way the authentic user.

### **2.6.2. Integrity requirements**

To protect credentials of user from being stolen, all passwords are stored in encrypted form. The Requirements significantly reduces the value of stolen user credentials, it's not easy to decrypt the password.

### 2.6.3 Privacy Requirements

**Table- 2.6.3: Privacy Requirements**

<b>PR-01</b>	<b>All data will be protected</b>
<b>Description</b>	The main requirement in the context is the generation of participant's data for analysis

### 2.7 Usability and Human-Interaction Requirements

This website easy to use and all of the people who wants to take part overlap exam.

#### 2.7.1 Ease of Use Requirements

To make specific consumers to achieve quantified objectives with more effectiveness, satisfaction and efficiency in our system.

#### 2.7.2 Personalization and Internationalization Requirements

There are no internationalization requirements added. We only make it automated for our overlap exam processing system.

#### 2.7.3 Understandability and Politeness Requirements

This system is very easy to use and understand, and simple user-interface. Anyone can easily access this system easily

#### 2.7.4 Accessibility Requirements

There are no specific accessibility requirements.

#### 2.7.5 User Documentation Requirements

**Table-2.7.5: User Documentation Requirements**

<b>UDR-01</b>	<b>The system developer documentation</b>
<b>Description</b>	To develop my project , I have specified the requirements of user documentation I involved to my project documentation
<b>Stakeholder</b>	Website developer

### 2.7.6 Training Requirements

There are no training requirements needed to build this system.

## 2.8 Look and Feel Requirements

There should not exist any unnecessary things on this project.

### 2.8.1 Appearance Requirements

**Table-2.8.1: Appearance Requirements**

<b>LF-01</b>	<b>Labels of mandatory fields must be bold</b>
<b>Description</b>	Labels of mandatory fields must be bold to identify them as being of mandatory.
<b>Stakeholders</b>	Admin

### 2.8.2 Style Requirements

**Table-2.8.2: Style Requirements**

<b>LF-02</b>	<b>The look and feel must be manageable using style sheet.</b>
<b>Description</b>	The styling of the elements of the web based user interface will be defined using CSS, JavaScript and bootstrap
<b>Stakeholders</b>	System Developer

## 2.9 Operational and environmental requirements

An operational and environmental requirement is very important because this project may not work in every environment and its operation may not accurate in every time.

### 2.9.1 Expected Physical Requirements

There are no specific expected physical requirements.

### 2.9.2 Requirement for Interfacing with Adjacent System

There is no specific interfacing with adjacent system requirements.

### 2.9.4 Release Requirements

There are no specific release requirements but in the project schedule section it was described briefly.

## 2.10 Legal Requirement

Fraudulent data and engaging third party software or third person is totally prohibited.

### 2.10.1 Compliance Requirements

Compliance requirements are only guidelines for compliance with the hundreds of laws and regulations applicable to the specific type assistance used by the recipient, and their objectives are generic in nature due to the large number of federal programs. Each compliance requirement is identified by a letter, in alphabetical order.

### **2.10.2 Standards Requirements**

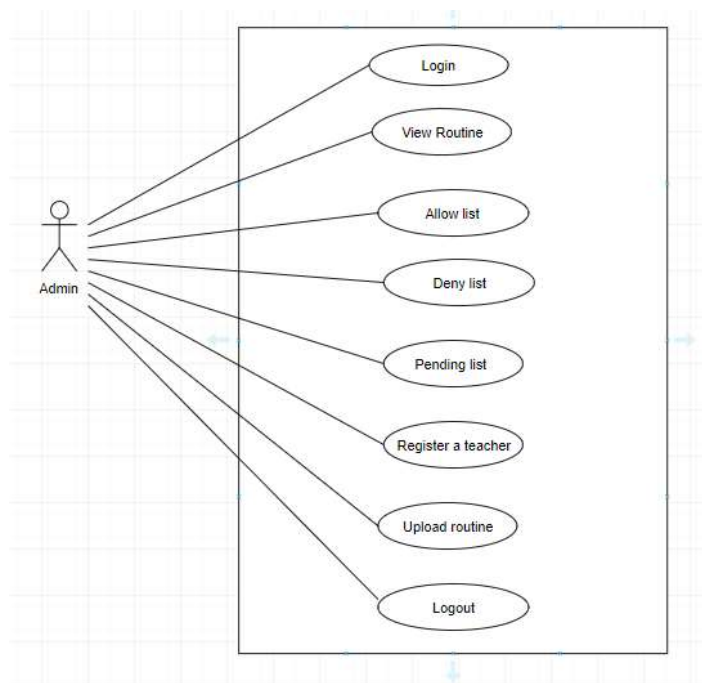

To comply with the Open Standards Requirement, an "open standard" must satisfy the following criteria. If an "open standard" does not meet these criteria, it will be discriminating against open source developers.

