## ACKNOWLEDGEMENT

First of all, I express my sincerest thanks and thankfulness to almighty God for his ethereal gift blessing makes me possible to finish the last year internship positively.

I indeed thankful and wish our profound and gratefulness to **Ahmed Al Marouf, Lecturer, Department of CSE, Daffodil International University**, Dhaka. Profound familiarity and keen kindness of my supervisor in the arena of ‘**Telecommunication sector on Metal Plus Ltd.**’ to carry out this internship. His limitless tolerance, scholarly guidance, repeated help, continuous and active supervision, positive criticism, valuable advice, reading many substandard drafts and adjusting them at all phase have made it possible to finished this internship.

I would like to express heartiest thanks to **Dr. Syed Akhter Hossain, Professor and Head, Department of CSE**, for his kind help to finish my internship and also to all faculty associate and the staff of CSE department of Daffodil International University.

I would like to express heartiest thanks to **Mr. Azizul Islam, Assistant General Manager Telecom Division and Mr Rakibul Islam Ratul, Supervisor and Head of NOC, Metal Plus Ltd.**, for there kind support and for giving me chance for my internship. I would also give my thanks to each **NOC** colleagues and the staff of **Metal Plus Ltd.**

I would like to show gratitude whole course mate in Daffodil International University, who acquired part in this discuss while finalizing the progression work.

Finally, I must admit with due respect the continuous support and patients of my parents without whom I can't come this farther.

## **ABSTRACT**

I am Rezaul Huque Nayeem a proud student of Daffodil International University and I have just completed my final year internship on a very reputed company Metal Plus Ltd. As a NOC engineer. This report necessity of the internship program for my Bachelor of Science course degree in my university. Metal Plus Ltd is doing maintenance activities of every telecom company on Bangladesh like Grameenphone, Robi, Airtel and Banglalink. They are in this business from 2006. They have a very beautiful NOC or Network Operation Center. I do my internship on their NOC. I am showing my interested to internship at this NOC because now a day communication technology played a very important role in modern world. In this internship period I learn working processes in a NOC and how to monitor the network. The First part of internship statement gives a summary about journey of Metal Plus Ltd. How they able become an important vendor for all of telecom service provider. And how much role they have been played on telecom sector. Then expatiate about the tasks we performed and our tasks through internship, finding hitches during monitoring network and process of solving them. There our main responsibilities are to monitoring the various power related alarm and take necessary steps. Hear I get a very good chance to observe the main operation on every telecom company. That is why I select this interesting subject “Working as Network Operations Center Trainee Engineer at Metal Plus Ltd.”. This report written about how a NOC engineer work and how they are monitor the whole telecom network system.

# CHAPTER 1

## INTRODUCTION

### 1.1 Introduction

For completing my BSc in Computer Science and engineering I have to complete my thesis or project or internship. I chose to complete internship. I already complete my internship on Metal Plus NOC. During my Internship I learned about how to work on a NOC, how to monitor network operation 24/7. At beginning of my internship, I just have to observe how my senior co-worker are doing their job. How they manage all kind of operations, and escalates various network alarms to field. During this time, I learned how see alarm, every kind of network alarm, when and why alarms appeared on system monitor etc.

### 1.2 Motivation

My internship place is metal plus ltd, which company is doing maintenance every telecom company's network tower in all over Bangladesh. That's why in this company I can observe the operation of Grameen phone, Robi, Airtel and Banglalink in one place. I can learn how they work and how their network work. Every telecom company work in different way. In metal NOC I can learn all of them or at least know their working procedure. This will give me a chance to develop my working experiences. In future I can show this experience on any telecom company in Bangladesh for an honorable job position. Joining a company as an intern gives us the opportunity to work hands on in a professional environment. Internships help us by teaching more about the career path we are pursuing.

### **1.3 Internship Objective**

By Internship I can get a chance to attend real life office meeting and events. That's why I can interact with professional person who can help me to make new connections and teach me how to communicate in a professional environment. I my internship I have been introduced with a lot of professional and resourceful person.

