## Subject: Submission of the Report Titles "Comparative Analysis of Corporate Banking Service of Commercial Banks in Bangladesh: A Case Study".

Dear Madam,
It is a delight for me to present the report titled "Comparative Analysis of Corporate Banking Service of Commercial Banks in Bangladesh: A Case Study". I have given my best exertion to make this paper feasible \& informative. My primary target was to prepare this answer as per your rules \& guidelines and possessing extraordinary experience. This endeavor extremely assists me to accomplish the outcome of hypothetical information in the connected field. I believe that this experience will positively impact on developing more effective research-based papers in future resolving all the mistakes.

Furthermore, I am very much grateful for the privilege that you gave me to express my capability, and I hope that you will positively consider my effort to stimulate my willpower to accomplish such activities more effectively \& efficiently.

Your Faithfully,

## Aminu! IAlam.

## Aminul Islam Ovi

ID: 161-11-4936

## Approval Certificate

This is to certify that Aminul Islam Ovi, ID: 161-11-4936, BBA(Finance) is a regular student of Department of Business Administration, Faculty of Business \& Entrepreneurship, Daffodil International University. He has effectively completed his 3 months internship program at Modhumoti Bank Ltd and has prepared this internship report under my direct supervision. His given internship topic is "Comparative Analysis of Corporate Banking Service of Commercial Banks in Bangladesh: A Case Study".

I've gone through the report and found it is well written report. He has completed the report by himself. I wish his success in life.

Rozina Akter
Assistant Professor
Department Of Business Administration
Faculty of Business \& Entrepreneurship
Daffodil International University

## Acknowledgement

Firstly, I wish to offer my thanks and respect to Almighty Allah who has given me the capacity to done this work. I do offer thanks for the favors given by Allah to my everyday life, great wellbeing, legit identity and shrewd perspectives. It is without a doubt an astounding pleasure to get the opportunity to display this report following three months of sensible presentation of Modhumoti Bank Ltd. This entry-level position report is reflected as a clear exertion to develop my connected \& individual comprehension, which adds to the theoretical \& analytical piece of my investigation. The general population without whom I may never be fit to present my report in the accompanying expressed paying little heed to any significance altogether.

First and foremost, I might want to exact my extreme appreciation and profound affections to my decent teacher Rozina Akter, Assistant Professor, Department of Business Administration \& Faculty of Business \& Economics, for his supportive direction, evaluation \& interminable fortification for this report. The gift, help \& direction given by her, is an opportunity to convey me to an extended path. I want to express my gratitude to all the senior officers for their regular \& unconditional assistance to finish my internship program effectively. Besides, this short term internship program makes me perceived to realize the corporate culture \& environment and developed my practical knowledge very much. I should refer to the remarkable workplace and the idealistic management \& operation of this bank, which helped me gigantically.

#### Abstract

The purpose of this study is to accomplish Comparative Analysis of Corporate Banking Service of Commercial Banks in Bangladesh: A Case Study. In terms of the banking industry, corporate banking plays a significant role in contributing to the economy more than retail banking. This paper is basically qualitative \& quantitative in nature \& from this paper it has been found that almost all private commercial banks ( 5 banks ) have been increasing the total amount of loan \& advances following the increasing amount of deposit in every consecutive year to satisfy the need of their corporate clients, but in comparison to the amount of loan \& deposit, the total amount of interest income isn't satisfactory. According to the ideal loan to deposit ratio a bank shouldn't keep the loan to deposit ratio above $80 \%-90 \%$, but most of the banks are offering higher loan against the total amount of deposit by borrowing liquid from other sources that put depositors at high risk. Besides, the higher amount of loan couldn't generate a higher amount of net interest income where most of the banks generate only $1 \%$ to $2 \%$ interest income due to failing to make effective credit analysis, weak \& lengthy juridical system and improper supervision of the management that also result in a higher non-performing loan. However, to ensure sustainable growth in the corporate banking sector \& to protect the interest of depositors' bank must take effective decisions \& actions to mitigate the number of non-performing loans and the risk of loan default.

## 1) Introduction:

Bangladesh is a developing country in South Asia. Like other countries, in Bangladesh corporate banking plays a magnificent role in contributing to the economy more than retail banking. It is because the number of transactions of corporate clients as well as the quantity is much higher than the retail customer that result in higher profit. However, after independence, Bangladesh started its banking journey by renaming its central bank as "Bangladesh Bank". Gradually the banking industry grows up with the combination of many private \& state-owned commercial bank. Currently, it has 6 state-owned commercial banks \& 41 private commercial banks who are providing various services including corporate banking, retail banking, digital banking, Islamic banking etc.

Although it is true that to become a developed nation corporate banking sector should be dynamic to boost up more industrialization \& create more employment, the reality of today's corporate banking sector isn't as much stronger as it needs to be in terms of Bangladesh perspective. The poor governance in the banking industry, political unrest, corruption, money laundering, frequent crash in the share market, increasing amount of defaulters has gradually been weakening this industry for a long while. As a result, banking industries are compelled to raise the interest rate on borrowing to cover the loss. On the other hand, due to the higher interest rate on borrowing, their corporate clients are motivated to divert in the capital market from the money market to meet their need. Hence, these drawbacks are stimulating a kind of distrust among corporate clients that also hamper the good relationship between them. Along with this, the poor management system in the banking industry \& lack of knowledge, lack of assessment in the creditworthiness of a company or firm, regular supervision or monitoring and improper actions may lead to enhance the defaulters that result in a collapsed banking industry.

To recover from this problem, some effective sustainable banking solution should be adopted. And in the analysis part, it has been cleared that the bank should charge lower interest rate (currently it is charging $12 \%-13 \%$ ) on corporate borrowing so that it may easier to the borrowers to return the money on time. Besides, a lower interest rate on borrowing may also encourage to come up with the new emerging firm to expand their existing business. However, the lower interest rate on borrowing is highly required because it has been clarified in the analysis part that the net interest margin ( net interest profit ) of the banks is volatile or sometimes below standard due to high bad debt or weakness in credit collection.
1.1) Key products \& services of corporate banking: The corporate banking segment of a bank generally serves a distinguished clientele which is encompassed with small to midsized local business with billion in sales \& offices across the country. The key product \& services that corporate banks offer are -
a) Loans \& other credit products: This is typically considered as one of the largest segment of business within corporate banking which is associated with biggest source of profit \& risk.
b) Treasury \& cash management services: On behalf of a company or large institution, banks manage their day to day working capital \& currency conversion requirements.
c) Equipment lending: On behalf of a company, bank often leases a range of equipment that are used by companies in diverse sectors such as manufacturing, transportation \& information technology.
d) Commercial real estate: The main services under commercial real estate are associated with asset analysis, portfolio evaluation, debt \& equity structuring.
e) Trade finance: It involves letter of credit, bill collections \& factoring.
f) Employer services: Services such as payroll \& group retirement plans are typically offered by this service.
g) Underwriting service: Under this service, bank assist corporations to issue securities in the market to raise their capital and if the company fails to sell the maximum number of shares to raise capital, the bank will purchase all of them on behalf of that particular corporation.

## 2) Literature Review:

Guo,X, Duff., \& Hair,M.(2008)- have found in their research paper, titles as " Service quality measurement in the Chinese Corporate Banking Market", four constructive findings to improve the corporate banking service in China. Firstly, Bank should provide reliable services in order to gain satisfaction from corporate customers. Secondly, the bank management should provide adequate training to mitigate long term problem in future. Thirdly, the bank should emphasize on communication pattern to maintaining strong corporate relationship with their respective clients. And fourthly, bank management should focus on latest technology \& service quality very precisely.

Alvaro Edmundo TresierraandSergio David Reyes ( 2017 ) have found in their research paper, titles as "Effects of institutional quality and the development of the banking system on corporate debt" that when government \& private agents will maintain a stable financial regulations, mitigate political unrest \& corruption \& ensure a secure \& stable financial market the banking system will be more strong on expanding corporate debt. This is because it allows more stable \& prolonged relationship between banks \& a firms.

Aodheen O'Donnell, Mark G. Durkin and Danielle McCartan-Quinn (2002) - have found in their research, titled as "Corporate Banking in the UK- Personal VS Remote Interaction", that the all customers prefer personal interaction specially smaller customer, who are deemed as less profitable customer to the bank, don't prefer to embrace technological based communication rather very much comfortable on personal interaction with their banks.

Syed Saad Andaleeb, Mamunur Rashid and Quazi Akhlaqur Rahman( 2014 ) have implied in their research paper, titles as "A model of customer-centric banking practices for corporate clients in

Bangladesh", that corporate customer centric banking is generally influenced by intangible factors including corporate image, commitment, compassion and consistency are the four significant intangible factors. While cost benefit \& convenience, two tangible factors, aren't significant determinants of satisfaction for corporate clients.

Chan, A. K. K., \& Ma, V. S. M. (1990) researched on Corporate Banking Behaviour: A Survey in Hong Kong. International Journal of Bank Marketing, figured out the importance for banks to understand their clients' attitudes in order to serve them more satisfactorily, which in turn will lead to a better market share.

According to Takeo Hoshi(1990), he has found that in the perspective of Japan economy the investment of firms that opt the public debt financing option and weakened their bank ties was more delicate to liquidity than firms continues to borrow funds from bank.

Yongsheng Guo, John Holland and Niklas Kreander( 2014 ) have implied in their research paper, titled as "An exploration of the value creation process in bank-corporate communications" that the nature of bank-corporate relationship is long run. The relationship totally relies on trust based personal communication between banks \& corporations. Besides the advances of technology, financial regulations \& business globalization are some macro conditions that influence this relationship.

## 3) Objectives:

- To analyse the comparative performance of corporate banking between 5 private commercial banks in Bangladesh from 2013 - 2017
- To discover the areas of constraints by all these banks and come up with some suggestions to improve the situation.

## 4) Methodology:

This paper is based on fully secondary data. All types of data has been collected from different sources, like

- Annual Report Of Banks
- Lankabangla Financial Portal
- Different journals

This comparative analysis accomplished on five private commercial bank ltd in Bangladesh including Modhumoti Bank Ltd, Dhaka Bank Ltd, Trust Bank Ltd, One Bank Ltd \& NRB Bank Ltd to make an effective comparison between their corporate banking sectors. This study includes both quantitative \& qualitative analysis. Ratio analysis, trend analysis, common-size analysis, product \& service analysis, credit quality analysis, credit rating analysis \& key performance analysis are the major analysis part of this study. All kinds of numerical analysis have figured out by using MS-Excel.