**CHAPTER 3**  
**System Analysis**

### 3.1 Use CaseDiagram

Use case diagram, use to be describing the activities of the system in a graphical way. How many actors and how many activities how to work that represent in one diagram that is a use case. This view of user perspective of this system. Graphically represent all activities and all actors.

#### 3.1.1 Use Case forAdmin

**Figure-3.1.1: Use case Admin**

### 3.1.2 Use Case ForTeacher

Figure-3.1.2: Use case Teacher

### 3.1.3 Use Case Diagram forStudent

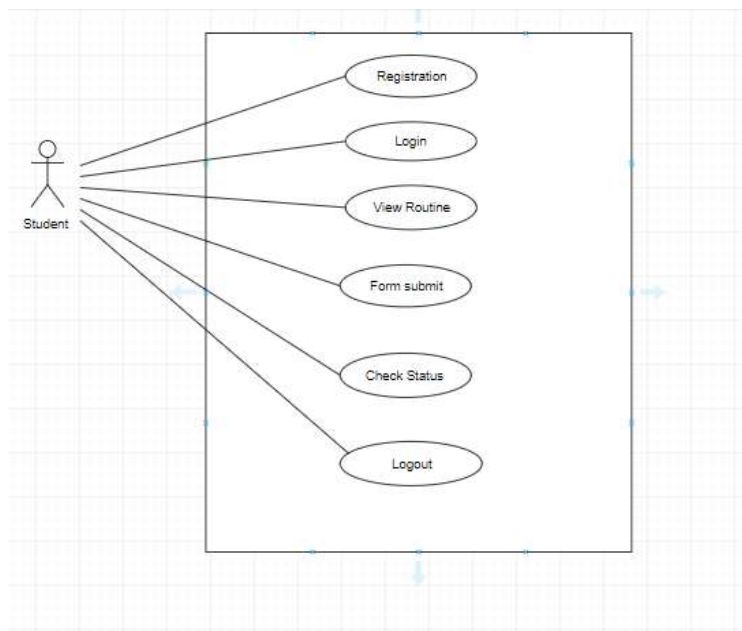

Figure-3.1.3: Use case Student

## 3.2 Use CaseDescription

### 3.2.1 UserRegistration

**Table- 3.2.1: User Registration**

Use Case Name	Register User
Actor	student
Description	It is an important functionality for storing registration information.
Goal	Without registration user cannot the system.
Priority	Essential
Trigger	Selecting Register
Pre-Condition	The system has supported with a Database to store data
Basic Path	User enters personal information
Post-Condition	Personal information is stored & user can login
Possible Enhancement	None

### 3.2.2. Login

**Table-3.2.2: Login**

Use Case Name	Login
Actor	Admin, Teacher, Student
Description	It is an important functionality for accessing the system
Goal	Authorized user can easily access
Priority	Essential
Trigger	Selecting Login
Pre-Condition	Teacher and Student must be registered
Basic Path	Admin, teacher and student enters email and password
Alternative Path	None
Post-Condition	Login and view dashboard
Possible Enhancement	None

### 3.2.3. View Routine

**Table-3.2.3: View Routine**

Use Case Name	View Routine
Actor	Admin, Teacher, Student
Description	It is important functionality for seeing exam routine.
Goal	All user can see the actual exam time
Priority	Optional
Trigger	Selecting routine
Pre-Condition	All user must be Logged In
Basic Path	All user can easily make a decision for exam
Alternative Path	None
Post-Condition	View routine
Possible Enhancement	None

