ACKNOWLEDEMENT

It was a great privilege for me to do an internship in such a reputed company. It was all possible for my supervisor **Mr. Md Anwar Hossen, Assistant Professor, Department of Software Engineering, Daffodil International University**. He is the one who gave me the opportunity of this internship for which I am grateful to him. Moreover, during this entire internship period, he gave me his utmost support and guidance which was really very helpful for me to complete this internship successfully. Finally, I am thankful to Allah for all the good results.

EXECUTIVE SUMMARY

As part gratification of my Internship, I picked this stage since I figure this might satisfy my strength and it'll provide a positive outcome on my future. I am exceptionally thankful to Workspace Infotech Limited (WSIT) for giving this internship opportunity and deputing me at “Flowcite Research Management” project.

Workspace Infotech Limited is an IT company which serves the IT services for last 12 years in Bangladesh as well as all over the world. There are specialized in the domain of Software Development like Web and Mobile App. Besides they have enriched manpower for graphics design for web, software and advertising. WSIT always put their client first. They aim to make the software development process faster, better, and collaborative anytime, anywhere by using any latest tools and technology to produce quality product, thereby ensuring client satisfaction by successful delivery.

Flowcite is a research management tools formed by a team that has several years of experiences. It is best configurable solution ever that mainly targeting the people who want to research and wants to get all the research tools in one platform so that they can be more productive and make a quality research.

CHAPTER 1: INTRODUCTION

1.1 Background

Internship is such kind of opportunities where student can apply their learnings and knowledge to solve the real-life problems working as a team and by the supports of senior personality of that organization. It gives the opportunity to the student to relate their learnings with the competitive industry level environment. Also achieve the abilities and experiences from the organizations that helps them to build their industry experience before the end of the graduation and to build a better future.

As a student of Daffodil International University, my university gives me this glorious opportunity having internship within our bachelor program and I am the one who got this chance. With any previous job experience I joined Workspace Infotech Limited (WSIT) and deputed to a project named “Flowcite” as an intern. It is a web-based project. So, this is a massive opportunity to the achieve hands of the hands experience on web development. This internship period will involve a challenging and dynamic opportunities and helps me to the trace the best career for the century.

1.2 Motivation

I took this internship to build up my career as a web application developer. I strongly believe that right now this is the one of the most powerful careers. As a web developer we design and develop various web application for clients. And which may help me seeking for new challenges and creative workplace where I can apply my skills and knowledge. Here there is also opportunities to be a specialist in a single discipline like frontend or backend developer etc. Considering the above points to I joined this company as an intern.

1.3 Objectives

I prepared this report for my internship program of the degree Bachelor of Science in Software Engineering. This report will hardly help upcoming students regarding the

working environment. Applying the knowledge that I earned they may make ready themselves accordingly for their future career. Additionally, the report is deliberated to reflect my achievements, project works and professional growth during the intern period. Besides, who interested for short detail about Flowcite project may find this report helpful.

The report is prepared to meet specific goals. Its goal is to:

1. Introduction of my organization
2. Services of the organization
3. Team description where I work
4. Brief description of my responsibilities
5. My achievements, focusing on non-academic achievements.
6. Know the problems faced in the software industry
7. Know the way how to solve this problem.
8. Know the conventions and coding style
9. Grow with the development cycle and models
10. Working followed by documentation and customization
11. Know about software maintenance.

1.4 Scope

This report is prepared for my educational purpose only and to accomplish the requirement for industrial attachment. Some of the direct and indirect aspects of software industry and their challenges has included in this report. This report reflects my experiences and insights of knowledge that I earned from my workstation. A detail description of “Flowcite” project is discussed so that other students can take their decision whether it is suitable for them or not after knowing about the company.

CHAPTER 2: COMPANY OVERVIEW

2.1 Overview

I joined Workspace Infotech Limited as an intern which is an IT company who serves IT service for the last 12 years. Its services include Software solutions, Web development/design, Graphics design and Hoisting services. They provide their service not only in Bangladesh but also in the world. This company was formed by highly experienced people in project management and software development to ensure quality services with a clear vision. They execute their every project with continuous accountability. They put the client's goals first and develop strategies according to the clients' requirements. Workspace Infotech always try to earn clients trust and try to build a great relationship with them.

2.2 List of Services

- Business Management System.
- Android/IOS App Development.
- Web Design and Development
- Professional Graphic Design service.
- Advanced UI/UX Design
- Template Design
- Hosting Domain Services.

2.3 Market Situations

The job for web developers is growing rapidly than the other of professions. Demands are going to be driven by the growing popularity of electronics devices. The newly created startup or the old one now tries to build their websites to represents themselves and their work around the world. And many others are trying to build mobile app and web app both to reach their target audience with their services. So, the number of people who wants the web and mobile services to make their business spread is increasing day by day. So, our company provide this quality services and products by maintaining the customer satisfaction.

2.4 Target Audience

Developers are always tried to place new methodology through their creative idea. Every single startup/business wants to made website that meet their expectation and make their services available to their targeted audience. Through the website company/organizations display their services or products and customer order that products or took these services Our companies target audiences are basically new startups, e-commerce sites, management systems, government projects, new online newspapers services etc. and that they also target student who have time to apply their knowledge on those projects for part time or a short period of time. Besides many needs' mobile application for their business and they are also our companies target audience.

2.5 Organization Strength

1. Workspace Infotech Limited providing software solutions and services to more than 350 clients in the last 12 years.
2. The company has expert engineers and skilled software developers
3. Strong client relationships
4. Strong support team.
5. Smooth internal communications
6. Well planned successful marketing strategies.
7. Provide Professional Training.

2.6 Contact

Company Name: Workspace Infotech Limited

Website: <https://www.workspaceit.com/>

Email: info@workspaceit.com

Address: House-16, Road-12, Nikunja-2

(Ground & 1st floor), Nikunja-2, Khilkhet, Dhaka-1229

CHAPTER 3: COMPANY CULTURE AND CARRYING OUT

3.1 Development Team Overview

In this internship period I have worked with the main development team of Flowcite. There is one project lead who supervised the project and one project coordinator who deal with client about project requirements and any kind of clarification. Other team members follow the instruction of project lead and try to maintain the development rules. Each and every team member are very helpful. They always try to help one another and contribute their work and knowledge to make this project successful.

3.2 Working Environment

The office has a great environment of working. Office provides all the necessary equipment with a beautiful organized desk. Every team member enjoys their work in this environment. It makes them more productive. Overall, it was very comfortable.

