An exceptional obligation is because of my decent educator, Mr. Mohammed Nafeez Al Amin, Assistant Professor and Associate Head, Department of Business Administration, Faculty of Business and Economics who has been my scholastic chief for the course of BBA. He was top dog enough to allocate her significant time to give me her modest direction, motivation musings, adequate and appropriate headings for the fruitful preparation of this report.

I am likewise very grateful to all Ahsan Composite Limited authorities, who work to give me the fundamental information and itemized explanation that arranged this report and the entry level position think about. I might likewise want to thank the staff at the Ahsan Composite Limited for their significant cooperation and help. It will be uncalled for on the off chance that I don't give them thanks since we can do nothing without their cooperation.

I am likewise grateful to my Family for their constant a wide range of backings all through the getting ready report.

Executive Summary

This investigation is the outcome of my entrance level position program at Ahsan Composite Limited as far back as a fourth of a year. The reason behind the doled out educational projects is to appreciate specialist satisfaction, which is the reason I expected to get the representatives judicious locale of obligation so I could cooperate clearly with them to grasp their points of view and their association with their association. Occupation satisfaction is the conclusion of satisfaction or joy that an individual gets from his or her movement. The investigation demonstrates that specialist satisfaction depends to a great degree on occupation progressions, remuneration system, duty in fundamental initiative structures, work environment, vocation improvement opportunity, boss information, association with senior administration, attempt tohome flexibility, etc. The case for this examination was Ahsan Composite Limited's present specialists. Printed overviews were scattered among 150 respondents and all of the surveys were amassed and taken as the investigation information. MS Excel has investigated the information. Regardless of differences in sentiments made by the specialists of the association on what the investigation was coordinated, the examination demonstrates that representatives are content with their movement destinations.

Chapter One

INTRODUCTION

With the advent of the 21st century, globalization and association between multinational and foreign companies are having an impact on the economies of the third world, including Bangladesh. Bangladesh's various business conglomerates institutions and other companies are working in such a way to address this ever-increasing competition in order to meet challenges both locally and internationally. The development-oriented conglomerate business influences the socio-economic sector in such a way that after a few years our country becomes a middle-income country. A garment industry plays a major role in a country's sustainable development. It is recognized that the RMG sector is the barometer of the national economy that this development industry is well connected with employment and environment. Bangladesh has undertaken the internship training program for its students in order to develop skilled professionals in this particular area, Daffodil International University. As a partial and essential requirement of BBA degree, the authority has placed me to Ahsan Composite Limited, for having practical experience in this sector for three months' internship program.

1.1 Origin of The Report

This report is an internship report prepared to complete the BBA program as a requirement. The internship's primary objective was to provide the student with an "on - the - job" exposure and an opportunity to translate theoretical concepts into real - life situations. Students are placed in companies, organizations, research institutions and the garments sector. In this regard, I was assigned to Ahsan Composite Limited after the completion of the BBA program; for my internship report under the supervision of Sir Mr. Mohammed Nafeez Al Amin, Associate Head & Assistant Professor, Faculty of Business & Entrepreneurship Daffodil International University, I chose the topic "Job satisfaction of employee at Ahsan Composite Limited."

1.2 Objectives of the Study

The study's objective is to gain an understanding of the practical human resource activities and related knowledge I have gained from abstract training, university education, and various Ahsan Composite Limited document.

Objectives:

> To find out Job satisfaction level of employees at Ahsan Composite Limited.

1.3: Scope of the Study

The study report is prepared in term of the three months of internship program the report covered all the aspects of ACL employee's job satisfaction.

1.4 Methodology of the study

The present examination depends on enlightening investigation utilizing essential data to investigate the destinations. A very much organized survey was utilized to gather the essential data.

Basic irregular testing technique was utilized among the example size of 150 employees of. Ahsan Composite Limited. In this investigation rate examination have been utilized as the exploration instruments.

Nature of the report

Exploratory report

An exploratory research project is an attempt to lay the ground work that will lead to future studies, or to determine if what is being observed might be explained by a currently existing theory. Most often, exploratory research lays the initial ground work for future research.

