Executive summary

Newspapers are the mass media to bring stories or happenings that considered news to people around us. A research told that, a few years back the numbers of newspapers around the world was not more than 6580. This shows, print media is the main platform to show off out the real skills of a journalist. Now a day most of the people are getting online oriented. But I prefer print media. Because in print media, news come out with perfection and elaboration. That's why I have chosen the Daily Samakal for my internship. I believe, the Daily Samakal is a leading newspaper of Bangladesh in the present situation. I thought and idea with them. I can reach a vast number of people with my works. And my academic education helped me a lot regarding my internship. I have learned last of new things over here. Under the supervisor of Mr. Shariful Islam Sharif and Mr. Mujibar Rahman. I come to know about my mistakes and lack of knowledge. They have encouraged me a lot of to increase my skill in a professional way.

CHAPTER ONE: INTRODUCTION

1.1 What is an internship?

Internship is a specific period of working experience which is offered by an employer to give students and fresh graduates exposure to the working environment. It is done often in a specific industry, related to their field of study.

An excepted standard period of internship can be ranged from 10 weeks to more. Generally, internship in this country is most likely to be unpaid but there are exceptions also. Throughout the internship period one will develop many skills and experiences needed to survive in the professional world.

An internship can give an intern a real insight into the world of work, allowing him/her to build on the theory they learned at university and helping them to gain practical skills that will make him/her more qualified for a job. It also gives one the chance to explore their career options and gain an insight into an organization or career path.

Probably the most important thing about internship is that it gives someone an exclusive opportunity, specially an undergraduate with no professional experience, to experience professionalism. Through internship one experiences and learns the difference between academic learning and what's waiting for a student in professional life. Therefore, it's important that an intern takes the internship period seriously and does his/her work with passion and compatibility.

The professional world and academic learning hardly has any similarities. One cannot possibly grasp the idea of the changes he/she needs to cope up with. It was an incredible experience for me in Daily Samakal. It has prepared me for what's to come and how to face new challenges. I have done my program of internship from Daily Samakal.

1.2 Significance of internship:

Every person has to different way to learn things, one is by academic education and the other one practical experiences. And if it comes to be the adjustment of this two following activities, it becomes ever better, and that's why, the internship is a better way to gain practical experience. After the four-year education life, internship process is the time to apply our experiences. And it is clear that there is a difference between academic education and field experiences. So this internship period should be taken seriously along with the responsibilities in the phase of life. I chose the Daily Samakal for my internship because it is an important daily of the country. I have worked here for three-month long. I faced many experiences of which I was not known in my academic life. I tried my best to become a good sub-editor. I worked at the central desk, tried to re- arrange news reports in audience —friendly way. I also took help from my supervisor challenges to enhance myself. Department of Journalism and mass communication Daffodil International University provides an opportunity of my internship for the students, which is three months long with in this period, interns have to complete their internship program. CHAPTER THREE:

Learning Experience

3.1 Knowledge gathering /learning:

In the Daily Samakal, I worked at the central desk during my international desk during my internship. I gathered news from the reporters and edited them to be published. My experiences are given bellow:

Editing News: During my internship I came to know that news editing is an important factor so, I gathered general knowledge reading this sector. The duty of editor is to provide pure and accurate news for the newspaper. If something goes to wrong, editor has to take the responsibility. During my duty as a sub-editor. I cheeked for spelling mistake, proper headlines to eliminate unnecessary words. And in the end of the process, I submitted edited copy to my supervisor.

Earning knowledge about News: For last four years of my academic Life, I had a little Experience on editing the following process from other journalists. I had to visit national press club to cover events and came in touch with senior journalists.

Practical Experiences: Editing news is a completed task. Because, every single mistakes are a mistake of the editor. So I had the smaller pieces of the words. But I used to edit them cordially. To practice news gathered news and information.

3.2 Tools and Technology used:

During my internship I used a number of tools and technologies. To cover desk words and news, I used my smart phone (HM-note 5A) and for my writing tools pen and papers was my first choice.

I also used computers. The common sever of Daily Samakal was the basic source of my information's. Which was connected with each and every computers of the house. So, everyone had equal access to all the computers.

3.3 Special experiences:

I am an apprentice of the Department of Journalism and mass communication for this four year. I wasn't connected with any media house. I was busy with my academic life. So the internship period in the Daily Samakal was a new experience for me. After as an intern my first edited was published on 12th July, 2019. This was hilarious experience for me.

I can barely express my feelings of that day. I have copy of the newspaper published on that day which means a lot to me.