### 3.2.4. Formsubmit

**Table-3.2.4: Form submit**

Use Case Name	Form submit
Actor	Student
Description	It is an important functionality for storing application
Goal	application must be successfully store in database
Priority	Essential
Trigger	Selecting application information
Pre-Condition	Student must be Logged In
Basic Path	Student enter form information
Alternative Path	None
Post-Condition	Application stored in database
Possible Enhancement	None

### 3.2.5 Check Status

**Table- 3.2.5 Check Status**

Use Case Name	Check status
Actor	Student
Description	It is an important functionality for checking store status.
Goal	Check status that are store in database
Priority	Essential
Trigger	Selecting status information
Pre-Condition	Student must be Logged In
Basic Path	Student must submit form
Alternative Path	None
Post-Condition	Status stored in database
Possible Enhancement	None

### 3.2.6. GetNotification

**Table-3.2.6: Get Notification**

Use Case Name	Get Notification
Actor	Teacher
Description	It is an important functionality for managing notification
Goal	teacher get notification through mail for each application that they can view the application
Priority	Essential
Trigger	Getting notification
Pre-Condition	Form must be submitted
Basic Path	Teacher must registered
Alternative Path	None
Post-Condition	Send notification through mail
Possible Enhancement	None

### 3.2.7. Allow and denyApplication

**Table-3.2.7: Allow and deny Application**

Use Case Name	Allow and deny application
Actor	Teacher
Description	It is an important functionality for allow and deny application
Goal	Allow and denied application must be

successfully store in database
Essential
Press allow or deny
Teacher must be Logged In
Teacher allow or deny the application for exam and the system stored in database
None
Allow and deny application stored in database
None

### 3.2.8 Register a teacher

**Table-3.2.8: Register a teacher**

Use Case Name	Register a teacher
Actor	Admin
Description	It is an important functionality for storing all teacher information
Goal	Teacher information must be successfully store in database
Priority	Essential
Trigger	Selecting teacher registration
Pre-Condition	Admin must be Logged In
Basic Path	Admin enters teachers all information
Alternative Path	None
Post-Condition	Teacher stored in database
Possible Enhancement	None

### 3.2.9. View Allow, Deny and Pending applicationlist

**Table-3.2.9: View Allow, Deny and Pending application list**

Use Case Name	View Allow, Deny and Pending application list
Actor	Admin, Teacher
Description	It is an easy functionality for seeing all application list
Goal	How many applications are allowing, deny and pending are store in database. Admin and Teacher can easily view list
Priority	Essential
Trigger	Selecting all application list
Pre-Condition	Admin and teacher must be Logged In
Basic Path	Admin, TeacherClick application list
Alternative Path	None
Post-Condition	View all application list

### 3.2.10. UploadRoutine

**Table: 3.2.10: Upload Routine**

Use Case Name	Upload Routine
Actor	Admin
Description	It is an important functionality for uploading a new routine
Goal	Upload a new pdf routine that can see the all user
Priority	Essential
Trigger	uploading routine
Pre-Condition	Admin must be Logged In
Basic Path	Admin must click upload file
Alternative Path	None
Post-Condition	View the new routine
Possible Enhancement	None

### 3.2.11 SearchApplication

**Table-3.2.11: Search Application**

Use Case Name	Search Application
Actor	Admin , Teacher
Description	It is an easy functionality for searching application information
Goal	Admin, Teacher easily find out a patient
Priority	Optional
Trigger	Selecting Application Information
Pre-Condition	Admin, teacher must be Logged In
Basic Path	Admin, teacher can enter mid and semester name for search
Alternative Path	None
Post-Condition	View the matching application information
Possible Enhancement	None

### 3.2.12 Logout

**Table-3.2.12: Logout**

Use Case Name	Logout
Actor	Admin, Teacher, Student

Description	It is a functionality for finishing the work
Goal	Finish the work all user must be logout
Priority	Essential
Trigger	Selecting dashboard
Pre-Condition	All user must be Logged In
Basic Path	All user Click Logout
Alternative Path	None
Post-Condition	Logout Successfully Done
Possible Enhancement	None

### 3.3 ActivityDiagram

Activity diagram is the process of representations of all work flow of step by step activity and option. Activity diagram is a flowchart for representing one activity to another activity. Its show all operation of this system.

