Acknowledgment

Most importantly, I express gratitude toward Almighty Allah and I am appreciative for His heavenly effortlessness which encourages me to effectively finish the last year temporary position.

I am appreciative to my Supervisor Md. Tanvir Rahman, Senior Lecturer, Department of CSE Daffodil International University, Dhaka, and I wish him my most profound appreciation. His tireless tolerance, academic guidance, relentless inspiration, predictable and dynamic supervision, helpful analysis and astute counsel at all levels have made it conceivable to finish this temporary position.

I might want to uncover my sincere appreciation to Dr. Syed Akhter Hossain, Professor and Head of the CSE Department, for his thoughtful help with completing my temporary job, just as to other employees and staff of Daffodil International University's CSE Department.

ABSTRACT

A temporary job on "Web Application Development," working with different web innovations and picking up information to build up a significant undertaking has been broadly talked about. Working with various tasks and an enormous group in the earth is entirely unexpected as we for the most part think. This report talked about the obligations of a web engineer or developer and the agreeable working methodology. Working involvement in JavaScript, PHP, and WordPress among various web innovation, for example, JS(AngularJS; ReactJS), PHP(Raw PHP), CMS(WordPress) was the topic of the exchange. Why helpful coordinated effort is tended to in the examination by actualizing a typical working model. There are numerous degrees of improvement of the undertaking. What layer I worked with has been tended to and my involvement in that layer. My work in the making of papers, online business and a lot progressively differing sites were tended to principally. Plan of frontend with a backend system and picking up information on being a full stack designer has been quickly tended to.

- To learn more need to work with new technology.
- Sometimes hard problem comes from new web format.
- Many companies are working hard to reach the point.

CHAPTER 3

Tasks, Projects, and Activities

3.1 Task and Activities

The workplace begins at 10.00 am and finishes at 07.00 pm normally 2 days in seven days. In that timespan, I had numerous assignments to do with.

- Starting with essential web architecture with HTML5, CSS3, JS, and Bootstrap.
- Tracing the blunder for the plans and fixing them.
- After multi month I confronted an undertaking of Web Application Customization and advancement for the customers with the co-activity of the Society of Laparoscopic Surgeons of Bangladesh (SLSB).
- After 2 months I had worked with web architecture in the co-activity of Sharif Bearing and Machineries.
- Learning new innovations and new inventive and extraordinary plan constantly.

3.2: Events and Activities

This temporary job gives me a chance to learn in a brief timeframe new dialects and innovations. That enabled me to turn out to be notable inside the arranged time period with the IT occasion the board and different exercises. The temporary position helped me build up my on - the-spot understanding of overseeing assignments and helping me in improving my educational plan vitae and portfolio.

For each venture that I built up in my temporary job time, there was a test. The two issues coordinated the timetable, adding consumer loyalty to the finished projects, which means no requirement for more plan updates.

Once more, in a benevolent mentality participation stage, there was a pleasant domain for learning and working. That picked up the experience of working as per myself in a working environment and association.

3.3: Project Task and Activities

The essential point of this Internship was to learn Web Development for the Industries. So I worked with an E-Commerce System, a few Web Sites.

E-Commerce site and Whole Management system development.

Languages Used

- HTML5 and CSS for making the skeleton or colorized the site.
- JS for developing the functionality and Interactive features.
- Raw PHP and JS for the server-side language.

3.4 Challenges

Confronting numerous issues or difficulties is simple when a tremendous venture is finished. I've likewise confronted, however it's another experience for me to survive. Indeed, even the task has another piece of fun and satisfaction to understand mistakes and complete them. Taking up the following difficulties can make one progressively certain.

CHAPTER 4

Competencies and Smart Plan

4.1 Competencies Earned

During my entry level position, I worked with a few activities. I carried out those responsibilities inside the course of events required. So I could state that I am experienced enough presently to do any sort of hard and requesting web improvement work in the ICT field. I'm completely arranged for the activity for this unpredictable, testing time. I have a hand-to-hand involvement in the new age advancements to make the overly intelligent spots.

Indeed, even in a brief span I'm totally arranged to adapt new advancements. Presently there are a lot more innovations that come each day to control the pattern. I'm totally arranged to take on these assignments.

4.2 Smart Plan

My profession has just been planned and plotted to create and assemble superb web innovation. I arranged the accompanying strides to decorate my future:• Working with the current testing work.

- CV and portfolio to improve a lifelong way.
- Improving the profile of LinkedIn and the profile of GitHub.
- I've been in the know regarding the innovation.
- Regular preparing to review the experience I have learned.
- To look for new and imaginative expressions and structure.

4.3 Reflections

- Doing testing work with an imaginative group.
- Creating something remarkable for my nation.
- Learn more innovation.
- Start an Initiative for making the new chances.
- Creating something for the country.
- Working with the innovation use for humankind.

CHAPTER 5

Conclusion and Future career

5.1 Discussions and conclusion

I've adapted such a significant number of things in this entry level position. Step by step instructions to deal with an extend and deal with the course of events were the most significant point. Information about different Web and Android Application innovation can assist me with finding the preferable profession over other. SDLC process for the gigantic venture and making a SDK and well Documentation were other experience I've assembled. Again working as a team with a group experience will assist me with enhancing my progression forward.

5.2 Scope for Further Career

This entry level position and information will assist me with utilizing my future vocation. Still I've a few confinements on my insight and I've to find out additional. In any case, my present information can help me enough to follow the best vocation of the century. I'm seeing the accompanying future vocation can be my objective:

- Good information on JS can assist me with working with dynamic and innovative occupations.
- There isn't so a lot of JS engineer directly so I could get in a higher calling on any IT organization.
- Several information about web and android innovation can pick me to the main IT organization.
- Besides Web advertisement Android information I've others information for venture the board and collective work will assist me with getting the best profession.