CHAPTER FOUR: EVALUATION OF LEARNING

4.1 Difference between academic learning and practical work:

Academic education is a bit different from practical work. Every single part has its own importance. The things I learnt from my previous education life has been a great apart from my academic life, much new things took place in the practical period. Various academic courses like news writing, TV and radio reporting, editing and page make-up was really helpful during my practical work. Every houses have their own policies of which I was not informed.

The work according to those policies was completely new experiences for me. For making news stories, I have gone through the 5W1H process and the Inverted Pyramid Structure of which I came to know during my academic life. Another important factor of work is maintaining the schedule. The use of internet has made life mush faster than before Publishing the news has also been a matter of race. So, time means a lot. But practical life and study lives are totally different, when at work, the importance of every single assignment comes in focus.

4.2 Expectation and Experience:

During my studies, I have worked in the JMC gazette which was published by our department. But in field of national Daily, this is my very first experience. I was not certain about my internship. But as a student of the department of Journalism and mass Communication, DIU, I had a slight experience and it helped me a bit in my practical life at all. As stated before every house works under their policy. That's why I was a bit nervous at the beginning. But after few days, things started to become easier for me. Another factor is time. I had to focus for the very first edition. So, this period such an experience for me.

4.3 Skill development during my internship:

During my internship at the Daily Samakal. I worked in the central deck and international deck. The skill occurred in this two sector are stated below:

- Making planning for checklist.
- Collection of Resources.
- ❖ Field experiences regarding practical works.
- * Taking preparation before field visit.
- Managing the time properly.
- ❖ Confidence and professionalism regarding scheduled works.
- Development of social Relationship.
- Maintenance of office rules and regulations.
- ❖ To guess and apply the right word for writing story.
- ***** Exploring available online resources for additional information.

Opportunity and Future Career:

Experience is often the most valuable thing. In this time experience is an important for all kind of job sectors. Without experience it is so tough to get any job. You should have good experience, though result in not enough for getting job. We spend four years in our academic activities with no opportunity to gain work experience. That's why after the four years' academic activities we get an opportunity to gain experience through by our internship program. It is a great chance to enhance our work experience. As we can say that internship can help us to develop our future career.

During my internship I have work with different types of people and I introduced with many professional people after that I have a good relationship with them and they will assist me to find out a good job.

I have also work as a sub-editor and as a reporter. I have gain knowledge how to make a report and I believe that it will make my CV stronger because a strong CV is an important to get a good job. As we see most of the company they give more value an experienced person. but in professional life time is an important for all kind of jobholders.

So in this digital age all kind of news spread out with in a short time all over the world. That's why we should maintain our time properly and we have realized how to maintain our working time.

CHAPTER FIVE: CONCLUSION

5.1 SWOT analysis of the organization

Strengths:

- ❖ An acclaimed newspaper in the country.
- ❖ The editorial policy is independent and strong
- ❖ The house has brilliant reporters with abilities of excellent investigative reporting.
- ❖ Cover a vast area along with the capital.
- ***** The house has professional reporters.
- * The paper has good readership.

Weaknesses:

- * The online section has room for improvement.
- ❖ The transportation should be improved.
- ❖ Politically biased.
- ❖ Need improvement in official management.
- ❖ Lack of sufficient technology and tolls to support every employer.

Opportunities:

- Central deck and online section need new sub-editor and reporters.
- ❖ The facilities of sub-editor and reporters.
- Circulation are about to increase.
- * Transportation could be added.

Threats:

- Quite presences of political influence.
- Online news will reduce sells of hard copy.
- Discouragement now growing over people as they think use of paper is threat to the environment.
- * Misrepresentation take place of any news and information.

5.2 Recommendation:

In this modern world information technology is moving faster than any other technology, after a while, people will stop reading newspaper. Everyone will lean more towards online newspaper, so I think Samakal should more concentrate about online news portal and increase more database.

- 1. The Samakal authority should concentrate more about social media for enhancing their reader. Like Facebook, Twitter.
- 2. The Samakal authority can arrange monthly discussion session where all the employer can give their opinion to improve their house.
- 3. They should change their newspaper infrastructure to attract people.
- 4. The Samakal authority can run an award on the basis of most dedicated employee among the employees.
- 5. The Samakal must provide more desk and Computers.
- 6. The Samakal should increase more opportunity for those people who are doing internship on their house.

