ACKNOWLEDGEMENT

To begin with, we need to concede that this projects couldn't be hardly done if without the assistance of sufficient individuals in particular divisions of our task, legitimate direction from our manager and obviously the almighty Allah.

We are truly appreciative and wish our significant obligation to **Mr. Md. Riazur Rahman, Senior Lecturer**, Department of CSE, Daffodil International University. Profound Knowledge and distinct fascination of our supervisor in the field of "Android Development" to do this project. His endless patience, academic direction, ceaseless support, steady and enthusiastic oversight, productive analysis, important counsel, perusing numerous substandard drafts and revising them at all stages have made it conceivable to finish this project.

We might want to express our heartiest thanks to **Dr Syed Akhter Hossain, Professor and Head**, Department of CSE, Daffodil International University, for his sort of help to complete our task and furthermore to other employees and the staff of CSE department of Daffodil International University.

I sincerely thank **Imtiaz Ahmed Milon** as his trainer and skilled job. The Daffodil family would like to thank all those who gave me this opportunity to work with him and learn many of the best things in my life. Also, I got a lot of people who helped me a lot in the formation. I truly thank all those who helped me unconditionally.

At last, our most profound appreciation goes towards our parents for their persistent support and express confidence in us which eventually drove us towards the fulfillment of this Internship.

ABSTRACT

An internship in a “web designs and development” is now on of the great aspect of a computer professional career. This internship report is for finishing my BSc. Daffodil International University in Computer Science, Improving and utilizing the knowledge gained during my studies. The main goal of this internship was web design and development. There are many programming languages to develop a web-based application or software. I have joined skill jobs training institute and technology and there I have learing all kind of official manner, communication with a colleague, how to perform duties etc. Some of language is only used for the frontend and backend designs of the software. Example- HTML5, CSS, JS, PHP and WordPress among various web technology are some programming language develop the frontend of an application. PHP, Java scripts, SQL Bootstrap Framework etc. are used at the backend. Nowadays frameworks are basically structured programming by using model, view and controller which is also called MVC. This internship The report contained of the details related to web designs and development of all the details of my experiences during my entire internship.

INTRODUCTION

1.1Introduction

My ideas was that first basic level web development experience and it is totally i do internship medium developing i do with a modern web application technologies from the very first the such as Website use HTML5,CSS,Javascript, js, Bootstrap ,PHP Mysql server and other languages .This is great opportunity to the gain hands of the hands experience on web devlopment and application and steps to the first ERP ften in the real-time and mediated by software and technology or Application Development.web devlopment based application with a demand according of currents age and the client satisfaction. This is internship will involve a dynamic and challenging opportunities and helps to the trace best career for the century.

1.2 Motivation

I am doing this internship to make the best career myself a better web Application developer by real life application developing or a web programmer. I believe that this career is the most powerful career in this 21st century. A Web Developer creates and designs different websites for clients. Again that may help Seeking for a challenging and creative job in a dynamic and a better work place where I can use my strong technical knowledge and skills. Different Web Developers may be responsible for different aspects of a site's creation, which means specializing in a single discipline is possible.

1.3 Internship Objectives

I have gained knowledge about web technology and a large area of web programming language and I have extensive experience using multiple standard programming languages. Understand the aesthetics of aesthetics and design principals. Great problem for shooting and bug resolution skills. Critical thinking And I'm doing problem solving trying .I realized the strength of team work. That internship increased my sense and responsibility and good work habits maintaining the time line.My goal the internship to get realife web application development exprience. So that i can become a full stack web developer. Develop personal and profes

- We PiyShef - Digital Companion solves lots of problems of small scale businesses to Established organization through Web Development Company to Digital Marketing services.
- We managed to solve our client biggest problems through Digital Marketing services like.