#### 3.3.1 Activity Diagram forAdmin

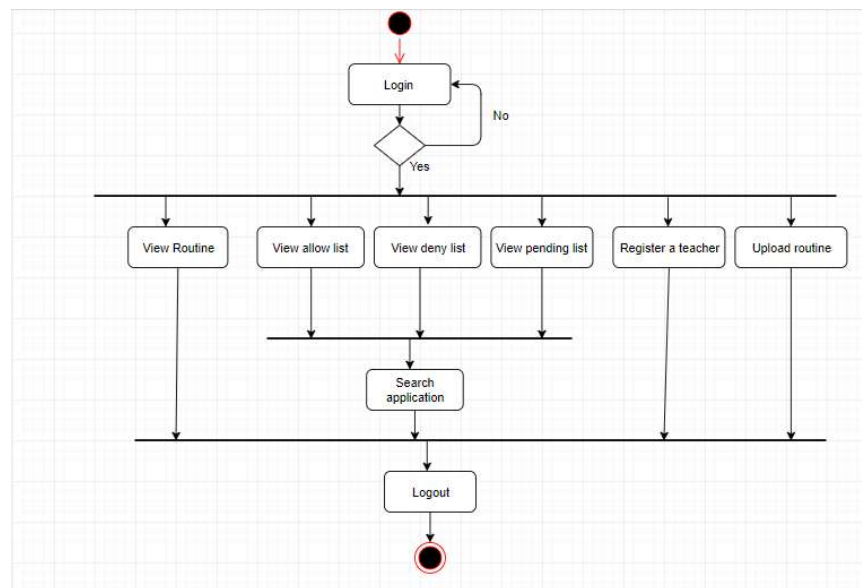

Figure-3.3.1: Activity Diagram For Admin

### 3.3.2 Activity Diagram for Teacher

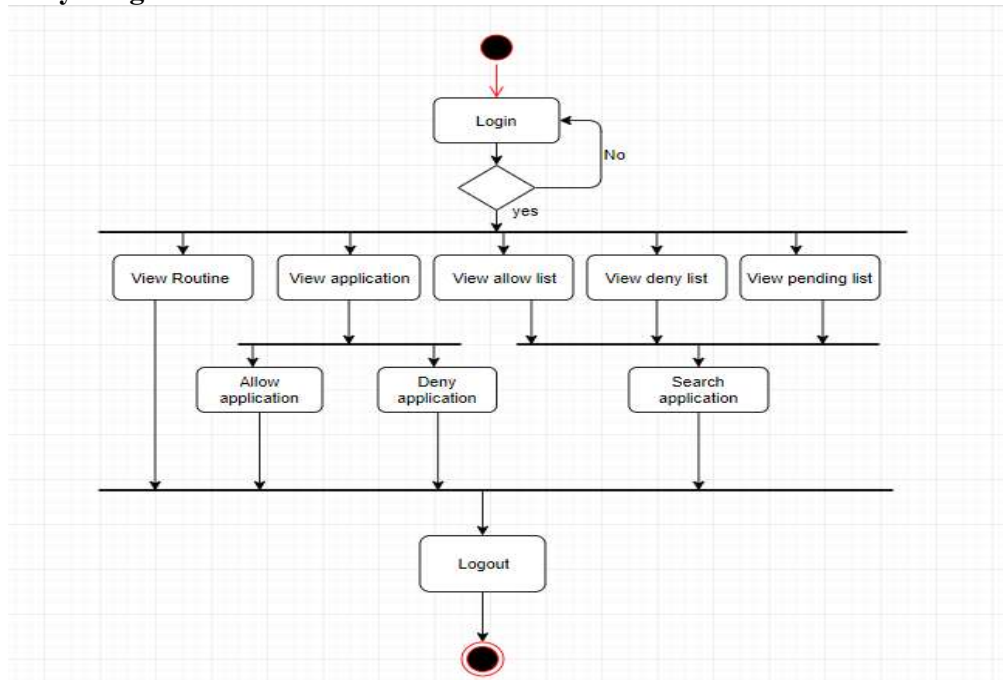

Figure-3.3.2: Activity Diagram for Teacher

### 3.3.3 Activity Diagram Student

## 4.5 Development Tools and Technology

### 4.5.1 User Interface Technology

#### 4.5.1.1 PHP

Using for developing backend for this web application

#### 4.5.1.2 jQuery

Using for frontend design and form validation

#### 4.5.1.3 CSS3 and

Bootstrap

Using for  
frontend design

#### 4.5.1.4 FontAwesome Using for various Icon for this web application

## **4.5.2 Implement Tools and Platform**

### **4.5.2.2 Sublime Text3**

Using for text editor

### **4.5.2.3 Xampp**

To build up a local server for this web application

### **4.5.2.4 Preferred DatabaseMySQL**

Using for various query

### **4.5.2.5 Apache**

Using for local Server

## **Chapter 5**

### **System Testing**

## 5. Testing Feature

Feature testing is the process of making changes in software system to add one or more new features or to make modifications in the already existing features. Each of these feature is said to have a characteristic that is designed to be useful, intuitive, and effective.

### 5.1 Testing Features

#### 5.1.1 Features to be tested

- 01 – Registration
- 02 – Login
- 03- FormSubmit
- 04- Register aTeacher

#### 5.1.2 Features can not to be tested

- 01- Viewstatus
- 02- SearchApplication
- 03- View All  
Application
- List 04-  
ViewRoutine
- 05-Upload Routine

## 5.2 Testing Strategies

A testing strategy is a general approach to the testing process rather than a method of devising particular system or component tests. Different testing strategies may be adopted depending on the type of system to be tested and the development process used.

### 5.2.1 Test Approach

A test approach is the test strategy implementation of a project, defines how testing would be carried out. Test approach has two techniques:

**Proactive** - An approach in which the test design process is initiated as early as possible in order to find and fix the defects before the build is created.

**Reactive** - An approach in which the testing is not started until after design and coding are completed.

### 5.2.2 Pass / Fail Criteria

The entrance criteria for each phase of testing must be met before the next phase can commence. Now the criteria for pass and fail are given below.

- 01- According to the given scenario the expected result need to take place then the scenario will be considered as pass otherwise that criteria should be failed