## 5) Discussion \& Analysis: Comparative analysis between their corporate banking product $\&$ services:

5.1) MMBL VS TBL :

| Modhumoti Bank Ltd | Trust Bank Ltd |
| :--- | :--- |
| Short Term Finance | Overdrafts |
| Long Term Finance | Short Term Loan |
| Real Estate Finance | Long Term Loan |
| Work Order Financing | Syndicated Loan |
| Syndicated Financing | Trade Financing |
| Project Financing | Cash Management |
| Trade Financing |  |

Interpretation: From above comparison of their respective corporate banking services, it discloses that the MMBL is adopting competitive advantage over Trust Bank Ltd by offering some different services including real estate financing, work order financing that Trust Bank isn't offering to their corporate clients.

## 5.2) MMBL VS ONE Bank Ltd:

| Modhumoti Bank Ltd | ONE Bank Ltd |
| :--- | :--- |
| Short Term Finance | Deposit Account |
| Long Term Finance | Salary Account |
| Real Estate Finance | Trade Finance |
| Work Order Financing | Project Finance |
| Syndicated Financing | Infrastructure Finance |
| Project Financing |  |
| Trade Financing |  |

Interpretation: From above comparison of their respective corporate banking services, it discloses that the MMBL is adopting competitive advantage over ONE Bank Ltd by offering some different services including Syndicated Financing, work order financing that ONE Bank isn't offering to their corporate clients.

## 5.3) MMBL VS DBL:

| Modhumoti Bank Ltd | Dhaka Bank Ltd |
| :--- | :--- |
| Short Term Finance | Project Finance ( Short,Mid,Long Term) |
| Long Term Finance | Working Capital Finance( Overdraft ) |
| Real Estate Finance | Trade Finance |
| Work Order Financing | Cash Management Services |
| Syndicated Financing |  |
| Project Financing |  |
| Trade Financing |  |

Interpretation: From above comparison of their respective corporate banking services, it discloses that the MMBL is adopting competitive advantage over Dhaka Bank Ltd by offering some different services including Syndicated Financing, work order financing that Dhaka Bank Ltd isn't offering to their corporate clients.

## 5.4) MMBL VS NRB BANK LTD:

| Modhumoti Bank Ltd | NRB Bank Ltd |
| :--- | :--- |
| Short Term Finance | Business Transaction Account |
| Long Term Finance | Term Deposits |
| Real Estate Finance | Special Notice Deposit |
| Work Order Financing | Payroll Banking |

| Syndicated Financing | Cash Management Services |
| :--- | :--- |
| Project Financing |  |
| Trade Financing |  |

Interpretation: From the above comparison of their respective corporate banking services, it discloses that both banks are enjoying different comparative advantage by offering their unique service. Here, NRB Bank Ltd is adopting competitive advantage over Modhumoti Bank Ltd by offering some different services including Business Transaction Account, Payroll Banking while MMBL obtaining a competitive advantage over NRB Bank Ltd by providing also some unique service including Syndicated Financing, work order financing that Dhaka Bank Ltd isn't offering to their corporate clients.

## 6) Liquidity \& Leverage Analysis:

## 6.1) Analysis Between MMBL VS TBL

| Liquidity \& Leverage Analysis( MMBL ) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Particulars/Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| Current Ratio | 2.32 | 1.39 | 1.00 | 1.21 | 1.16 |
| Loan To Deposit Ratio | $2 \%$ | $41 \%$ | $0 \%$ | $68 \%$ | $84 \%$ |
| Liquid Asset To Total Deposit | 4.47 | 1.59 | 0.00 | 1.37 | 1.34 |
| Debt Ratio | 0.42 | 0.70 | 1.00 | 0.99 | 0.87 |
| Debt To Equity Ratio | 0.72 | 2.34 | 563.66 | 79.98 | 6.86 |

| Liquidity \& Leverage Analysis ( TBL ) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| Current Ratio | 1.00 | 1.01 | 1.48 | 1.06 | 1.06 |
| Loan to Deposit Ratio | 53.96 | 42.31 | 59.46 | 21.60 | 0.95 |
| Liquid Asset To Total Deposit | 54.49 | 51.35 | 89.35 | 39.89 | 1.11 |
| Debt Ratio | 0.33 | 0.40 | 0.30 | 0.27 | 0.97 |
| Debt To Equity Ratio | 0.49 | 0.68 | 0.43 | 0.38 | 38.77 |

## Interpretation:

Current Ratio : Here the current ratio of Modhumoti Bank is exhibiting an immense volatile trend from 2013 to 2017. Although it is a positive sign that the bank holds a standard ratio by maintaining ratio 1 or above in every consecutive year. That indicates that the bank has sufficient liquidity to fulfil short term liabilities as well as an opportunity to generate a higher return by investing money.

While the current ratio of Trust Bank Ltd in 2015 was comparatively higher than other consecutive years. Although after 2015, it was able to maintain a stable current ratio by investing an additional portion of liquidity in the market to bring a higher return.

Loan To Deposit Ratio: Here Modhumoti Bank Ltd is following an upward trend in terms of the loan to deposit ratio. However, it was a matter of concern that the bank was unable to provide loans in 2015 due to the inevitable reason or face a liquidity crisis, but from 2016 it accords a good portion of the loan by keeping the ratio between $80 \%-90 \%$ against the total amount of deposit.

While the performance of Trust Bank Ltd from 2013 to 2016 was above standard ( $80 \%-90 \%$ ) or risky which implied that the bank probably strived to maximize their earnings by dispatching excessive amount of loan against their total amount of deposit due to cover any unforeseen fund requirements. There is also a possibility of the bank to borrow money ( as the lending amount crosses deposit amount) to satisfy their clients need that may result in experiencing higher interest cost.

Liquid Asset To Total Deposit:_Although in 2013 the ratio was too much higher against its total deposit, from the next year the bank (MMBL) kept a standard portion of a liquid asset against its
total deposit to secure the deposit amount of their clients. However, it also implies that against any unfavorable situation, the bank can pay its liabilities ( deposit ) by converting the asset into cash.

On the other hand, Trust Bank Ltd is keeping an excessive portion of liquidity against its total deposit to secure their clients' money which opposes against the interest of the bank. Since the bank may invest this additional liquidity to generate a positive return.

Debt Ratio: The debt ratio of Modhumoti Bank Ltd is increasing in every year as the bank expands its operation all over the country. As a result, more assets are being purchased by the bank on account that enhances their amount of liabilities. However, the ratio above .50 indicates that the bank has a high amount of liabilities against a total asset that may result in a defaulter.

On the other hand, the debt ratio of Trust Bank Ltd from 2013 to 2016 was below . 50 (standard ) which indicates that the bank had purchased lots of its asset with its own fund instead of borrowing money. However, it also exhibits a positive sign for a company.

Debt To Equity Ratio : The debt to equity ratio of Modhumoti Bank Ltd is growing up every year that indicates a higher debt possessing for financing purpose instead of making the best utilization of equity finance. An ideal debt to equity ratio shouldn't be more than 1 , but here the bank possess higher debt which may be the reason of loan default \& also undermine the value of equity shareholders.

While the debt to equity ratio of Trust Bank Ltd is below 1( standard ) that implies a good sign for the bank as well as assures the best utilization of equity shareholders fund.

## 6.2) Analysis Between MMBL \& DBL:

| Liquidity \& Leverage Analysis ( DBL ) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Year | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| Current Ratio | 1.11 | 1.29 | 1.28 | 1.32 | 18.27 |
| Loan To Deposit Ratio | 0.86 | 0.83 | 0.84 | 0.84 | 0.89 |
| Liquid Asset To Total Deposit | 1.15 | 1.16 | 0.85 | 0.86 | 0.91 |
| Debt Ratio | 0.92 | 0.92 | 0.63 | 0.05 | 0.05 |
| Debt To Equity Ratio | 11.15 | 11.46 | 11.92 | 12.63 | 13.58 |

| Liquidity \& Leverage Analysis (MMBL) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Particulars/Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| Current Ratio | 2.32 | 1.39 | 1.00 | 1.21 | 1.16 |
| Loan To Deposit Ratio | 0.02 | 0.41 | 0.00 | 0.68 | 0.84 |
| Liquid Asset To Total Deposit | 4.47 | 1.59 | 0.00 | 1.37 | 1.34 |
| Debt Ratio | 0.42 | 0.70 | 1.00 | 0.99 | 0.87 |
| Debt To Equity Ratio | 0.72 | 2.34 | 563.66 | 79.98 | 6.86 |

## Interpretation:

Current Ratio: The current ratio of DBL is moving toward upward, indicating that the bank is possessing higher liquidity in every consecutive year. But based on current data bank's current ratio is performing at above standard or 1 in the last few years. That means against 1 tk liabilities bank is maintaining higher current asset which the bank could invest elsewhere to get a higher return in future.

On the other hand, the current ratio of Modhumoti Bank is exhibiting an immense volatile trend from 2013 to 2017. Although it is a positive sign that the bank holds a standard ratio by maintaining ratio 1 or above in every consecutive year. That indicates that the bank has sufficient liquidity to fulfil short term liabilities as well as an opportunity to generate a higher return by investing money.

Loan To Deposit Ratio: Here Dhaka Bank Ltd is keeping an ideal loan to deposit ratio by maintaining the ratio between $80 \%$ - $90 \%$ from 2013 to 2017. That indicates that the bank maintains a standard proportion of deposit against the total amount of loan or keeps a good balance between loan \& deposit to tackle any uncertain situation in future.

While, Modhumoti Bank Ltd is following an upward trend in terms of the loan to deposit ratio. However, it was a matter of concern that the bank was unable to provide loans in 2015 due to the inevitable reason or face a liquidity crisis, but from 2016 it accords a good portion of the loan by keeping the ratio between $80 \%-90 \%$ against the total amount of deposit.