2.4 SWOT Analysis

In below fig 2.1 shows the SWOT Analysis

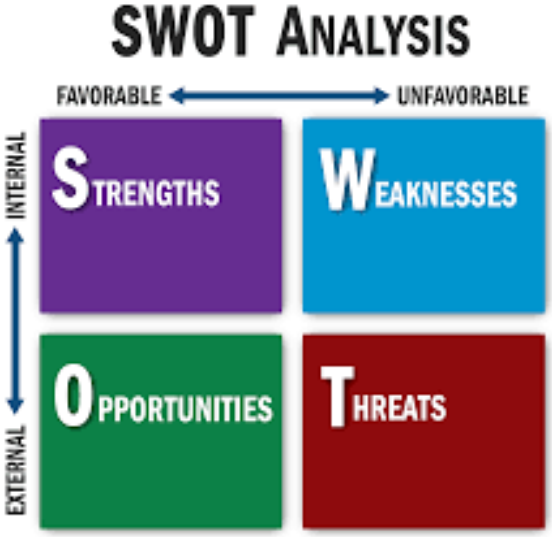

Figure 2.4.1: SWOT Analysis

©Daffodil International University

Strengths

- Improving cross-country collaborations that will improve the broad research capacity.
- Increasing enthusiasm about conducting clinical trials.
- Some university wide initiatives to incentivize researchers.
- Reforms to improve research infrastructure.
- Best web design and development Services following the new trend.

Weakness

- Under developed research infrastructure and very few clinical trial units nationwide.
- Limited administrative capacity within Institutions.
- Limited staff capacity to carry out clinical trials, which also puts extreme burden on few staff who can conduct clinical trials but do not have protected research time.
- I became very impatient when the projects exceeded the deadline.
- It has become difficult for me to work with certain personalities
- It can be difficult for me to maintain a healhty work/life balance.
- I have fallen into discomfort in the past and in ambiguity.

Opportunities

- Economy of the country is growing.
- A huge expansion of medical education institutions.
- Large and diver population.
- Improving awareness about the need research and clinical trials.
- The Potential new use of product or service
- Use the marketing or promotional strategie for business development.
- People are tensed with fair service but Popular-IT ensures that.

Threats

- Global financial crisis leading to low funding opportunity.
- Competitive disadvantage in attracting funding.

©Daffodil International University

- Potential actions of competition are a common type of threat in the context of business
- Brain drain.
- Regulatory framewords and processes are lengthy.

2.5 Organization Structure

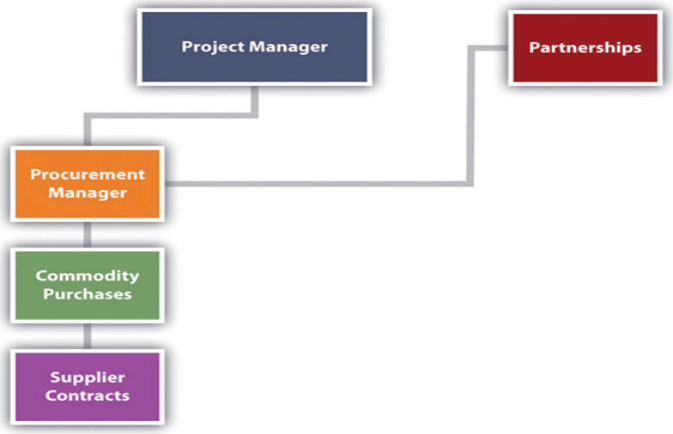

Figure 2.5.1: Organization Structure Diagram

In our company mainly 3 division works

1. Web hosting management system team manager.
2. Web design and development system team manager.
3. Sells and marketing team manager.

Must have organizational structure and must have skills, and strong, knowledge to handle different levels of tasks. Work and flow the information in a phased manner with the coordination process. It must be maintained within the organizational structure of an organization. And every part of the organizational part is important to bring the final result.

Node JS	Expert 50%

3.4 Challenges

Web design and development is not a primary task as it has to be presented with lots of challenging and work A development is a huge project to face various challenges and difficulties But one developer has to solve that problem with a suitable output and Find the idea because he considers it his responsibility

©Daffodil International University

CHAPTER 4

Competencies and Smart Plan

4.1 Competencies Earned

I worked with a few projects during the internship. I have completed the necessary work in just the right time. All I can say is that I can do any kind of hard and challenging work in the ICT sector related to full web development and web based Android applications. For this dynamically challenging period, I am fully prepared for my career and I have gained experience in creating super dynamic sites and Android applications with new age technologies. I am fully prepared to learn new technology in a short time. Even many technologies come every day and control the trend. I am fully prepared to take on these technological challenges.

