# Approval

This internship titled on “Internship on Landen Technology”, submitted by Md. Ashiqur Rahaman, ID:172-35-2149 to the Department of Software Engineering, Daffodil International University has been accepted as satisfactory for the partial fulfilment of the requirements for the degree of Bachelor of Science in Software Engineering and approval as to its style and contents.

## BOARD OF EXAMINERS

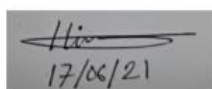

-----  
Dr. Imran Mahmud  
Associate Professor and Head  
Department of Software Engineering  
Daffodil International University

Chairman

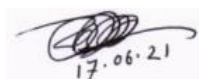

-----  
Md. Shohel Arman  
Senior Lecturer  
Department of Software Engineering  
Daffodil International University

Internal Examiner 1

-----  
Farhan Anan Himu  
Lecturer  
Department of Software Engineering  
Daffodil International University

Internal Examiner 2

-----  
Professor Dr. Mohammad Abul Kashem  
Department of Computer Science and Engineering  
Dhaka University of Engineering and Technology

External Examiner

## Declaration

I hereby declare that, this internship has been done by me under the supervision of Mr. Md. Shohel Arman, Lecturer (Senior Scale), Department of SWE Daffodil International University. I also declare that neither this internship nor any part of this project has been submitted elsewhere for award of any degree or diploma.

## Appointment Letter

piCredo Software Ltd.

Date: 30/11/2020

Ref: piCredo/HR/2020/005

**Md. Ashiqur Rahman**

Daffodil International University

Student ID: 172-35-2149

**Subject: Internship Appointment Letter.**

**Dear Mr. Md. Ashiqur Rahman,**

With reference to letter ref. no. DIU/Head/SWE/2020/-1006 dated November 24, 2020, I am pleased to inform your acceptance of an internship position as an Intern in the Software Development Department of piCredo Software Ltd. at a daily allowance of Tk. 100/- . Your first day of joining will be December 1, 2020. You will report to your supervisor Rakibul Islam, Software Developer.

During your internship, you will have an access to company's clients and confidential information. You agree that you will keep all this information and client information strictly confidential and will not share it with anyone outside the company. You will not use it for your own benefits and on completion of the internship; you will return documents, equipment, and all property of the company.

**Congratulations on the Internship.**

**Best Regards,**

**Jannat Afsary**  
Director, Admin, HR & Finance

## 1. Introduction

### 1.1 Company Overview

My company's name is piCredo Software Ltd. Technology and innovation are at the heart of piCredo Software Ltd.'s narrative. They began their journey in January 2020, with the goal of providing the best technology and customer service possible. They have a strong technical team that can provide high-quality services to its customers.

The vision at piCredo Software, is to reach across the globe with technological innovation that will have positive impact on people's life. Their mission is to empower people with technology and innovation.

### 1.2 My Responsibilities

My designation for the following organization was software development intern. I started as a Junior Software Engineer last month. I worked as an intern for about four-month. My responsibilities in the internship period were full-stack web development. I developed multiple single-page projects but I developed a full web-based project named landen. An android app is also available in the google play store for the same name. I converted the web version to full of functionality.

### 1.3 Technology I Learned

Here are some tools and techniques I learned during my internship period:

1. **Firestore Implementation:** I implemented google firestore in vanilla JavaScript. Where I use a real-time database that is available for (pay you to use to go) mode. Users authenticate using firestore authentication. They can perform CRUD operations.
2. **Bangla Invoice Generation:** I learned Bangla invoice generation using canvas drawing in JavaScript.
3. **Payment Gateway Integration:** I learned payment gateway integration. I'm now able to send an HTTP response using the necessary parameters and also can make an API request.

- 4. Delivery Channel Integration:** I learned delivery channel integration. Where I can send HTTP post requests and get the individual cities, Thana, area, etc. And also learned how to track an order.
- 5. Ecommerce Site Development:** Recently I also completed a full e-commerce website using laravel framework.

## 1.4 Project Overview

Landen ([www.landen.com.bd](http://www.landen.com.bd)) is the first invoicing fintech application in Bangladesh. This Application allows small businesses, such as F-commerce, E-commerce, and micro-merchants, to conveniently keep track of their daily transactions and generate sales invoices. Micro-merchants and F-commerce firms will also be allowed to accept payment via online and deliver their products.

## 1.5 Project Purpose

Small company owners, such as Facebook, e-commerce, and micro merchants, can use this software to simply establish daily business accounts and sales receipts. By using this application, small business owners can easily understand the real picture of their business at a glance.