Liquid Asset To Total Deposit: To tackle any uncertain situation DBL is maintaining an ideal liquid asset against its total deposit so that the bank may ensure the financial security of the client's deposit.

On the other hand, in 2013 the ratio was too much higher against its total deposit, from the next year the bank (MMBL) kept a standard portion of a liquid asset against its total deposit to secure the deposit amount of their clients. However, it also implies that against any unfavorable situation, the bank can pay its liabilities ( deposit ) by converting the asset into cash.

Debt Ratio: The debt ratio of DBL has decreased from 0.92 in 2013 to 0.05 in 2017, which indicates that the bank is purchasing fewer assets on credit. Because having more liabilities may create a burden on the performance of the bank. Besides, the bank isn't exercising the ratio above 0.50 , which is a good sign for the bank.

On the other hand, the debt ratio of Modhumoti Bank Ltd is increasing in every year as the bank expands its operation all over the country. As a result, more assets are being purchased by the bank on account that enhances their amount of liabilities. However, the ratio above .50 indicates that the bank has a high amount of liabilities against a total asset that may result in a defaulter.

Debt To Equity Ratio: The debt to equity ratio of DBL increased from 11.15 in 2013 to 13.58 in 2017, which implies an alarming sign for the bank. However, this upward trend clarifies that the bank is giving higher priority to debt finance rather than making the best utilization equity finance.

On the other hand, the debt to equity ratio of Modhumoti Bank Ltd is growing up every year that indicates a higher debt possessing for financing purpose instead of making the best utilization of equity finance. An ideal debt to equity ratio shouldn't be more than 1 , but here the bank possess higher debt which may be the reason of loan default \& also undermine the value of equity shareholders.

## 6.3) Analysis between MMBL \& One Bank Ltd:

| Liquidity \& Leverage Analysis( ONE Bank Ltd ) |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Year | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |  |
| Current Ratio | 68.74 | 146.43 | 1.66 | 0.93 | 1.37 |  |
| Loan To Deposit Ratio | 63.47 | 145.09 | 1.64 | 2.57 | 7.62 |  |
| Liquid Asset To Total Deposit | 68.74 | 146.43 | 1.66 | 3.75 | 8.26 |  |
| Debt Ratio | 0.00 | 0.97 | 0.98 | 0.99 | 1.00 |  |
| Debt To Equity Ratio | 0.20 | 0.23 | 0.23 | 0.54 | 0.42 |  |

Liquidity \& Leverage Analysis( MMBL )

| Particulars/Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Current Ratio | 2.32 | 1.39 | 1.00 | 1.21 | 1.16 |
| Loan To Deposit Ratio | 0.02 | 0.41 | 0.00 | 0.68 | 0.84 |
| Liquid Asset To Total Deposit | 4.47 | 1.59 | 0.00 | 1.37 | 1.34 |
| Debt Ratio | 0.42 | 0.70 | 1.00 | 0.99 | 0.87 |
| Debt To Equity Ratio | 0.72 | 2.34 | 563.66 | 79.98 | 6.86 |

## Interpretation:

Current Ratio: Since 2013 to 2014, ONE Bank Ltd was maintaining a higher current ratio which wasn't good for the bank because it could be used for investment purpose to generate higher return. However, since 2015 the bank was able to reduce the excessive amount of current ratio from 146.43 in 2014 to 1.66 in 2015 by investing additional amount of liquidity.

On the other hand, the current ratio of Modhumoti Bank is exhibiting an immense volatile trend from 2013 to 2017. Although it is a positive sign that the bank holds a standard ratio by maintaining ratio 1 or above in every consecutive year. That indicates that the bank has sufficient liquidity to fulfil short term liabilities as well as an opportunity to generate a higher return by investing money.

Loan To Deposit Ratio: It seems that ONE Bank is offering an excessive amount of loan to the borrower against its total deposit that leads to generating higher "loan to deposit ratio" in every consecutive year. The reason behind these consequences could be a liquidity crisis or the bank may not have enough liquidity to cover any unforeseen fund requirements. However, to keep aloof from any unfavorable situation the ratio shouldn't be more than $80 \%$ to $90 \%$.

While, Modhumoti Bank Ltd is following an upward trend in terms of the loan to deposit ratio. However, it was a matter of concern that the bank was unable to provide loans in 2015 due to the
inevitable reason or face a liquidity crisis, but from 2016 it accords a good portion of the loan by keeping the ratio between $80 \%-90 \%$ against the total amount of deposit.

Liquid Asset To Total Deposit: The liquid asset to total deposit ratio of ONE Bank Ltd is following an upward trend in every consecutive year. It clarifies that the bank is retaining enough liquid asset against the total amount of deposit to ensure the security of their client's deposit. But maintaining a standard portion of liquidity may also create the opportunity to invest the fund in diversified profitable sectors.

On the other hand, in 2013 the ratio was too much higher against its total deposit, from the next year the bank (MMBL) kept a standard portion of a liquid asset against its total deposit to secure the deposit amount of their clients. However, it also implies that against any unfavorable situation, the bank can pay its liabilities ( deposit ) by converting the asset into cash.

Debt Ratio: The debt ratio of One Bank Ltd is following an upward trend in every consecutive year. It refers that the bank is purchasing more assets on credit that may lead to possessing a higher burden of debt or liabilities. Besides, the bank is holding a higher ratio than the standard ( 0.50 ), which may result in a defaulter.

On the other hand, the debt ratio of Modhumoti Bank Ltd is increasing in every year as the bank expands its operation all over the country. As a result, more assets are being purchased by the bank on account that enhances their amount of liabilities. However, the ratio above .50 indicates that the bank has a high amount of liabilities against a total asset that may result in a defaulter.

Debt To Equity Ratio: The debt to equity ratio of ONE Bank Ltd is good enough in comparison with MMBL. As the bank is maintaining lower or below 1 ( standard) debt to equity ratio by effectively utilizing shareholder's equity in the best possible way. This situation indicates that the bank is leaning more toward equity financing rather than debt financing to minimize pressure on liabilities.

On the other hand, the debt to equity ratio of Modhumoti Bank Ltd is growing up every year that indicates a higher debt possessing for financing purpose instead of making the best utilization of equity finance. An ideal debt to equity ratio shouldn't be more than 1, but here the bank possess higher debt which may be the reason of loan default \& also undermine the value of equity shareholders.

## 6.4) Analysis between MMBL \& NRB Bank Ltd:

| Liquidity \& Leverage Analysis (NRB BANK LTD ) |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Debt Ratio | 0.33 | 0.71 | 0.78 | 0.80 | 0.87 |  |  |
| Debt To Equity Ratio | 0.49 | 2.40 | 3.59 | 3.89 | 6.48 |  |  |

| Liquidity \& Leverage Analysis( MMBL ) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Particulars/Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| Current Ratio | 2.32 | 1.39 | 1.00 | 1.21 | 1.16 |

| Loan To Deposit Ratio | 0.02 | 0.41 | 0.00 | 0.68 | 0.84 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Liquid Asset To Total Deposit | 4.47 | 1.59 | 0.00 | 1.37 | 1.34 |
| Debt Ratio | 0.42 | 0.70 | 1.00 | 0.99 | 0.87 |
| Debt To Equity Ratio | 0.72 | 2.34 | 563.66 | 79.98 | 6.86 |

## Interpretation:

Current Ratio: The current ratio of NRB Bank is decreasing from 2.98 in 2013 to 1.18 in 2017 in every consecutive year. This decreasing trend indicating that the bank is emphasizing more on investment to generate higher return instead of holding the idle liquidity.

On the other hand, the current ratio of Modhumoti Bank is exhibiting an immense volatile trend from 2013 to 2017. Although it is a positive sign that the bank holds a standard ratio by maintaining ratio 1 or above in every consecutive year. That indicates that the bank has sufficient liquidity to fulfil short term liabilities as well as an opportunity to generate a higher return by investing money.

Loan To Deposit Ratio: The loan to deposit ratio of NRB Bank is below the standard range ( $80 \%$ $-90 \%$ ) in every consecutive years, which implies that the bank may not be earning (deposit) as much as it could be that may result in offering lower portion of loan.

While, Modhumoti Bank Ltd is following an upward trend in terms of the loan to deposit ratio. However, it was a matter of concern that the bank was unable to provide loans in 2015 due to the inevitable reason or face a liquidity crisis, but from 2016 it accords a good portion of the loan by keeping the ratio between $80 \%$ - $90 \%$ against the total amount of deposit.

Liquid Asset To Total Deposit: From the above calculation it seems that NRB bank is accustomed to hold a standard margin ( 1 ) of liquid asset against its total deposit so that during any unfavorable situation it may satisfy their clients by liquidating those assets. However, keeping a standard margin also consolidate a client's confidents to put higher deposit in the bank.

On the other hand, in 2013 the ratio was too much higher against its total deposit, from the next year the bank (MMBL) kept a standard portion of a liquid asset against its total deposit to secure the deposit amount of their clients. However, it also implies that against any unfavorable situation, the bank can pay its liabilities ( deposit ) by converting the asset into cash.

Debt Ratio: The debt ratio of NRB Bank is following an upward trend as the ratio has increased from 0.33 in 2013 to 0.87 in 2017. The reason behind this situation could be leaning more in debt financing to purchase assets. However, to avoid any unforeseen situation or to minimize the burden of debt the bank debt ratio shouldn't be more than 0.50 .

On the other hand, the debt ratio of Modhumoti Bank Ltd is increasing in every year as the bank expands its operation all over the country. As a result, more assets are being purchased by the bank on account that enhances their amount of liabilities. However, the ratio above .50 indicates that the bank has a high amount of liabilities against a total asset that may result in a defaulter.

Debt To Equity Ratio: The debt to equity ratio of NRB Bank is increasing from 0.49 in 2013 to 6.48 in 2017 with a high pace. Concentrating more on debt financing instead of equity financing may accelerate this pace. However, on behalf of shareholder's interest bank should make the best utilization of equity finance to generate the best possible outcome. Otherwise, the bank may experience a higher interest cost on debt that they could abstain by providing comparatively less interest to the depositors.

On the other hand, the debt to equity ratio of Modhumoti Bank Ltd is growing up every year that indicates a higher debt possessing for financing purpose instead of making the best utilization of equity finance. An ideal debt to equity ratio shouldn't be more than 1 , but here the bank possess higher debt which may be the reason of loan default \& also undermine the value of equity shareholders.