3.3 Rules and Regulations

1. Enter office before 8 A.M.
2. Punch your ID card before entering and leaving office.
3. Keep silent in the work room.
4. All communication must establish via working email or skype.
5. Join daily scrum meeting.
6. Always follow task management tools.
7. You must have to clear all the task within deadline and get approval from team lead.
8. Send daily task update mail to lead and coordinator.
9. No personal talk or gossiping or personal phone call in work room.

3.4 Facilities

1. Saturday, Sunday weekend.
2. 2 increments yearly.
3. 2 festival bonuses.
4. Performance Bonus.
5. Overtime payment.
6. Daily lunch.

3.5 Professional Environment

Though I took this internship as a part of my academic course, but there are massive differences between industry environment and classroom environment. This industrial environment is not as simple as I expected. It is tough to adapt professional environment by one day. Professionalism has to be learned from within the professional environment Workspace Infotech helped me to adapt this professionalism. Also, the environment of my team is also friendly.

3.6 Office Culture

In a word corporate culture of Workspace Infotech Ltd is excellent. They provide daily lunch and have arrangement for refreshment of the employee. Employee can take refreshment break and our company has lots of entertainments elements to cheer up the employee and keep their mind fresh.

3.7 First day at office

While I found out that my working day will start from tomorrow, I have been excited to think about how the day will go. Then when the day started, everyone came one by one and started sending morning messages in our WSIT skype group, inside me a little bit of

fear started working. Because this is my first entry in this industry. So, I was more afraid of how everyone would accept me. Then since 8 o'clock, I have been sitting in front of the computer wondering when everyone will come and at the same time, my heart rate has been increasing at a rate parallel to my fear. Finally, our team leader, everyone's favorite Mahedi, and the rest of our teammate came to the meeting, Mahedi brother introduced me to everyone there, I was very happy to get such friendly behavior from everyone. Then I realized that I was really lucky to be a member of the WSIT family and there is nothing to be worry and fear. After that Mahedi brother briefed us about the projects and also said who is working on which project. Another funny thing is that when Samiul brother (another senior employee of our team) asked me to tell me about myself, I was very confused as to what to say. Because that was the first time, I was talking to everyone and if I can't present myself properly on the first day, a bad impression will be formed. So, I said something about me with tons of fear. Finally, Mahedi brother explained our tasks to us and told me about my today's learning and ended the meeting by saying to me to practice my lessons. So, as Mahedi brother said, I studied my given lesson on my first day. Even though I knew something before, but I did it a little more sincerely today. Because now is the time to prove and work with the WSIT family altogether. So, with that in mind, I did my reading. So overall the day was a very scary day for me at the beginning but after talking to everyone I didn't think about it anymore and I invested the rest of the time in my learning.

CHAPTER 4: SOFTWARE REQUIREMENT SPECIFICATION

4.1 Functional Requirements

FR-1: Fetch Article Summary

FR-2: Import Bulk PDF

FR-3: Set user limitations for different service

FR-4: Make Sidebar library and project button collapsible

FR-5: Add pagination for book store page

FR-6: Undo article deletion

FR-7: Undo pdf citation deletion

FR-8: Implement full web page dynamic screenshot

4.2 Non-Functional Requirements

1. Optimize API fetch time
2. Optimize search time

CHAPTER 5: SYSTEM ANALYSIS

5.1 Use Case Diagram

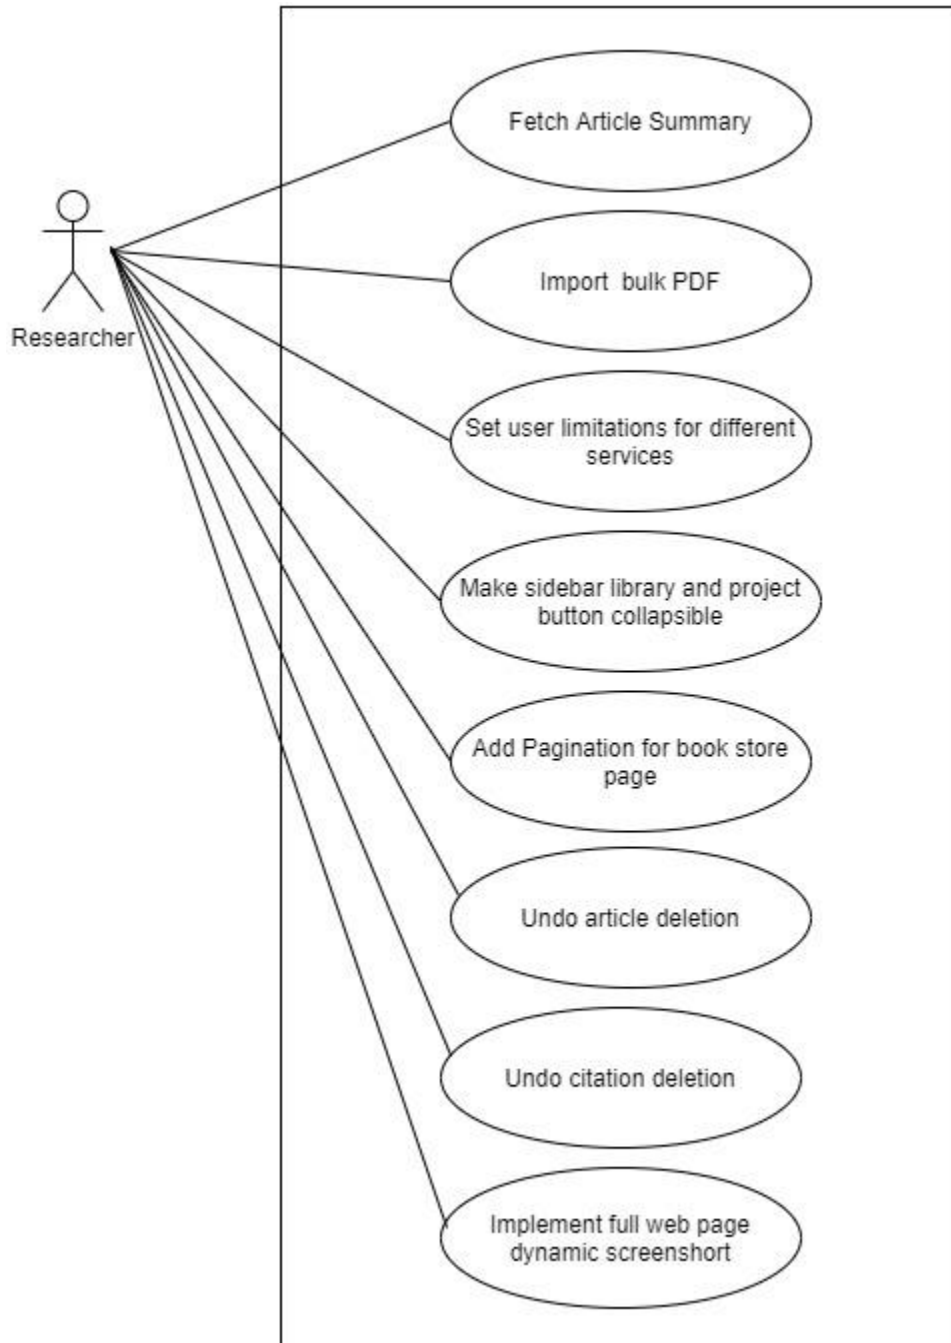

Fig: 5.1 Use Case Diagram (Researcher)