5.3 Conclusion:

Internship is the way of enhancing work experience. Though the internship was enjoyable and quite challenging experience for me. Through hard work, I learned a lot of new life influencing thing. Undoubtedly, the internship was the most fruitful and significance experience in my life. During my three months' internship I learned a lot of new things and it will help me in my professional career. I believe that I will be able to give something good in my experience. In this section everyone maintains a proverb "Time and Tide wait for none" Especially I learned how to maintain working time. I gratefully remember the kind of support and suitable instruction given by the Samakal. It is undoubtedly true that without their cooperation I would not complete my internship. I want to thank my supervisor he also helped me a lot. Finally, heart fully thank to Allah without His grace nothing can be possible. By the grace of Allah, I have done my graduation degree department of Journalism and mass Communication from Daffodil International University.

CHAPTER ONE: INTRODUCTION 1.1 What is an internship? Internship is a specific period of working experience which is offered by an employer to give students and fresh graduates exposure to the working environment. It is done often in a specific industry, related to their field of study. An excepted standard period of internship can be ranged from 10 weeks to more. Generally, internship in this country is most likely to be unpaid but there are exceptions also. Throughout the internship period one will develop many skills and experiences needed to survive in the professional world. An internship can give an intern a real insight into the world of work, allowing him/her to build on the theory they learned at university and helping them to gain practical skills that will make him/her more qualified for a job. It also gives one the chance to explore their career options and gain an insight into an organization or career path. Probably the most important thing about internship is that it gives someone an exclusive opportunity, specially an undergraduate with no professional experience, to experience professionalism. Through internship one experiences and learns the difference between academic learning and what's waiting for a student in professional life. Therefore, it's important that an intern takes the internship period seriously and does his/her work with passion and compatibility. The professional world and academic learning hardly has any similarities. One cannot possibly grasp the idea of the changes he/she needs to cope up with. It was an incredible experience for me in Daily Samakal. It has prepared me for what's to come and how to face new challenges. I have done my program of internship from Daily Samakal. 1.2 Significance of internship: Every person has to different way to learn things, one is by academic education and the other one practical experiences. And if it comes to be the adjustment of this

two following activities, it becomes ever better, and that's why, the internship is a better way to gain practical experience. After the four-year education life. internship process is the time to apply our experiences. And it is clear that there is a difference between academic education and field experiences. So this internship period should be taken seriously along with the responsibilities in the phase of life. I chose the Daily Samakal for my internship because it is an important daily of the country. I have worked here for three-month long. I faced many experiences of which I was not known in my academic life. I tried my best to become a good sub-editor. I worked at the central desk, tried to re- arrange news reports in audience -friendly way. I also took help from my supervisor challenges to enhance myself. Department of Journalism and mass communication Daffodil International University provides an opportunity of my internship for the students, which is three months long with in this period, interns have to complete their internship program. I gathered news from the reporters and edited them to be published. My experiences are given bellow: Editing News: During my internship I came to know that news editing is an important factor so, I gathered general knowledge reading this sector. The duty of editor is to provide pure and accurate news for the newspaper. If something goes to wrong, editor has to take the responsibility. During my duty as a sub-editor. I cheeked for spelling mistake, proper headlines to eliminate unnecessary words. And in the end of the process, I submitted edited copy to my supervisor. Earning knowledge about News: For last four years of my academic Life, I had a little Experience on editing the following process from other journalists. I had to visit national press club to cover events and came in touch with senior journalists. Practical Experiences: Editing news is a completed task. Because, every single mistakes are a mistake of the editor. So I had the smaller pieces of the words. But I used to edit them cordially. To practice news gathered news and information, 3.2 Tools and Technology used: During my internship I used a number of tools and technologies. To cover desk words and news, I used my smart phone (HM-note 5A) and for my writing tools pen and papers was my first choice. I also used computers. The common sever of Daily Samakal was the basic source of my information's. Which was connected with each and every computers of the house. So, everyone had equal access to all the computers. 3.3 Special experiences: I am an apprentice of the Department of Journalism and mass communication for this four year. I wasn't connected with any media house. I was busy with my academic life. So the internship period in the Daily Samakal was a new experience for me. After as an intern my first edited was published on 12th July, 2019. This was hilarious experience for me. I can barely express my feelings of that day. I have copy of the newspaper published on that day which means a lot to me. CHAPTER FOUR: EVALUATION OF LEARNING 4.1 Difference between academic learning and practical work: Academic education is a bit different from practical work. Every single part has its own importance. The things I learnt from my previous education life has been a great apart from my academic life, much new things took place in the practical period. Various academic courses like news writing, TV and radio reporting, editing and page make-up was really helpful during my practical work. Every houses have their own policies of which I was not informed. The work according to those policies was completely new experiences for me. For making news stories, I have gone through the 5W1H process and the Inverted Pyramid Structure of which I came to know during my academic life. Another important factor of work is maintaining the schedule. The use of internet has made life mush faster than before Publishing the news has also been a matter of race. So, time means a lot. But practical life and study lives are totally different, when at work, the importance of every single assignment comes in focus. 4.2 Expectation and Experience: During my studies, I have worked in the JMC gazette which was published by our department. But in field of national Daily, this is my very first experience. I was not certain about my internship. But as a student of the department of Journalism and mass Communication, DIU, I had a slight experience and it helped me a bit in my practical life at all. As stated before every house works under their policy. That's why I was a bit nervous at the beginning. But after few days, things