- 02- If an item tested 10 times, 9 times perfectly worked and single time do not work properly then it will consider as fail case.
- 03- System crash will be considered as fail case.
- 04- After submitting a query in the system, if expected page won't appear then it will be considered as fail case.

### 5.2.4 Testing Schedule

Test Phase	Time
Test plan creation	1 week
Test specification creation	2 weeks
Unit testing	4 weeks
Component testing	1 week
Test Phase	Time
Integration testing	1 week
Use case diagram	2 week
User interface testing	1 week
Load testing	1 week
Performance testing	2 week
Release to production	2 week

**Table-5.2.4: testing Schedule**

### 5.3 Testing Environment

Testing environment is a setup of software and hardware for the testing teams to execute test cases. In other words, it supports test execution with hardware, software and network configured. For test environment, key area to set up includes

- System and applications
- Test data
- Database server
- Front end running environment
- Client operating system
- Browser
- Hardware includes Server Operating system
- Network
- Documentation required like referenced documents/configuration guides/installation guides/ user manuals

#### 5.4 Testcase

A test case is a document, which has a set of test data, preconditions, expected results and post conditions, developed for a particular test scenario in order verify compliance against a specific requirement.

**Table 5.4.1: Test Case for User Registration**

<b>Test Case ID:</b> TC 01				<b>Module Name:</b> Registration		
<b>Sub Module:</b> Student Registration				<b>Test Designed by:</b> Jannatul ferdous		
<b>Test Priority (Low/Medium/High):</b> High				<b>Test Designed date:</b> 1.3.2019		
<b>Test Title:</b> User Registration with valid information				<b>Test Executed by:</b> Jannatul ferdous		
<b>Description:</b> Test the system's on registration page				<b>Test Execution date:</b> 10.3.2019		
<b>Pre-condition:</b> The user navigate to registration page and input the required filled. And click on the Register button.						
Step	Test step	Test data	Code module	Expected result	Actual Result	Pass/fail
1	Input first name	farhana	<b>Register.php</b>	User should be registered successfull y	User navigate	Pass
2	Input last-name	arnika				
3	Input email	arnika@diu.edu.bd				
4	Input varsity id	151-35-1125				
4	Password	1234567				
5	Confirm password	1234567				
<b>Post-conditions:</b> if the user information's are valid then the information will saved in the database otherwise show the invalid fields						