5.2 Identifying Use Cases

- UC-1: Fetch Article Summary
- UC-2: Import Bulk PDF
- UC-3: Set user limitations for different services
- UC-4: Make sidebar library and project button collapsible
- UC-5: Add pagination for book store page
- UC-6: Undo article deletion
- UC-7: Undo citation deletion
- UC-8: Implement full web page dynamic screenshot

5.3 Identifying Use Case Description

Use Case Id	UC-1
Use Case name	Fetch article summary
Scenario	Researcher want to get article summary.
Triggering event	When researcher select project, upload pdf and click generate summarizer button.
Brief description	Researcher just want to read the metadata (abstract, author, methodology, keywords, reference etc.) instead of read the whole article.
Actors	Researcher
Pre-Condition	Must have to select project and upload a PDF.

Table: 5.3.1 Use case description Fetch article summary

Use Case Id	UC-2
Use Case name	Import bulk pdf
Scenario	Researcher want upload multiple PDF into a single project.
Triggering event	When researcher go inside a project and click add document button.
Brief description	Researcher want to upload multiple PDF or just a single PDF then he/she can do that by clicking add document button inside project page.
Actors	Researcher
Pre-Condition	Must have to select project and upload a PDF.

Table: 5.3.2 use case description Import bulk pdf

Use Case Id	UC-3
Use Case name	Set user limitations for different services
Scenario	Researcher want to use pro features.
Triggering event	In profile page there are two buttons, one is Upgrade to pro and another is back to free. When researcher click one of this then it triggers this functionality.
Brief description	Researcher want to use our pro services then he/she must have to upgrade his account by purchasing our pro service plan. Otherwise, he/she will face some limitation when using our services.
Actors	Researcher
Pre-Condition	None.

Table: 5.3.3 use case description Set user limitations for different services

Use Case Id	UC-4
Use Case name	Make sidebar library and project button collapsible
Scenario	Researcher want to collapse library menu or project list from sidebar.
Triggering event	When researcher click library collapsible icon or project collapsible icon from sidebar.
Brief description	Researcher want minimize the library menu or want to minimize project list for better view/readability.
Actors	Researcher
Pre-Condition	Research must have projects for project collapsible functionality.

Table: 5.3.4 use case description Make sidebar library and project button collapsible

Use Case Id	UC-5
Use Case name	Add pagination for book store page.
Scenario	Researcher want visit search result according to page wise.
Triggering event	In book store page after search any book at the bottom of the result there are pagination button.
Brief description	In book store page when user search any book then at the below of the search result there are exit a pagination bar for visit search results according to page number
Actors	Researcher
Pre-Condition	Research has to search any book.

Table: 5.3.5 use case description Add pagination for book store page

Use Case Id	UC-6
Use Case name	Undo article deletion.
Scenario	Researcher want to undo article deletion after delete any article from project.
Triggering event	In project page a toaster with undo button appears when researcher delete any article.
Brief description	When researcher unfortunately delete any article then he/she wants to undo his deletion. In this situation research can click the undo button within few seconds.
Actors	Researcher
Pre-Condition	Must have at least one article under a project.

Table: 5.3.6 use case description Undo article deletion

Use Case Id	UC-7
Use Case name	Undo citation deletion.
Scenario	Researcher want to undo citation deletion after delete any citation from article.
Triggering event	In project page a toaster with undo button appears when researcher delete any citation.
Brief description	When researcher unfortunately delete any citation then he/she wants to undo his deletion. In this situation research can click the undo button within few seconds.
Actors	Researcher
Pre-Condition	Must have at least one citation of an article.

Table: 5.3.7 use case description Undo citation deletion

Use Case Id	UC-8
Use Case name	Implement full web page dynamic screenshot
Scenario	Researcher want to save full page screenshot from browser plugin.
Triggering event	When researcher select some text, select a project and click the next button.
Brief description	When researcher wants to add citation from any research related website then he/she may want to save the full-page image to remember the page.
Actors	Researcher
Pre-Condition	Have to install flowcite browser plugin in user's browser.