## 7) Efficiency \& Productivity Analysis:

## 7.1) Analysis Between Modhumoti Bank Ltd VS Trust Bank Ltd:

| Efficiency \& Productivity Analysis (MMBL ) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| Net Profit Margin | $\mathbf{2 2 \%}$ | $35 \%$ | $100 \%$ | $52 \%$ | $24 \%$ |
| Operating Profit Margin | $44 \%$ | $57 \%$ | $100 \%$ | $52 \%$ | $47 \%$ |
| Interest Coverage Ratio | 2.33 | 0.71 | 0.00 | 1.05 | 0.81 |
| Net Interest Margin | - | 0.02 | 0.00 | 0.02 | 0.02 |

| Efficiency \& Productivity Analysis (TBL ) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| Net Profit <br> Margin | $33 \%$ | $25 \%$ | $54 \%$ | $56 \%$ | $37 \%$ |
| Operating <br> Profit Margin | $33 \%$ | $18 \%$ | $238 \%$ | $270 \%$ | $42 \%$ |
| Interest <br> Coverage Ratio | 0.49 | 0.33 | 66.54 | 9.68 | 0.67 |
| Net Interest <br> Margin | 0.08 | 0.02 | 0.02 | 0.01 | 0.04 |

## Interpretation:

Net Profit Margin: Although from 2013 to 2014 MMBL proceeded toward an upward trend, from 2015 to 2017 it had followed a downward trend in net profit margin. Surprisingly in 2015, the bank made $100 \%$ of net profit margin, which seems quite unrealistic, had been possible only for not incurring any sort of operating \& other expenses. However, it was able to recover them strongly just in the next year by generating a standard or higher return after covering all the operating expenses.

While, in terms of Trust Bank Ltd the net profit margin seems quite volatile comparing with each year. Although in comparison with MMBL bank is generating higher profit in every consecutive year, to maintain stable growth bank should keep the margin constant.

Operating Profit Margin : The operating profit margin of MMBL is looking attractive as the bank was able to reduce its operating expenses \& accelerated both interest income \& operating income. However, since Modhumoti Bank is a new emerging bank, it took advantage of eliminating operating cost in the best possible way.

However, in comparison with MMBL, the operating profit margin of Trust Bank Ltd wasn't higher in every consecutive year. But in $2015 \& 2016$, generating a massive "operating profit margin" was possible by depleting operating expenses masterly.

Interest Coverage Ratio: The interest coverage ratio of MMBL in 2013 was 2.33, which is much higher than other consecutive years. But after 2013 bank experienced the lower ratio in every consecutive year that indicates that the bank didn't have enough capacity to pay interest on its liabilities ( deposit ) for not utilizing the deposit in an effective manner. Therefore, to avoid such risky condition the bank must have to maintain the ratio above 1.5.

While in compare with MMBL, Trust Bank Ltd's interest coverage ratio in 2015 was $66.54 \& 9.68$ in 2016, which is much higher compared with its previous years. On the other hand, in 2015 the interest coverage ratio of MMBL was 0 which put the depositors into high risk. However, Trust Bank Ltd is possessing a safety position in terms of paying interest to its depositors.

Net Interest Margin : The net interest margin of MMBL was 0.02 in 2014,2016 \& 2017 respectively, which implies that in these 3 years bank has successfully made its investment decision (loan, mortgage) which generates a substantial return in comparison to its expenses on the same investments. Although in 2015, it was completely incapable to make the best utilization of investment fund by generating $0 \%$ net profit margin.

While in comparison with MMBL net interest margin of TBL in every consecutive year was well enough as the bank was capable to avail the effective investment decision to generate a higher return.

## 7.2) Analysis Between Modhumoti Bank Ltd VS Dhaka Bank Ltd:

| Efficiency \& Productivity Analysis (DBL ) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Year | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| Net Profit Margin | $13 \%$ | $15 \%$ | $13 \%$ | $12 \%$ | $12 \%$ |
| Operating Profit Margin | $20 \%$ | $28 \%$ | $31 \%$ | $42 \%$ | $40 \%$ |
| Interest Coverage Ratio | 0.31 | 0.35 | 0.37 | 0.59 | 0.53 |
| Net Interest Margin | 0.01 | 0.01 | 0.01 | 0.01 | 0.01 |

| Efficiency \& Productivity Analysis (MMBL ) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| Net Profit Margin | $22 \%$ | $35 \%$ | $100 \%$ | $52 \%$ | $24 \%$ |
| Operating Profit Margin | $44 \%$ | $57 \%$ | $100 \%$ | $52 \%$ | $47 \%$ |
| Interest Coverage Ratio | 2.33 | 0.71 | 0.00 | 1.05 | 0.81 |
| Net Interest Margin | - | 0.02 | 0.00 | 0.02 | 0.02 |

## Interpretation:

Net Profit Margin: The net profit margin of DBL is quite volatile, which implies that the bank is confronting trouble to control operating expenses. However, in comparison to MMBL, the net profit margin of MMBL is generating higher margin due to effective initiative to reduce operating expenses.

While, through from 2013 to 2014 MMBL proceeded toward an upward trend, from 2015 to 2017 it had followed a downward trend in net profit margin. Surprisingly in 2015, the bank made $100 \%$ of net profit margin, which seems quite unrealistic, had been possible only for not incurring any sort of operating \& other expenses. However, it was able to recover them strongly just in the next year by generating a standard or higher return after covering all the operating expenses.

Operating Profit Margin: The operating profit margin of DBL is increasing in every consecutive year. It had been possible because the bank was able to reduce operating expense.

While, the operating profit margin of MMBL is also looking attractive as the bank was able to reduce its operating expenses \& accelerated both interest income \& operating income. However, since Modhumoti Bank is a new emerging bank, it took advantage of eliminating operating cost in the best possible way.

Interest Coverage Ratio: The interest coverage ratio of DBL is increasing in every year, which refers to a positive sign in future as the bank would be able to pay interest on its liabilities. But based on current data, the bank isn't maintaining the standard ratio 1.5 . That means if the bank fails to maintain the ratio above 1.5 , in future it may confront huge financial trouble in terms of paying interest.

While, the interest coverage ratio of MMBL in 2013 was 2.33 , which is much higher than other consecutive years. But after 2013 bank experienced the lower ratio in every consecutive year that indicates that the bank didn't have enough capacity to pay interest on its liabilities ( deposit ) for not utilizing the deposit in an effective manner. Therefore, to avoid such risky condition the bank must have to maintain the ratio above 1.5 .

Net Interest Margin: The net interest margin of DBBL is totally constant from 2013 to 2017 with the ratio of 0.1. It may refer that the bank isn't able to increase its interest earning or mayn't monitoring on credit collection properly.

On the other hand, the net interest margin of MMBL was 0.02 in 2014, 2016 \& 2017 respectively, which implies that in these 3 years bank has successfully made its investment decision (loan, mortgage) which generates a substantial return in comparison to its expenses on the same investments. Although in 2015, it was completely incapable to make the best utilization of investment fund by generating $0 \%$ net profit margin.

## 7.3) Analysis Between Modhumoti Bank Ltd VS ONE Bank Ltd:

| Efficiency \& Productivity Analysis (ONE Bank Ltd ) |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Year | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |  |
| Net Profit Margin | $30 \%$ | $44 \%$ | $38 \%$ | $18 \%$ | $3 \%$ |  |
| Operating Profit Margin | $58 \%$ | $44 \%$ | $40 \%$ | $33 \%$ | $6 \%$ |  |
| Interest Coverage Ratio | 1.05 | 0.82 | 0.68 | 0.46 | 0.07 |  |

| Interest Coverage Ratio | 2.33 | 0.71 | 0.00 | 1.05 | 0.81 |
| Net Interest Margin | - | 0.02 | 0.00 | 0.02 | 0.02 |

Efficiency \& Productivity Analysis (MMBL)

## Interpretation:

Net Profit Margin: The net profit margin of ONE Bank Ltd increased from 30\% in 2013 to 44\% in 2014, which inkling an increasing net profit margin ratio in the following years. But after 2014, the company might fail to minimize their operating expenses \& maximize interest income that results in a lower net profit margin in the following years.

While, from 2013 to 2014 MMBL proceeded toward an upward trend \& from 2015 to 2017 it had followed a downward trend in net profit margin. Surprisingly in 2015, the bank made $100 \%$ of net profit margin, which seems quite unrealistic, had been possible only for not incurring any sort of operating \& other expenses. However, it was able to recover them strongly just in the next year by generating a standard or higher return after covering all the operating expenses.

Operating Profit Margin: The operating profit margin of ONE Bank Ltd has decreased with a massive change from $58 \%$ in 2013 to $6 \%$ in 2017. It clearly indicates an alarming sign because the company hasn't been able to reduce operating expense effectively \& efficiently.

While, the operating profit margin of MMBL is also looking attractive as the bank was able to reduce its operating expenses \& accelerated both interest income \& operating income. However,
since Modhumoti Bank is a new emerging bank, it took advantage of eliminating operating cost in the best possible way.

Interest Coverage Ratio: The interest coverage ratio of ONE Bank Ltd is following a downward trend by decreasing the value from 1.05 in 2013 to 0.07 in 2017 due to failure to make the best utilization of investment or emphasizing more on other expenses that lead to retain lower interest coverage ratio for deposits. However, the interest coverage ratio with below 1.5 may undermine the confidence of depositors.

While, the interest coverage ratio of MMBL in 2013 was 2.33 , which is much higher than other consecutive years. But after 2013 bank experienced the lower ratio in every consecutive year that indicates that the bank didn't have enough capacity to pay interest on its liabilities ( deposit ) for not utilizing the deposit in an effective manner. Therefore, to avoid such risky condition the bank must have to maintain the ratio above 1.5 .

Net Interest Margin: The above result has been clearly proved in net interest margin since the bank has been failing on making effective investment (loan, mortgage) decision that result in lower interest margin. Besides incompetency in credit collection with interest \& dearth of sufficient monitoring would be the cause of lower net interest margin

On the other hand, the net interest margin of MMBL was 0.02 in 2014, $2016 \& 2017$ respectively, which implies that in these 3 years bank has successfully made its investment decision (loan, mortgage) which generates a substantial return in comparison to its expenses on the same investments. Although in 2015, it was completely incapable to make the best utilization of investment fund by generating $0 \%$ net profit margin.