## 1.6 Stakeholders

- Users (Micro-merchant Owners).
- Clients.

## 1.7 Gantt chart

Fig 1.0:- Gantt chart

## 2. System Analysis

### 2.1 Functional Requirements

#### 2.1.1 Users

<b>Requirement ID</b>	UFR1.01.01
<b>Title</b>	Registration
<b>Description</b>	The option is for User to register in this system.
<b>Priority</b>	High

<b>Requirement ID</b>	UFR1.01.02
<b>Title</b>	Login
<b>Description</b>	The option is for Users to Login in this system.
<b>Priority</b>	High

<b>Requirement ID</b>	UFR1.01.03
<b>Title</b>	User Profile
<b>Description</b>	The option is for Users to update users Profile.
<b>Priority</b>	Medium

<b>Requirement ID</b>	UFR1.01.04
<b>Title</b>	Add Products
<b>Description</b>	The option is for Users to Add Products.
<b>Priority</b>	High

<b>Requirement ID</b>	UFR1.01.05
<b>Title</b>	Add Clients
<b>Description</b>	The option allows the Users to add their clients.
<b>Priority</b>	High

<b>Requirement ID</b>	UFR1.01.06
<b>Title</b>	Add Daily Invest
<b>Description</b>	This option allows the Users to add daily invest.
<b>Priority</b>	Medium

**Requirement ID** UFR1.01.07  
**Title** Add Monthly Invest  
**Description** This option allows the Users to add their monthly invest.  
**Priority** Medium

**Requirement ID** UFR1.01.08  
**Title** View Clients List  
**Description** This option allows the Users to view/delete/update clients.  
**Priority** Low

**Requirement ID** UFR1.01.09  
**Title** View Products List  
**Description** This option allows the Users to view/delete/update products.  
**Priority** Low

**Requirement ID** UFR1.01.10  
**Title** Generate Invoice  
**Description** This option allows the Users to Generate Invoice.  
**Priority** Medium

**Requirement ID** UFR1.01.11  
**Title** View Invoice List  
**Description** This option allows the Users to view list of invoices.  
**Priority** Low

**Requirement ID** UFR1.01.12  
**Title** Generate Payment URL  
**Description** This option allows the Users to generate payment url for clients to pay their due amount through online.  
**Priority** Medium

**Requirement ID** UFR1.01.13  
**Title** Make Parcel Delivery  
**Description** This option allows the Users to make parcel for delivery.  
**Priority** Medium

**Requirement ID** UFR1.01.14  
**Title** Track Delivery  
**Description** The option is for Users to view delivery list and track their delivery.  
**Priority** Medium

**Requirement ID** CFR1.01.15  
**Title** Logout  
**Description** The option is for Users to Logout in this system.  
**Priority** Low

### 2.1.2 Admin

**Requirement ID** AFR1.02.01  
**Title** Login  
**Description** The option is for Admin to login in this system.  
**Priority** High

**Requirement ID** AFR1.02.02  
**Title** View Delivery List  
**Description** The option is for Admin to view all delivery list.  
**Priority** Medium

**Requirement ID** AFR1.02.03  
**Title** Track Individual Delivery  
**Description** The option is for Admin to track individual delivery.  
**Priority** Medium

<b>Requirement ID</b>	AFR1.02.04
<b>Title</b>	View Payment List
<b>Description</b>	The option is for Admin to view payment list.
<b>Priority</b>	Medium
<b>Requirement ID</b>	AFR1.02.05
<b>Title</b>	Excel Export
<b>Description</b>	The option is for Agent to export delivery table or payment table.
<b>Requirement ID</b>	AFR1.02.07
<b>Title</b>	Logout
<b>Description</b>	The option is for Agent to Logout in this system.
<b>Priority</b>	Low

## 2.2 Non-Functional Requirements

- Right now registration process for web applications is off for some reason. Users must use mobile apps for the registration process. After completing user able to log in through the web.
- Users will be able to send OTP to registered mobile numbers up to 6 times in a row consecutively while login. After the 6th attempt user will get blocked for that phone number. And will unblock after 3-4 hours.
- For every operation user must need to wait 5-10 (based on internet speed) seconds until loading from the firebase database.
- After creating the invoice, the user will not be able to delete this or the sales info.
- Payment URL will available in the invoice when users choose online payment while generating invoices.