1. Learn how to Telecom Network Work.
2. Gain knowledge about networking components & technologies.
3. Know about internet, data, router & LAN.
4. Learn how I can access Ip addressing.
5. Learn about telecommunication.
6. To gain experience about telecommunication.
7. Understood the scenario of networking practical fields.
8. Most of all Learn about official environment and workplace.

### **1.4 Introduction of Company**

“The Metal Private Ltd (Market Leader of Tractor industry in Bangladesh), Metal Agro Ltd, Slek Knitwear, Jamil Engineering Ltd). From July 2008, MPL is marketing Eicher Tractors in Bangladesh. Our Market Share in this industry is around 15 %. From August 2010, MPL is marketing Diesel Generators, Powered by Eicher Engine Metal Plus Limited (MPL) was established in July 2005. Its sister s. From January 2011, MPL has started O&M activities in Telecom sectors. Presently, we are working with Grameenphone, Banglalink, Airtel Bangladesh Ltd., Huawei Technologies (BD) ltd., City cell, and Ericsson etc.” [2]

## **Key Management**

### Chairman

Engr Mr. Aminul Islam.

He is also MD of more eight companies (including Project Builders Limited)

### Managing Director

Engr Mr. Sadid Jamil.

He is MD of more four companies including The Metal Private Limited

### Executive Director

Lieutenant Colonel Tarequl Alam Khan (Retired), psc,

He is working in this company from July 15, 2009. He is responsible to look after overall business of the company

## **1.5 Report Layout**

1. In chapter 1, I discuss introduction, motivation and internship objective of MPL NOC.
2. In chapter 2, I overview of organizational info, history of MPL, basic erection of info, capacity and linking of MPL.
3. In chapter 3, I deliberate about my duty and events of internship, events and maintains works.
4. In chapter 4, I discoursed about my Skills Earned, Smart Plan, and thinking.
5. In chapter 5, discussion and decision, describe possibility for further career of telecommunication field.

## CHAPTER 2

### ORGANIZATION

#### 2.1 Introduction

The word 'Metal' manifests hardness of bondage existing among its members of companies, its shine in works accomplished and conductivity maintained throughout building dynamic organization. The seed of Chronological progress of Metal sown in 1987.