started to become easier for me. Another factor is time. I had to focus for the very first edition. So, this period such an experience for me. 4.3 Skill development during my internship: During my internship at the Daily Samakal. I worked in the central deck and international deck. The skill occurred in this two sector are stated below: ? Making planning for checklist. ? Collection of Resources. ? Field experiences regarding practical works. ? Taking preparation before field visit. ? Managing the time properly. ? Confidence and professionalism regarding scheduled works. ? Development of social Relationship. ? Maintenance of office rules and regulations. ? To guess and apply the right word for writing story. ? Exploring available online resources for additional information. Opportunity and Future Career: Experience is often the most valuable thing. In this time experience is an important for all kind of job sectors. Without experience it is so tough to get any job. You should have good experience, though result in not enough for getting job. We spend four years in our academic activities with no opportunity to gain work experience. That's why after the four years' academic activities we get an opportunity to gain experience through by our internship program. It is a great chance to enhance our work experience. As we can say that internship can help us to develop our future career. During my internship I have work with different types of people and I introduced with many professional people after that I have a good relationship with them and they will assist me to find out a good job. I have also work as a subeditor and as a reporter. I have gain knowledge how to make a report and I believe that it will make my CV stronger because a strong CV is an important to get a good job. As we see most of the company they give more value an experienced person. but in professional life time is an important for all kind of jobholders. So in this digital age all kind of news spread out with in a short time all over the world. That's why we should maintain our time properly and we have realized how to maintain our working time. CHAPTER FIVE: CONCLUSION 5.1 SWOT analysis of the organization Strengths: ? An acclaimed newspaper in the country. ? The editorial policy is independent and strong? The house has brilliant reporters with abilities of excellent investigative reporting. ? Cover a vast area along with the capital. ? The house has professional reporters. ? The paper has good readership. Weaknesses: ? The online section has room for improvement. ? The transportation should be improved. ? Politically biased. ? Need improvement in official management. ? Lack of sufficient technology and tolls to support every employer. Opportunities: ? Central deck and online section need new sub-editor and reporters. ? The facilities of sub-editor and reporters. ? Circulation are about to increase. ? Transportation could be added. Threats: ©Daffodil International University? Quite presences of political influence.? Online news will reduce sells of hard copy. ? Discouragement now growing over people as they think use of paper is threat to the environment. ? Misrepresentation take place of any news and information. 5.2 Recommendation: In this modern world information technology is moving faster than any other technology, after a while, people will stop reading newspaper. Everyone will lean more towards online newspaper, so I think Samakal should more concentrate about online news portal and increase more database. 1. The Samakal authority should concentrate more about social media for enhancing their reader. Like Facebook, Twitter. 2. The Samakal authority can arrange monthly discussion session where all the employer can give their opinion to improve their house. 3. They should change their newspaper infrastructure to attract people, 4. The Samakal authority can run an award on the basis of most dedicated employee among the employees. 5. The Samakal must provide more desk and Computers. 6. The Samakal should increase more opportunity for those people who are doing internship on their house. 5.3 Conclusion: Internship is the way of

enhancing work experience. Though the internship was enjoyable and quite challenging experience for me. Through hard work, I learned a lot of new life influencing thing. Undoubtedly, the internship was the most fruitful and significance experience in my life. During my three months' internship I learned a lot of new things and it will help me in my professional career. I believe that I will be able to give something good in my experience. In this section everyone maintains a proverb "Time and Tide wait for none" Especially I learned how to maintain working time. I gratefully remember the kind of support and suitable instruction given by the Samakal. It is undoubtedly true that without their cooperation I would not complete my internship. I want to thank my supervisor he also helped me a lot. Finally, heart fully thank to Allah without His grace nothing can be possible.