## 2.3 Use Case

### 2.3.1 Use Case Diagram for Users

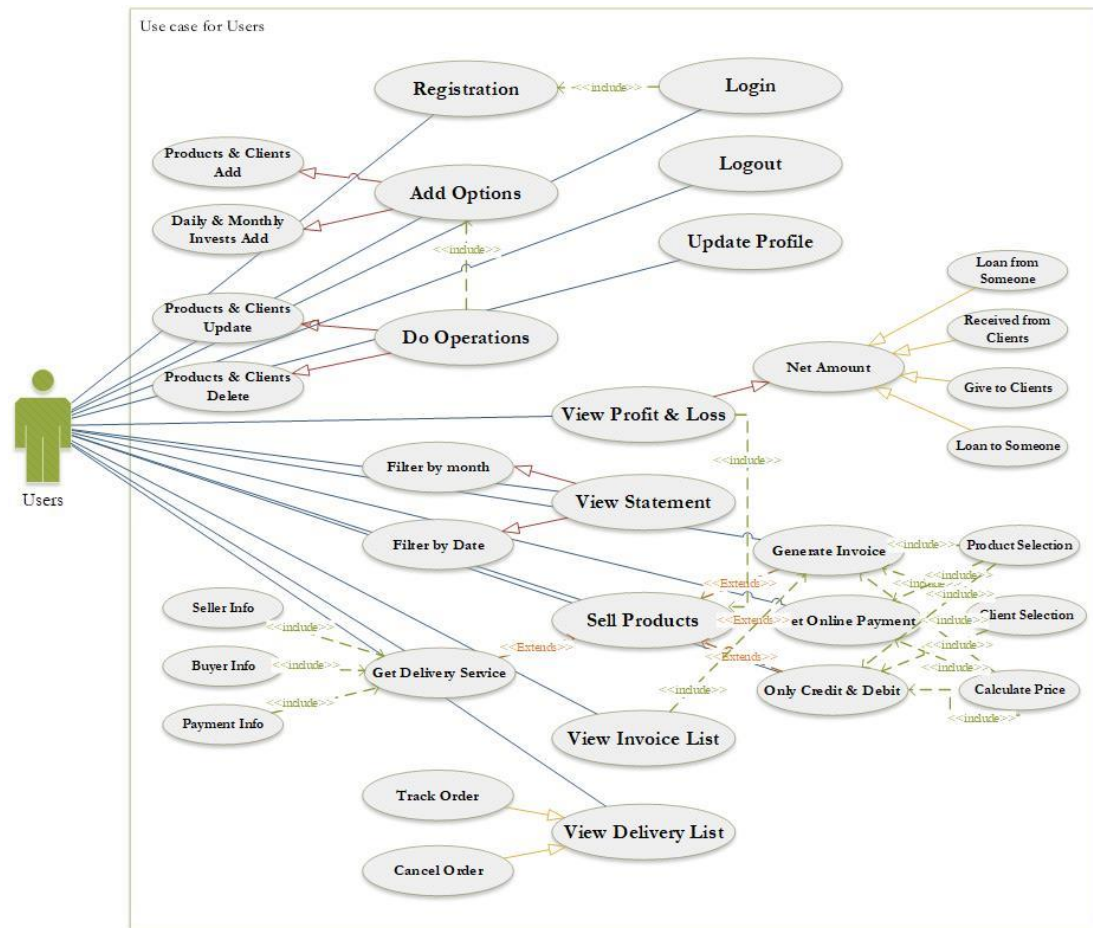

Fig 1.1:- User Use Case Diagram

### 2.3.2 Use Case Description (Users)

<b>Use Case No.</b>	1.1
<b>Use Case Name</b>	Registration
<b>Actor</b>	Users
<b>Description</b>	Allowing users to create account for the system.
<b>Precondition</b>	User should remain in the registration page
<b>Trigger</b>	Click the “Sign Up” Link
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ Several text fields to give input of the name, phone, email, company name and page name respectively.</li> <li>➤ Fill all the field and click the sign up button.</li> </ul>
<b>Post Condition</b>	User registered the system.