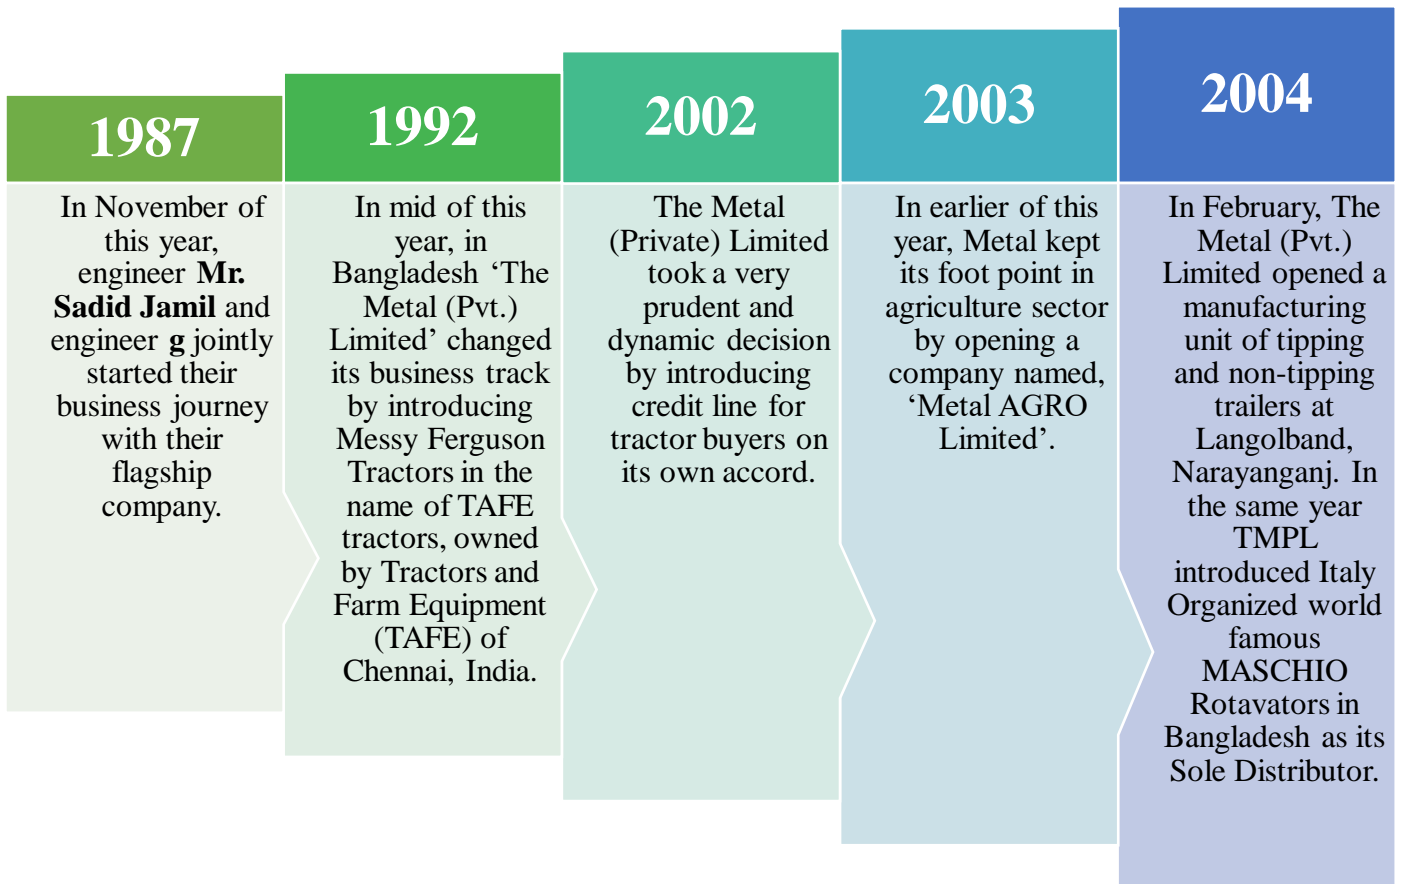

Fig. 2.1: Journey of Metal Plus Ltd 1

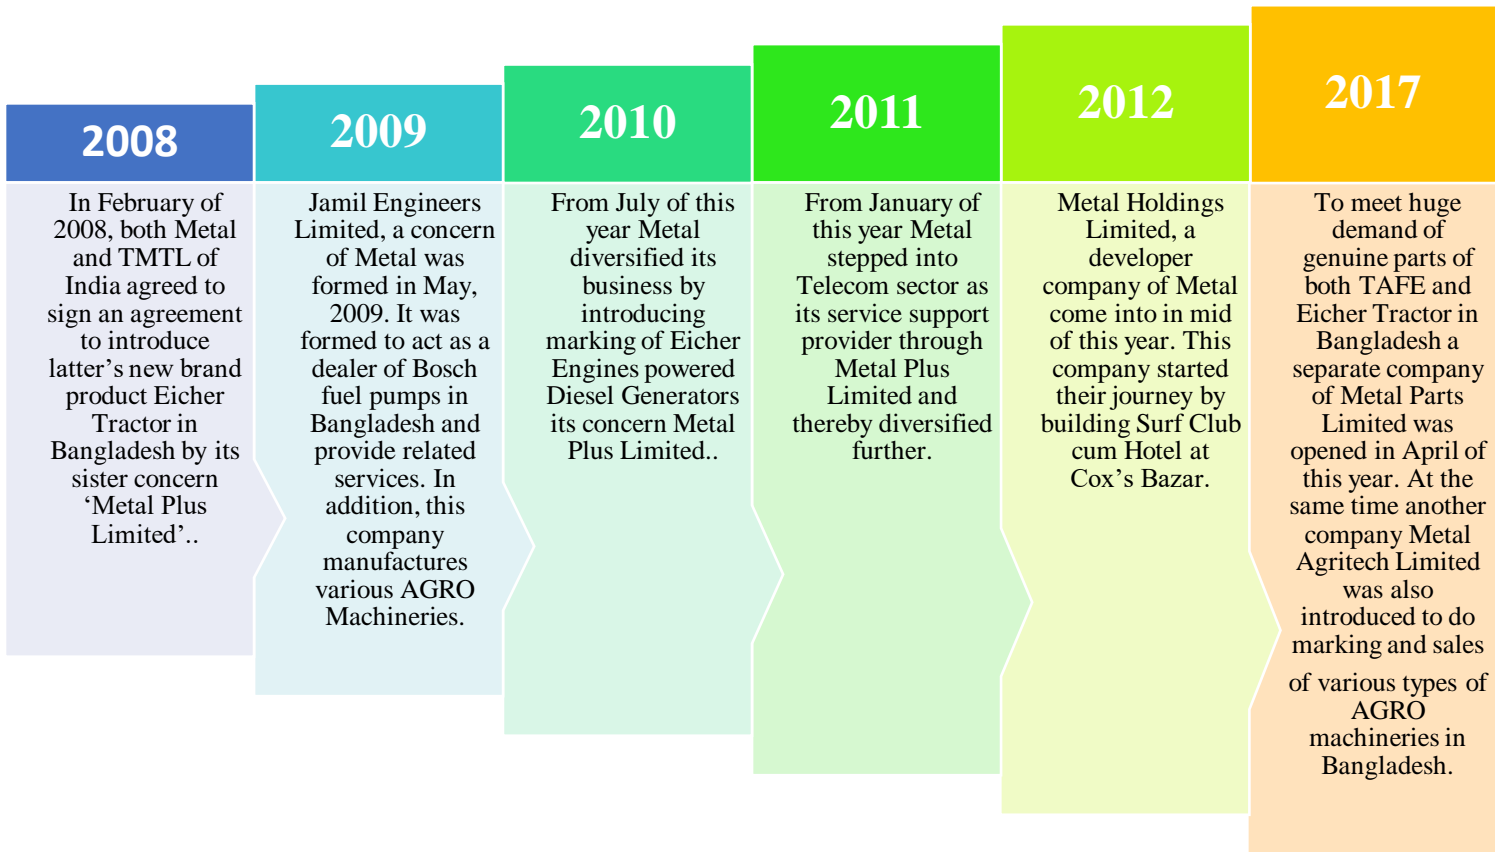

Fig. 2.2: Journey of Metal Plus Ltd 2

Fig. 2.3: Metal Plus Ltd Official Logo [1]

## **2.2 Product and Market Situation**

### **2.2.1 The Metal (Pvt.) Limited**

#### **Products:**

The Metal (Pvt.) Limited is the exclusive dealer/distributor in Bangladesh of:

- TAFE tractors
- MASCHIO rotary Tillers
- Metal rice Trans planters
- CLASS combine harvesters
- Reaper binder machines
- Metal reapers
- World combine harvester

#### **Services**

- After sales service
- Free trainings on machinery operation, machinery maintenance, and entrepreneurship for farmers and local services providers.

#### **Creating widespread change**

The sale of every machine of the Metal (Pvt.) Limited can help

Up 20 non-machine owing farmers in the community for

Increased production via machines service support.

## **2.2.2 The Metal AGRO Limited**

### **Products**

- Vegetable seeds
- Rice seeds
- Maize seeds
- Oil seeds
- Pulse seeds
- Potato seeds
- Spices seeds
- Fodder seeds
- Flower seeds
- Nursery seed

### **Services**

- Seed genetic development, with an emphasis on regional preferences, stress and disease tolerance and resistance along with yield, taste, earliness, and shelf life.
- Seed production, both hybrid and Open Pollinated (OP).
- Quality control throughout seed packing, storage, and delivery.
- Product demonstration and field days to increase product awareness and collection of direct farmer feedback.
- Feedback collection on product usage and problems from their customers via Metal's own call center.

## **2.2.3 The Metal Plus Limited**

### **Products**

- Eicher tractors
- Diesel generators
- Telecommunications service support

- MASCHIO Rotavators
- Supply of Telecom Power Support items
- Combine Harvester
- Reaper

Fig. 2.4: The Metal Plus Limited Head Office

### Services

- After sales services support of tractors
- After sales services support of generators
- Providing management services to mobile operators.
- After sales supports of other AGRO machineries.