**Table 5.4.2: Test Case for User Login**

<b>Test Case ID:</b> TC 02		<b>Module Name:</b> Login	
<b>Sub Module:</b> User Login		<b>Test Designed by:</b> Jannatul ferdous	
<b>Test Priority (Low/Medium/High):</b> High		<b>Test Designed date:</b> 12.3.2019	
<b>Test Title:</b> User Login with valid email/user name and password		<b>Test Executed by:</b> Jannatul ferdous	
<b>Description:</b> Test the system's on login page		<b>Test Execution date:</b> 22.03.2019	

<b>Pre-condition:</b> The user has valid email and password. The current email is <a href="mailto:arnika@diu.edu.bd">arnika@diu.edu.bd</a> and password 1234567. The system navigates to Login page. And click on the Login button.						
Step	Test step	Test data	Code module	Expected result	Actual Result	Pass /fail
1	Navigateto LoginPage	Click on login tab	<b>login.php</b>	User should be able to login	User navigate tohome page	Pass
2	Input Email	arnika@diu.edu.bd				
3	Input Category	Student		successfuly		
4	Input password	1234567				
<b>Post-conditions:</b> User is validated with database and successfully login to account. The account session details are logged in database						

**Table-5.4.3 Test Case for User Login Failed**

<b>Test Case ID:</b> TC 03			<b>Module Name:</b> Login			
<b>Sub Module:</b> User Login			<b>Test Designed by:</b> Jannatul ferdous			
<b>Test Priority (Low/Medium/High):</b> High			<b>Test Designed date:</b> 15.3.2019			
<b>Test Title:</b> User Login with valid email/user name and password			<b>Test Executed by:</b> Jannatul ferdous			
<b>Description:</b> Test the system's on login page			<b>Test Execution date:</b> 29.3.2019			
<b>Pre-condition:</b> The user has valid email and password. The current email is <a href="mailto:arnika@diu.edu.bd">arnika@diu.edu.bd</a> and password 1234567.						
Step	Test step	Test data	Code module	Expected result	Actual Result	Pass/fail
1	Navigateto LoginPage	Click on login tab	login.php	User should not be able to login successfully	User navigate or redirect to the login page with error message page	Fail
2	Input username	Arnika@gmail.com				
3	Input category	Student				
4	Input password	1234567				
<b>Post-conditions:</b> User is not validated with database .Again user can login with valid information						

**Table 5.4.4: Test case for Form submit**

<b>Test Case ID:</b> TC 06			<b>Module Name:</b> Form submit			
<b>Sub Module:</b> Student form submit			<b>Test Designed by:</b> Jannatul ferdous			
<b>Test Priority (Low/Medium/High):</b> High			<b>Test Designed date:</b> 18.3.2019			
<b>Test Title:</b> User Login with valid email and password. Then Full fill the required all field.			<b>Test Executed by:</b> Jannatul ferdous			
<b>Description:</b> Test the system's Formpage			<b>Test Execution date:</b> 29.3.2019			
<b>Pre-condition:</b> The user has valid email and password.						
Step	Test step	Test data	Code module	Expected result	Actual Result	Pass/fail

1	Navigate to Student Dashboard	Click Fill up form page	<b>form.php</b>	Student success fully submit	Student can see successful message	Pass
2	Input Date	1/4/2019				
3	Input Semester name	Spring2019				
4	Input name	arnika				
5	Input improve Course code	SWE112				
6	Input improve Course title	Computer Fundamentals with Lab				
7	Input improve Course initial	ABC				
8	Input Schedule course code	SWE111				
9	Input improve Course initial	XYZ				
10	Input Schedule course title	Introduction to Software Engineering				
11	Input Advisor Name	syda sambul shamma				
12	Input Advisor initial	SSH				
13	Input Term	MID				
14	Input applicant_id	151-35-1125				
15	Input applicant section	C				
16	Input applicant-batch	16				
<b>Post-conditions:</b> Student is valeted and form information stored in database						