## 7.4) Analysis Between Modhumoti Bank Ltd VS NRB Bank Ltd:

| Efficiency \& Productivity Analysis ( NRB Bank Ltd ) |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Years | 2013 | 2014 | 2015 | 2016 | 2017 |
| Net Profit Margin | 5\% | -8\% | 17\% | 30\% | 21\% |
| Operating Profit Margin | 13\% | 3\% | 28\% | 47\% | 40\% |
| Interest Coverage Ratio | 0.53 | 0.04 | 0.36 | 0.66 | 0.61 |
| Net Interest Margin | - | 0.03 | 0.01 | 0.01 | 0.02 |

| Efficiency \& Productivity Analysis (MMBL ) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| Net Profit Margin | $22 \%$ | $35 \%$ | $100 \%$ | $52 \%$ | $24 \%$ |
| Operating Profit Margin | $44 \%$ | $57 \%$ | $100 \%$ | $52 \%$ | $47 \%$ |
| Interest Coverage Ratio | 2.33 | 0.71 | 0.00 | 1.05 | 0.81 |
| Net Interest Margin | - | 0.02 | 0.00 | 0.02 | 0.02 |

## Interpretation:

Net Profit Margin: The net profit margin of NRB bank in 2014 performs negative due to possessing more excessive amount of cost than revenue. Later, in 2015, 2016 \& 2017 the bank was able to revive them by generating positive outcome $17 \%, 30 \% \& 21 \%$ respectively. However, in comparison to MMBL, it can be said that NRB is confronting trouble in generating higher profit margin opposed to Modhumoti Bank.

While, from 2013 to 2014 MMBL proceeded toward an upward trend \& from 2015 to 2017 it had followed a downward trend in net profit margin. Surprisingly in 2015, the bank made $100 \%$ of net profit margin, which seems quite unrealistic, had been possible only for not incurring any sort of operating \& other expenses. However, it was able to recover them strongly just in the next year by generating a standard or higher return after covering all the operating expenses.

Operating Profit Margin: It deems that the operating profit margin of NRB Bank is quite volatile due to facing trouble in minimizing rising operating expenses in every consecutive year. Emphasizing more on controlling expenses are required to maintain stable growth in future.

While, the operating profit margin of MMBL is looking attractive as the bank was able to reduce its operating expenses \& accelerated both interest income \& operating income. However, since Modhumoti Bank is a new emerging bank, it took advantage of eliminating operating cost in the best possible way.

Interest Coverage Ratio: The interest coverage ratio of NRB Bank is volatile in every consecutive year due to failing to generate higher interest income or emphasizing more on incurring expenses that may lead to become failure to pay interest to the depositors. However, it is also a matter of concern that the bank is holding lower interest coverage ratio or below 1.5 ( standard ) that may hamper the smooth operation of the bank shortly.

While, the interest coverage ratio of MMBL in 2013 was 2.33 , which is much higher than other consecutive years. But after 2013 bank experienced the lower ratio in every consecutive year that indicates that the bank didn't have enough capacity to pay interest on its liabilities ( deposit ) for not utilizing the deposit in an effective manner. Therefore, to avoid such risky condition the bank must have to maintain the ratio above 1.5 .

Net Interest Margin: In 2014, the bank was able to possess the highest interest margin (0.03) that gradually decrease in the following years. However, in comparison to MMBL it is clear that the NRB bank is facing trouble in collecting interest over loans \& mortgages.

On the other hand, the net interest margin of MMBL was 0.02 in 2014, $2016 \& 2017$ respectively, which implies that in these 3 years bank has successfully made its investment decision (loan, mortgage) which generates a substantial return in comparison to its expenses on the same
investments. Although in 2015, it was completely incapable to make the best utilization of investment fund by generating $0 \%$ net profit margin.

## 8) Profitability Analysis:

## 8.1) Analysis Between Modhumoti Bank VS Trust Bank Ltd:

| Profitability Analysis (MMBL ) |  |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | :---: |
| Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |  |
| ROE | $1 \%$ | $6 \%$ | $99 \%$ | $98 \%$ | $98 \%$ |  |
| ROA | $1 \%$ | $2 \%$ | $0 \%$ | $1 \%$ | $1 \%$ |  |

| Profitability Analysis (TBL) |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| ROE | $4 \%$ | $2 \%$ | $2 \%$ | $1 \%$ | $1 \%$ |
| ROA | $3 \%$ | $1 \%$ | $1 \%$ | $1 \%$ | $3 \%$ |

## Interpretation:

ROE: The Return on Equity of MMBL was following an upward trend in every consecutive years which implies that the bank is emphasizing more upon utilizing shareholder's equity in a best possible way to generate higher return. Such tendency also boost up shareholder's confidence on their particular investment

On the other hand, based upon return on equity of TBL it could be a risky investment for equity shareholders as the return from equity investment decreasing from $4 \%$ in 2013 to $1 \%$ in 2017. Failing to manage equity holder's fund effectively \& efficiently leads to decrease ROE.of TBL.

ROA : The return on asset of MMBL is following a downward trend since 2014 to 2017 due to not utilizing assets in a best possible way in order to generate maximum return.

However, in compare with MMBL, Trust Bank Ltd's return from asset was comparatively higher in 2017 where TBL is generating $3 \%$ return \& MMBL is generating only $1 \%$ return. It also refers a positive sign for the investors' to obtain a higher positive return from the investment.
8.2) Analysis Between Modhumoti Bank Ltd VS Dhaka Bank Ltd:

| :---: | ---: | ---: | ---: | ---: | ---: | :---: |
| Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |  |
| ROE | $1 \%$ | $6 \%$ | $99 \%$ | $98 \%$ | $98 \%$ |  |
| ROA | $1 \%$ | $2 \%$ | $0 \%$ | $1 \%$ | $1 \%$ |  |

## Interpretation:

ROE: The Return on Equity of DBL was following downward trend till 2017. Although the return was comparatively higher than MMBL as DBL was able to make the best utilization of shareholder's equity to generate income.

While, the Return on Equity of MMBL was following an upward trend in every consecutive years which implies that the bank is emphasizing more upon utilizing shareholder's equity in a best possible way to generate higher return. Such tendency also boost up shareholder's confidence on their particular investment

ROA: The return on asset of DBL remains constant in every consecutive year that implies that the bank isn't effectively utilizing its asset to increase return from asset.

While, the return on asset of MMBL is following a downward trend since 2014 to 2017 due to not utilizing assets in a best possible way in order to generate maximum return.

## 8.3) Analysis Between Modhumoti Bank Ltd VS ONE Bank Ltd :

| Profitability Analysis (ONE Bank Ltd ) |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Year | 2013 | 2014 | 2015 | 2016 | 2017 |
| ROE | $0 \%$ | $20 \%$ | $17 \%$ | $19 \%$ | $19 \%$ |
| ROA | $1 \%$ | $2 \%$ | $1 \%$ | $1 \%$ | $1 \%$ |

| Profitability Analysis (MMBL ) |  |  |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | :---: | :---: |
| Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ |  | $\mathbf{2 0 1 6}$ |  | $\mathbf{2 0 1 7}$ |
| ROE | $1 \%$ | $6 \%$ | $99 \%$ | $98 \%$ | $98 \%$ |  |  |
| ROA | $1 \%$ | $2 \%$ | $0 \%$ | $1 \%$ | $1 \%$ |  |  |

## Interpretation:

ROE: The return on equity of ONE Bank Ltd in 2013 was $0 \%$ as the company didn't make equity finance effectively or efficiently. But since 2014 it was able to recover them by generating positive outcome in every consecutive year.

On the other hand, the Return on Equity of MMBL was following an upward trend in every consecutive years which implies that the bank is emphasizing more upon utilizing shareholder's equity in a best possible way to generate higher return. Such tendency also boost up shareholder's confidence on their particular investment

ROA: The return on asset was increased just once in 2014 from $1 \%$ to $2 \%$ that brought a positive feedback for the bank. But after 2014 its ROA became $1 \%$ till 2017. It implies a negative sign as the bank's return from asset isn't growing up due to not making the best utilization of assets.

While, the return on asset of MMBL is following a downward trend since 2014 to 2017 due to not utilizing assets in a best possible way in order to generate maximum return.

## 8.4) Analysis Between MMBL VS NRB Bank Ltd:

| Profitability Analysis ( NRB BANK LTD ) |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Years | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| ROE | $0.26 \%$ | $-2 \%$ | $5 \%$ | $10 \%$ | $9 \%$ |
| ROA | $0.18 \%$ | $-0.49 \%$ | $1 \%$ | $2 \%$ | $1 \%$ |

| Profitability Analysis (MMBL ) |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Years |  |  |  |  |  |  | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ |  | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ |
| ROE | $1 \%$ | $6 \%$ | $99 \%$ | $98 \%$ | $98 \%$ |  |  |  |  |  |  |  |
| ROA | $1 \%$ | $2 \%$ | $0 \%$ | $1 \%$ | $1 \%$ |  |  |  |  |  |  |  |

## Interpretation:

ROE: The ROE of NRB Bank in 2013 was $0.26 \%$ \& $-2 \%$ in 2014 which imposes a negative impact among equity holders. But after 2014, the bank was capable of reviving them by increasing the return from $-2 \%$ to $5 \%$ in $2015,10 \%$ in $2016 \& 9 \%$ in 2017. It was possible because at the initial level the bank didn't use equity finance in a well manner thus the return from shareholder's equity was less than 1or negative

On the other hand, the Return on Equity of MMBL was following an upward trend in every consecutive years which implies that the bank is emphasizing more upon utilizing shareholder's equity in a best possible way to generate higher return. Such tendency also boost up shareholder's confidence on their particular investment

ROA: The return on asset of NRB bank is 2013 was $0.18 \%$ in 2013 \& $-0.49 \%$ in 2014 which may result in failing to utilize the asset in a best possible manner. However, after 2014 it was able to recover them by generating $1 \%$ return from $-0.49 \%$ return.
While, the return on asset of MMBL is following a downward trend since 2014 to 2017 due to not utilizing assets in a best possible way in order to generate maximum return.