### **2.3 Target Group**

Metal Plus Ltd. look forward to become a vibrant self-motivated group and lead The country's telecommunication sector by establishing a sound and Cost-effective tower maintenance.

They are trying to become the largest vendor in telecom sector. They provide a very activate cost effective BTS maintenance service to every telecom group in Bangladesh.

### **Achievements**

Sold 750 units of diesel generators to retail and corporate clients in the last 8 years.

Provided operations and maintenance support in more than 5,000 Base Transceiver Station (BTS) sites for large mobile operators, including Grameenphone.

Ensured average 39% year-on-year growth of Eicher Tractors for the last 3years.

Grew total number of staffs from 15 to 450 during the last 9 years.

Having more than 14% of the tractors market share, up from 10% in 2013.

By now positioned Eicher Tractors in 44 districts of Bangladesh.

### **2.4 SWOT Analysis of Metal Plus (Pvt.) Limited**

SWOT (strengths, weaknesses, opportunities, and threats) analysis is a background used to estimate a corporation's inexpensive position and to progress premeditated planning. SWOT analysis measures interior and exterior influences, as well as present and upcoming potential.

A SWOT analysis is premeditated to facilitate a representative, fact-based, data-driven look at the strengths and weaknesses of an association, its creativities, or an industry. The association requirements to keep the analysis correct by circumventing pre-conceived opinions or gray areas and as an alternative focusing on real-life situations. Corporations should use it as a attendant and not necessarily as a preparation.

Fig. 2.5: SWOT Analysis [3]

**The rest of the steps in the SWOT analysis series, find them here:**

- Step 1: **Strengths**
- Step 2: **Weaknesses**
- Step 3: **Opportunities**
- Step 4: **Threats**

## **Strengths**

In Meta all the administration groups are highly educated and experienced. The managing executives are the strengths of the Company as they have years of professional knowledge, expertise, and qualifications which helps them to work and take Metal plus Ltd. to the position it is right now.

Metal Plus Ltd. has shown spectacular growth in the profit sector.

- A remarkable revenue increase rate has already been achieved by Metal Plus Ltd.
- Metal has so many branches all over the country which offers the best service possible. All the branches are located in suitable places and they keep the branches very protected so the customers feel secured while doing services
- Vast services distinguish between Metal Plus Ltd. and other company. And customers also can choose suitable services according to their requirement.

## **Weaknesses**

- The marketing department of Metal Plus Ltd. is very weak.
- The profit rate is very low compared to other Company.
- The way of promotion in Metal Plus Ltd. is complicated so it is one of the reasons for creating unsatisfied employees.

## **Opportunities**

- In Power Division our company is developing and with many future opportunities for success.
- To previous history there so many projects maintain responsibility offer yet to come.

- In Power Division sector many companies want to take help from our company which is noticeable.
- Metal Plus Ltd. provided great and reliable services and sometimes offer good job opportunities for expert engineers.

## **Threats**

- Networking sector always challenging. Here always try to maintain network strictly. Cause small mistake are big issue here. In this sector losses chances are so many. That's why team always try to maintain network smoothly otherwise another company take chances.
- It mentions to influences that have the probable to harm an association. For example, a drought is a danger to a wheat-producing corporation, as it may extinguish or reduce the crop harvest.

### **2.4.1 Organizational Structure**

An organizational structure is a scheme that summaries how positive activities are absorbed in order to accomplish the goals of an association. These happenings can include instructions, roles, and household tasks. The organizational structure also controls how material flows between stages within the corporation