Table: 5.3.8 use case description Implement full web page dynamic screenshot

CHAPTER 6: SYSTEM DESIGN SPECIFICATION

6.1 ER Diagram

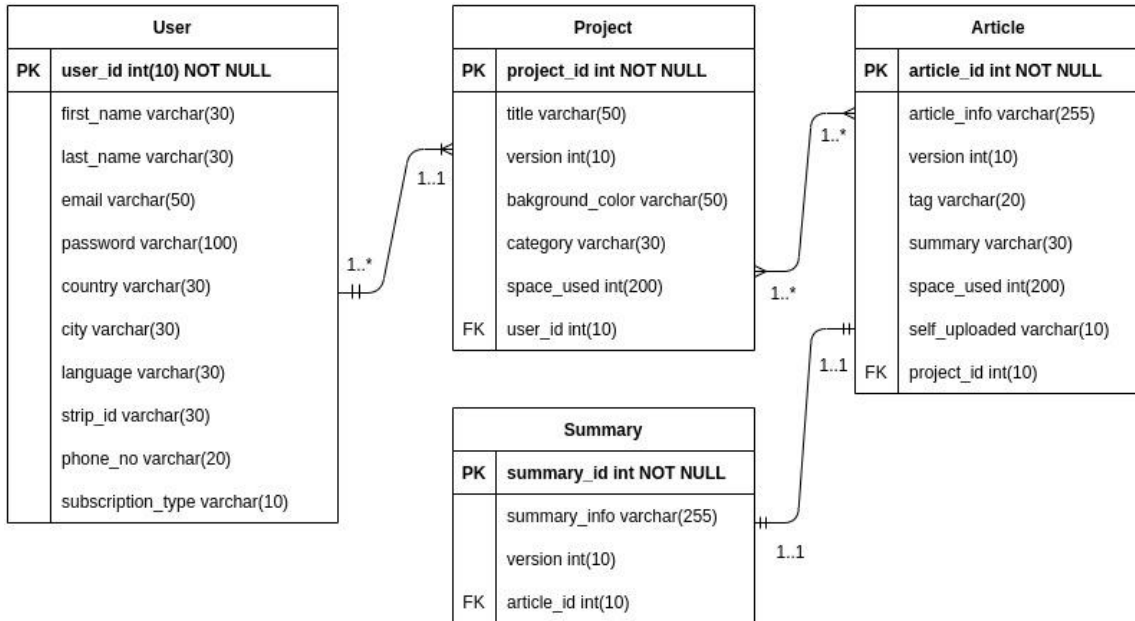

Fig 6.1: ER Diagram

6.2 Class Diagram

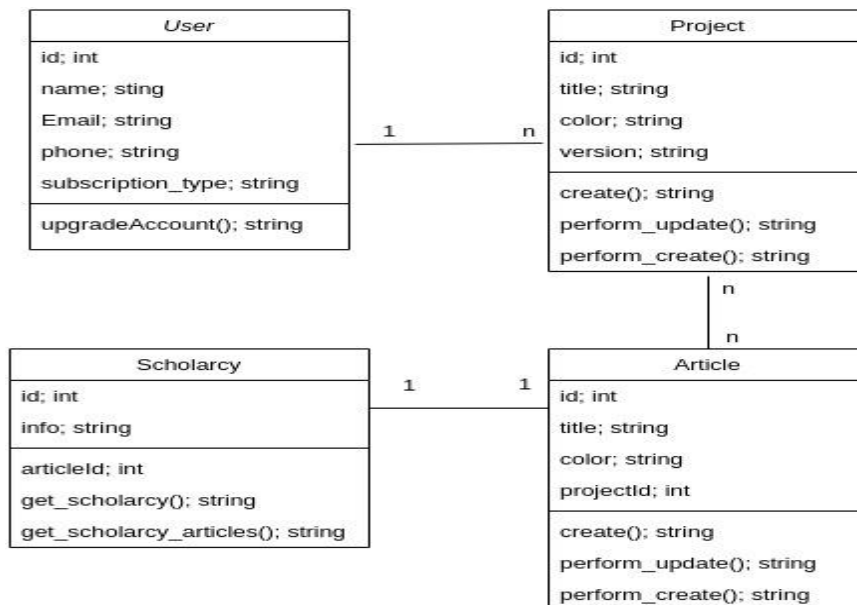

Fig 6.2: Class Diagram

6.3 Development Tools and Technology

6.3.1 Technologies

1. JavaScript
2. React JS
3. Axios (API Calling Library)
4. Python Django
5. Django REST Framework

6.3.2 Tools

1. Visual studio code
2. PyCharm
3. Postman/Talend
4. Codeplay

CHAPTER 7: PROJECT EXERTION

7.1 Training Knowledge

Before starting the project, my team lead shared the brief details of this project with me. Then my team assigned another team member to explain me the technical and theoretical aspect of the whole project. Because It is necessary to know what we will develop. My lead asks me my technical strength and lacking according to the project. After listening all the things, he assured me to help to cover my lacking during this project.

7.2 Technical Findings

The UI side is mainly done by the designer. So, at first, I faced some problem while working on the frontend. I've faced some problem in frontend while implementing any feature or logic because firstly the frontend JavaScript library "React Js" I have not used before and secondly, they're using their own layout for frontend so at the very beginning it was confusing for me.

7.3 Challenges

When new task came it always challenging for me because there are some times when I have not to code from scratch. I have to work on exiting code. Then it was challenging for me for keep the existing feature workable and have to implement the new feature or made any changes on that portion. So, I have to study the existing code with proper understanding about the logics implemented there then I dirty my hand with coding.

7.4 Completion and Delivery

Because of my less knowledge of frontend technology I could not meet the deadline for some tasks and It took extra time to complete those tasks. And after joining me the first sprint delivery was late. But in this extra time, I learned a lot.

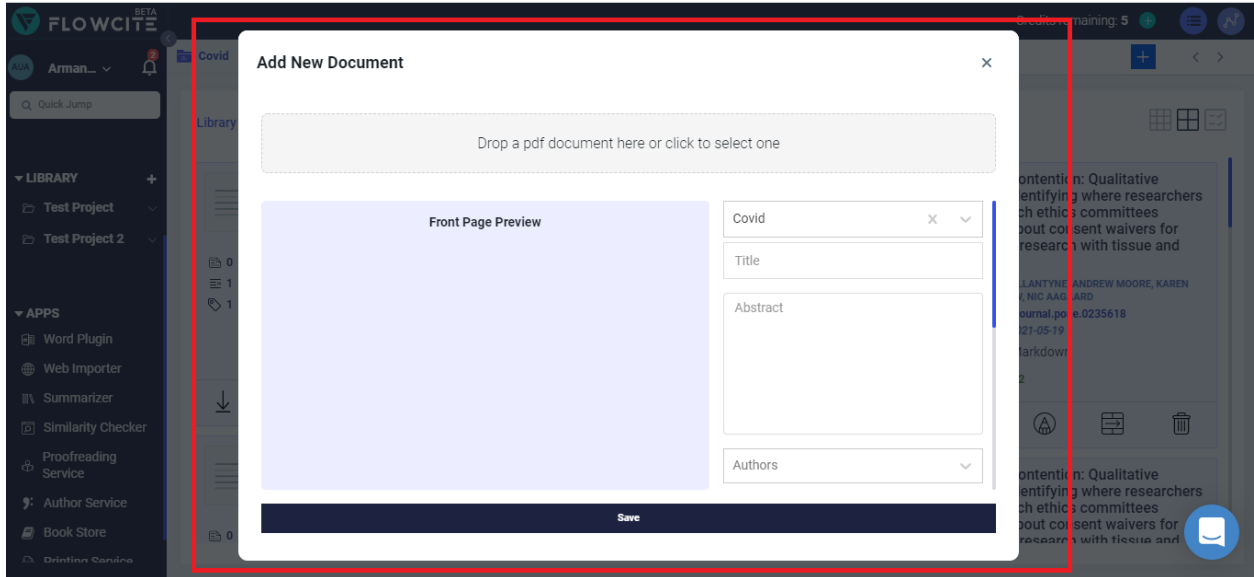

7.5 User Manual (Researcher)

UC-1: Fetch Article Summary:

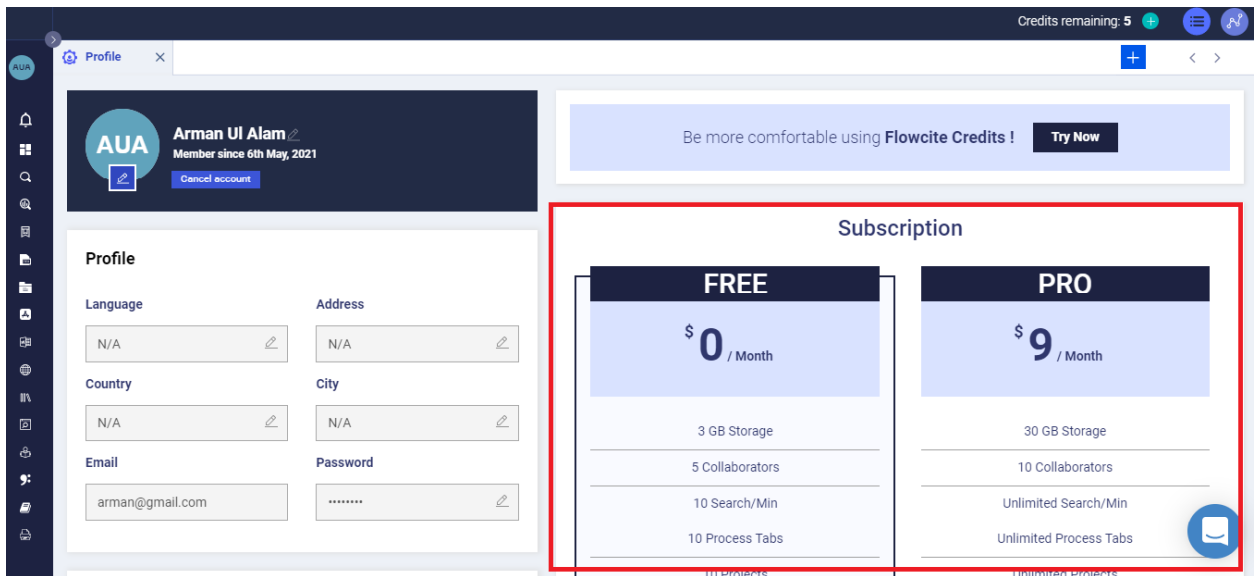

The screenshot shows the FLOWCITE Summarizer interface. The top navigation bar includes the FLOWCITE logo, a user profile (Arman...), and a notification bell. The main header displays "Credits remaining: 5". The interface is divided into a left sidebar with "LIBRARY" and "APPS" sections, and a main content area. The "Summarizer" section is titled "Powered By Scholarcy" and features a prominent blue banner: "Summarize your preferred articles" with a subtext "Price for 1 Summary - 5 credits". Below this, a red box highlights the "Upload any article, report or book chapter" section. This section contains a "Select Project (required)" dropdown menu, a large dashed box with an upward arrow and the text "Drop a pdf document here or click to select one", and a "Generate Summary" button. To the right of the upload area, there is a circular icon of a document with a refresh symbol and the text "Your awesome summary is few clicks away!". At the bottom, a "SUMMARY LIST" shows a preview of an article titled "How Did the Media Report on the Great East Japan Earthquake? Objectivity and Emotionality Seeking in Japanese Media Coverage" by Yukiko Uchida, Chie Kanagawa, Aiko Takenishi, Akira Harada, Kiyotake Okawa, and Hiromi Yabuno.

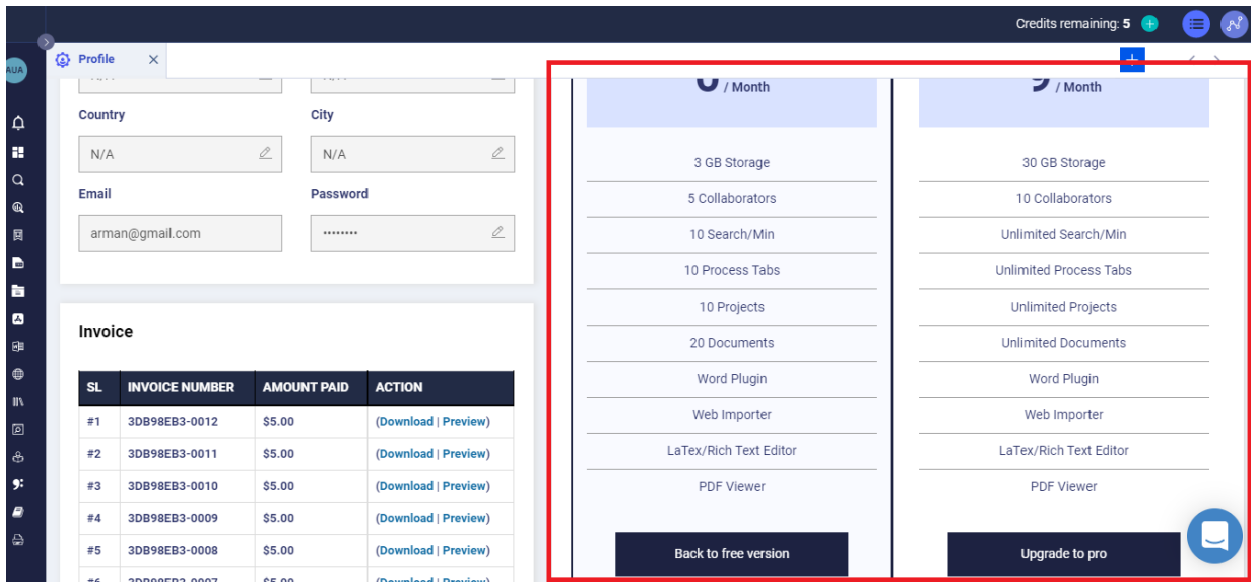

UC-2: Import Bulk PDF

The screenshot displays the FLOWCITE interface with a library of articles. The top navigation bar shows "Credits remaining: 5". The left sidebar contains "LIBRARY" and "APPS" sections. The main content area is titled "Library > Covid" and features a red box highlighting the "Add Document" button, which is accompanied by icons for search, document, share, and refresh. Below the button, several article cards are visible. The first card is "Media Portrayals of Suicide" by THE PLOS MEDICINE EDITORS, with DOI: 10.1371/journal.pmed.1000051 and a citation snippet. The second card is "Good and Bad Research Collaborations: Researchers' Views on Science and Ethics in Global Health Research" by MICHAEL PARKER, PATRICIA KINGORI, with DOI: 10.1371/journal.pone.0163579. The third card is "Points of contention: Qualitative research identifying where researchers and research ethics committees disagree about consent waivers for secondary research with tissue and data" by ANGELA BALLANTYNE, ANDREW MOORE, KAREN BARTHOLOMEW, NIC AAGAARD, with DOI: 10.1371/journal.pone.0235618. Each article card includes a "Note" button and a "Test Markdown" option. The interface also shows a grid view toggle and a chat icon in the bottom right corner.