## Interpretation:

NOTE: Here, changing in value against the total asset, total liabilities \& total equity have been discussed one by one to provide a clear conception.

MMBL: Firstly, In terms of Modhumoti Bank Ltd, in 2013 against 100\% of total asset current asset was $95 \%$ \& other non-current asset was 5\%, in 2014 against $100 \%$ of total asset it has $96 \%$ current asset \& $4 \%$ non-current asset \& these trend is followed by other consecutive years. However, from the very beginning of their operation it seems that the bank is maintaining higher liquidity or current asset instead of non-current asset in every consecutive year, since the bank maintained $98 \%$ of current asset in 2016 \& $99 \%$ of current asset in 2017. Moreover, by investing these additional amount of current asset the bank would have earned higher profit.

Secondly, in 2013, 2014, 2015, 2016 \& 2017 against $100 \%$ of total liabilities it had $47 \%, 12 \%$, $6 \%, 12 \%$ \& $14 \%$ respectively. While their competitor Trust Bank is possessing only $0 \%$ in 2013, $3 \%$ in $2014,8 \%$ in $2015,2 \%$ in $2016 \& 4 \%$ in 2017 respectively against its $100 \%$ of total liabilities. Therefore, it seems that the bank is borrowing more liquidity from others to run their operation smoothly than possessing a high amount of deposit due to failing to collect a standard portion of deposit that may cause of a loan defaulter. Along with this, MMBL is possessing $51 \%$ of deposit in 2013, $86 \%$ in $2014,93 \%$ in $2015,86 \%$ in $2016 \& 84 \%$ in 2017 which is comparatively higher than Trust Bank Ltd.

Thirdly, against $100 \%$ of total shareholder's equity, it seems that the paid-up capital isn't only an indicator to finance its operation. Besides a subsequent portion of money had come from statutory reserve \& profit \& loss account which TBL didn't apply.

TBL: Firstly, against $100 \%$ of total asset, the bank holds current asset $99 \%$ since 2013 to 2017 \& maintained $1 \%$ of non-current asset in every consecutive year. This tendency must describe a stable
or constant balance between current asset \& non-current asset. However, in comparison with MMBL, it seems that TBL holds more current asset against its non-current asset. Since MMBL is an emerging bank thus it emphasizes not only on current asset but also on non-current asset.

Secondly, against $100 \%$ of total liabilities, the bank borrows $0 \%$ in 2013, $5 \%$ in 2014, $10 \%$ in 2015 , $9 \%$ in $2016,5 \%$ in 2017 , which is comparatively lower than MMBL, \& holding deposit $0 \%$ in $2013,5 \%$ in $2014,88 \%$ in $2015,9 \%$ in $2016,92 \%$ in 2017 respectively, which is comparatively lower than MMBL So from the above result, it can be said that, though TBL maintains a lower amount of borrowings, it hasn't a subsequent amount of deposit.

Thirdly, against $100 \%$ of total equity, the paid up capital was $90 \%$ since 2013 to 2016 \& retained earnings was $10 \%$ since 2013 to 2016. While MMBL relied upon diversified area to cover its equity finance.

| Total Shareholders Equity | $100 \%$ | $100 \%$ | $100 \%$ | $100 \%$ | $100 \%$ |

## Interpretation:

DBL: Firstly, against $100 \%$ of total asset, the current asset is $93 \%$ in 2013, $93 \%$ in 2014, 69\% in $2015,70 \%$ in $2016,75 \%$ in $2017 \&$ non-current asset is $7 \%$ in $2013,8 \%$ in $2014,4 \%$ in $2015,4 \%$ in $2016,4 \%$ in 2017 respectively. From the above calculation, it is very much clear that the bank has reduced its current asset in compare with the previous years in order to grab the investment opportunity. Besides it is also maintaining good balance by keeping a subsequent portion of noncurrent asset in every consecutive year.

Secondly, against $100 \%$ of total liabilities, borrowing from other bank was $3 \%$ in 2013, $6 \%$ in 2014, $2 \%$ in $2015,6 \%$ in $2016,7 \%$ in $2017 \&$ total deposit of the bank was $87 \%$ in $2013,85 \%$ in $2014,92 \%$ in $2015,87 \%$ in $2016,86 \%$ in 2017 respectively. From the above calculation, it is very much clear that the bank is maintaining a good portion of the deposit against its borrowing (from other banks) from 2013 to 2017 that will assist them to make a smooth operation as well as make the clients more reliable on bank's performance.

Thirdly, against $100 \%$ of total equity, paid-up capital of the bank was $46 \%$ in 2013, $0 \%$ in 2014, $43 \%$ in $2015,44 \%$ in $2016 \& 46 \%$ in 2017 respectively, while its statutory reserve in 2013 was $35 \%, 38 \%$ in $2014,28 \%$ in $2015,30 \%$ in $2016 \& 32 \%$ in 2017.Along with this the bank is also maintaining a standard portion of retained earning \& general reserve in every consecutive year that indicates that the bank is maintaining a well-balanced ratio in terms of equity portion.

MMBL: Firstly, In terms of Modhumoti Bank Ltd, in 2013 against 100\% of total asset current asset was $95 \%$ \& other non-current asset was 5\%, in 2014 against $100 \%$ of total asset it has $96 \%$ current asset \& $4 \%$ non-current asset \& these trend is followed by other consecutive years. However, from the very beginning of their operation it seems that the bank is maintaining higher liquidity or current asset instead of non-current asset in every consecutive year, since the bank maintained $98 \%$ of current asset in $2016 \& 99 \%$ of current asset in 2017. Moreover, by investing these additional amount of current asset the bank would have earned higher profit.

Secondly, in 2013, 2014, 2015, 2016 \& 2017 against $100 \%$ of total liabilities it had $47 \%, 12 \%$, $6 \%, 12 \% \& 14 \%$ respectively. While their competitor Trust Bank is possessing only $0 \%$ in 2013, $3 \%$ in 2014, $8 \%$ in $2015,2 \%$ in $2016 \& 4 \%$ in 2017 respectively against its $100 \%$ of total liabilities. Therefore, it seems that the bank is borrowing more liquidity from others to run their operation smoothly than possessing a high amount of deposit due to failing to collect a standard portion of deposit that may cause of a loan defaulter. Along with this, MMBL is possessing $51 \%$ of deposit in $2013,86 \%$ in $2014,93 \%$ in $2015,86 \%$ in $2016 \& 84 \%$ in 2017 which is comparatively higher than Trust Bank Ltd.

Thirdly, against $100 \%$ of total shareholder's equity, it seems that the paid-up capital isn't only an indicator to finance its operation. Besides a subsequent portion of money had come from statutory reserve \& profit \& loss account which TBL didn’t apply.

## Interpretation:

ONE Bank Ltd: Firstly against $100 \%$ of total asset, current asset is $100 \%$ in 2013, 100\% in 2014, $100 \%$ in $2015,99 \%$ in 2016, and $99 \%$ in 2017 \& non-current asset is $0 \%$ in $2013,0 \%$ in $2014,0 \%$ in $2015,1 \%$ in $2016,1 \%$ in 2017 respectively. So from the above calculation it has been cleared to us that in the beginning time ( 2013 - 2015 ) the company maintained $100 \%$ current asset of its total asset but later as the bank's operation was expanded it maintained a standard ratio of fixed asset along with current asset. But in compare to MMBL, ONE Bank is holding more of its current asset than the current asset of MMBL that the bank could invest in non-current asset.

Secondly, against $100 \%$ of total liabilities, borrowing from other bank was $0 \%$ in 2013, $0 \%$ in $2014,0 \%$ in $2015,53 \%$ in $2016,60 \%$ in $2017 \&$ total deposit was $1 \%$ in $2013,1 \%$ in $2014,62 \%$ in $2015,27 \%$ in $2016,12 \%$ in 2017 respectively. Here, the ONE Bank Ltd is borrowing comparatively higher amount than MMBL as well as ONE bank is maintaining a lower portion of deposit against its borrowing that could be risky for bank to maintain smooth operation..

Thirdly, against $100 \%$ of total shareholder's equity, paid-up capital of the bank is decreasing from $56 \%$ in 2013 to $51 \%$ in 2017. But in compare with MMBL, MMBL is performing well, since in the last 5 years ( $2013-2017$ ) MMBL'S paid up capital was $99 \%, 92 \%$, $82 \%, 83 \%$ \& $84 \%$ respectively.

MMBL: Firstly, In terms of Modhumoti Bank Ltd, in 2013 against 100\% of total asset current asset was $95 \%$ \& other non-current asset was 5\%, in 2014 against $100 \%$ of total asset it has $96 \%$ current asset \& $4 \%$ non-current asset \& these trend is followed by other consecutive years. However, from the very beginning of their operation it seems that the bank is maintaining higher liquidity or current asset instead of non-current asset in every consecutive year, since the bank maintained $98 \%$ of current asset in 2016 \& $99 \%$ of current asset in 2017. Moreover, by investing these additional amount of current asset the bank would have earned higher profit.

Secondly, in 2013, 2014, 2015, 2016 \& 2017 against $100 \%$ of total liabilities it had $47 \%, 12 \%$, $6 \%, 12 \% \& 14 \%$ respectively. While their competitor Trust Bank is possessing only $0 \%$ in 2013, $3 \%$ in $2014,8 \%$ in $2015,2 \%$ in $2016 \& 4 \%$ in 2017 respectively against its $100 \%$ of total liabilities. Therefore, it seems that the bank is borrowing more liquidity from others to run their operation smoothly than possessing a high amount of deposit due to failing to collect a standard portion of deposit that may cause of a loan defaulter. Along with this, MMBL is possessing $51 \%$ of deposit in $2013,86 \%$ in $2014,93 \%$ in $2015,86 \%$ in $2016 \& 84 \%$ in 2017 which is comparatively higher than Trust Bank Ltd.