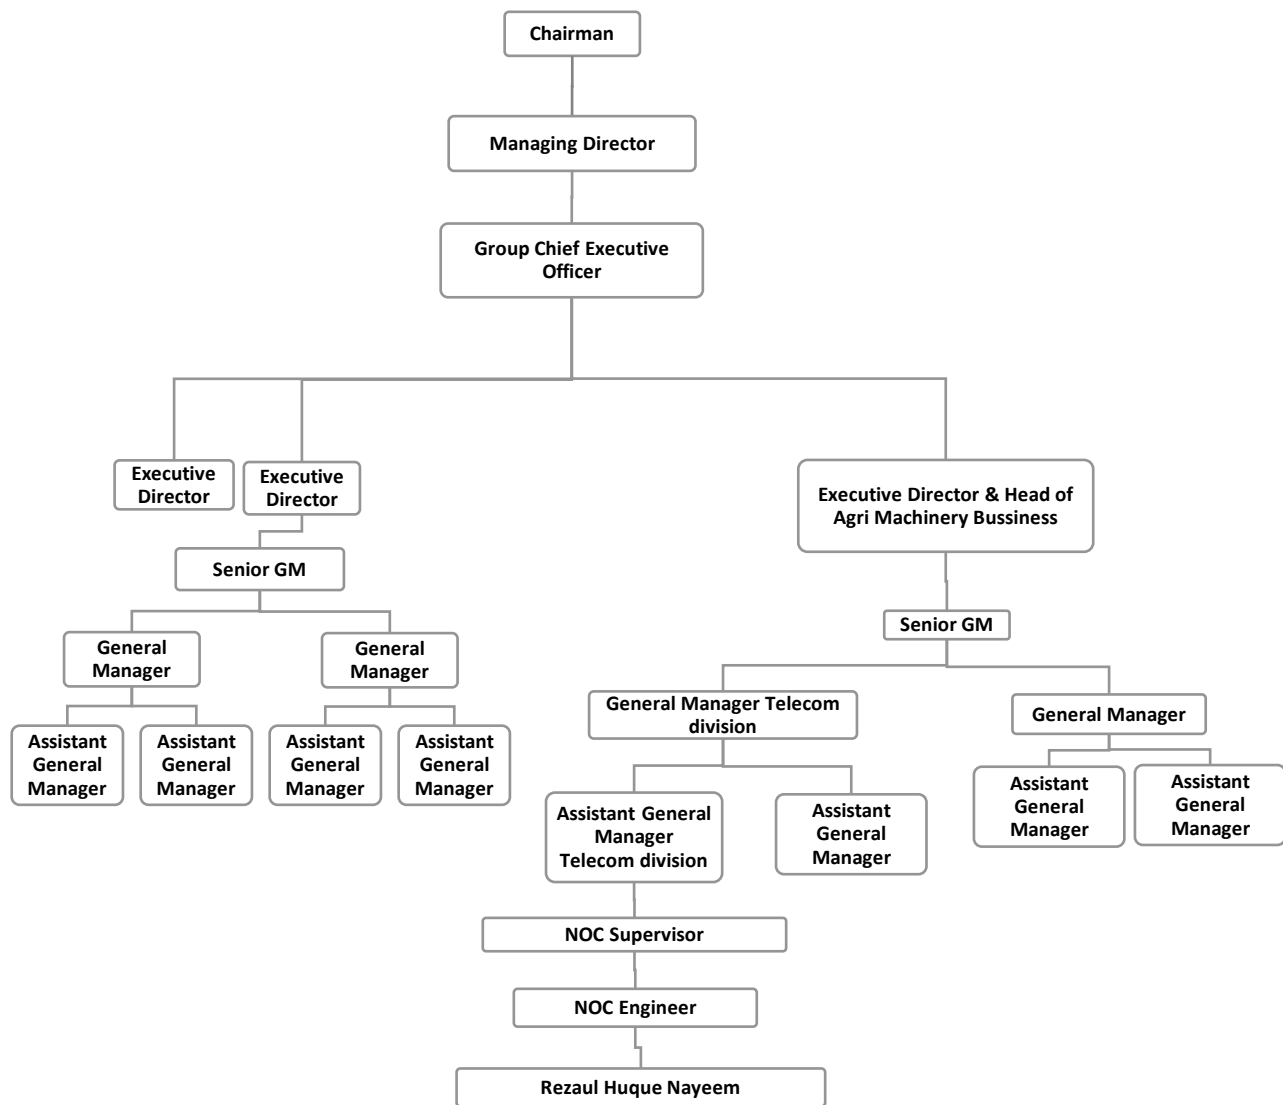

Fig. 2.6: Organizational structure.