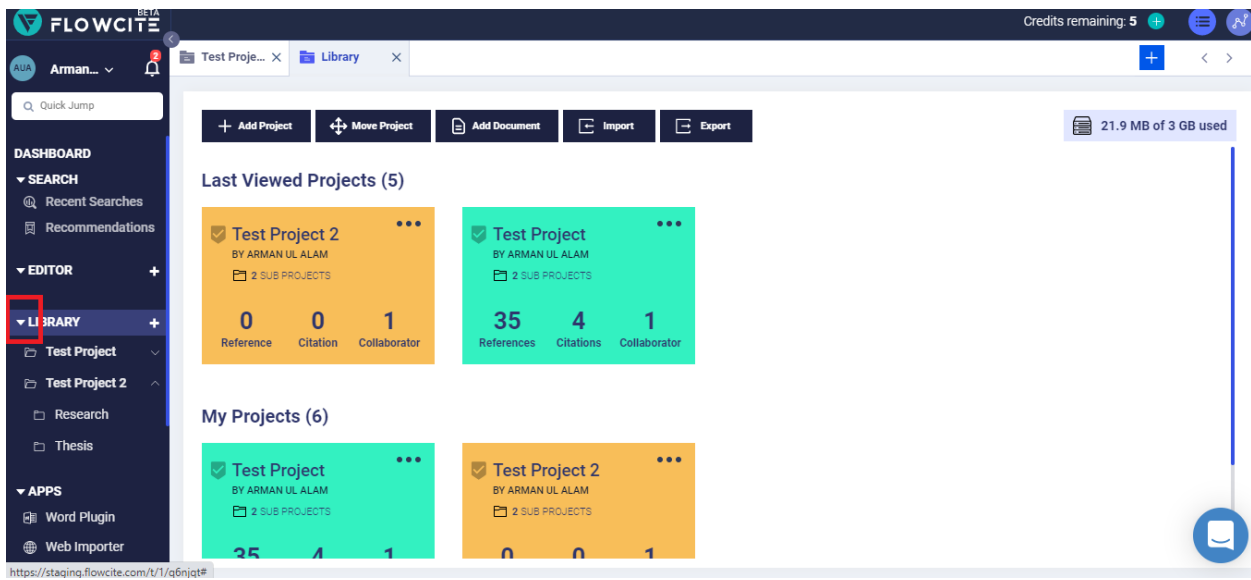

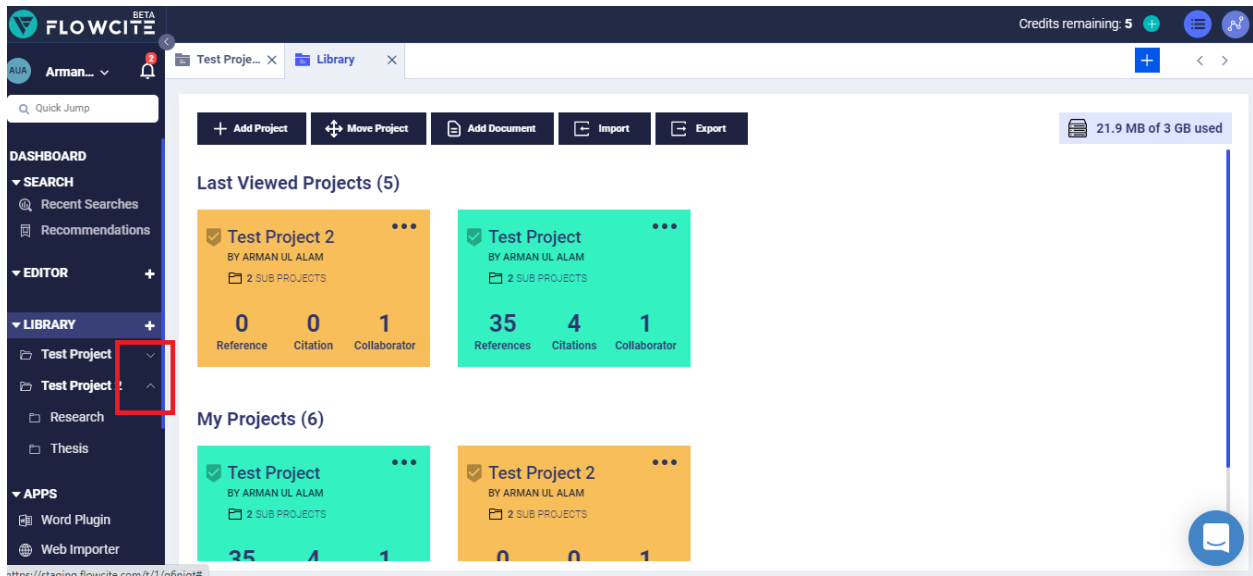

UC-3: Set user limitations for different service

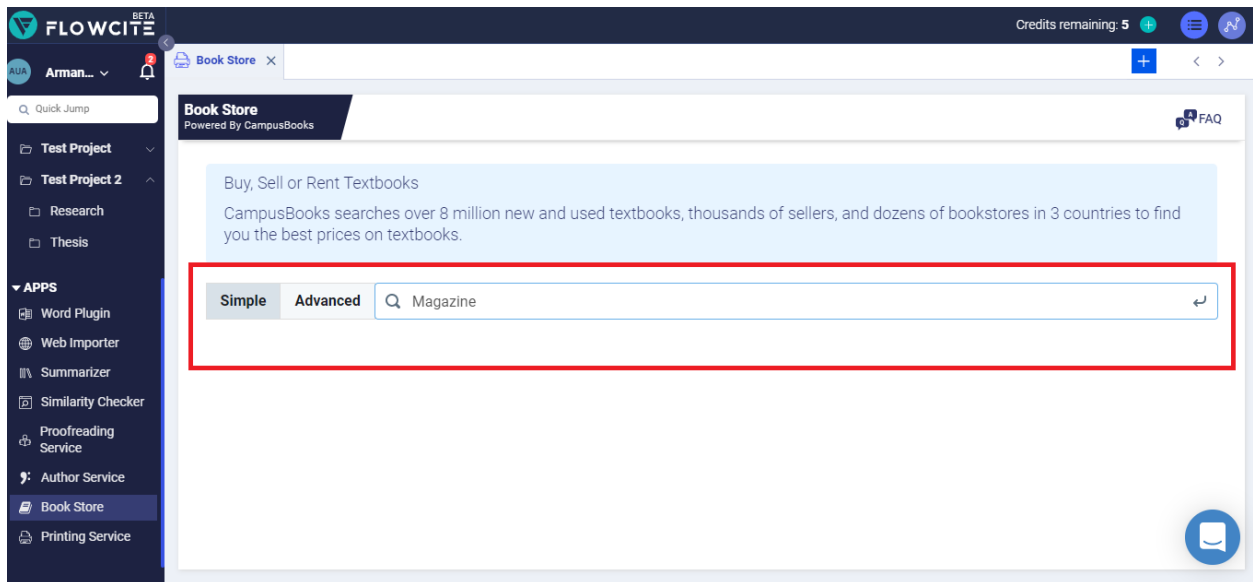

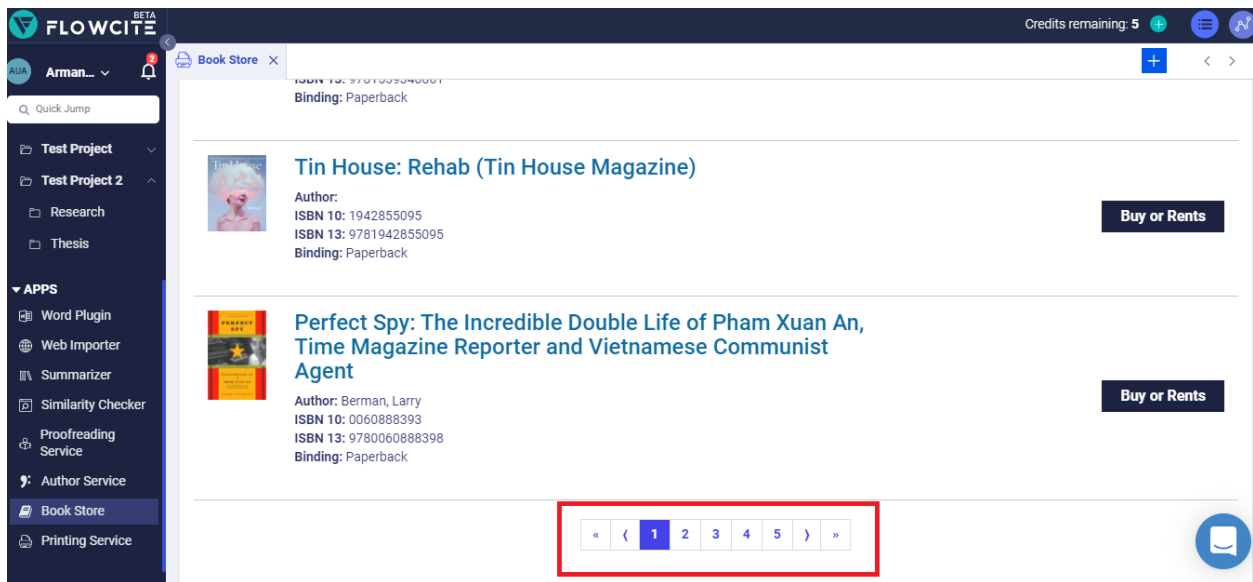

UC-4: Make Sidebar library and project button collapsible

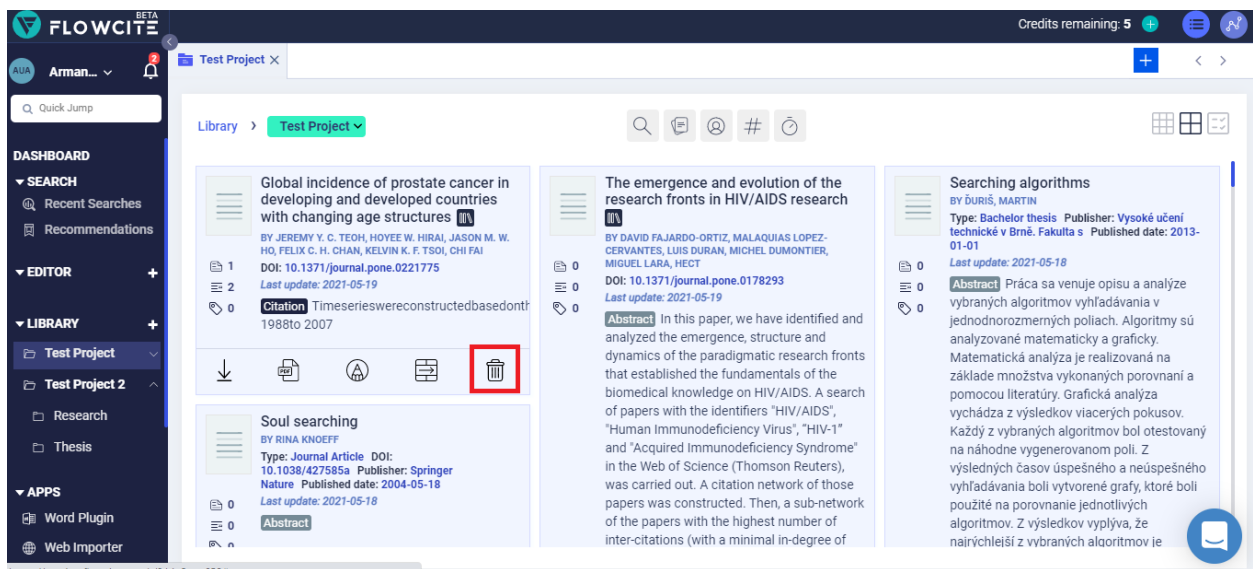

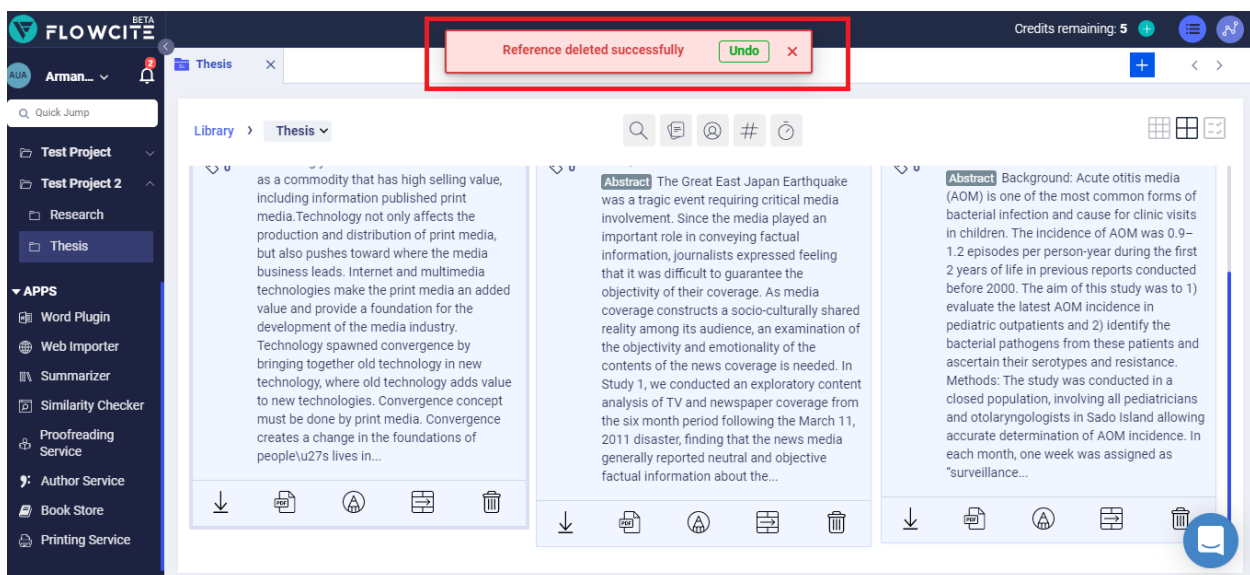

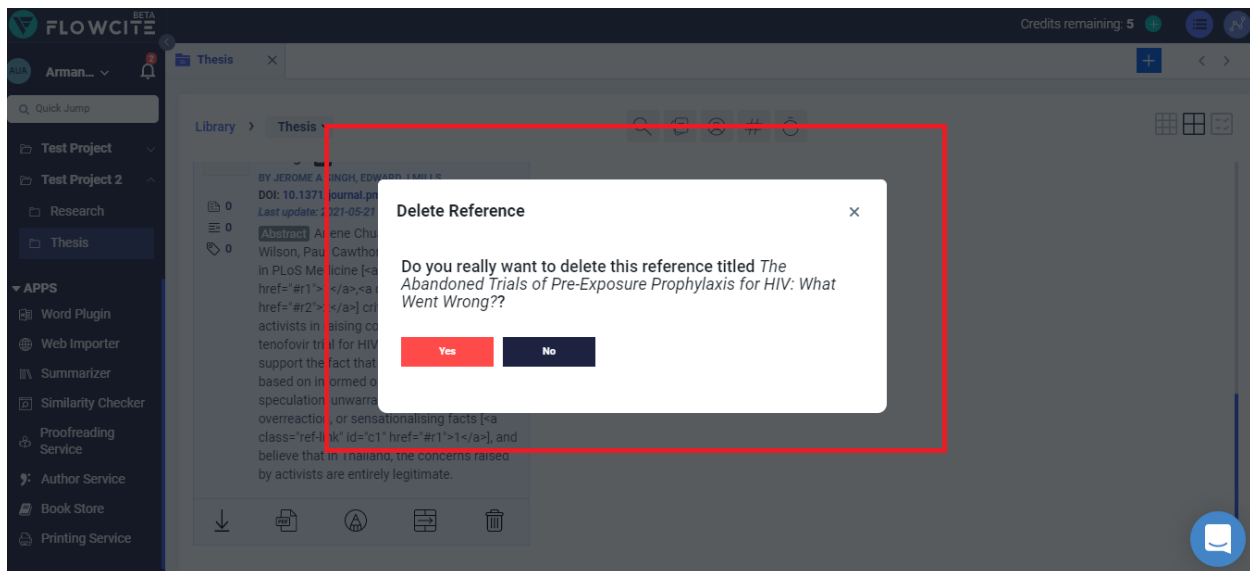

UC-5: Add pagination for book store page

UC-6: Undo article deletion

7.6 Project Links

Staging: <https://staging.flowcite.com>

Live: <https://api.flowcite.com>

CHAPTER 8: EXPERIENCE AND ACHIEVEMENTS

8.1 Technical Enhancement

1. JavaScript
2. React JS
3. React JS Libraries (Formik, axios, react-sortable, react-dropzone etc.)
4. Python
5. Django Framework
6. Django Rest Framework

8.2 Non-Technical Enhancement

1. Internal Communication
2. Responsibilities
3. Team Work
4. Self Confidence
5. Take Challenges

8.3 Achievements

The biggest achievement of this internship is that the project that I assigned is really amazing. Because it's going to be a really helpful and beneficiary for the researchers. A researcher can do