<b>Use Case No.</b>	1.2
<b>Use Case Name</b>	Login
<b>Actor</b>	Users
<b>Description</b>	Allowing users to login to the system.
<b>Precondition</b>	User should remain in the login page
<b>Trigger</b>	Click the “Send OTP” Link
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ One text field and re-captcha container first appear in login screen. After confirming OTP user able to login the system.</li> <li>➤ Write the phone number and solve re-captcha and then fill the right OTP and click the login button.</li> </ul>
<b>Post Condition</b>	User logged into the system

<b>Use Case No.</b>	1.3
<b>Use Case Name</b>	Update Profile
<b>Actor</b>	Users
<b>Description</b>	Allowing users to update their profile.
<b>Precondition</b>	User should remain in the update profile page
<b>Trigger</b>	Click the “User Profile” Link from right top bar.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ All the field will appear in user profile page. Upload company logo and sign will be there.</li> <li>➤ Update any field which users want to.</li> </ul>
<b>Post Condition</b>	An alert arise after successful update.

<b>Use Case No.</b>	1.4.1
<b>Use Case Name</b>	Add Options (Add Products)
<b>Actor</b>	Users
<b>Description</b>	Allowing users to Add products into the system.
<b>Precondition</b>	A modal popped up from top and remain in dashboard screen.
<b>Trigger</b>	Click the “Add” button in product add card.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ Several text fields to give input of the product name, price, quantity etc.</li> <li>➤ Click “Add Product” button to add products.</li> </ul>
<b>Post Condition</b>	An alert arise after successful addition.

<b>Use Case No.</b>	1.4.2
<b>Use Case Name</b>	Add Options (Add Client)
<b>Actor</b>	Users
<b>Description</b>	Allowing users to Add clients into the system.
<b>Precondition</b>	A modal popped up from top and remain in dashboard screen.
<b>Trigger</b>	Click the “Add” button in client add card.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ Several text fields to give input of the client name, phone, email, address etc.</li> <li>➤ Click “Add Client” button to add clients.</li> </ul>
<b>Post Condition</b>	An alert arise after successful addition.

<b>Use Case No.</b>	1.4.3
<b>Use Case Name</b>	Add Options (Add Daily Invest)
<b>Actor</b>	Users
<b>Description</b>	Allowing users to Add Daily Invest into the system.
<b>Precondition</b>	A modal popped up from top and remain in dashboard screen.
<b>Trigger</b>	Click the “Add” button in Daily Invest card.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ Several text fields to give input of the transport cost, daily cost, others cost, with date etc.</li> <li>➤ Click “Add Daily Invest” button to add Daily Invest.</li> </ul>
<b>Post Condition</b>	An alert arise after successful addition.

<b>Use Case No.</b>	1.4.4
<b>Use Case Name</b>	Add Options (Add Monthly Cost)
<b>Actor</b>	Users
<b>Description</b>	Allowing users to Add Monthly Cost into the system.
<b>Precondition</b>	A modal popped up from top and remain in dashboard screen.
<b>Trigger</b>	Click the “Add” button in Add Monthly Cost card.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ First need to select month name and year name from select box. Then there will be some text fields for input of salary, rent, electricity, etc.</li> <li>➤ Click “Add Monthly Cost” button to add Monthly Cost.</li> </ul>
<b>Post Condition</b>	An alert arise after successful addition.

<b>Use Case No.</b>	1.5.1
<b>Use Case Name</b>	Do Operation (View/Update/Delete Products)
<b>Actor</b>	Users
<b>Description</b>	Allowing users to View/Update/Delete products.
<b>Precondition</b>	User will remain in product details page.
<b>Trigger</b>	Click the “Edit” icon button from product listing page and do operations.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ User able to update from specific field or delete products.</li> <li>➤ Click “Update” button to update products.</li> </ul>
<b>Post Condition</b>	An alert arise after successful update.

<b>Use Case No.</b>	1.5.2
<b>Use Case Name</b>	Do Operation (View/Update/Delete Clients)
<b>Actor</b>	Users
<b>Description</b>	Allowing users to View/Update/Delete clients.
<b>Precondition</b>	User will remain in client details page.
<b>Trigger</b>	Click the “Edit” icon button from client listing page and do operations.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ User able to update from specific field or delete clients.</li> <li>➤ Click “Update” button to update clients.</li> </ul>
<b>Post Condition</b>	An alert arise after successful update.

<b>Use Case No.</b>	1.6
<b>Use Case Name</b>	View Profit & Loss
<b>Actor</b>	Users
<b>Description</b>	Allowing users to view total net amount.
<b>Precondition</b>	User should remain in the due calculation page.
<b>Trigger</b>	Click the “See” button in due amount card.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ Users can see four option loan from someone, loan to someone, received from client, give to clients and add or update fields.</li> <li>➤ Select “Date Range” to see the net balance and details.</li> </ul>
<b>Post Condition</b>	An alert arise after successful update or addition.