## CHAPTER 3

### Tasks, Projects and Activities

#### 3.1 Daily Tasks and Activities

Table 3.1: Daily Activities

<b>Month-1 Activities</b>	First months of my internee my colleague helps me to know about the working procedure. They teach me how our telecom network work. They taught me that we need GP MAP, and X-BOT terminal on telegram for checking alarms. How and which command we need. Like MP BATT BON, MP DOWN BON, MP TEMP BON, MP DC BON. Here BON is shortcut for Bogra North. They also introduced with me our active zone. Where we provide our operations. The name of Zone managers.
<b>Month-2 Activities</b>	My Second months they teach me about our packages site, their initials and code names. How to give comment for checking their voltages, when we get door open alarms, when we get site down alarm. They give small task like checking site voltages with comment. Checking our either down or up. Sites temperature alarms, if our sites go down then escalates this alarm to zone managers. If we get any IPBH sites alarm then we inform to our regional manager.

<p><b>Month-3 Activities</b></p>	<p>At my Third month of internship they give me full operation control of robi terminal. I check and escalate every alarm of Rajshahi zone. I take care of MUX sites and give feedback about those sites' status too directly to ROBI operations Head. Create a very good connectivity with him. I learn about disaster period and know how to face if disaster happened. In my 3rd month they handover me about 85% of ROBI terminal.</p>
<p><b>Month-4 Activities:</b></p>	<p>At my fourth and final month of my internship MPL NOC give me offer latter to join with them. After join on metal plus they give me their ID card and full access of NOC. They give me a desk and full professional setup for NOC. I take care of ROBI terminal. Receive and send every query and full feedback about all sites of Rajshahi robi terminal.</p>

Fig. 3.1: Metal Plus NOC Picture 1

### 3.2 Events and Activities

In a telecom network there are two kind of tower maintenance. Active part and passive part.

**Active Part:** All kind of transmission activities on this part. “Element of the active infrastructure are the basic transceiver station (BST), the base station controller BSC a, the mobile switching center MSC and microwave and GSM antenna. The antenna enables both the transmission and to proceed receipt the radio signal, enabling the cellular telephony to proceed interrupted as the subscriber is mobile.” [4]

Fig. 3.2: Metal Plus NOC Picture 2

**Passive Part:** Passive infrastructure sharing refers to sharing of physical sites, buildings, shelters, towers, power supply, and battery backup.

Metal Plus Ltd NOC take care both part of Grameenphone, Robi and Banglalink. In my internship period I work on only passive part. I work on Robi proprietary SEM system. They give me an access of that system. I have to login every time and take few steps on that system. And then get main monitoring system. Sem system is only support on IE 9.

### 3.3 Project Task and Activities

In Robi terminal we have to monitor only passive alarms on SAM system. Our Main alarm are:

Table 3.3: All Power Alarm of ROBI

OML FAULT	GENERATOR ON LOAD
POWER DOWN	HIGH TEMPERATURE
AC MAINS FAILURE	IVS FAULT
AC SURGE PROTECTOR FAULT	MAINS FAILURE VTMS
AIRCON FAULT VTMS	MAINS INPUT OUT OF RANGE
AMBIENT HUMIDITY UNACCEPTABLE	RECTIFIER MODULE FAULT
AMBIENT TEMPERATURE UNACCEPTABLE	SMOKE ALARM
BATTERY CABINET DOOR OPEN	WATER ALARM
BATTERY CABINET TEMPERATURE FAULT	MONITORING DEVICE HARDWARE FAULT
DC LOW VOLTAGE	MONITORING DEVICE POWER SUPPLY PROBLEM
DOOR OPEN	POWER MODULE AND MONITORING MODULE COMMUNICATION FAILURE
GENERATOR FAULT	CELL UNAVAILABLE
GENERATOR FUEL LEVEL LOW	GSM CELL OUT OF SERVICE
GENERATOR NEED SERVICING	NODEB UNAVAILABLE

## Task

Our main task is to make sure power is available all types of network tower.

Usually there is 4 kind of tower.

1. Package 1: CP site or Commercial powered tower
2. Package 2: CP+AG site or Commercial and automatic generator powered tower
3. Package 3: NCP site or NO Commercial powered tower or solar and automatic generator powered tower
4. Package 4: ISS site or only solar powered tower.

