CHAPTER ONE

INTRODUCTION

1.1 About Internship

The internship is a procedure to get professional experience from a professional institution during the study period. With this mechanism, a student can gather field experience. It is so much essential for any kind of student. Because the Job market has is too much competition nowadays. If any student completes a perfect internship period, he/she can cope up with the job market. After a successful internship period, a student achieved an idea of the real world, which idea helps him/her for the future life.

On the achievement of the Internship I had required to:

- Improve the communication skill
- let us know about the real working environment
- Polish our academic knowledge
- learn about newsroom activities.
- Time management
- Acquire knowledge about making news

1.2 What is an Internship and why Internship is important?

Our field of work is getting bigger day by day. Although the population of Bangladesh and the world has increased, it has not been possible to create skilled manpower. So the competition in the job market has increased.

At present, organizations want skilled workers for themselves. But students accustomed to biblical studies fail to prove themselves when it comes to working.

But an internship is a medium through which a student gets an idea about the professional environment before finishing his studies. As a result, after finishing his studies, he can easily adapt to the new job.

There is no alternative to internships after academic studies. Because at the end of the day in the career we have to understand the fieldwork and give the right output. On work participation in word related fields.

1.3 Duration of my Internship

I join my internship from 17th October to 26th December, 2021 at Somoy Television under **News and Current Affairs Department (NCA)**. I have completed my Internship on 26th December 2021. In my internship period I worked 6 days in a week (except Saturday).

1.4 My Supervisor at Somoy Television

He is also an anchor different talk show. Such like: “Sompadokiyo”. From Dhaka University (DU) she has completed her graduation. In 2007 from “Channel I” he started his journey in the media sector. After that in 2010, he changed his job and was appointed as a staff reporter at Ekushey TV. After this from 10 April 2011 to now he is working in Somoy Television. He is a famous crime reporter in Bangladesh.

CHAPTER FOUR

EVALUATION OF LEARNING

4.1 Difference between Academic & Practical Experience

Academic knowledge and practical knowledge is different. In academic life, we always try to learn only theoretical things. There we haven't enough opportunity to work in the field. In our academic life, we always tried to cover soft news. Our institution didn't allow us to cover soft news. But in professional life, we have to cover all types of news. For that, we can gather more practical knowledge from the field.

During my academic life, I didn't think about time. But in these 10 weeks of internship, I always thought about time. In university, there is a space to delay submitting an assignment. But in practical life, we have to submit an assignment within a short time.

But in academic life, I learned a lot of basics of journalism like ethics of journalism, inverted pyramid structure. These learnings always helped me in my practical life. We all know that there are a lot of graduates who come to the journalism sector from another educational background. But I think, as a student of journalism background I can think in different angel. Because I know the real basics of journalism. So academic knowledge helped me to work in practical life also.

4.2 Outcome of my Internship

I think, my internship period will help me in my future life. Because In this short time, I learned a lot of things from Somoy television, which increases my knowledge. We always talk about productivity. When I worked in Somoy Television, I got a real working environment. A good working environment increases our productivity also. Because there we have to work in that flow.

Learned from my internship:

- Gather a sound knowledge about electronic media
- Time management
- Productivity tools
- Professionalism

4.3 Expectation & Experience

My expectation from Somoy television and experience is so much similar. Because they assigned me many kinds of programs to prove myself. In a short time, I achieved a lot of confidence from there. My supervisor always tried to give me challenge. In that time, I learned how to work in pressure.

4.4 Skills Development in Internship Period

In my internship period I increased my skills in different are. These are:

- Perfect television news format
- Professional video editing policy
- Fast typing
- Presentation quality
- Using digital media for a news

4.5 Opportunity for Future Career

The internship is very essential for any kind of student to gather professional experience. After a successful internship, I think I can work in any media house smoothly. Because Somoy Television gave me that much opportunity to prove myself.

Somoy Television is a 24 hours news-based television house. So we all have to connect with news all the time. In these 10 weeks, there is no leave day of mine. Because there I always thought that if I missed a day, the news will not broadcast. This flow makes me more professional this time.

All the companies always try to recruit an experienced employee. Though he/she can understand the working flow of a channel. Now I gathered that experience to prove myself in any media house. So I think this internship will play a key role in my life.