Data Collection: Data were collected using a structured questionnaire survey. Information collected to deliver this report is both from primary and secondary sources.

Sample Size

Sample size was 150 employees of ACL.

Primary Data:

- ➢ Face to face discussion with executive and officer
- Observation during my internship period.
- Survey questionnaire

Secondary Data:

The secondary data are collected from Ahsan Composite Limited. secondary sources like annual report, Broachers and company website.

Chapter Two

Organizational History

2.1 History and short introduction of Ahsan Composite Limited

It's an instant of exult to introduce ourselves to our clients and patrons. We corroborate whatever we have achieved; its credits should be directed towards our clients. We instigated our journey in 2002 as a name Ahsan Composite Limited (ACL).

ACL is a vertical knit Composite textile unit having an average daily production capacity of 40,000 pieces of knit garments with ladies, gents and kids' items. As a Composite knit textile, ACL boasts a dyeing unit with a production capacity of 9.4 tons per day and the knitting unit with a production capacity of 5 tons per day. Regular capital reinvestment is an integrated part of the company's management idea and has resulted in new state of art Woven unit with a production capacity of 6,000 pieces woven garments per day. As an export oriented company, ACL mostly caters for customers based in the European and the American (north & south) countries. The prominent buyers of ACL are C&A, Oviesse, NKD, Arientation, and SRG Apparel. We have come all the way more than one decade with self-reliance, integrity and superiority of being proficient to meet our valued customer's requirements by producing top worth garments in an amusing atmosphere and meeting timely delivery.

2.9.2 Woven Unit

ACL has a close woven family of more than 650 employees. Out of them, approx 50 are at managerial level.

Chapter Three

Literature Review

3.1 Job satisfaction

Usually work satisfaction or laborer satisfaction described diverse ways. A couple of individuals believe that how content an individual is with his or her movement, toward the day's end whether they like their action or individual perspectives like the possibility of the action or not. On the other hand, it's not as clear as the definition, some social affair of people thinks. They believe that this technique incorporates a multidimensional mental response to one's action. A champion among the most as frequently as conceivable used definitions in legitimate research is that of Locke (1976), who describes the articulation "a pleasurable or positive eager state coming about in light of the assessment of one's action or work understanding." Spector In 1997, 14 customary perspectives were recorded. They are-Appreciation, partners, correspondence, coincidental points of interest, condition of business, nature of work, affiliation, personal growth, techniques and frameworks, open entryways for progression, affirmation, security and oversight. Occupation satisfaction can similarly be found in the particular setting of issues that impact the work understanding and the idea of their working life for delegates. As to relationship with explicit elements, for instance, general success, stress at work, work control, home-work interface and working conditions, it can similarly be understanding. In India an "Examination of Factors Affecting Employee Satisfaction of open and Private Sector" contemplated that laborers will all in all adoration their movement if they get what they acknowledge. Examination exhibited that by far most of the agents in india are not content with their action beside two or three folks in exchange division and female in guidance portion.

The complete activity fulfillment dimension of guys is found higer than that of lady. What's more, fabricating level employment segment fulfillment level is extremely poor.

A Few Definition of job satisfaction are quoted as follows:

According to E.A. Locke- "Job satisfaction is a pleasurable or positive emotional state resulting from the appraisal of one's job or job experience." According to Fieldman and Arnold- "Job satisfaction will be defined as the amount of overall positive affect or feelings that individual have towards their jobs." According to Andrew Brin- "Job satisfaction is the amount of

pleasure or contentment associated with a job. If you like your job intensely, you will experience job-dissatisfaction."

3.2 Three important dimension of job satisfaction:

- 1. Job satisfaction cannot be seen; it can only be inferred.
- 2. Job satisfaction is determined by how will outcomes meet the expectations or exceed it. If any employee faces any situation that organization is paying less amount according to his workload and other department people are receiving good amount than him, then surely dissatisfaction occurs. He will show a negative attitude there. On the other hand, if he is paid with a good amount automatically he will show a positive attitude towards his organization.
- 3. Job satisfaction can be count by the job attitudes. Positive attitude is conceptually signaled of job satisfaction and vice versa.