<b>Use Case No.</b>	1.7
<b>Use Case Name</b>	View Statement
<b>Actor</b>	Users
<b>Description</b>	Allowing users to view statement for activities in monthly or date wise.
<b>Precondition</b>	User should remain in statement page.
<b>Trigger</b>	Select month name from select box or date range from date field.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ After selecting date range user able to see total cost.</li> <li>➤ After selecting last field system automatically show the amount.</li> </ul>
<b>Post Condition</b>	User able to show the amount.

<b>Use Case No.</b>	1.8
<b>Use Case Name</b>	Sell Product
<b>Actor</b>	Users
<b>Description</b>	In this section user can generate invoice, make payment online and make parcel for delivery.
<b>Precondition</b>	User should remain in invoice creation page.
<b>Trigger</b>	Create invoice by clicking “Click” button link from invoice card.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ First users need to select client’s info, then product info and quantity, after calculating subtotal users able to perform next options.</li> <li>➤ There will be thee checkbox (make pdf invoice, online payment, delivery service). Select one or more and make invoice using create invoice button</li> </ul>
<b>Post Condition</b>	An alert arise after successful creation.

<b>Use Case No.</b>	1.9
<b>Use Case Name</b>	View Invoice List
<b>Actor</b>	Users
<b>Description</b>	Allowing users to view invoice list.
<b>Precondition</b>	A modal popped up from top and remain in dashboard screen.
<b>Trigger</b>	View invoice list by clicking “View” button link from invoice list card.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ In the popup modal, there will be a table where all the invoice list is displayed.</li> <li>➤ Users can close that modal.</li> </ul>
<b>Post Condition</b>	Users can close that modal.

<b>Use Case No.</b>	1.10
<b>Use Case Name</b>	View/Track Delivery List
<b>Actor</b>	Users
<b>Description</b>	Allowing users to view delivery list and track delivery.
<b>Precondition</b>	User should remain in delivery listing page.
<b>Trigger</b>	Track delivery list by clicking “Order details” button link from delivery list table.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ In the delivery listing page, there will be a table where all the delivery list is displayed.</li> <li>➤ When user click specific order from that list a tracking status and others information displayed.</li> </ul>
<b>Post Condition</b>	Users can close that modal.

<b>Use Case No.</b>	1.11
<b>Use Case Name</b>	Logout.
<b>Actor</b>	Users
<b>Description</b>	Allowing users to Logout from the system.
<b>Precondition</b>	Users should remain in authenticate page.
<b>Trigger</b>	Click the “Logout” Link from right top bar.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ All the session for the specific account has been dismissed.</li> </ul>
<b>Post Condition</b>	An alert arise after successful logged out in homepage.