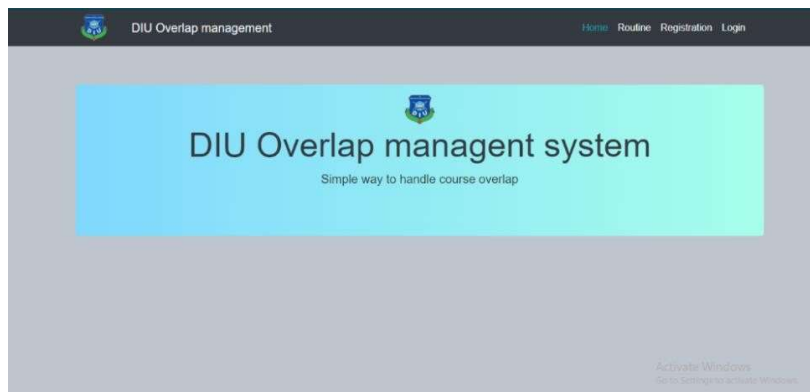

**Table 5.4.5: Test case for Register a Teacher**

<b>Test Case ID:</b> TC 05		<b>Module Name:</b> Register a Teacher				
<b>Sub Module:</b> Teacher registration		<b>Test Designed by:</b> Jannatul ferdous				
<b>Test Priority (Low/Medium/High):</b> High		<b>Test Designed date:</b> 20.03.2019				
<b>Test Title:</b> Teacher Registration with valid information		<b>Test Executed by:</b> Jannatul ferdous				
<b>Description:</b> Test the system's on teacher registration page		<b>Test Execution date:</b> 30.03.2019				
<b>Pre-condition:</b> Admin navigate to registration page and input the required filled. And click on the Register button.						
Step	Test step	Test data	Code module	Expected result	Actual Result	Pass/fail
1	Input first name	zannatul	<b>Teacherregistration.php</b>	Admin should be registered successfully	Admin navigate	Pass
2	Input last-name	ferdous				
3	Input teacher email	onix@gmail.com				
4	Input teacher_id	151-35-1032				
5	Input teacher-initial	ABC				
6	Input password	12345678				
7	Input confirm password	12345678				
<b>Post-conditions:</b> If the user information's are valid then the information will have saved in the database otherwise show it invalid fields						