Thirdly, against $100 \%$ of total shareholder's equity, it seems that the paid-up capital isn't only an indicator to finance its operation. Besides a subsequent portion of money had come from statutory reserve \& profit \& loss account which TBL didn’t apply.
9.4) Analysis between MMBL VS NRB Bank Ltd:

## Interpretation:

NRB Bank: Firstly, against $100 \%$ of total asset NRB Bank is maintaining $93 \%$ of current asset in $2013,94 \%$ in $2014,96 \%$ in $2015,95 \%$ in $2016 \& 96 \%$ in 2017 respectively. While against $100 \%$ of total asset it holds $7 \%$ of non-current asset in $2013,6 \%$ in $2014,5 \%$ in $2015,6 \%$ in 2016 \& $3 \%$ in 2017 respectively. So from these data it has been proved that in the beginning time period the bank was accustomed to retain fewer current asset \& focused on its non-current asset in order to expand their business operation.. But later as the business operation expands, bank put emphasis on current asset by increasing the volume and partially minimize its non- current asset. Therefore, it can stressed that, the strategy that NRB has applied in terms of its total asset is really appreciable.

Secondly, against $100 \%$ of total liabilities borrowing from other bank was $0 \%$ in $2013,71 \%$ in $2014,12 \%$ in $2015,6 \%$ in $2016 \& 15 \%$ in 2017 respectively. While against $100 \%$ of total liabilities its total deposit was $20 \%$ in 2013, $39 \%$ in 2014, $83 \%$ in 2015, $89 \%$ in $2016 \& 79 \%$ in 2017 respectively. So from this data, it can be said that the bank has reduced its borrowing massively in compare to previous years \& put emphasis on expanding deposit time to time. However, such practice will obviously minimize the excessive borrowing cost of the bank.

Thirdly, against $100 \%$ of total equity, paid up capital of the bank was $100 \%$ in $2013,101 \%$ in 2014, $89 \%$ in $2015,79 \%$ in $2016 \& 86 \%$ in 2017 respectively. While it's statutory reserve was $0 \%$ in $2013,0 \%$ in $2014,2 \%$ in $2015,4 \%$ in $2016 \& 7 \%$ in 2017 respectively. So it seems that in the beginning time period bank completely depends upon paid up capital but as the time goes it successfully utilize other factors including statutory reserve to make the best utilization of total equity.

MMBL: Firstly, In terms of Modhumoti Bank Ltd, in 2013 against 100\% of total asset current asset was $95 \%$ \& other non-current asset was 5\%, in 2014 against $100 \%$ of total asset it has $96 \%$ current asset \& $4 \%$ non-current asset \& these trend is followed by other consecutive years. However, from the very beginning of their operation it seems that the bank is maintaining higher liquidity or current asset instead of non-current asset in every consecutive year, since the bank maintained $98 \%$ of current asset in $2016 \& 99 \%$ of current asset in 2017. Moreover, by investing these additional amount of current asset the bank would have earned higher profit.

Secondly, in 2013, 2014, 2015, 2016 \& 2017 against $100 \%$ of total liabilities it had 47\%, 12\%, $6 \%, 12 \% \& 14 \%$ respectively. While their competitor Trust Bank is possessing only $0 \%$ in 2013, $3 \%$ in $2014,8 \%$ in $2015,2 \%$ in $2016 \& 4 \%$ in 2017 respectively against its $100 \%$ of total liabilities. Therefore, it seems that the bank is borrowing more liquidity from others to run their operation smoothly than possessing a high amount of deposit due to failing to collect a standard portion of deposit that may cause of a loan defaulter. Along with this, MMBL is possessing $51 \%$ of deposit in $2013,86 \%$ in $2014,93 \%$ in $2015,86 \%$ in $2016 \& 84 \%$ in 2017 which is comparatively higher than Trust Bank Ltd.

Thirdly, against $100 \%$ of total shareholder's equity, it seems that the paid-up capital isn't only an indicator to finance its operation. Besides a subsequent portion of money had come from statutory reserve \& profit \& loss account which TBL didn’t apply.

| EPS | $543 \%$ | $625 \%$ | $478 \%$ | $403 \%$ | $100 \%$ |

## Interpretation:

Note: Here, changing in value against the net interest income, total operating profit \& total net profit have been discussed one by one to provide a clear conception.

MMBL: Against 100\% of net interest income, bank's net interest income in 2014 was 14\%, 0\% in $2015,1 \%$ in $2016 \& 2 \%$ in 2017 respectively which indicates that in the beginning time period bank was able to generate higher interest income that leads to higher interest income but in the following years bank fails to make higher interest income due to making higher interest expense.

Secondly, against $100 \%$ of total operating profit, in 2014 it was $440 \%, 0 \%$ in 2015, $10 \%$ in 2016 \& $26 \%$ in 2017 respectively. From above result, it shows that the bank's operating profit has reduced drastically from the previous year due to failure to minimize the higher operating expenses effectively in the following years.

Thirdly, against $100 \%$ of net profit after tax, it was $538 \%$ in 2014, $1344 \%$ in $2015,812 \%$ in 2016 \& $51 \%$ in 2017 respectively. . From above result, it shows that the bank's net profit has reduced drastically from the previous year due to failure to minimize the higher operating expenses as well as interest expense.

TBL: Against $100 \%$ of net interest income, it was $218 \%$ in 2014, $782 \%$ in $2015,391 \%$ in 2016 \& $500 \%$ in 2017 respectively which shows that the net interest income is gradually increasing in every consecutive year. However, it clearly indicates that the bank is effectively utilizing its loan
portion to increase its interest income. While, the net interest income of MMBL wasn't well enough comparing with TBL.

Secondly, against $100 \%$ of total operating profit, it was $692 \%$ in $2014,857 \%$ in $2015,1123 \%$ in 2016 \& $1388 \%$ in 2017 respectively which shows that the total operating income is gradually increasing in every consecutive year. However, it clearly implies that that bank was able to reduce operating expense to generate higher operating profit.

Thirdly, against $100 \%$ of net profit after tax, it was $403 \%$ in 2014, $478 \%$ in 2015, 625\% in 2016 \& $543 \%$ in 2017 respectively. In compare with MMBL, TBL net profit is following an upward trend $\&$ disclosing a positive outcome for future.

## Interpretation:

ONE Bank Ltd: Firstly, the net interest income of ONE Bank Ltd in 2014 was 308\%, 275\% in $2015,238 \%$ in $2016 \& 98 \%$ in 2017 respectively. So from the above calculation it clarifies that the bank is following a downward trend due to failing to reduce interest expense in line with interest income. While the net interest income of MMBL is also following a downward trend.

Secondly ,the operating profit of ONE Bank ltd is increasing in every year against $100 \%$ of total operating income due to effectively managing the interest income. As a result, the net profit of the ONE Bank Ltd generates higher return than MMBL.

MMBL: Against 100\% of net interest income, bank's net interest income in 2014 was 14\%, $0 \%$ in $2015,1 \%$ in $2016 \& 2 \%$ in 2017 respectively which indicates that in the beginning time period bank was able to generate higher interest income that leads to higher interest income but in the following years bank fails to make higher interest income due to making higher interest expense.

Secondly, against $100 \%$ of total operating profit, in 2014 it was $440 \%, 0 \%$ in 2015, $10 \%$ in 2016 \& $26 \%$ in 2017 respectively. From above result, it shows that the bank's operating profit has reduced drastically from the previous year due to failure to minimize the higher operating expenses effectively in the following years.

Thirdly, against $100 \%$ of net profit after tax, it was $538 \%$ in 2014, $1344 \%$ in 2015, $812 \%$ in 2016 \& $51 \%$ in 2017 respectively. . From above result, it shows that the bank's net profit has reduced drastically from the previous year due to failure to minimize the higher operating expenses as well as interest expense.

## Interpretation:

DBL: Against $100 \%$ of net interest income, bank's net interest income in $201485 \%, 136 \%$ in $2015,129 \%$ in $2016 \& 147 \%$ in 2017 which indicates an upward trend in the net interest income in every consecutive year. It also describes that the bank is utilizing its lending in a best possible way to generate higher net interest income. While the net interest income of MMBL is following a downward trend due to failing to extract higher interest income \& reduce interest expense.

Secondly, the total operating profit of bank is growing up in every consecutive year as it was able to enhance operating profit against its operating expenses. As a result, the total operating profit was $106 \%$ in $2014,107 \%$ in $2015,113 \%$ in $2016,136 \%$ in 2017 against $100 \%$ of operating profit in 2013.

Thirdly, against $100 \%$ of net profit after tax in 2013, the net profit of DBL is following an upward trend by increasing its net profit percentage year after year by effectively \& efficiently controlling interest expenses \& operating expenses. However, it also indicates that the bank has more probability to generate higher income in near future following this upward trend.

MMBL: Against 100\% of net interest income, bank's net interest income in 2014 was $14 \%, 0 \%$ in $2015,1 \%$ in $2016 \& 2 \%$ in 2017 respectively which indicates that in the beginning time period bank was able to generate higher interest income that leads to higher interest income but in the following years bank fails to make higher interest income due to making higher interest expense.

Secondly, against $100 \%$ of total operating profit, in 2014 it was $440 \%, 0 \%$ in 2015, $10 \%$ in 2016 $\& 26 \%$ in 2017 respectively. From above result, it shows that the bank's operating profit has reduced drastically from the previous year due to failure to minimize the higher operating expenses effectively in the following years.

Thirdly, against $100 \%$ of net profit after tax, it was $538 \%$ in 2014, 1344\% in 2015, 812\% in 2016 \& $51 \%$ in 2017 respectively. . From above result, it shows that the bank's net profit has reduced drastically from the previous year due to failure to minimize the higher operating expenses as well as interest expense.

## Interpretation:

NRB: Against $100 \%$ of net interest income, bank's net interest income in 2014 was $189 \%$ in $2014,166 \%$ in $2015,296 \%$ in $2016 \& 442 \%$ in 2017 respectively which indicates that the bank has been able to make the best utilization of lending in order to generate highest net interest income in every consecutive year.

Secondly, against $100 \%$ of total operating profit, bank's operating profit in 2014 was $67 \%$, $1282 \%$ in $2015,2638 \%$ in $2016 \& 2779 \%$ in 2017 respectively. So from above result, it shows that the bank's operating profit has increased in a significant level from the previous years due to effectively maintaining operating expenses.