### 2.3.3 Use Case Diagram for Admin

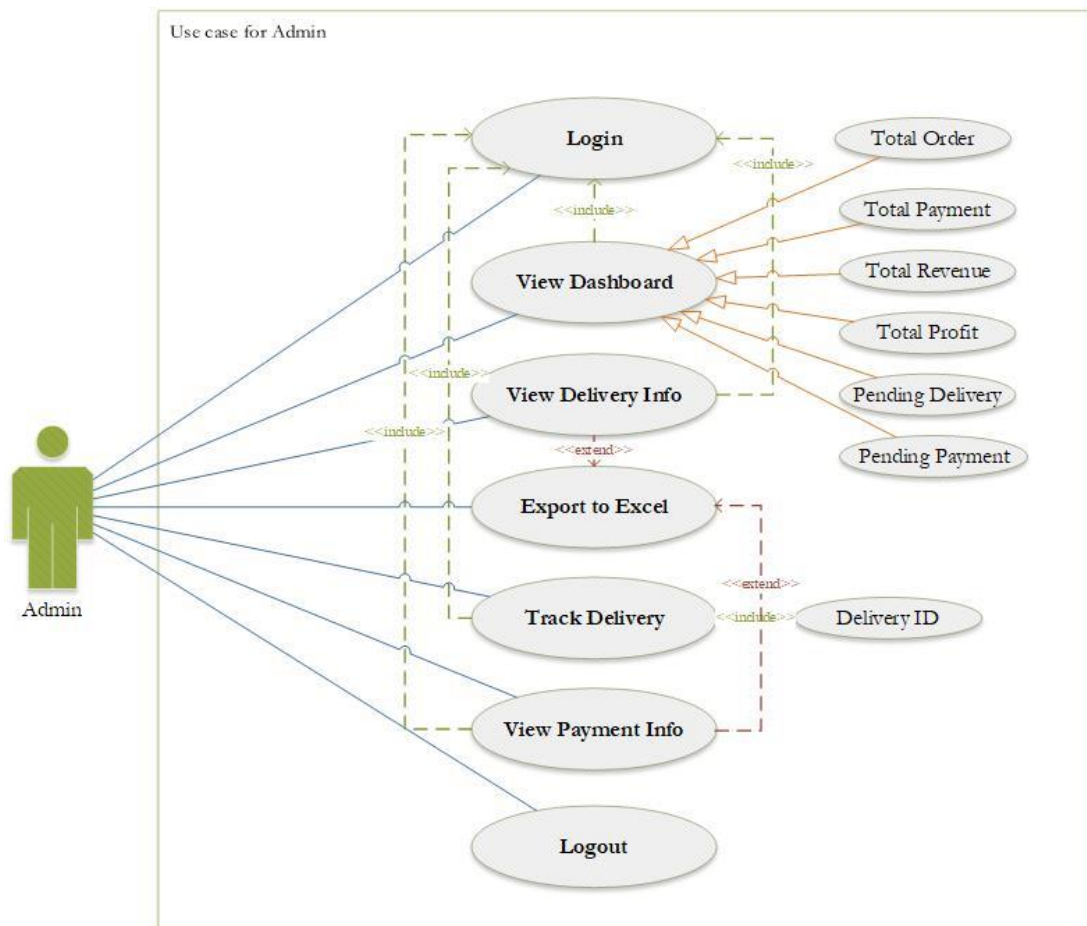

Fig 1.2:- Admin Use Case Diagram

### 2.3.4 Use Case Description (Admin)

<b>Use Case No.</b>	2.1
<b>Use Case Name</b>	Login
<b>Actor</b>	Admin
<b>Description</b>	Allowing Admin to login to the system
<b>Precondition</b>	Admin should remain in the login page
<b>Trigger</b>	Click the “Login” Link.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ Two text fields to give input of the username and password respectively</li> <li>➤ Write the username and password on that field and click the login button.</li> </ul>
<b>Post Condition</b>	Admin able to see admin panel.

<b>Use Case No.</b>	1.2
<b>Use Case Name</b>	View Dashboard
<b>Actor</b>	Admin
<b>Description</b>	Allowing to Admin to view total order count, total payment count, total revenue count, pending delivery count, pending payment count.
<b>Precondition</b>	Admin should remain in the admin dashboard page.
<b>Trigger</b>	No trigger need to apply.
<b>Flow of Events</b>	➤ Admin can view total order count, total payment count, total revenue count, pending delivery count, and pending payment count.
<b>Post Condition</b>	Admin can see main table in dashboard page.

<b>Use Case No.</b>	1.3
<b>Use Case Name</b>	View delivery info
<b>Actor</b>	Admin
<b>Description</b>	Allowing to Admin to view all delivery info ad export to excel.
<b>Precondition</b>	Download as excel file.
<b>Trigger</b>	Click the “Export to excel” Link.
<b>Flow of Events</b>	➤ Admin can view all the delivery list ➤ Download excel file.
<b>Post Condition</b>	Download notification appeared and start to download.

<b>Use Case No.</b>	1.4
<b>Use Case Name</b>	Track Delivery
<b>Actor</b>	Admin
<b>Description</b>	Allowing Admin to track download for individual users parcel.
<b>Precondition</b>	Click and show delivery status.
<b>Trigger</b>	Click the “Track” Link.
<b>Flow of Events</b>	➤ Agent can view all the delivery list and track the delivery by using delivery id.
<b>Post Condition</b>	Know the delivery state.

<b>Use Case No.</b>	1.5
<b>Use Case Name</b>	View Payment info
<b>Actor</b>	Admin
<b>Description</b>	Allowing to Admin to view all payment info ad export to excel.
<b>Precondition</b>	Download as excel file.
<b>Trigger</b>	Click the “Export to excel” Link.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ Agent can view all the payment list</li> <li>➤ Download excel file.</li> </ul>
<b>Post Condition</b>	Download notification appeared and start to download.

<b>Use Case No.</b>	1.7
<b>Use Case Name</b>	Logout.
<b>Actor</b>	Admin
<b>Description</b>	Allowing to Admin to Logout from the system
<b>Precondition</b>	Agent should remain in the authenticate page.
<b>Trigger</b>	Click the “Logout” Link.
<b>Flow of Events</b>	<ul style="list-style-type: none"> <li>➤ All the session for admin has been dismissed.</li> </ul>
<b>Post Condition</b>	Admin Logout Successfully.