almost everything in one system that never going to be happened in previous. Our system reduces the time of a researcher and make everything organized so that a researcher can get everything near his hand. So, it is a big achievement for me working as a team member in this project.

8.4 Future Scope

During this internship I learned a lot. It's not only technology but also many soft skills and other skills that going to be helpful for me in future. The mistakes I do in this time and the learnings from this mistake is priceless. Now I know how to cope with extreme situation when face any problems. How to deal with client. How to meet deadline and many more. In the near future these experiences will help me a lot.

8.5 Limitations

Before joining the company, I signed the contract and the company's confidential agreement. In this agreement there mentioned that I cannot disclose with others any internal or sensitive information of the company and projects without proper permission. So, I avoid many details about my project and company to keep maintain company rules and privacy.

CHAPTER 9: CONCLUSIONS AND RECOMMENDATION

9.1 Conclusions

To conclude, the overall journey of my internship at Workspace Infotech Limited was so amazing. I enjoyed this journey from the first day of my internship. The experiences and learnings I have earned from this internship program with WSIT were really important for me and my future career. This internship program assisted me a lot to realize further for the coming future of mine. During the program, I have remarked the overall activity of an Industrial project and environment and I have obtained plenty of understanding about those. I have a great opportunity to relate my theoretical knowledge with real life system.

9.2 Recommendation

Before joining to Workspace Infotech Ltd, I did not know what I will learned from there. But I am well aware of it about what I achieved and learned. In WSIT, I got tremendous support from my senior and junior colleagues which is unforgettable. For that, I would like to express my whole-hearted gratitude to my colleagues for giving their support and suggestions and time. Also, thanks to our chairman and CEO sir for giving this opportunity to be a member of WSIT family.
