## 1.0 Introduction

Banking sector is expanding its hand in different financial events every day. At the same time the banking process is becoming faster, easier and the banking arena is becoming wider. As the demand for better service increases day by day, they are coming with different innovative ideas & products. In order to survive in the competitive field of the banking sector, all banking organizations are looking for better service opportunities to provide their fellow clients. As a result, it has become essential for every person to have some idea on the bank and banking procedure.

Private sector banks started functioning during the year 1983-84 with the objective of government policy to make sure effective and meaningful participation of the private sector in the overall national economy.

The perception of Islamic banking has been bloomed from the inspiration of building up a society on justice in accordance with basic socio-economic principles of Islam. The difference between Islamic bank and conventional bank is on principles. The functions of this type of bank are completely different.

## Chapter-2

## 2.0 Background of Al-Arafah Islami Bank Ltd.

Al-Arafah Islami Bank Limited has been established and functioning with effect from 27th September 1995 as a scheduled commercial Bank of Bangladesh strictly based on Islamic Shariah principles.

Islamic Banking has been operating in more than 70 countries of the world including Bangladesh through 218 institutions. It has in the meantime established its beneficial approach and efficiency on operation. Islamic Banking system has its inborn inner strength as follows:

- It gives a fixed percentage of investment income to the depositors. Therefore, in order to give better rate of profit its investment portfolio is managed properly so that better investment income can be earned and paid to the depositors.
- The Management cost is to be borne out of a fixed portion of investment income and service charge earned by the bank. Therefore, efficient customer services and better portfolio management are required to be ensured by the management.
- The depositors can calculate their interest income to be earned from conventional banks and thereby make expenditure with consequential inflation which the depositors of Islamic Bank cannot do as they cannot foresee profit income.
- Since Islami Bank invests its fund in different Islamic Modes of Finance particularly in Mudaraba and Musharaka and also accepts deposits on Mudaraba principle, entrepreneurship as well as sense of belongingness to the Bank is developed.
- In buying & Selling modes of financing like Murabaha, Bai-Muajjal, Izara, enduses is ensured strictly as per principles of Islamic Shariah. Thus funds cannot be diverted for other purpose.

Islami Bank attaches importance to human resources development. As such the employees are trained discreetly, in this regard on which the conventional Bank does not give much importance.

Banks have their own unique strategy, which leads to their objectives. Some wishes to grow faster and achieve some long range growth. On the other hand some banks want to lead a quite life minimizing risk and convey an image of a sound bank. AIBL is pretty new in its operation. Even though the financial analysis on the banks performance seems the banks doing very well in the banking industry of Bangladesh, and has prosperous future.

AIBL has established goodwill through innovative products and services. Technology development has opened up a new dimension in the development of creative products, efficient services and customer satisfaction. The bank must cope with this technological advancement its present status.

Though there are some drawbacks in some sectors of Al- Arafah Islami Bank Ltd., still modern banking technology and employee and employer sincerity may lead to increased profit. The progress of AIBL in Bangladesh is depended on the environment, structure, special features offered by the bank, rapid increase of deposit, investment, profit, dividend on behalf of short time, the public respond over the bank.

The aim of the internship program is to gain knowledge of practical banking and to compare this practical knowledge with theoretical knowledge. During the 3month internship program, it is not possible to go to the depth or each activities of division because of time limitation. So, objectives of internship program have not been fulfilled with complete satisfaction. However, highest effort has been given to achieve the objectives of internship program. I think this report may show a guideline to AIBL for its future planning and its successful operation to achieve its goal in the competitive environment.