### 3. System Design

#### 3.1 Activity Diagram

##### 3.1.1 Activity Diagram (Admin)

### 3.2 Entity Relationship (ER) Diagram

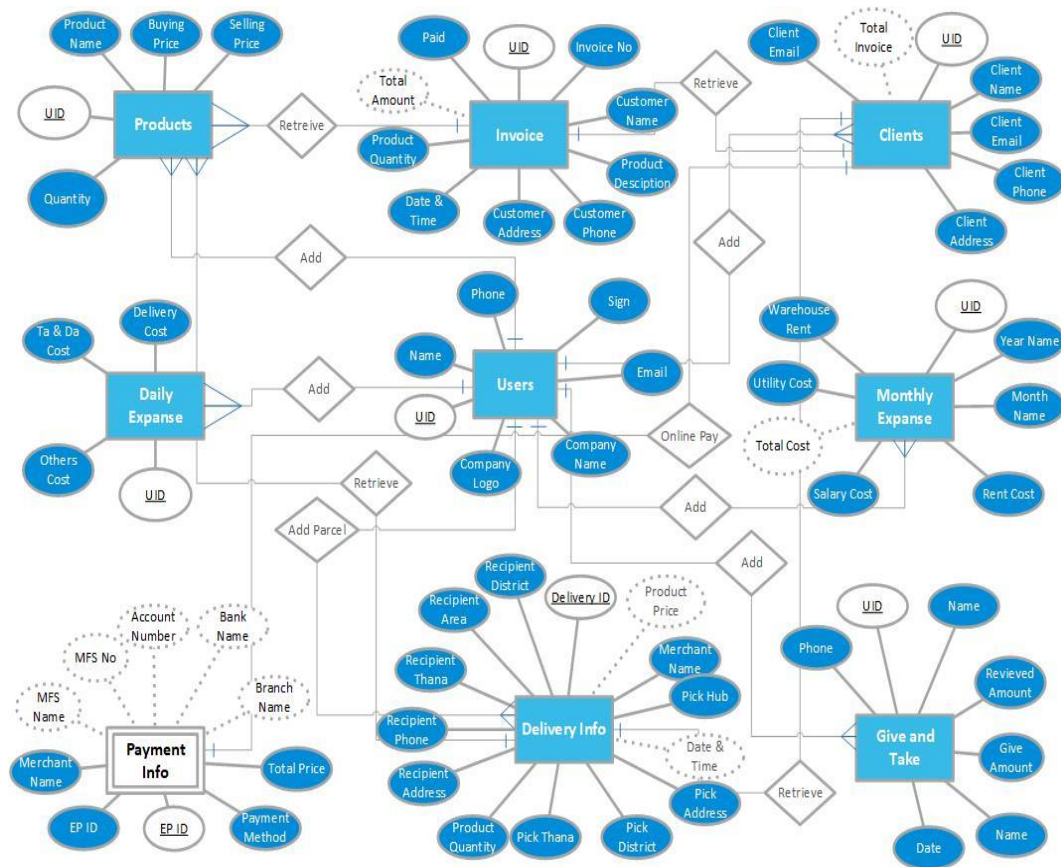

Fig 3.0:- ER Diagram

## **4. System Test & Development**

### **4.1 Introduction of System Testing**

System testing is a type of testing that verifies a software product's completeness and integration. A system test is used to evaluate the end-to-end specifications of a system. System testing is a collection of tests whose main objective is to put a computer-based system through its paces.

### **4.2 Features to be tested**

1. Registration
2. Login (OTP sending process)
3. Create/Read Operation.
4. Update/Delete Operation
5. Payment Process
6. Delivery Process
7. Invoice generation
8. Credit & Debit

### **4.3 Testing Approach**

1. The full system will be tested manually and step by step.
2. Check all the validation criteria.
3. Check all messages and alert.