If those sites go down for power issue then we ensure power by portable generator or pg. Check regularly sites status and if need rectify them

Fig. 3.3: Metal Plus NOC Picture 3

## Activities

First, we connect with ROBI terminal with a Cisco VPN modified by robi. By entering user name and password we then connect with ROBI IP. Then from Internet Explorer we go to Robisso Login Page. Then we put our user name and password. Then it takes us SSO-portal. Then we go to SEM tab. Then we can find total number of alarms of Bangladesh. And summery of all tower. Then by clicking on alarm we can go to ALU Integrated Portal. Then we have to put our user name again and find main SEM system. After confirm some agreement we can see all alarm of Bangladesh of ROBI. After sorting I can find a colorful page where we can see location name, Alarm name, Last Occurrence vendor name alart group ect. Hare we can find all alarm of Rajshahi zone. Then we copy all alarm and put it on a excel file. Where by Macro we can fine our site name and alarm name. Then we observe that alarms and if necessary, we escalate this alarm to our sub center by telegram.

### **3.4 Challenges**

At starting of my internship, I faced interesting challenges. Like first I have attended office at 8 AM. That's is really very tough for me. Also have to work at office all day long from 8 AM to 5 PM. that was really very difficult for me. It was my first office environment that's why I have to learn many office rules in a very short time. I have to communicate with lots of people. I learn how to work with the and how to deal with them. I also have to do night shifting duty on NOC. It was really a very big challenge for me.

## **CHAPTER 4**

### **COMPETENCIES AND SMART PLAN**

#### **4.1 Competencies Earned**

- Monitored network and resolved all issues that occurred on same At Grameenphone Network.
- Performed troubleshoot on system and resolved all issues in process.
- Coordinated with senior level engineering group and site contacts for resolving all technical issues.
- Monitoring all Critical, Major, and Minor of BTS related alarm through GP web soc webpage.
- Monitoring the Back Bone network as well as high capacity links through x-bot.
- Provide different types of technical information to FO team by checking GP web soc webpage.
- Maintaining the MS Excel logbook for prepared different types of report based on customer requirement.
- Follow up different types of work orders based on customer requirement.
- Power alarm monitoring for backbone round the clock.
- SMS notification to concerned engineers for different faults.
- Alarm escalation according to the guideline.
- Maintaining the MS word and MS Excel log book for prepared different types of report based on customer requirement.

## 4.2 Smart Plan

By Intern on Metal Plus NOC now I am concerned to the future of my career now. In intern period, I get real life knowledge that will help my future career in Telecom sector. It has very high demand in modern technology. I learned some practical things in my internship period in an office environment. Now I will try my best to increase this knowledge and practice more and more. My future plan is completely learning about Network Engineering, then implementation in real world.

## 4.3 Reflections

By doing Internship on Metal Plus we get the practical experience and knowledge in the field of Network Engineering. It helps me to get experience in engineering job. In my intern period, I learned telecom related Practical knowledge. Telecom sector is a smart and energetic job at this time. This Internship will help me to be get a smart job. Internship gives advanced tricks and trips that skillful by the professional.

Fig. 4.1: Metal Plus NOC Conference Room

## **CHAPTER 5**

### **CONCLUSION AND FUTURE CAREER**

#### **5.1 Discussion and Conclusion**

My Internship on Metal Plus Ltd has been completed in 30 April 2019. By internship, I gain knowledge of many things which is discuss in previous chapter. Now a day's all communication system depends on Telecom network. This internship gives me a chance to gain particular career knowledge before permanents obligations are made. I am really lucky to get internship on Metal Plus NOC.

#### **5.2 Scope for Further Career**

In our country in Bangladesh there are many lots of company. In this companies Metal Plus Ltd. is one of the largest and popular company. Main services in this company they provided are Maintenance main backbone of network field. They take care all network tower of all telecom operator in the Bangladesh. Therefore, by intern on MPL NOC it's really help me to get an honorable job on this company. Infect after completing my four month of internship they offered me to join MPL as a NOC Engineer. I join on Metal Plus Ltd. immediately after completing my internship with an honorable salary.