These two terms are used interchangeable, yet there are differentiates between these two terms. Occupation satisfaction is a specific subset of outlooks. Moods are the reflector parameter about one's feelings towards an occupation, objects. Outlooks are suffering, anyway satisfaction is dynamic and it keeps advancing. It can diminish quickly than it made. Subsequently chiefs need to give more thought to work satisfaction dependably.

3.3 Factors Influencing Job Satisfaction:

There are a few factors that impact work fulfillment. These examinations have uncovered steady relationship of specific factors with the activity fulfillment. These components are clarifying through the graph:

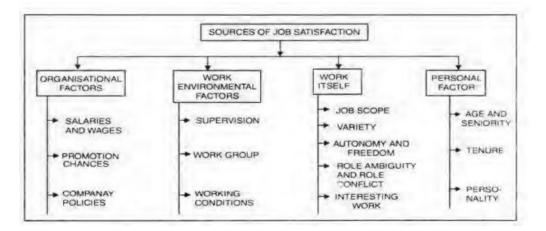

Figure: Factors Influencing Job Satisfaction

A. Organizational Factors:

The organizational factors which affect job satisfaction are:

1. Salaries and wages:

Money is the most basic factor for fulfilling ones needs. Money also satisfies the foremost component of necessities of Maslow's model of satisfaction. Wages and pay rates expect a tremendous activity in affecting work satisfaction. Other than specialist consistently imagines that money is impression of the organization stress for them. Thirdly, it is considered as a picture of achievement since higher pay reflects more elevated amount of responsibility towards affiliation.

Non-cash related focal points are moreover basic. All around, specialists don't grasp the essential focal points plan. They need a remuneration system which is clear sensible and as per their craving.

Promotion:

Another considerable factor that affect job satisfaction because of following reason

- Promotion indicates on employee's worth to the organization which is highly morale boosting. This is true fact in case of high level jobs.
- Employee consider their promotion as the ultimate achievement in his career and when it is realized, he feels satisfied
- Promotion involves positive changes.

2. Company Policies:

Various leveled techniques are essential factors for choosing the action satisfaction of agents. An oppressive and significantly complete structure causes despise among the agents where as an open and larger part rule structure makes entrancing business demand towards them.

The legitimate methodologies can make positive and negative suppositions among the specialists. Demanding game plans can mix a failure and liberal and sensible methodology can stream satisfaction inside the delegate's mind.

B. Work Environment Factor:

This includes following factors

1. Supervision:

Supervision is another important factor of job satisfaction. There are two dimensions of supervisory styles. They are

Employee Centeredness- here the supervisor takes personal interest in employee's welfare.

Participation- allow the employees in decision making process which will affect their job. This can create a highly appreciated environment for employees.

2. Work Group:

The nature of work group will have effect on job satisfaction in following ways

a. A friendly cooperative group provides opportunities to the group members to interact with each other. It can create a source of support, comfort, advice and assistance to the individual group members.

b. a stronger group is possible only when the members have similar attitudes and values, thus a great source of satisfaction can be formulated.

3.Working conditions:

It is alluring for each emplyee to have a superior working condition as they lead to increasingly physical solace. Temperature, moistness, lighting, ventilation, working hours, working environment tidiness and sufficient instruments and gear are factors expected to decide work fulfillment. Poor condition may prompt worker disappointment. Furthermore, as appeared in the figure underneath, all representatives are not fulfilled or disappointed with the positive and ominous workplace.

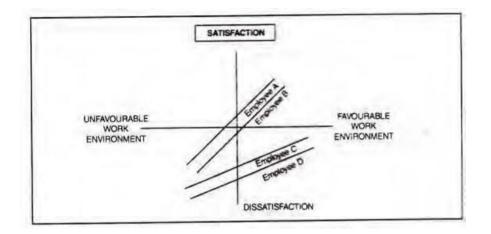

Figure: Working Condition

As appeared in figure, all the four representatives are disappointed when the working conditions are horrible. Nonetheless, as the working conditions begin getting to be good, the activity fulfillment of representatives A and B increments while worker's C and D have a little increment in fulfillment.