#### 4.4 Testing Case Table

Test ID	Test Case	Description	Expected Output	Actual Output
TCID-1	Registration	Enter data in all fields	Successfully Registered	Successfully Registered
TCID-2	Login	Send OTP in provided number.	Successfully send OTP	Successfully send OTP
TCID-3	CRUD Operation	Product add, client add, monthly, daily invest add to input all the required field.	Operation Successful	Operation Successful
TCID-4	Online Payment	Checking hash value and send http response then generate payment URL.	Payment link generated	Payment link generated
TCID-5	Invoice Generation	Showing all products indo and clients info in a canvas and make pdf.	Pdf generation complete.	Pdf generation complete
TCID-5	Delivery Service	Place order http request to courier marketplace and get delivery service.	Order Successful	Order Successful

#### 4.5 Tools & Technology

##### 1. Client Side:

- HTML5
- CSS3
- Vanilla JavaScript
- Bootstrap4
- JQuery-3.2.1
- Ajax

## **6. Conclusion**

### **6.1 Project summary**

As I mentioned before that, Landen is the first invoicing fintech app in Bangladesh. Landen Technologies promises to keep their features up to date in response to consumer demand. They are also devoted to providing a single point of contact for all financial issues faced by underserved micro, small, and digital enterprises, allowing them to participate in digital financial inclusion.

### **6.2 GitHub Link**

As per my company role I can't not share my GitHub repository link.

### **6.3 Future Scope**

They want to be their customers' one-stop shop for financial solutions, and they want to do so in the most cost-effective and simple way possible. Nonetheless, they are working on a sustainable business that has a beneficial social impact alongside users. They also want to maximize shareholder benefit and create a win-win situation for all of their stakeholders.

[Daffodil International University](#) Internship report of Landen Technology Appointment Letter  
 iv © [Daffodil International University](#) Internship report of Landen Technology 1.  
 Introduction 1.1 Company Overview My company's name is piCredo Software Ltd.  
 Technology and innovation are at the heart of piCredo Software Ltd.'s narrative. They began  
 their journey in January 2020, with the goal of providing the best technology and customer  
 service possible. They have a strong technical team that can provide high-quality services to  
 its customers. The vision at piCredo Software, is to reach across the globe with technological  
 innovation that will have positive impact on people's life. Their mission is to empower people  
 with technology and innovation. 1.2 My Responsibilities My designation for the following  
 organization was software development intern. I started as a Junior Software Engineer last  
 month. I worked as an intern for about four- month. My responsibilities in the internship  
 period were full-stack web development. I developed multiple single-page projects but I  
 developed a full web-based project named landen. An android app is also available in the  
 google play store for the same name. I converted the web version to full of functionality. 1.3  
 Technology I Learned Here are some tools and techniques I learned during my internship  
 period: 1. Firebase Implementation: I implemented google firebase in vanilla JavaScript.  
 Where I use a real-time database that is available for (pay you to use to go) mode. Users  
 authenticate using firebase authentication. They can perform CRUD operations. 2. Bangla  
 Invoice Generation: I learned Bangla invoice generation using canvas drawing in JavaScript.  
 3. Payment Gateway Integration: I learned payment gateway integration. I'm now able to  
 send an HTTP response using the necessary parameters and also can make an API request.  
[1 © Daffodil International University](#) Internship report of Landen Technology 4. Delivery  
 Channel Integration: I learned delivery channel integration. Where I can send HTTP post  
 requests and get the individual cities, Thana, area, etc. And also learned how to track an  
 order. 5. Ecommerce Site Development: Recently I also completed a full e-commerce  
 website using laravel framework. 1.4 Project Overview Landen (www.landen.com.bd) is the  
 first invoicing fintech application in Bangladesh. This Application allows small businesses,  
 such as F-commerce, E-commerce, and micro-merchants, to conveniently keep track of their  
 daily transactions and generate sales invoices. Micro-merchants and F-commerce firms will  
 also be allowed to accept payment via online and deliver their products. 1.5 Project Purpose  
 Small company owners, such as Facebook, e-commerce, and micro merchants, can use this  
 software to simply establish daily business accounts and sales receipts. By using this  
 application, small business owners can easily understand the real picture of their business at  
 a glance. 1.6 Stakeholders ? Users (Micro-merchant Owners). ? Clients. 1.7 Gantt chart Fig

Conclusion 6.1 Project summery As I mentioned before that, landen is the first invoicing fintech app in Bangladesh. Landen Technologies promises to keep their features up to date in response to consumer demand. They are also devoted to providing a single point of contact for all financial issues faced by underserved micro, small, and digital enterprises, allowing them to participate in digital financial inclusion. 6.2 GitHub Link As per my company role I can't not share my GitHub repository link. 6.3 Future Scope They want to be their customers' one-stop shop for financial solutions, and they want to do so in the most cost-effective and simple way possible. Nonetheless, they are working on a sustainable business that has a beneficial social impact alongside users. They also want to maximize shareholder benefit and create a win-win situation for all of their stakeholders. [34 © Daffodil International University](#)
