Teachers are taking preparation of the topic before entering the classroom and lecture accordingly. 2. At the beginning of the classes, teacher gave the students some idea about topic. So that, student understand the lecture properly. 3. The teachers are patiently listening the problems of students. 4. There is very less opportunity for students to cancelling. This is necessary. Because every student does not have same understanding. 5. The teachers are going the class in time. 6. The school have very good in case of study, exam and it have a nice and comfortable environment to study. Chapter Eight: Recommendations 1. The relationship between teachers and students to be more friendly. 2. The management should be more organized. 3. Teachers and students must concentrate on time management. 4. Different types of newspapers and journals should be distributed among students. So that, they have been encouraged towards reading. 5. In the covid period, many students are lost the interest of study. Teachers should encourage them. 6. There should be a counselling session necessary for students. So that, they express their problems and concentrate on study. 32 Chapter Nine: Conclusion By the grace of Almighty Allah, it was a nice, different, and great experience. I

enjoyed my internship very much. Though I have no previous teaching experience, it was a wonderful experience. I was very nervous besides excited at the very beginning.