C. Work itself:

The content of work also plays a significant role for measuring job satisfaction

(a) job scope:

The higher the level of this factor which includes job responsibility, work pace and feedback, higher the level of satisfaction.

(b) Variety

Variety of job work is effective but that should be in a moderate amount. Excessive or less variety causes both stress and monotony which can create job dissatisfaction.

(c) lack of freedom and autonomy:

Employees do not like it when their every step is determined by the authority supervisor. It creates helplessness and dissatisfaction.

(d) Role ambiguity and role conflict:

This can lead confusion and conflict among the employee as they don't know what is their task and what is expected of them.

(e) Interesting work:

A challenging and interesting work always provides a status of satisfaction towards employee. On the other hand, boring and monotonous work creates a sense of worthless feelings.

D. Personal Factors:

The identity characteristics and qualities additionally decide the activity fulfillment level. Worry wart and pessimistic disapproved of individuals will dependably gripe about everything which likewise incorporates work. Then again constructive attributes individuals are constantly sure and they have the charm to perk up different workers and make them fulfilled about the activity.

Some of the important personal factors are:

a. Age and Seniority:

The maturity of people comes with the age. They become realistic, less idealistic so that they easily accept available resources, rewards and always satisfied about the situation. People who do not move up with the time are more likely to be dissatisfied in every situation of their life including job sector.

b. Tenure

Residency is a fundamental factor in ensuring proficient soundness. Long - term residency width agents are particularly content with their movement. Fear of occupation setback can make a hopeless identity. Only a long - term residency can empower them to plan a future and thusly make them feel satisfied.

c. Personality:

A couple of characteristics of personality are direct related to business satisfaction. For instance, certainty, advancement, confirmation, feeling of freedom, challenge, and obligation. The higher the Maslow's require chain of significance, the higher the satisfaction of the movement. So the officials must ensure that other than outfitting them with a sound working environment, the delegate has positive characteristics.

3.4 Rules & Regulation-Attendance:

automated and manual.

• Automated: Head Office, Parks

• Manual: Factories, Projects

Question Number12: Among the quantity of 150 respondents 13% individuals runs with firmly deviate, 20% individuals dissent, 12% nonpartisan, 35% individuals run with Agree, and 20% respondents who runs with unequivocally concur.

Chapter Five

Findings and Recommendations

5.1 Findings

- It can be said that most of the respondents are happy with the working hour and salary.
- Larger part of respondent's said that superior does not treats the workers reasonably, when they perform great job.
- It can be derived that there is a huge communication gap between different level of management which can be a barrier in creating appropriate corporate relationship and it can affect the efficiency of work.
- Top of the board of Ahsan Composite Limited continues rousing the representative to perform better of the prevalent.

5.2 Recommendation

My Study finding over all demonstrates that most representatives are happy with their responsibility to Ahsan Composite Limited. Albeit dependent on the consequences of the investigation and the end drawn from it, the accompanying proposals are sketched out which can be followed so as to keep up the present state and build up the future work situation Satisfaction in the association:

- Ahsan Composite Limited should improve work according to employee's qualification and skills.
- > They should be more careful to the top management of the organization.
- > Supervisor of ACL should make a friendly relationship with employees.
- They should give more attention to personal accomplishment and recognition of the employee to increase the level of job satisfaction.
- Managers of ACL should concern about the facility and demand of junior level of employee rather than selective officers by removing biasness.

Conclusion

From the previously mentioned report, it very well may be comprehended that Ahsan Composite Limited is one of the main client created business associations. In this manner, since it is a vast combination, all dimensions of staff are working there. Since my temporary position program was gone for understanding the dimension of occupation fulfillment, I needed to pick up the pragmatic region of duty and representative responsibility so I could collaborate with them to assess their perspectives and associations with the association. I attempted best to legitimately and in a roundabout way ask and gather data. I had great access to the distributions of the organization, however. For all intents and purposes and exactly, past examinations on this issue have discovered that activity fulfillment depends to a great extent on the quantity of interrelated segments, for example, work environment, wage, preparing, and so forth. In spite of contrasts of assessment about what the investigation was led by the association's representatives, what the examination observes to be profoundly happy with their work.