## **Chapter 6**

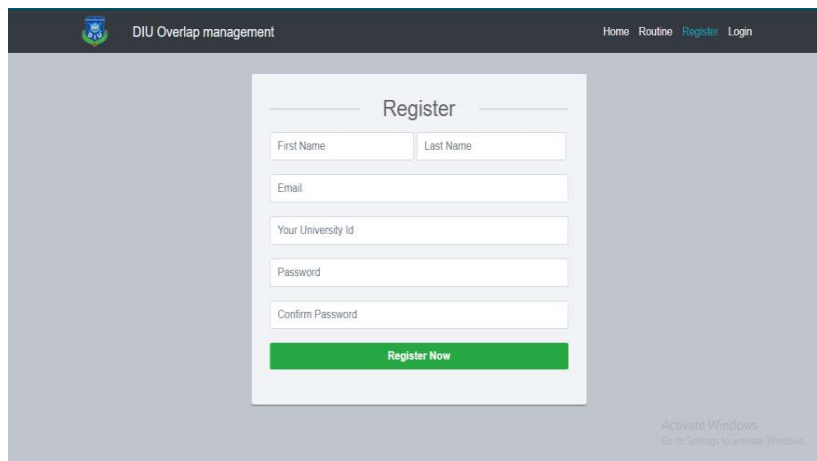

### **User Manual**

## 6.1 Home Page

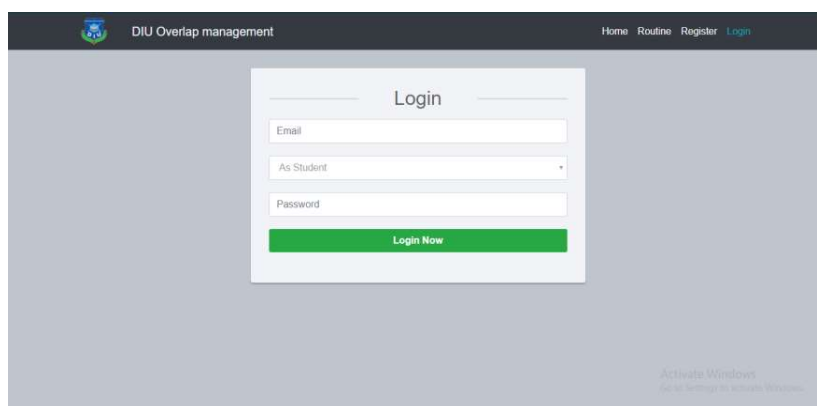

**Figure-6.1: Home Page**

## 6.2 RegistrationPage

**Figure-6.2: Registration Page**

## 6.3 LoginPage

**Figure-6.3 Login Page**

## 6.4 AdminLogin

The screenshot shows the 'Admin Login' page. At the top, there is a navigation bar with the DIU logo, the text 'DIU Overlap management', and links for 'Home', 'Routine', and 'Admin Login'. The main content area features a central form titled 'Admin Login' with two input fields: 'Email' and 'Password'. Below these fields is a green button labeled 'Login Now'. The background is a light gray gradient. In the bottom right corner, there is a small watermark that says 'Activate Windows Go to Settings to activate Windows'.

Figure-6.4: Admin login

## 6.5 Registration a Teacher

The screenshot shows the 'Register' page. The navigation bar includes 'Dashboard', 'Routine', 'Allowed', 'Denied', 'Pending', 'Register a Teacher', 'Upload Routine', and 'Logout'. The main form is titled 'Register' and contains several input fields: 'First Name', 'Last Name', 'Teacher's Email', 'Teacher's id no', 'Teacher Initial', 'Teacher's Password', and 'Confirm Password'. A green button labeled 'Register A Teacher Now' is positioned at the bottom of the form. The background is a light gray gradient. In the bottom right corner, there is a small watermark that says 'Activate Windows Go to Settings to activate Windows'.

Figure-6.5: Registration a Teacher

## 6.6 FormPage

The screenshot shows the 'OverLap Form' page. The navigation bar includes 'Dashboard', 'Current Routine', 'Fill Up Form', 'Status', and 'Logout'. The form is titled 'OverLap Form' and contains several sections:

- Date:** A text input field with the placeholder 'mm/dd/yyyy'.
- To:** A text area containing the address: 'The Member of Exam Committee, Software Engineering Department, Daffodil International University, 102, Sukrabad, Mirpur Road, Dhanmondi-1207'.
- Subject:** A text input field with the placeholder 'Application for attending the Overlap Exam in' and a dropdown menu for 'enter current semester'.
- Dear Sir:** A text area containing a message: 'I am [enter your name], a regular student in your university. My [which semester you are] semester final exam routine is published. This time after getting my exam routine I have noticed that two of my courses are in the same day as well as same time slot. It is not possible for me to attend two courses in the same time.'
- Details for Overlap course:** A table with two rows and four columns: 'Acknowledgement', 'Course Code', 'Course title', and 'Teacher Initial'.

Acknowledgement	Course Code	Course title	Teacher Initial
I will attend this course at the time of improvement exam	Improve course code	Improve course t	Teacher Initial
I will attend this course at schedule time	Schedule course code	Schedule course	Teacher Initial

The background is a light gray gradient. In the bottom right corner, there is a small watermark that says 'Activate Windows Go to Settings to activate Windows'.

**Chapter-7**  
**ProjectSummer**

## **7.1 GitHubLink**

## **7.2 ProjectSummary**

This project has been started from September. From that beginning time I have to work hard to know the requirement clearly. After that I proposed a design to them by help of my supervisor.

I started to develop the project. From then I gradually develop the project. I think storing the data in database neatly is very important. That's why I did this first and made a relationship with the tables. After that I design the UI. This project's UI is very simple and clean which is very help for the user's experience. Then I started coding and executing the project.

If I did not test this project, there will stay some bug on this project which will ruin the full project. That why give importance to test this project and then I solved some bug which I got after testing this project.

## **7.3 Limitations:**

- Password is to encrypted
- Not Fully Responsive
- Not highly Secure

## **7.4 Obstacles & Achievements**

To walk in the good way, one's have to face many obstacles. By facing obstacles one will get some achievements. Send notification through mail and give the status from application was an obstacle for me. Although I have done it by taking help from my supervisor, friends and by searching the solution from google.

## **7.4 Future Scope**

By working with this project, I have learnt many things and meet with some great person. This project will give me some opportunity to work with this type of similar project.