4.2 Smart Plan

I have planned and mapped my career to grow outstanding web with technology and I am ready to create I am mapped out my career to create awesome web site technology to develop. I have planned to make my future beautiful through my following steps . I need to know HTML HTML5 code to work with new challenges Learn and learn about CSS, CSS3 and PHP, MySQL and JavaScript and get started with the code. After starting the code divides the design into different sections and the part completes its part. Better to use bootstrap and more responsive And start crashing websites. Then launch the mobile, tab, desktop side device website and take test steps for more unique and monitoring. Until the end we file the image of our project.

- Creating and looking for a CV portfolio for a good career .
- Enhance LinkedIn profiles and GitHub profiles .
- Updating yourself and updating myself in technology.
- Searching for new and creative arts and designs.
- Working at ajob with new challenges

©Daffodil International University

4.3 Reflection

My goal is to be one of the best full stack developers and I am sincerely working on it. To fulfill my responsibility to reach my goals and build a great, creative and professional web developer based portfolio for my career, and to reflect my work. My portfolios are a reflection of my creative work and another key to my success. I want to be a successful freelancer I have to have my own portfolio of work that creates a reflection of my work. It will help me to show my ability and creativity for my clients. I have to create something outstanding for my country.Which helps me to learn more technology to speed up my work.

- Create something for the race and mankind.
- It's working with the creative team challenging.
- Making something for my country .
- Learn more devlopment technology .
- Take an initiative to create new opportunities.

©Daffodil International University

CHAPTER 5

CONCLUSION AND FUTURE CARRIER

5.1 Discussion and Conclusion

I have gained a lot of experience and learned a lot from my internship about web design and development. The most important thing I learned during this internship was to manage a project and manage the timeline.I gained knowledge about various web and Android application technologies that can help me do something better or look for a career.I still can't complete the laravel structures correctly but I'll learn it soon. In the end, I can say that this internship inspires me and gives me a lot of encouragement which is really effective for me. My company gives me such a good scope to learn and discover my potentials. I am very grateful to them.My goal the internship to get realife web application development exprience. So that i can become a full stack web developer. Develop personal and professional strategies and plans to improve job performance and professional relationship with clients, coworkers.

5.2 Scope for Further Career

Gaining a lot of knowledge through e-internships that will help me use my career through the future. I have something The limitations of my skills and knowledge so that I want to learn more and gain knowledge. I am doing this internship to make myself a better web Application developer developing by real life application. Development personal and professional strategies and plans to improve job performance and professional relationship with clients, coworkers and supervisor. But I do Learned and achieved can help a lot to build the best career in my country. However, I can Getting a job at a good company can be a daunting task, but it can be a daunting task Can help you find the best career and lots of opportunities. And I will do it successfully wherever I do the job.

- Must be a good full stack developer.
- Web Application & Development helped me acquire references and find new job opportunities.

©Daffodil International University

- I have to acquire good knowledge about JS and I have to be dynamic and work with modern work.
- If I had learned JS well, I could have gone on to a better career in a good IT company.
- Will be able to be a successful project manager.
- It provides a platform to enter into a particular career field
- Will be able to be a successful software engineer.
- In addition to web application knowledge I have other languages to get me the best career.

Appendix A: Internship Reflection

I decided on an internship to pursue a career for new challenges Time in the career market. Every student should gain some hands-on experience as they implement projects in real life to use the knowledge. I started the internship journey and the internship was a great turning point for me too. I like their skills job because they have good market value and a lot of reputation They also provide some interesting services in a better way. My desire as an internship as well as working efficiently is to create a portfolio that will bring me benefits. This gives me extra opportunities to expand my career for the future.

Appendix B: Company Detail

Skill jobs founder name is MD.Sabur Khan, CEO of Daffodil group. Skill job is renewed place for web services such as website design and development. They are not only open a wide door for job seekers but also, they give an opportunity to student for learning.