Thirdly, against $100 \%$ of net profit after tax, bank's net profit in 2014 was $629 \%, 2259 \%$ in $2015,5020 \%$ in 2016 \& $4233 \%$ in 2017 respectively. So it can be said that, the bank was successful to generate higher net profit by efficiently minimizing interest \& operating cost.

MMBL: Against $100 \%$ of net interest income, bank's net interest income in 2014 was $14 \%, 0 \%$ in $2015,1 \%$ in $2016 \& 2 \%$ in 2017 respectively which indicates that in the beginning time period bank was able to generate higher interest income that leads to higher interest income but in the following years bank fails to make higher interest income due to making higher interest expense.

Secondly, against $100 \%$ of total operating profit, in 2014 it was $440 \%, 0 \%$ in 2015, $10 \%$ in 2016 \& $26 \%$ in 2017 respectively. From above result, it shows that the bank's operating profit has reduced drastically from the previous year due to failure to minimize the higher operating expenses effectively in the following years.

Thirdly, against $100 \%$ of net profit after tax, it was $538 \%$ in $2014,1344 \%$ in $2015,812 \%$ in 2016 \& $51 \%$ in 2017 respectively. . From above result, it shows that the bank's net profit has reduced drastically from the previous year due to failure to minimize the higher operating expenses as well as interest expense.

## Interpretation MMBL \& TBL:

Financial Performance: Here the deposit of MMBL has decreased significantly from 2014 ( $486 \%$ ) to 2016 ( $38 \%$ ), but in 2017 it was able to increase $4 \%$ deposit in comparison to the last year. While in line with the deposit, MMBL's loan \& advances also decreased from 2014 (
$11703 \%$ ) to 2016 ( $72 \%$ ) \& increased partially or 4\% from the last year in 2017. However, the increase in deposits \& loans from 2016 to 2017 didn't affect the interest income to boost up. Because instead of increasing along with increasing deposits \& loans, the interest income from 2016 to 2017 has decreased drastically from $67 \%$ to $31 \%$.

On the other hand, the deposit of TBL has also decreased significantly from 2014 (22\%) to 2016 ( $15 \%$ ) , but in 2017 it was able to increase only $1 \%$ of deposit in comparison to last year. While in line with the deposit, TBL's loan \& advances also decreased from 2014 (22\%) to 2016 ( $9 \%$ ) \& increased $29 \%$ from the last year in 2017. However, the interest income in 2015 extracts negative output \& interest income in 2017 extracts only $8 \%$ output offering $16 \%$ of loans, where in 2015 TBL generates $42 \%$ of interest income by offering only $21 \%$ of loan \& advances.

Credit Quality: In terms of credit quality MMBL's non-performing loans have increased 96\% in the last year while TBL's non-performing loans have increased only $3.35 \%$ from $3.21 \%$. So it shows that MMBL is at higher risk of loan default or close to being in default in comparison to TBL.

## Interpretation MMBL VS DBL:

Financial Performance: : Here the deposit of DBL has increased from 2014 ( 8\%) to 2016 ( $13 \%$ ), but in the next year deposit percentage decreased from $13 \%$ to $8 \%$. While in line with the deposit, DBL's loan was stable or $14 \%$ from 2015 to 2017. However, the interest income in 2014 \& 2015 performs negative against $4 \%$ \& $14 \%$ loan \& advances respectively. In addition, the interest income also decreased from $8 \%$ to $4 \%$ in 2017 against $14 \%$ \& 14\% loan respectively.

On the other hand, the deposit of MMBL has decreased significantly from 2014 (486\%) to 2016 ( $38 \%$ ), but in 2017 it was able to increase $4 \%$ deposit in comparison to the last year. While in line with the deposit, MMBL's loan \& advances also decreased from 2014 ( $11703 \%$ ) to 2016 ( $72 \%$ ) \& increased partially or $4 \%$ from the last year in 2017. However, the increase in deposits \& loans from 2016 to 2017 didn't affect the interest income to boost up. Because instead of increasing along with increasing deposits \& loans, the interest income from 2016 to 2017 has decreased drastically from $67 \%$ to $31 \%$.

Credit Quality: In terms of credit quality DBL's non-performing loan has decreased significantly from $37 \%$ in 2014 to $-3 \%$ in $2015 \&-2 \%$ in 2016 respectively that hinted a positive sign for future performance but just in the next year its non-performing loan increased from - $2 \%$ to $70 \%$ which indicates that the bank was unable to collect loan that may result in loan default.

While In terms of credit quality MMBL's non-performing loans have increased $96 \%$ in the last year while TBL's non-performing loans have increased only $3.35 \%$ from $3.21 \%$. So it shows that MMBL is at higher risk of loan default or close to being in default in comparison to TBL.

## Interpretation MMBL VS ONE BANK LTD:

Financial Performance: The deposit of ONE Bank Ltd has increased from 16\% in 2014 to 31\% in 2015 \& then decreased from $31 \%$ to $17 \%$ \& $19 \%$ respectively. While in line with the deposit, loan \& advances of ONE Bank ltd has increased in every consecutive year.

On the other hand, the deposit of MMBL has decreased significantly from 2014 (486\%) to 2016 ( $38 \%$ ), but in 2017 it was able to increase $4 \%$ deposit in comparison to the last year. While in line with the deposit, MMBL's loan \& advances also decreased from 2014 ( 11703\%) to 2016 ( $72 \%$ ) \& increased partially or $4 \%$ from the last year in 2017. However, the increase in deposits \& loans from 2016 to 2017 didn't affect the interest income to boost up. Because instead of increasing
along with increasing deposits \& loans, the interest income from 2016 to 2017 has decreased drastically from $67 \%$ to $31 \%$.

## Interpretation MMBL VS NRB Bank Ltd:

Financial Performance: Here the deposit of NRB in 2014 was $314 \%$, which the highest percentage of deposit among all the consecutive years, but from the next years the deposit percentage of NRB Bank has reduced dramatically. has increased from 2014 ( 8\%) to 2016 ( $13 \%$ ), but in the next year deposit percentage decreased from $13 \%$ to $8 \%$. However, the interest income performs negative or $-12 \%$ against $76 \%$ of total loan in $2015 \&$ produce $49 \%$ interest income against $82 \%$ of loan \& advances in 2017. It discloses that the bank wasn't able to avail its loans \& advances properly that result in lower interest income.

On the other hand, the deposit of MMBL has decreased significantly from 2014 (486\%) to 2016 ( $38 \%$ ), but in 2017 it was able to increase $4 \%$ deposit in comparison to the last year. While in line with the deposit, MMBL's loan \& advances also decreased significantly from 2014 ( $11703 \%$ ) to 2016 ( $72 \%$ ) \& increased partially or $4 \%$ from the last year in 2017. However, the increase in deposits \& loans from 2016 to 2017 didn't affect the interest income to boost up. Because instead of increasing along with increasing deposits \& loans, the interest income from 2016 to 2017 has decreased drastically from $67 \%$ to $31 \%$.

Credit Quality: In terms of credit quality, NRB's non-performing loan has decreased significantly from $1014 \%$ in 2016 to $-130 \%$ in 2017 respectively that hinted a positive sign for future performance as the bank has become able to collect loan that could have been resulting in loan default.

While In terms of credit quality MMBL's non-performing loan has increased $96 \%$ in the last year or 2017 while NRB's non-performing loan was $130 \%$ in the last. So it shows that NRB is at higher risk of loan default or close to being in default in comparison to MMBL.
12) Findings: The major findings of this study are almost all banks ( 5 banks ) have increased the total amount of loan \& advances following the increasing amount of deposit in every consecutive year to satisfy the need of their corporate clients, but in comparison to the amount of loan, the total amount of interest income isn't satisfactory. This statement is proved when the interest income of Modhumoti Bank Ltd (MMBL),NRB Bank Ltd,Trsut Bank Ltd, Dhaka Bank Ltd fell significantly against higher amount of loan.

Besides another major finding, associated with corporate banking, is the increasing amount of non-performing loan of banks in every consecutive year that may result in loan default as well as put the depositors at heavy risk. Because it has been found that banks like TBL, DBL \& MMBL non-performing loan in 2017 have increased significantly by $3.35 \%, 70 \%$ \& $96 \%$ respectively due to failing to make effective credit analysis \& supervision. While

NRB Bank was able to reduce non-performing loan from $1014 \%$ (2016) to $130 \%$ (2017) respectively.

Moreover, some key ratios consistent with corporate banking also influence the overall findings. Among them, loan to deposit ratio \& net profit margin is the important indicators of the overall performance of the corporate banking sector. The loan to deposit ratio of MMBL has increased from (2016) to (2017) respectively maintaining the standard ratio between $80 \%-90 \%$. While the net interest margin of MMBL was constant for 2016 \& 2017 respectively even against an increasing amount of loan. Similarly, the loan to deposit ratio of DBL, ONE Bank Ltd, have increased from ( 2016 ) to (2017), but the net interest margin of these banks weren't increased in line with increasing loan to deposit ratio. However, Trust Bank Ltd \& NRB Bank Ltd were able to increase net interest margin from (2016) to (2017) where loan to deposit ratio decreased from (2016) to ( 2017 ) respectively.
13) Conclusions \& Recommendation: It has been a matter of concern for the corporate banking industry that whether this sector will perform better to smooth the overall economy in near future. Because banks aren't cautious enough while offering loan to the corporate clients to run their business operation. As a result, non-performing loan of all banks has increased significantly due to failing to make effective credit analysis. This ramification brings down the interest income in every consecutive year that may jeopardize the interest of the depositors. Therefore, to resolve these issues bank shouldn't provide loan more than $80 \%$ to $90 \%$ of their deposit \& need to cover the demand of loan from the total deposit amount without borrowing funds from other financial institutions. Along with this, bank should proceed toward strong credit management policy \& must obtain immediate legal action against the defaulters so that it secures the interest of the depositors.
However, the whole paper is based on secondary data \& from the beginning of this study paper has faced some limitations, like as:
$>$ Data from annual report \& lankabd mismatched with each other.
$>$ In some cases, the annual report doesn't provide the whole data of the Balance sheet \& income statement.
$>$ The availability of information regarding "Corporate Banking in Bangladesh" over the search engine isn't adequate.

So for these limitations of my paper, there have more opportunities for further research.
